

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Sherwood Park Master Plan Update

Lead Agency: City of Paso Robles

Contact Name: Darcy Delgado

Email: ddelgado@prcity.com Phone Number: (805) 237-3970

Project Location: Paso Robles San Luis Obispo
City *County*

Project Description (Proposed actions, location, and/or consequences).

The City of Paso Robles is proposing to design and install improvements at two adjacent City parks: Sherwood Park and Oak Creek Park (collectively known as Sherwood Park). The improvements would implement the 2019 Sherwood Park Area Master Plan, which was adopted by the City Council in February 2019. Park improvements would be completed in two phases, and at completion would include a new playground area, a new skate park, a new splash pad, new community event and amphitheater areas, new parking areas, new restrooms, renovated lighted sports fields (baseball, soccer, tennis), new lighted sports fields (pickle-ball, basketball, youth court), perimeter sidewalks, and walking trails. Other improvements would include monument signs, picnic tables, and a new two-story concession/restroom building. Both phases of the proposed project would include installation of non-invasive, drought-tolerant native plants, including 20 new trees. Lawn areas would be limited to recreation fields and the public gathering area. An irrigation system would be installed that would include a rain sensor, electronic timing controllers, and flow sensors. Pervious surfaces would be incorporated into the trails and parking lots to help reduce stormwater runoff and retain groundwater.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Installation of new lighted facilities, including parking lot and pathway lighting, could result in potential impacts to nearby residential uses. Implementation of a Lighting Pollution Prevention Plan would reduce these impacts to less than significant. (AES-1)

Construction of the project would result in potentially significant air quality impacts related to exceedances of the SLO APCD's PM10, DPM, and ROG + NOx emission thresholds. Implementation of APCD standard mitigation measures would reduce this impact to less than significant. (AQ-1, AQ-2, and AQ-3)

Construction activities and tree removal could result in potentially significant impacts to nesting birds and raptors protected under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act. Implementation of mitigation requiring a pre-construction nesting bird survey would reduce this impact to less than significant. (BIO-1)

Construction of the project could result in inadvertent archaeological resource discovery. Implementation of Mitigation Measure CR-1 would reduce this impact to less than significant. (CR-1)

Construction of the project could result in short-term noise impacts to nearby sensitive land uses (residences, senior center). Implementation of Noise Reduction Best Management Practices would reduce this impact to less than significant. (NS-1)

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known controversy.

Provide a list of the responsible or trustee agencies for the project.

California Air Resources Board
California Department of Fish and Wildlife (Region #5)
Native American Heritage Commission
California Department of Parks and Recreation (the project is seeking partial funding from the California State Parks
Statewide Park Development and Community Revitalization Program grant)
Regional Water Quality Control Board (Region #3)
State Water Resources Control Board
