NOTICE OF EXEMPTION

PROJECT TITLE	Iron Peak Road Grading and Fuels Reduction		
PROJECT LOCATION	T23N R15W Sections 25, Mt. Diablo Base & Meridian	COUNTY	Mendocino
PUBLIC AGENCY	California Department of Forestry and Fire Protection (CAL FIRE)		
CONTACT	Robert B. Douglas, Environmental Scientist CAL FIRE Mendocino Unit		
ADDRESS	Resource Management 17501 North Highway 101 Willits, CA 95490	PHONE	707-972-3795

PROJECT DESCRIPTION

The project, located 11.5 miles north of Laytonville and accessed via Spy Rock Road, will consist of clearing rock and boulder directly from 3,250 feet of roadway using the track skid steer and leading up to a communications tower and fire lookout on State-owned property to facilitate passage of service vehicles. Vegetation, such as small trees (10" dbh and less) and shrubs, will also be removed within 10-20' of either side of the roadway where feasible by hand crews using chainsaws. Material will be carried to the roadside by hand for processing. Approximately 900 feet of the road exists as an easement through private property. Larger trees (> 10" dbh) will be pruned with pole saws and all woody material will be chipped on the roadway and scattered. This project is expected to take no more than 5 days per year to complete as part of annual maintenance activities.

EXEMPTION STATUS

- Categorical Exemption Type/Section: Class 4/15304 Minor Alterations to Land
- Statutory Exemption (state code section):
- Ministerial (§21080(b)(1); 15268)
- Declared Emergency (§21080(b)(3); 15269(a))
- Emergency Project (§21080(b)(4); 15269(b)(c))

REASONS PROJECT IS EXEMPT

The project meets the requirements of a CEQA Article 19 Class 4 Categorical exemption "Minor Alterations to Land" (Section 15304, Public Resources Code) as the proposed activities involve road grading of an existing road, understory brush and small tree removal, pruning and chipping to reduce wildfire threat. Although this project will modify some structural aspects of the vegetation, it will not convert the vegetation type or result in the removal of otherwise "healthy, mature, and scenic trees." The California Natural Diversity Database (CNDDDB) was searched and no rare, threatened or endangered plant or animal species were identified on the project site that will be negatively impacted by this project. The CAL FIRE Archaeologist has been consulted and has determined that this project is exempt from further archaeological review.

Field review by CAL FIRE staff confirmed that no exceptions apply (Section 15300.2) which would preclude the use of a Notice of Exemption for this project. The Department has concluded that no significant environmental impact would occur to aesthetics, agriculture and forestland/timberland, air quality, biological resources, cultural resources, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, land use planning, mineral resources, noise, population and housing, public services, recreation, transportation/traffic, utilities and service systems, or wildfire. Documentation of the environmental review completed by the Department is kept on file at CAL FIRE Mendocino Unit, Resource Management, 17501 N. Highway 101, Willits, CA 95490, Attn. Environmental Coordinator.

DATE RECEIVED FOR FILING

 Matthew Reischman, Assistant Deputy Director
