Project Description: (please use a separate page if necessary)

The project would address building-wide deficiencies, including: fire/life safety improvements; hazardous materials removal; repairs and water intrusion prevention detailing of exterior facades and their components; updates and repairs for disabled accessibility compliance; applicable reinstatement of energy systems and enhancements; addition of high-tech HVAC and lighting controls; addition of security systems and procedures controlling movement within the building and between spaces; security officer station, physical barriers at west entrance; and improvement of interior spaces by replacement of finishes, etc. that are at the end of their useful life. Due to the building's historic designation, the renovations would be designed to address the building's historic character. The project goal is to achieve Zero Net Energy and LEED Silver certification.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
