This is to advise that the Monte Vista Water District, acting as the lead agency, has prepared an Initial Study to determine if the project may have a significant effect on the environment and is proposing to adopt a Mitigated Negative Declaration based on the following finding:

- The Initial Study shows that there is no substantial evidence that the project may have a significant effect on the environment.
- The Initial Study identified potentially significant effects but:
- (1) Revisions in the project plans or proposal made or agreed to by the applicant before this proposed Negative Declaration was released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur; and,
  - (2) There is no substantial evidence before the agency that the project as revised may have a significant effect on the environment.
