

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Caples Lake and Silver Lake East Campground Improvements Project

Lead Agency: El Dorado Irrigation District

Contact Name: Doug Venable

Email: dvenable@eid.org

Phone Number: (530) 642-4187

Project Location: Kirkwood

*City*

Alpine, Amador, & El Dorado

*County*

Project Description (Proposed actions, location, and/or consequences).

The El Dorado Irrigation District proposes to make improvements to camping units, infrastructure, restrooms, and other facilities to meet the most current U.S. Forest Service design and accessibility standards of the Architectural Barriers Act, at the Caples Lake and Silver Lake East campgrounds. The improvements are a requirement of the Federal Energy Regulatory Commission license to operate Project No. 184. The project includes: 1) resurfacing and expanding campground roadways and parking spurs; 2) replacing, expanding, and relocating camping units; 3) replacing the potable water systems; 4) replacing restrooms and other facilities; and 5) abandoning and/or removing existing camping units, pipelines, and other facilities.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially Significant Effects: biological, Tribal and cultural resources, geology and soils, hazards and hazardous materials, and hydrology and water quality.

Mitigation Measures:

Biological Resources-

Conduct environmental awareness training before project activities begin. Conduct pre-construction amphibian survey and install high-visibility fencing to protect resource areas; tightly woven fiber netting, plastic mono-filament netting, or similar material shall not be used.

Cultural Resources and Tribal Cultural Resources-

1) a. monitor for potential prehistoric archaeological resources during initial ground disturbing activities, b. prepare a worker awareness brochure, c. invite tribal representatives to review the worker awareness brochure, and d. conduct training of personnel involved in project implementation.

2) Create a 15-foot buffer area around adjacent identified resource location.

3) Reduce or avoid impacts related to undiscovered burials in accordance with the California Health and Safety Code 7050.5[b].

Geology and Soils, Hazards and Hazardous Materials, and Hydrology and Water Quality-

Prepare and implement the appropriate Stormwater Pollution Prevention Plan (SWPPP), or Stormwater Management Plan (SWMP), to prevent and control pollution and to minimize and control runoff and erosion.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.
