

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Reservoirs 2 and 2A Recoating Project

Lead Agency: El Dorado Irrigation District

Contact Name: Michael C. Baron

Email: mbaron@eid.org

Phone Number: 530-642-4188

Project Location: Camino  
*City*

El Dorado County  
*County*

Project Description (Proposed actions, location, and/or consequences).

The proposed Project would rehabilitate the deteriorating interior and fading exterior surfaces of the existing Reservoir 2 and 2A water storage tanks. The approximately 9-acre project site is located south of U.S. Highway 50, on EID owned land along a private drive east of Snows Road approximately 950 feet north of the intersection with Bellwood Drive, in the Camino Community Region of El Dorado County.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

**Biological Resources:** Potential impacts to nesting birds as a result of the proposed project were recognized. Mitigation measures were added that will require pre-construction surveys to evaluate whether nesting birds are present at or near the site. additional mitigation measures are incorporated in the event nesting birds are present at the site and guidance for CDFW consultation provided.

**Hazards and Hazardous Materials & Hydrology and Water Quality:** Potential impacts that could result from the use of hazardous materials were recognized as part of the tank recoating process. A mitigation measure was included requiring the preparation and implementation of a Spill Prevention and Control Plan as well as applicable Hazardous Materials Business Plans

**Noise:** Potential impacts to sensitive receptors as a result of excessive noise during the recoating process were recognized. Mitigation measures were added to reduce potential impacts by restricting construction activities from 7 am to 7 pm on weekdays and 8 am to 5 pm on weekends. Require that all construction equipment is fitted with efficient mufflers and not be allowed to idle for excessive amounts of time when not in use.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.
