Agricultural

Project Description: (please use a separate page if necessary)

The California Department of Water Resources Flood System Sustainability Branch repairs significant levee damage due to erosion, seepage, and/or stability deficiencies. Damaged levee sections were identified during levee inspections throughout the San Joaquin River Flood Control System. Reclamation District (RD) 2091 is proposing levee repair construction to address seepage and boil damage on the San Joaquin River at five Levee Mile locations in Stanislaus County that threaten the stability of the existing levee. The RD2091 Levee Repair Project will repair seepage and stability issues at the five sites which total approximately 11,038 feet.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
