**COUNTY OF LAKE
NOTICE OF INTENT
TO ADOPT A MITIGATED NEGATIVE DECLARATION**

Project Title: Cooper Creek Bridge Replacement at Witter Springs Road

**Project Location: Witter Springs Road at Cooper Creek;
Adjacent to APNs 003-011-03, 05, 06**

Project Description: The Lake County Public Works Department proposes to replace the functionally obsolete temporary Bailey Bridge that was installed in 2001 on Witter Springs Road over Cooper Creek with a single-span cast-in-place reinforced concrete slab bridge at the same location as the existing bridge. It is anticipated that excavators, dozers, cranes, dump trucks, concrete trucks, concrete pumps, pile driving hammers, and pile driving equipment may be required to construct the new bridge. Construction is anticipated to be completed within one construction season. Erosion control best management practices (BMPs) will be implemented to keep sediment from leaving the site. Mitigation measures and conditions of approval would ensure that any potential effects are reduced to a less than significant level.

The public review period for the respective proposed Mitigated Negative Declaration based on the Initial Study will begin on July 1, 2019 and end on August 1, 2019. You are encouraged to submit written comments regarding the proposed Mitigated Negative Declaration. You may do so by submitting written comments to the Planning Division prior to the end of the review period. Copies of the application, environmental documents, and all reference documents associated with the project are available for review through the **Community Development Department, Planning Division; telephone (707) 263-2221.** Written comments may be submitted to the Planning Division or via email at peggy.barthel@lakecountyca.gov.
