Project Title: Ocotillo Borrow Pit

Lead Agency: San Bernardino County

Contact Name: Steven Valdez

Email: Steven.Valdez@lus.sbcounty.gov Phone Number: 909-387-4421

Project Location: Southeast corner of Ocotillo Way and Valley Vista Avenue San Bernardino  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

San Bernardino County, Department of Public Works (DPW) is submitting an application for a Mine Reclamation Plan for the Ocotillo Borrow Pit. The purpose of this application is to permit the Ocotillo Borrow Pit for a 100-year period to provide general fill material for various DPW Sites for annual maintenance and/or emergencies. DPW is proposing to excavate up to a depth of 15 feet and remove up to 1,000 cubic yards (cy) a year. The reclaimed end use of the Project Site is proposed to be a DPW material maintenance and storage yard.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The proposed project does not have the potential to significantly adversely affect humans, either directly or indirectly, once mitigation measures are implemented. Mitigation Measures are necessary for Cultural Resources, Geologic Resources, and Tribal Cultural Resources. The project would require archaeological and paleontological monitoring if cultural resources and/or paleontological resources are encountered during ground-disturbing activities. Mitigation is also in place to ensure in the event human remains are discovered, County of San Bernardino Coroner will be notified. The Coroner will contact the Native American Heritage Commission (NAHC) in the event that remains are determined to be human and of Native American origin. Additionally, the project would require paleontological monitoring if project depth exceeds 15 feet below current ground surface. The project would require Project-Specific consultations conducted with the NAHC and various Tribal entities in association with AB52, SB18, and/or any other legal guidelines relating to Native American consultations if Tribal Cultural Resources are encountered during ground-disturbing activities. Mitigation is also in place to ensure in the event Native American human remains are discovered, appropriate Native American tribes would be notified.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.
