Present Land Use/Zoning/General Plan Designation:

Heavy Industrial (M-H)

Project Description: (please use a separate page if necessary)

The proposed project proposes to construct a commercial 5-megawatt (MW) solar photovoltaic (PV) generation facility within a 20-acre portion of the property, which totals 118.30 acres. The project site is zoned Heavy Industrial (M-H). The project would include installation and operation of solar PV modules; mounting structures; inverters and transformers; electrical collection and distribution system; generation step-up transformer; and onsite switchgear. The point of interconnection for power generated from the project would be the Pacific Corp McCloud Substation. The expected lifespan of the solar PV generation facility is 35-40 years. However, after 35-40 years the solar panels will still have value and will produce around 60%-80% compared to year 1.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
