

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Crittenden Lane Trailhead Improvement Project

Lead Agency: City of Mountain View Public Works Department

Contact Name: Arlynn Bumanglag

Email: arlynnbumanglag@mountainview.gov Phone Number: (510) 285-6708

Project Location: Mountain View, Santa Clara County

City

County

Project Description (Proposed actions, location, and/or consequences).

The Project would replace the existing Crittenden Lane Trailhead with a 280-foot-long, 12-foot-wide trailhead featuring 2-foot-wide shoulders, driveway improvements at the Crittenden Lane cul-de-sac, signage and striping improvements, and ADA-compliant gradients supported by a combination of retaining walls and fill slopes. Portions of the new trailhead facility would be relocated just north of the existing trailhead. However, the new trailhead would intersect Stevens Creek Trail at the same location as the existing trailhead. The Project does not propose new lighting features. The northern, southern, and western portion of the trailhead alignment would be supported by retaining walls. The eastern portion of the trailhead alignment would be supported by approximately 4,800 square feet of graded full material to match the levee elevation at the Stevens Creek Trail intersection. The Project footprint is approximately 12,000 square feet.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

An analysis of the project determined that potentially significant environmental effects could occur to the following environmental categories: Air Quality, Biological Resources, Cultural Resources, Geology, Soils and Seismicity, Hazards and Hazardous Materials, Tribal Cultural Resources, and Mandatory Findings of Significance. Adherence to the following mitigation measures would ensure that potential impacts to the environment are reduced to a less-than-significant level. Refer to the full Initial Study for details on each mitigation measure.

1. Mitigation Measure AQ-1
2. Mitigation Measure BIO-1 through BIO-5
3. Mitigation Measure CUL-1 and CUL-2
4. Mitigation Measure GEO-1 and GEO-2
5. Mitigation Measure HAZ-1

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.

California Department of Fish and Wildlife
San Francisco Bay Conservation and Development Commission
Santa Clara Valley Water District
