

How to Use the Response to Comments CD

Volume II of the CD contains copies of all the comment letters received on the Public Draft SEIR by the June 4, 2019 close of the comment period for the ExxonMobil Interim Trucking for Santa Ynez Unit (SYU) Phased Restart Project.

Given the overall volume and size of the comments, the comment letters and responses are only available in electronic format. The Response to Comments Volume (Volume II on the CD) has six files that contain the comment letters and associated responses. These six files include the following:

1. Governmental Agency Comment Letters and Responses;
2. Applicant Comment Letters and Responses;
3. Organizations Comment Letters and Responses;
4. General Public Comment Letters and Responses;
5. Form Letters Comment Letters and Responses; and
6. Response to Draft SEIR Public Meeting Comments.

Each of these files contains all of the applicable comment letters and associated responses. Each file has a table of contents that provides the page numbers for each commentators letter(s) and their associated responses. The pdf files also have bookmarks that can be used to navigate the file. If multiple letters were submitted by the same commenter, all the comments were combined into a single group. In each of the files the comment letters are listed in alphabetical order. For the general public, the listing is by last name.

During the public meeting on the Draft SEIR, several written letters were submitted. These letters have been numbered and included in the applicable responses for that individual or agency. The Response to Draft SEIR Public Meeting Comments file provides response to the issues raised as part of public comment.

The comment letters from Adams Broadwell Joseph & Cardozo and Non-Governmental Organizations-Center for Biological Diversity contained a large number of reference documents that are cited in their comments. Copies of these reference documents have not been included with the response to comments but are available from Santa Barbara County upon request.

All the comment letters, except for the form letters, have been numbered and given written responses. While each of the form letters has not been numbered, responses have been provided to each of the three groups of form letters. An alpha-numeric code was assigned to each commenter (except for form letter commenters) to provide the reader with an easy indicator of which comment is being responded to for each letter. For example, in the letter from Santa Barbara County Air Pollution Control District (SBCAPCD), the first comment is APCD-1. The identification code appears in the right margin of the comment letter. Each letter, or group of multiple letters from a single commenter, is directly followed by the responses for that letter, and each of the responses is identified with the corresponding code (e.g., the first SBCAPCD response is labeled APCD-1).

The table below provides an alphabetical list of the governmental agencies, Applicant, organizations, and general public, that commented on the Draft SEIR. To find a specific comment letter, (1) open the applicable file on the CD and (2) navigate to the desired comment letter.

List of Governmental Agencies, Applicant, Organizations, and General Public Commenting on the Draft SEIR

Name	Code
Governmental Agencies	
Caltrans	CLTR
City of Santa Barbara	CSB
Santa Barbara County Air Pollution Control District	APCD
