

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Mammoth Bar Motocross Track Repair Project

Lead Agency: California Dept. of Parks & Recreation

Contact Name: Peter Jones

Email: Peter.Jones@parks.ca.gov Phone Number: 916-985-5662

Project Location: Auburn/Foresthill Placer
City County

Project Description (Proposed actions, location, and/or consequences).

The proposed project involves pulling the MX Track area back from the river to an existing parking/picnic area, reducing the chances of flood damage in the future. The existing parking area, picnic tables, and trials area would be moved to the east side of the river bar. Fill from the old track would be used to build bank turns and jumps on the level portions of the relocated track. After boulders are removed from the slope of the Trials Area, fill would be used to incorporate additional turns, minimizing the need for fill placement. Because this area is adjacent to the ascending canyon flank, the track would be engineered to effectively control surface runoff from the upslope terrain. The track would be fenced to prevent access during non-operating days.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Based on the Initial Study, it has been determined the proposed project would not have significant, adverse effects on the environment with incorporation of mitigation measures addressing the following resources::
BIO-1: Silt fencing and related measures to address effects on hardhead.
BIO-2: Employee education, pre-construction surveys, exclusion fencing, site inspections, and wildlife-safe erosion control measures to address effects on red-legged frog, foothill yellow-legged frog, western pond turtle, nesting birds, special-status bat species, riparian habitat, and wildlife movement.
BIO-3 Pre-construction surveys and appropriate buffers to address effects on nesting birds.
BIO-4 Pre-construction surveys, buffers, and related measures to address effects on special-status bat species.
BIO-5 Wet weather restrictions, vegetation protection, hazardous materials procedures, and trash and erosion control to address effects on riparian habitat.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

n/a

Provide a list of the responsible or trustee agencies for the project.

The project may require the following permits or approvals:

- California Dept. of Fish and Wildlife (CDFW) Lake or Streambed Alteration Agreement
- Regional Water Quality Control Board (RWQCB) Certification
