STATE CLEARINGHOUSE

MITIGATED NEGATIVE DECLARATION FOR CROSS CREEK BEND SUBDIVISION
(TSM 19-003 AND PZV 19-018) – DATED OCTOBER 2019
(STATE CLEARINGHOUSE NUMBER: 2019109078)

Dear Mr. Guerra:

The Department of Toxic Substances Control (DTSC) received an Initial Study and Mitigated Negative Declaration (MND) for Cross Creek Bend Subdivision (TSM 19-003 and PZV 19-018).

The proposed project is the development of 405 single-family residences on APN 073-060-032 at the southwest corner of Avenue 308 and Road 64 within the Goshen Community Plan Urban Development Boundary area. The 69.13-acre site will have a density of 6.27 units per acre constructed on 64.5 acres and the remaining acreage will be utilized as open space in the form of a stormwater detention basin and roadways.

DTSC recommends that the following issues be evaluated in the MND, Hazards and Hazardous Materials section:

1. The forthcoming MND should acknowledge the potential for project site activities to have resulted in the release of hazardous wastes/substances. In instances in which releases have occurred, further studies should be carried out to delineate the nature and extent of the contamination, and the potential threat to public health and/or the environment should be evaluated. The MND should also identify the mechanism(s) to initiate any required investigation and/or remediation and the government agency who will be responsible for providing appropriate regulatory oversight.

2. If buildings or other structures are to be demolished on any project sites included in the proposed project, surveys should be conducted for the presence of lead-based paints or products, mercury, asbestos containing materials, and polychlorinated biphenyl caulk. Removal, demolition and disposal of any of the above-mentioned chemicals should be conducted in compliance with California environmental regulations and policies. In addition, sampling near current and/or former buildings should be conducted in accordance with DTSC's 2006 *Interim Guidance Evaluation of School Sites with Potential Contamination from Lead Based Paint, Termiticides, and Electrical Transformers* (https://dtsc.ca.gov/wpcontent/uploads/sites/31/2018/09/Guidance_Lead_Contamination_050118.pdf).
3. If any projects initiated as part of the proposed project require the importation of soil to backfill any excavated areas, proper sampling should be conducted to ensure that the imported soil is free of contamination. DTSC recommends the imported materials be characterized according to *DTSC's 2001 Information Advisory Clean Imported Fill Material* (https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/SMP_FS_Cleanfill-Schools.pdf).
4. If any sites included as part of the proposed project have been used for agricultural, weed abatement or related activities, proper investigation for organochlorinated pesticides should be discussed in the MND. DTSC recommends the current and former agricultural lands be evaluated in accordance with DTSC's 2008 *Interim Guidance for Sampling Agricultural Properties (Third Revision)* (<https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/Ag-Guidance-Rev-3-August-7-2008-2.pdf>).

DTSC appreciates the opportunity to review the MND. Should you need any assistance with an environmental investigation, please submit a request for Lead Agency Oversight Application, which can be found at: https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/VCP_App-1460.doc. Additional information regarding voluntary agreements with DTSC can be found at: <https://dtsc.ca.gov/brownfields/>.

Mr. Hector Guerra
