RE: AB 52 Consultation, Central Coast Blue Project, City of Pismo Beach, San Luis Obispo County, California

Dear Chief Vigil:

The City of Pismo Beach is preparing an Environmental Impact Report for the proposed Central Coast Blue (CCB) Project. The CCB Project is a regional advanced purified water project intended to enhance supply reliability by reducing the Santa Maria Groundwater Basin's (SMGB) vulnerability to drought and seawater intrusion. The CCB Project includes construction of an advanced treatment facility, an advanced purified water storage tank, an equalization basin, a pump station, distribution pipelines, injection wells, monitoring wells, and one new production well. Water for the project would be sourced from two of the region's wastewater treatment facilities, the Pismo Beach and the South San Luis Obispo County Sanitation District (SSLOCS D) Wastewater Treatment Plants (WWTPs). The project would involve injection of advanced purified water into the SMGB via a series of seven injection wells to develop a seawater intrusion barrier. At this time, only the locations of the injection wells are known. Five injection wells would be installed at the Coastal Dunes RV Park and Campground in Oceano/Grover Beach, and two injection wells would be installed at the SSLOCS D WWTP in Oceano. The remaining project components would be constructed at yet to be determined locations in Grover Beach, Oceano, and the agricultural lands south of Oceano. The EIR will include a project-level analysis of the injection wells and a programmatic-level analysis for all other project components with locations that are yet to be determined. The proposed project is subject to the California Environmental Quality Act (CEQA).

The proposed project must comply with California Public Resources Code § 21080.3.1 (Assembly Bill [AB] 52 of 2014), which requires local governments to conduct meaningful consultation with California Native American tribes that have requested to be notified by lead agencies of proposed projects in the geographic area with which the tribe is traditionally and culturally affiliated.

The input of the San Luis Obispo County Chumash Council is important to the City's planning process. Under AB 52, you have 30 days from receipt of this letter to respond in writing if you wish you consult on the proposed project. If you require any additional information or have any questions, please contact me at 805-773-7044 or via e-mail at mdowning@pismo beach.org. Thank you for your assistance.

Sincerely,

A handwritten signature in black ink, appearing to read "Matthew Downing".

RE: Supplemental AB 52 Consultation, Central Coast Blue Project, City of Pismo Beach, San Luis Obispo County, California

Dear Chief Vigil:

The City of Pismo Beach is sending this supplemental AB 52 consultation letter regarding the Environmental Impact Report for the Central Coast Blue (CCB) Project to notify you about the determination of locations for the proposed Advanced Treatment Facility (ATF) complex, distribution pipelines, and monitoring wells, which were previously unknown. This letter is a follow-up to the consultation letter dated January 23, 2020. As stated therein, the CCB Project is a regional advanced purified water project intended to enhance supply reliability by reducing the Santa Maria Groundwater Basin's (SMGB) vulnerability to drought and seawater intrusion. The CCB Project includes construction of an advanced treatment facility, an advanced purified water storage tank, an equalization basin, a pump station, distribution pipelines, injection wells, monitoring wells, and one new production well. Water for the project would be sourced from two of the region's wastewater treatment facilities, the Pismo Beach and the South San Luis Obispo County Sanitation District (SSLOCS) Wastewater Treatment Plants (WWTPs). The project would involve injection of advanced purified water into the SMGB via a series of seven injection wells to develop a seawater intrusion barrier. Table 2-1 presents the known locations of project components. At this time, locations have been determined for all project components except the new production well and potential distribution pipelines that would be utilized for irrigation of agricultural lands south of Oceano. These components would be located in Grover Beach and/or Oceano. The EIR will include a project-level analysis of project components with known locations and a programmatic-level analysis for all other project components with locations that are yet to be determined. The proposed project is subject to the California Environmental Quality Act (CEQA).

Table 2-1 Known Locations of Project Components

Project Component	APN	Address/Description	Existing Use
ATF Complex and MW-3D/3E	060-543-016	980 Huber Street (between Huber Street and Barca Street approximately 120 feet north of Calvin Court), Grover Beach ¹	An approximately 1.5-acre parcel that contains several unpaved storage yards separated with chain link fencing that are used for the storage of automobiles, trucks, recreational vehicles, storage containers, boats,

RE: Supplemental AB 52 Consultation, Central Coast Blue Project, City of Pismo Beach, San Luis Obispo County, California

Dear Mr. Collins:

