**Project Description:** (please use a separate page if necessary)

The proposed project consists of removal of sediment and recontouring the creek channel to re-establish the historic channel and prevent continued flooding of Iris Canyon Road. Approximately 5,000 cubic yards of material would be removed within an approximate 1.5-acre area of disturbance along an approximate 1,200 linear foot segment of the creek. Sediment would be excavated and removed from approximately 2 to 5 feet below ground surface.

## Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".  
If you have already sent your document to the agency please denote that with an "S".
