LOS ANGELES, CALIFORNIA 90015  
CALIFORNIA ENVIRONMENTAL QUALITY ACT  
**NOTICE OF DETERMINATION**

(Article I – City CEQA Guidelines)

Public Resources Code Section 21152(a) requires local agencies to submit this information to the County Clerk. The filing of this notice starts a 30-day statute of limitations on court challenges to the approval of the project pursuant to Public Resources Code Section 21167.

<b>LEAD CITY AGENCY AND ADDRESS:</b> <b>City of Los Angeles</b> , Department of Public Works, Bureau of Engineering 1149 South Broadway, Suite 600, MS-939, Los Angeles CA 90015-2213	<b>COUNCIL DISTRICT</b> <b>11</b>
---	--------------------------------------

<b>PROJECT TITLE:</b> (Including its common name, if any) <b>ASILOMAR BOULEVARD STABILIZATION</b>	<b>C.F.:</b> 21-0343
--	----------------------

**PROJECT DESCRIPTION AND LOCATION:**  
The Asilomar Boulevard Landslide is an active landslide located on the south-facing slope below the Asilomar Boulevard right-of-way between Almar Avenue and Wynola Street in the Pacific Palisades community of the City of Los Angeles (City). The Project will construct a geo-technically stable roadway across the top of the landslide to prevent further sliding of the block beneath Asilomar Boulevard, between Almar Avenue and Wynola Street. Work within the right-of-way will occur using a specialized drill rig that will mix the existing subsurface material with cement, forming columns up to a depth of approximately 120 feet, which will strengthen the subsurface material and stabilize the slide area beneath the roadway. Following construction, the Project site's physiography will appear similar or virtually identical to the existing conditions, as all of the columns will be installed below the ground surface. The Project will also maintain the natural look of the existing slope, south of Asilomar Boulevard. The Project site is within the California Coastal Zone, under the dual jurisdiction of both the California Coastal Commission, and the City Engineer.