The City of Pismo Beach is sending this supplemental AB 52 consultation letter regarding the Environmental Impact Report for the Central Coast Blue (CCB) Project to notify you about the determination of locations for the proposed Advanced Treatment Facility (ATF) complex, distribution pipelines, and monitoring wells, which were previously unknown. This letter is a follow-up to the consultation letter dated January 23, 2020. As stated therein, the CCB Project is a regional advanced purified water project intended to enhance supply reliability by reducing the Santa Maria Groundwater Basin's (SMGB) vulnerability to drought and seawater intrusion. The CCB Project includes construction of an advanced treatment facility, an advanced purified water storage tank, an equalization basin, a pump station, distribution pipelines, injection wells, monitoring wells, and one new production well. Water for the project would be sourced from two of the region's wastewater treatment facilities, the Pismo Beach and the South San Luis Obispo County Sanitation District (SSLOCS) Wastewater Treatment Plants (WWTPs). The project would involve injection of advanced purified water into the SMGB via a series of seven injection wells to develop a seawater intrusion barrier. Table 2-1 presents the known locations of project components. At this time, locations have been determined for all project components except the new production well and potential distribution pipelines that would be utilized for irrigation of agricultural lands south of Oceano. These components would be located in Grover Beach and/or Oceano. The EIR will include a project-level analysis of project components with known locations and a programmatic-level analysis for all other project components with locations that are yet to be determined. The proposed project is subject to the California Environmental Quality Act (CEQA).

RE: Supplemental AB 52 Consultation, Central Coast Blue Project, City of Pismo Beach, San Luis Obispo County, California

Dear Chairperson Altamirano:

The City of Pismo Beach is sending this supplemental AB 52 consultation letter regarding the Environmental Impact Report for the Central Coast Blue (CCB) Project to notify you about the determination of locations for the proposed Advanced Treatment Facility (ATF) complex, distribution pipelines, and monitoring wells, which were previously unknown. This letter is a follow-up to the consultation letter dated January 23, 2020. As stated therein, the CCB Project is a regional advanced purified water project intended to enhance supply reliability by reducing the Santa Maria Groundwater Basin’s (SMGB) vulnerability to drought and seawater intrusion. The CCB Project includes construction of an advanced treatment facility, an advanced purified water storage tank, an equalization basin, a pump station, distribution pipelines, injection wells, monitoring wells, and one new production well. Water for the project would be sourced from two of the region’s wastewater treatment facilities, the Pismo Beach and the South San Luis Obispo County Sanitation District (SSLOCS) Wastewater Treatment Plants (WWTPs). The project would involve injection of advanced purified water into the SMGB via a series of seven injection wells to develop a seawater intrusion barrier. Table 2-1 presents the known locations of project components. At this time, locations have been determined for all project components except the new production well and potential distribution pipelines that would be utilized for irrigation of agricultural lands south of Oceano. These components would be located in Grover Beach and/or Oceano. The EIR will include a project-level analysis of project components with known locations and a programmatic-level analysis for all other project components with locations that are yet to be determined. The proposed project is subject to the California Environmental Quality Act (CEQA).

Table 2-7 Known Locations of Project Components

Project Component	APN	Address/Description	Existing Use
ATF Complex and MW-3D/3E	060-543-016	980 Huber Street (between Huber Street and Barca Street approximately 120 feet north of Calvin Court), Grover Beach ¹	An approximately 1.5-acre parcel that contains several unpaved storage yards separated with chain link fencing that are used for the storage of automobiles, trucks, recreational vehicles, storage containers, boats,

¹ A sign on one of the gates that provides access to this parcel identifies the site address as 980 Huber Street.

