Description of Project: CREH is proposing the to drill the 688H-10-9D well in BV Hills; it will be a production oil/gas well. The project involves drilling the new well, completing at various intervals, & installation of production facilities; refer to site plan. Drilling activities will require a sump & the estimated MD is up to 13,000 ft. The proposed well pad is part of an existing well pad, but new temporary and permanent disturbance is also required for the new well pad and access roads; flowlines will follow existing pipeline routes. After initial drilling & completions activities, CREH may complete additional downhole work (workover activities) as approved by CalGEMD (formerly DOGGR). All activities will be located on Tier 1 lands owned by CREH.
