

# Sample Summary for Electronic Document Submittal

15 copies of this document may be included when a Lead Agency is submitting electronic copies of environmental impact reports, negative declarations, mitigated negative declarations, or notices of preparation to the SCH. The SCH will still accept other summaries, such as an EIR summary prepared pursuant to CEQA Guidelines Section 15123, attached to the electronic copies of the document.

Lead Agency: Town of Truckee

Project Title: Church Street Extension/Trout Creek Restoration

Project Location: Truckee Nevada  
*City* *County*

Please provide a Project Description (Proposed Actions, location, and/or consequences).

For this project, the Town is proposing two components: the Church Street Extension component and the Trout Creek Restoration component. The Church Street Extension component will extend Church Street to Glenshire Drive, including a new crossing of Trout Creek. The crossing over Trout Creek will consist of a precast concrete arch bridge with a natural streambed bottom. The Trout Creek Restoration component will restore Reaches 4 and 5 of Trout Creek through the project area. This project component will restore Trout Creek from the western side of the balloon track (in the Railyard Master Plan area) downstream to the UPRR right-of-way.

Please identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The proposed project has the potential for impacts related to biological resources, cultural resources, and noise. However, these impacts would be avoided or reduced to a less-than-significant level with the incorporation of avoidance and mitigation measures discussed in each section. These mitigation measures include: Perform Pre-Construction Surveys for Nesting Raptors and Migratory Birds, Perform Pre-Construction Surveys for Special-Status Plants, Preparation of a Wetland and Riparian Mitigation Plan, Perform a Fish Rescue prior to start of construction, Prepare a Dewatering Plan, Halt work and report if Inadvertent Discovery of Archaeological Resources or Tribal Cultural Resources or Inadvertent Discovery of Human Remains, and the construction contractor must Comply with Town of Truckee Noise Standards.

If applicable, please describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
