

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Arcata High School Athletic Facilities Improvement Project

Lead Agency: Northern Humboldt Union High School District

Contact Name: Roger Macdonald

Email: rmacdonald@nohum.k12.ca.us

Phone Number: (707) 839-6481

Project Location: Arcata  
*City*

Humboldt  
*County*

Project Description (Proposed actions, location, and/or consequences).

The Northern Humboldt Union High School District proposes improvement of the existing athletic facility below the Arcata High School main campus. The improved athletic facility will include an all-weather track, football field, soccer field, baseball diamond, batting cages, multi-use building (i.e., maintenance, storage, restrooms, and ticket-concessions booth), improved driveway/entrance, and parking. The proposed project also includes several utility infrastructure improvements including the reconfiguration of electrical infrastructure, a new water meter, a new fire hydrant, a new wastewater line between the project site and the AHS main campus, and new drainage and stormwater improvements.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

POTENTIALLY SIGNIFICANT IMPACTS: 1) Air Quality - impacts to sensitive receptors from fugitive dust generation during construction activity. Mitigation - implementation of dust control measures; 2) Biological Resources - permanent impacts to Howell's montia, potential impacts to nesting birds, and temporary impacts to wetlands during construction. Mitigation - implementation of Howell's montia Mitigation Plan, pre-construction nesting bird surveys, and restrictions on construction activity/equipment during removal of existing infrastructure (i.e., fencing and stormwater infrastructure [DIs and piping]) from wetland areas; 3) Cultural Resources - potential impacts to unknown historic-archaeological resources and human remains during construction. Mitigation - archaeological monitoring during the deepest excavation during construction and implementation of inadvertent discovery protocol during for other construction activities; 4) Geology and Soils - impacts from substandard soil conditions and seismic hazards, and potential impacts to unknown paleontological resources. Mitigation - implementation of Geotechnical Report recommendations during project design and construction and implementation of inadvertent discovery protocol during construction; 5) Hydrology and Water Quality - impacts from new impervious surfaces and increased stormwater runoff. Mitigation - implementation of Stormwater Control Plan recommendations during project design, construction, and operation; 6) Noise - impacts to sensitive receptors from noise during construction activity. Mitigation - limitations on day/hours of construction activity and proper maintenance of construction equipment and use of manufacturer-approved muffler systems.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No areas of controversy have been brought to the Lead Agencies attention.

Provide a list of the responsible or trustee agencies for the project.

- City of Arcata
- North Coast Unified Air Quality Management District
- State Water Resources Control Board
