

## **NOTICE OF INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION FOR THE PG&E SACRAMENTO STREET RENOVATION PROJECT**

---

In accordance with the California Environmental Quality Act, the City of Auburn (City) has conducted an Initial Study for the PG&E Auburn Sacramento Street Renovation project and finds that the project will not have a significant adverse effect on the environment with implementation of mitigation measures. Therefore, the City provides this notice of intent to adopt a Mitigated Negative Declaration for the proposed project.

**Project Description:** The Pacific Gas and Electric Company (PG&E) Sacramento Street Renovation project would involve renovating an approximately 7.1-acre portion of the existing PG&E Auburn Service Center at 333 and 343 Sacramento Street. The project would include renovation of an existing building, demolition of three buildings, and construction of two new buildings and perimeter fencing, to support specialized operations such as storm, wildfire, or other regional response activities; and to be available for overflow from the PG&E Auburn Regional Center as needed. The primary use of the project site would be to manage wildfire mitigation efforts, wildfire response, and ongoing grid-hardening efforts in PG&E's Sierra Division.

**Project Location:** The project site is located at 333 and 343 Sacramento Street, Auburn, California. The project site is included in the Industrial (IND) land use designation in the City of Auburn General Plan and is zoned Industrial Park (M-1) and Regional Commercial (C-3).
