

CALIFORNIA ENVIRONMENTAL QUALITY ACT
NOTICE OF DETERMINATION

To: Office of Planning and Research
State Clearinghouse
P.O. Box 3044, 1400 Tenth Street, Room 212
Sacramento, CA 95812-3044

From: Department of Toxic Substances Control
Permitting Division
8800 Cal Center Drive
Sacramento, CA 95826

Subject: Filing of Notice of Determination in Compliance with § 21108 of the Public Resources Code

Project Title: Pacific Resource Recovery Services Hazardous Waste Facility Permit Renewal

State Clearinghouse Number: 1993041058

Project Location: 3150 East Pico Blvd, Los Angeles, CA 90023.

County: Los Angeles

Project Applicant: Pacific Resources Recovery Services

Project Description: The California Department of Toxic Substances Control (DTSC), approves the Hazardous Waste Facility Permit Renewal (Permit) for the Pacific Resource Recovery Services (PRRS) Hazardous Waste Facility located at 3150 E Pico Blvd, Los Angeles, CA 90023, for ten additional years. DTSC prepared an addendum to a previously adopted Initial Study/Negative Declaration (IS/ND) due to updates to the CEQA Guidelines, and as a result of the addition of two new units to the permit. The Permit Renewal is required to continue operating a Resource Conservation and Recovery Act (RCRA) equivalent Hazardous Waste Treatment, and Storage Facility for hazardous waste.

PRRS provides waste management services to a variety of industries that generate waste chemicals, many of which are typically used in the paint and coating industry. These waste streams often are generated from general surface preparation, clean-up, and equipment maintenance activities, as well as from paint application and clean-up activities. These types of chemicals are found in a multitude of industries, from paint manufacturing, automotive refinishing, and paint application to non-paint processes such as medical applications, inks, and metal plating. In addition, PRRS handles a variety of other hazardous wastes, including oil and petroleum-contaminated wastes.

The facility is proposing the addition of a new container storage unit, to be called the North Warehouse. The unit will be approximately 25,000 square feet and have a capacity of 145,640 gallons. The facility will be retrofitting the existing northern warehouse in order to make it a containerized hazardous waste management unit. This will entail the construction of approximately

650 to 750 lineal feet of concrete containment walls and roll berms, and application of chemical-resistant coating to existing concrete floor and new containment walls. All additional activities will continue to be consistent with the Hazardous Waste Permit and would result in minor physical changes. There are no ground disturbing activities proposed within the Permit Renewal, minor construction will take place within the existing warehouse and there are no proposed ground disturbing activities.

As Lead Agency under the California Environmental Quality Act (CEQA), DTSC approved the above-described project on September 26, 2024, and has made the following determinations:

1. The project will not have a significant effect on the environment.
2. A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were not made a condition of project approval by DTSC.
4. A mitigation reporting or monitoring plan was not adopted for this project by DTSC.
5. A Statement of Overriding Considerations was not adopted for this project by DTSC.
6. Findings were made pursuant to the provisions of CEQA by DTSC.

The administrative record for this project is available to the public by appointment at the following location:

Department of Toxic Substances Control
Permitting Division
