Project Description (Proposed actions, location, and/or consequences).

The project proposes to increase the diversion capacity at Lift #3 from 50 cfs to 100 cfs. The goal of the proposed project is to double the capacity of these Lift Pump structures by installing new pumps and culverts. The Proposed Project includes demolishing and removing the existing structures and replacing them with structures that are able to handle the increased capacity. This will eliminate the bottleneck in the water distribution system. The proposed project is located approximately 2.5-miles south of the community of Tranquillity and three miles west of the community of San Joaquin in western Fresno County, California. The proposed five-acre work area is centered on the Slough Canal near the intersection of West Parlier Avenue and South Sonoma Avenue.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.
