Notice of Completion and Environmental Document Transmittal for
St. Anthony On-Site Sewer and Water Distribution System Project
SCH2020059023
Riverside County

Dear Ms. Way:

The Division of Safety of Dams (DSOD) has reviewed the Notice of Completion and Environmental Document Transmittal for the St. Anthony On-Site Sewer and Water Distribution System Project (Project) submittal which describes the construction of new on-site sewer, water, and stormwater systems to serve the St. Anthony's mobile home park and includes the construction of two retention basins. The retention basins are alternately described as having the combined capacity of 284,484 **cubic yards** (176 acre-feet) on Page 3 and 282,934 **cubic feet** (6.5 acre-feet) on Exhibit 5 in the Project Description.

Insufficient information is provided regarding the dam in the Project to make an accurate determination with regards to the described work and it is unclear whether it will be subject to State jurisdiction for dam safety. Therefore, the Pueblo Unido Community Development Corporation, the applicant, needs to submit preliminary plans so that DSOD can make a jurisdictional determination.

As defined in Sections 6002 and 6003, Division 3 of the California Water Code, dams 25 feet or higher with a storage capacity of more than 15 acre-feet, and dams higher than 6 feet with a storage capacity of 50 acre-feet or more are subject to State jurisdiction. The dam height is defined as the vertical distance measured from the maximum possible water storage level to the downstream toe of the barrier.

If the dam is subject to State jurisdiction, a construction application, together with plans, specifications, and the appropriate filing fees must be filed with the Division of Safety of Dams for this project. All dam safety related issues must be resolved prior to approval of an application, and the work must be performed under the direction of a Civil Engineer registered in California. Erik Malvick, our Design Engineering Branch Chief, is responsible for the application process and can be reached at (916) 565-7840.

Ms. Way
