Project Summary Table

Report Section	Acceptable	Routine Solution	Phase II	REC	Estimated Cost
Significant Data Gaps	Yes				
Current Use of Project	Yes				
Hazardous Materials	Yes				
Storage Tanks	Yes				
Waste Generation	Yes				
Surface Areas	Yes				
Adjacent Property Use	Yes				
Historical Review	Yes				
Project Regulatory Database Review	Yes				
Off-Site Regulatory Database Review	Yes				
Vapor Migration	Yes				
Asbestos	Yes (1)	Yes	No	No	Not Applicable
Radon Gas	Yes				
Lead-Based Paint	Yes				
Lead in Drinking Water	Yes				
Moisture Conditions	Yes				

Conditions noted in the Project Summary Table are representative of the overall conditions of the property. The Project Summary Table should not be used as a stand alone document. REC - Recognized Environmental Condition, as defined by ASTM E1527-13.

Footnotes:

1. Based on the date of construction (1957 and 1965), there is a potential that asbestos containing materials (ACM) exist at the Project. The non-friable and friable suspect asbestos containing material (ACM) were observed in generally good condition. Based on the scope of work, these materials were not sampled. These materials can be maintained in place using the existing Operations and Maintenance (O&M) Program prepared by EMG and dated October 18, 2011. A properly designed O&M Program is sufficient to maintain the materials in accordance with current regulatory standards.

1.0 Executive Summary

EMG performed a Phase I Environmental Site Assessment of the property summarized below on July 2, 2018.

The assessment was performed at the Client's request using methods and procedures consistent with good commercial and customary practice conforming with ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Any exceptions to, or deletions from, this practice are described in Section 2 of this report. The assessment was completed for the following property:

Project Description	
Project Name:	5200 Sheila Street (the "Project")
Project Address:	5200 Sheila Street, Commerce, Los Angeles County, California 90040
Additional Current/Historical Addresses:	Not applicable
Assessor Parcel Number(s):	6335-007-021
Site Visit Date:	July 2, 2018
Property Type:	Office - sole tenant, Unified Grocers Inc., as a commercial office building and cafeteria
Land Area (acres)/Source:	5.65 from assessing records
Number of Units:	2
Number of Buildings:	2
Year Constructed:	1957 and 1965
Basement:	No
Building Area (SF)/Source:	109,220 from assessing records
Domestic Sewage:	Public utility - City of Commerce

North elevation of the Office Building at the Project

East elevation of the Office Building at the Project

South elevation of the Office Building at the Project

Central courtyard and the west elevation of the Office Building at the Project

East elevation of the Cafeteria Building at the Project

South elevation of the Cafeteria Building at the Project

Outdoor patio and the southwest elevations of the Cafeteria Building at the Project

North elevation of the Cafeteria Building at the Project

1.1 Findings, Opinions, & Conclusions

This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), controlled recognized environmental conditions (CRECs), significant data gaps, or significant business environmental risks in connection with the Project, except as discussed below.

Asbestos

Business Environmental Risk: Suspect ACM Identified

Based on the date of construction (1957 and 1965), there is a potential that asbestos containing materials (ACM) exist at the Project. The non-friable and friable suspect asbestos containing material (ACM) were observed in generally good condition. Based on the scope of work, these materials were not sampled.

These materials can be maintained in place using the existing Operations and Maintenance (O&M) Program prepared by EMG and dated October 18, 2011. A properly designed O&M Program is sufficient to maintain the materials in accordance with current regulatory standards.

1.2 Recommendations

EMG recommends the following:

Recommendation	Estimated Cost
The continued implementation of the existing Asbestos Operations and Maintenance (O&M) Program. Comprehensive survey costs, if required, will be identified as a result of O&M Program implementation.	Not Applicable

1.3 Certification

EMG certifies that EMG has no undisclosed interest in the subject property, that EMG's relationship with the Client is at arms-length, and that EMG's employment and compensation are not contingent upon the findings or recommendations provided in the Report.

If you have any questions regarding this report, please contact Heather Bell at (800) 733-0660 x6517 or hbell@emgcorp.com.

Environmental Professional:

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §

312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Project. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Heather Bell, Senior Environmental Consultant

1.4 Reliance

This report is addressed to Citibank, N.A., such other persons as may be designated by Citibank, N.A. and their respective successors and assigns. Special Conditions include (i) the Report may be relied upon by Citibank, N.A. in determining whether to make a loan evidenced by a note ("the Property Note") secured by the Subject Property, (ii) the Report may be relied upon by any purchaser in determining whether to purchase the Property Note from Citibank, N.A. and nationally recognized statistical rating organization rating or performing a ratings analysis on securities backed by or representing an interest in the Property Note, (iii) the Report may be referred to in and included with materials offering for sale the Property Note or an interest in the Property Note, (iv) persons who acquire the Property Note or an interest in the Property Note may rely on the Report, (v) the Report speaks only as of its date in the absence of a specific written update of the Report.

This report is for the use and benefit of, and may be relied upon by, Citibank, N.A. and any of their respective affiliates, agents and advisors, the initial and subsequent holders from time to time of any debt (or any portion thereof) and/or debt securities secured, directly and indirectly, by the property which is the subject of this report, by any participation interest in any such debt (or any portion thereof), and indenture trustee, servicer or other agent acting on behalf of such holders of such debt (or any portion thereof) and/or debt securities; any rating agencies; and the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and their respective successors and assigns.

