Section, Twp., Range: T14N, R1E, Sections 25, 26, 35, 36, and T14N, R2E, Section 30

Project Description: The California Department of Water Resources (DWR) Division of Flood Management proposes to construct, operate and maintain the Tisdale Weir Rehabilitation and Fish Passage Project (Proposed Project) which would integrate structural rehabilitation of the Tisdale Weir along with installation of fish passage facilities to reduce fish standing at the weir by improving fish passage through the weir to the Sacramento River.

Structural rehabilitation to the Tisdale Weir would include replacing southern and northern abutment walls; removing and replacing energy dissipation basin; and injection grouting and patching the weir. Fish passage facility installation would include reconstructing the energy dissipation basin on the downstream side of the weir to facilitate fish collection and passage through a notch in the weir; installing a notch in the existing weir, installing an operable gate (for flow regulation) in the notch, installing an equipment access pad and attendant facilities at the north end of the weir; an access ramp; and constructing a channel connecting the notch in the weir to the Sacramento River.
