To: Office of Planning and Research
State Clearinghouse
P.O. Box 3044, 1400 Tenth Street, Room 212
Sacramento, CA 95812-3044

From: Department of Toxic Substances Control
Permitting Division
8800 Cal Center Drive
Sacramento, CA 95826

Subject: Filing of Notice of Determination in Compliance with Section 21108 of the Public Resources Code

Project Title: World Oil Environmental Services - Chico II (f.k.a. Chico Drain Oil & Asbury Environmental Services)
Hazardous Waste Facility Standardized Permit Renewal

State Clearinghouse Number: 1997082088 &1998109248

Project Location: 1618 West 5th St, Chico, CA 95928

County: Butte County

Project Applicant: World Oil Environmental Services- Chico II

Project Description: The California Department of Toxic Substances Control (DTSC) adopted an Addendum to the previous Initial Study/Negative Declaration (IS/ND) and approved the Hazardous Waste Facility Standardized Permit to continue operating a Hazardous Waste Treatment and Storage Facility for non-RCRA hazardous waste, pursuant to authority granted under California Health and Safety Code Chapter 6.5 and California Code of Regulations, Title 22, Division 4.5, Chapter 20.

World Oil Environmental Services - Chico II, LLC (WOES-Chico II) operational activities consist of receiving used oil and antifreeze from offsite generators (e.g. gas stations, oil changers, auto repair shops) and consolidating the non-RCRA hazardous waste (i.e. used oil and antifreeze) received. Facility operations consist of collecting used oil and antifreeze from offsite generators and consolidating the used oil and antifreeze into two existing 10,000-gallon and one 8,500-gallon horizontal storage tanks respectively (Unit #1). Used oil and antifreeze is stored in tanks and drums before it is shipped to a hazardous waste treatment, recycling, or disposal facility. Solid waste contaminated with oil is generated as the used oil is pumped into the tanks through a filter. The solids collected on the filter are placed into one 55-gallon secondary containment of the tank storage area (Unit #2). The oily solids drums are then sent to a hazardous waste treatment or disposal facility. The facility also receives waste antifreeze and oily water from offsite generators. Waste antifreeze and oily water are transferred into larger tanker trucks in the Loading/ Unloading Area (Unit #3).

As Lead Agency under the California Environmental Quality Act (CEQA), DTSC approved the above-described project on January 20, 2022, and has made the following determinations:

1. The project will not have a significant effect on the environment.
2. A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were not made a condition of project approval by DTSC.
4. A Statement of Overriding Considerations was not adopted for this project by DTSC.
5. Findings were not made pursuant to the provisions of CEQA by DTSC.

The administrative record for this project is available to the public by appointment at the following location:
