Project Title: Fremont Hillside Stabilization Phase 2		
Project Applicant: California Polytechnic State University, San Luis Obispo		
Project Location - Specific: The hillside immediately east of Fremont Hall (Building 109) and the K-1 Parking Lot		
Project Location—City:	Project Location—County: San Luis Obispo	
Description of Nature, Purpose and Beneficiaries of Project: During the winter of 2017, landslide debris on this hillside became unstable, and Fremont Hall had to be vacated. Following a winterization project in 2018, consulting engineers and geologists determined that there was still a potential for debris flows to impact Fremont Hall and other nearby structures. The current project consists of a subsurface investigation to further characterize the current geologic conditions and landslide hazard risks of the hillside. This will include both deep core borings and down-hole logging of large diameter bucket auger borings.
