Notice of Determination – Project Description

Parkwood CMD 19A&B Water System Improvements

September 3, 2019

The Parkwood CMD (County Maintenance District) 19 A&B Parkwood Water System (Proposed Project) proposes to construct and operate one municipal production well to supplement existing supplies in the northern portion of its service area, within Madera County. The project site consists of one existing offline well and its associated features.

This project would involve construction of above grade and below grade infrastructure improvements designed to bring online a new production well to replace an existing, offline well on the same parcel. The final product will be a groundwater well capable of producing approximately 1,000 gallons per minute (gpm) to meet all drinking water quality requirements. Additionally, new pipeline improvements would be constructed in needed areas identified by a 2016 infrastructure study, and new water meters would be installed on each service connection to meet the upcoming compliance deadline in 2020. The projected schedule is to construct the production well in Fall of 2019, with overall project completion in Fall of 2020.
