SUBJECT: Filing of Notice of Determination in compliance with Section 21108 or 21152 of the Public Resources Code.

State Clearinghouse Number (if submitted to State Clearinghouse): 2019059120

Project Title: High Desert Solar Project

Project Applicant: HDSI, LLC

Project Location (include county): Victorville, San Bernardino County

Project Description:

See attachment.

This is to advise that the City of Victorville has approved the above
(Lead Agency or Responsible Agency)

described project on July 10, 2019 and has made the following determinations regarding the above
(date)
described project.

1. The project [will will not] have a significant effect on the environment.
2. An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
 A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures [were were not] made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan [was was not] adopted for this project.
5. A statement of Overriding Considerations [was was not] adopted for this project.
6. Findings [were were not] made pursuant to the provisions of CEQA.

This is to certify that the final EIR with comments and responses and record of project approval, or the negative Declaration, is available to the General Public at:

<https://www.victorvilleca.gov/government/city-departments/development/planning/environmental-review-notice>

COUNTY OF SAN BERNARDINO
CALIFORNIA

High Desert Solar Notice of Determination Attachment

Project Description:

The High Desert Solar Project (HDSP or Proposed Project) would be a nominal 108-megawatt (MWac) solar photovoltaic (PV) power facility and related substation with an integrated battery energy storage system (BESS), located in the City of Victorville, San Bernardino County, California. The HDSP would provide renewable energy and critically needed flexibility attributes needed to advance California's Renewable Portfolio Standard (RPS) goals, climate policies, and to enhance electrical grid reliability.

The Proposed Project would be developed on a total of approximately 624 acres (project site) consisting of an approximately 581-acre solar PV field, BESS, substation, and balance of system, collectively referred to as the **Solar Field Area**, and an approximately 35-acre corridor consisting of a 2.3-mile 230-kilovolt (kV) Gen-Tie line that would run east and then south in a defined and studied corridor to connect to the existing Victor-Caldwell 230kV line, upstream of the first pole on the Southern California Edison system. Additionally, a 1.7-mile 12.47kV Service Line would connect to the Victorville Municipal Utility Services (VMUS) system. This line would run as underbuilt with the 230kV line for the first mile and then diverge to the west and run on standard distribution utility poles to connect to the VMUS system near the Victorville Industrial Wastewater Treatment Facility southwest of the Solar Field Area. The Gen-Tie line and Service Line are collectively referred to as the **Interconnection Facilities**. The Interconnection Facilities would be located within linear corridors, 120 feet and 40 feet wide respectively, covering a total area of approximately 35 acres of which only a small portion would actually be disturbed. An approximately 8-acre **Gen-Tie Laydown Area** would be located on a vacant parcel of land adjacent and to the west and north of the existing High Desert Power Plant.
