d. Home seems to be maximizing use of the developable area of the lot
e. Consider adding more dimension to the band between the understory and top floor
f. There is a lot of repetition in the windows, consider modifying
g. Board is concerned with the unbroken eastern and western facades; they need more relief
h. Roof is very complicated, simplify where possible; consider lowering some sections to allow for simplification
i. The entry tower is successful
j. Landscape plans need further development, consider removing agapanthus