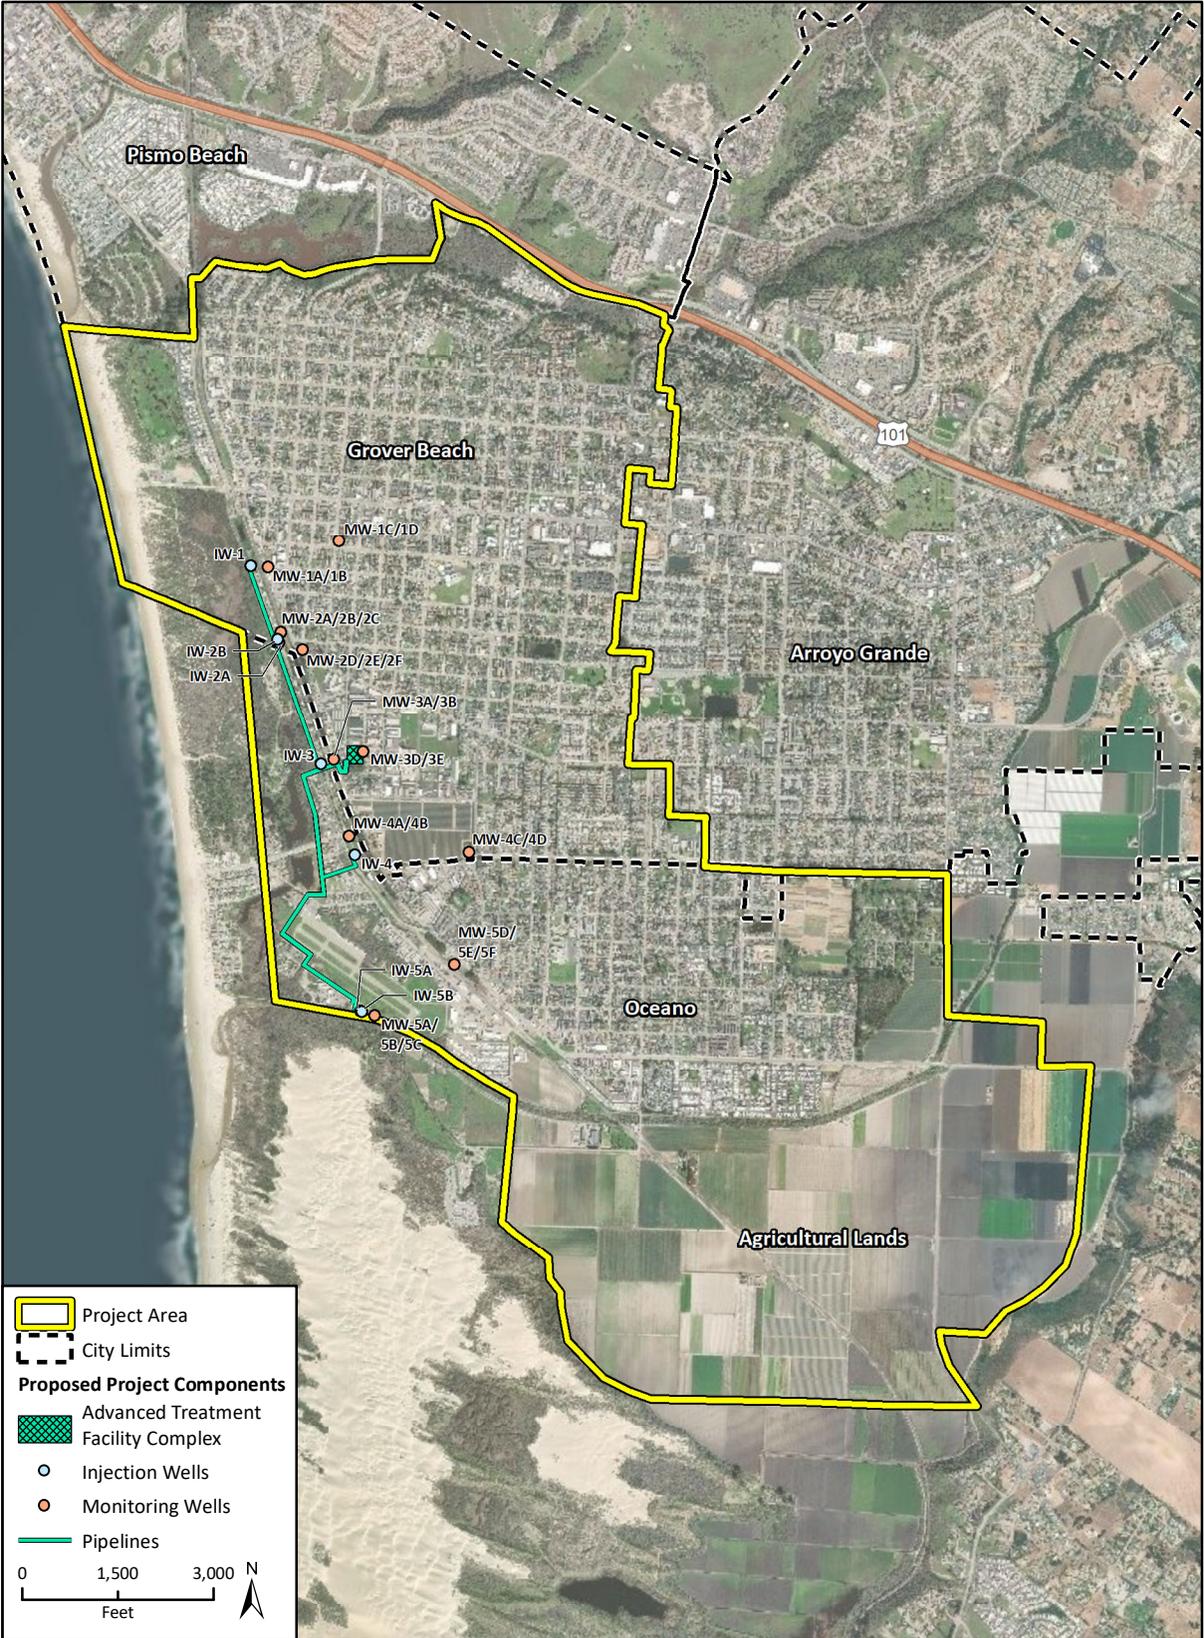

The proposed project must comply with California Public Resources Code § 21080.3.1 (Assembly Bill [AB] 52 of 2014), which requires local governments to conduct meaningful consultation with California Native American tribes that have requested to be notified by lead agencies of proposed projects in the geographic area with which the tribe is traditionally and culturally affiliated.

The input of the Coastal Band of the Chumash Nation is important to the City's planning process. Under AB 52, you have 30 days from receipt of this letter to respond in writing if you wish you consult on the proposed project. If you require any additional information or have any questions, please contact me at 805-773-7044 or via e-mail at mdowning@pismobeach.org. Thank you for your assistance.
