

**CITY OF CORONA
NOTICE OF AVAILABILITY**

**Notice of Availability (NOA) of a Draft Environmental Impact Report for the City of Corona
2018 Reclaimed Water Master Plan (State Clearinghouse No. 2020050497)**

LEAD AGENCY: City of Corona

PROJECT TITLE: City of Corona 2018 Reclaimed Water Master Plan

APPLICANT: City of Corona

PUBLIC COMMENT PERIOD: September 16, 2020 through November 2, 2020

The City of Corona is the Lead Agency in the preparation of a Draft Environmental Impact Report (DEIR) for the City of Corona 2018 Reclaimed Water Master Plan (State Clearinghouse No. 2020050497) to address the potential environmental effects associated with implementation of the project. Pursuant to Public Resources Code Section 21165 and the California Environmental Quality Act Guidelines (CEQA Guidelines) Section 15050, the City of Corona is the lead agency for the project. The City of Corona is the northwestern-most City in Riverside County. It is bordered by the County of Orange to the west, San Bernardino County to the north, unincorporated communities in the County of Riverside to the east and south, and the incorporated city of Norco. The City is accessed by State Route 91 (SR-91) and Interstate 15 (I-15).

The City's water service area encompasses approximately 39 square miles and delineates the extent of the City's potable water, reclaimed water, and wastewater services. The water service area boundary differs slightly from the City's jurisdictional boundary because it also includes the unincorporated communities of El Cerrito and Coronita and parts of Temescal Canyon. The water service area is a jurisdictional boundary bordered by the neighboring water service areas for the Cities of Norco and Eastvale to the north, City of Riverside to the northeast, Home Gardens County Water District to the east, and Temescal Valley Water District to the south. The southeastern portion of the water service area is generally bounded by unincorporated County lands. The southwestern portion of the water service area is bounded by the Cleveland National Forest and other County lands.

The project is an update to the City's adopted Reclaimed Water Master Plan (2001), which provides guidance to create infrastructure to efficiently use treated effluent from its existing and future wastewater reclamation facilities (WRFs) supplemented by non-potable groundwater to reduce dependence on imported water and potable groundwater.

Future projects infrastructure and improvements to the reclaimed water system would be categorized as sources of supply, large distribution pipelines, medium distribution pipelines, small distribution pipelines, conversion of adjacent customers, data management, and additional studies.

The document is available for review on the city's website at www.CoronaCA.gov/RWMP.

The document is also available at the Public Works Department and at the Corona Public Library at the below addresses.

City of Corona, Public Works Department
Ulises Escalona, Associate Engineer
400 S. Vicentia Avenue, Suite 210, Corona, California 92882