In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt (or any portion thereof) and or debt securities.

Bank of America, N.A., its employees, agents, successors and assigns may rely upon this report in evaluating a request for an extension of credit to be secured by the subject property. This report may also be used and relied upon by (a) any additional lender extending credit to be secured by the subject property (the credit to be extended by Bank of America, N.A., and such additional lender is referred to as the "Mortgage Loan") and (b) any actual or prospective purchaser, transferee, assignee, or servicer of the Mortgage Loan (or any portion thereof), any actual or prospective investor (including agent or advisor) in any securities evidencing a beneficial interest in or backed by the Mortgage Loan (or any portion thereof), any rating agency actually or prospectively rating any such securities, any indenture trustee, and any institutional provider (s) from time to time of any liquidity facility or credit support for such financing. In addition, this report or a reference to this report may be included or quoted in any offering circular, private placement memorandum, registration statement or prospectus and EMG agrees to cooperate in answering questions by any of the above parties in connection with a securitization or transaction involving the Mortgage Loan (or any portion thereof) and/or such securities. This report has no other purpose and should not be relied upon by any other person or entity.

This report is addressed to Barclays Bank PLC ("BBPLC") and its affiliates, their respective successors and assigns (including, without limitation, investors who purchase the mortgage loan or a participation interest in the mortgage loan and the trustee in a securitization that includes the mortgage loan), each servicer of the mortgage loan, and all rating agencies involved in any sale, securitization or

syndication involving the mortgage loan may use and rely upon this Report, including, without limitation, utilizing selected information from the Report in the offering materials (either in electronic or hard copy format) relating to any sale, securitization or syndication involving the mortgage loan. EMG] agrees to cooperate in answering questions by any of the above parties in connection with the sale, securitization or syndication, as communicated by BBPLC personnel. In addition, this Report or a reference to this Report may be included or quoted in any offering circular, registration statement, prospectus or sales brochure (either in electronic or hard copy format) in connection with a sale, securitization or syndication, or transaction involving such debt and or debt securities. We hereby certify that we have no undisclosed interest in the property, and our employment and compensation are not contingent upon our findings. This study is subject to the comments made throughout this report and to all assumptions and limiting conditions set forth herein.

This report is addressed to Citigroup Global Markets Realty Corp. and Citi Real Estate Funding, Inc. (Citigroup), and such other persons as may be designated by Citigroup and their respective successors and assigns. Special Conditions include (i) the Report may be relied upon by Citigroup in determining whether to make a loan evidenced by a note ("the Property Note") secured by the Subject Property, (ii) the Report may be relied upon by any purchaser in determining whether to purchase the Property Note from Citigroup and any rating agency rating securities issued by or representing an interest in the Mortgage Note, (iii) the Report may be referred to in and included with materials offering for sale the Property Note or an interest in the Property Note, (iv) persons who acquire the Property Note or an interest in the Property Note may rely on the Report, (v) the Report speaks only as of its date in the absence of a specific written update of the Report.

This report is for the use and benefit of, and may be relied upon by, Citigroup Global Markets Realty Corp. and Citi Real Estate Funding, Inc. (Citigroup), and any of their respective affiliates, agents and advisors, the initial and subsequent holders from time to time of any debt (or any portion thereof) and/or debt securities secured, directly and indirectly, by the property which is the subject of this report, by any participation interest in any such debt (or any portion thereof), and indenture trustee, servicer or other agent acting on behalf of such holders of such debt (or any portion thereof) and/or debt securities; any rating agencies; and the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and their respective successors and assigns.

In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt (or any portion thereof) and or debt securities.

2.0 Scope of Work

2.1 Purpose

The purpose of this report is to provide the Client the results of a commercially prudent and reasonable inquiry designed to identify recognized environmental conditions at the Project taking into account reasonably ascertainable information. In accordance with ASTM E1527-13, the level of environmental assessment was guided by several factors, including the type of property and the risk tolerance of the user.

The user informed EMG that the purpose of the assessment is for an acquisition and financing.

2.2 Scope of Work

The assessment was conducted utilizing generally accepted Phase I industry standards, using American Society for Testing and Materials (ASTM) Standard Practice E 1527-13.

This assessment is based on the evaluation of the information gathered, laboratory analyses of samples collected (when required), and accessibility at the time of the assessment.

The Scope of Work included an evaluation of:

- Interviews with individuals knowledgeable about the Project for the purpose of gathering information regarding the potential for contamination at the Project.
- Available pertinent documents obtained by EMG or provided by the client.
- Reasonably ascertainable federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Project.
- The Project history in an attempt to identify possible ownership(s) and/or uses, as identified through review of reasonably ascertainable standard historical sources.
- The physical characteristics of the Project, as identified through review of reasonably ascertainable topographic data, wetlands, soils, geology, and groundwater data.
- Current Project conditions (as applicable) as they pertain to the presence or absence of: facility storage tanks, drums, containers (above or below ground), etc., transformers and other electrical equipment which utilize fluid which may potentially contain PCBs, the use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes.
- An evaluation of information contained in programs such as the NPL, SEMS, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Project. This evaluation was performed to identify sites that represent a recognized environmental condition. The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The search is designed to meet the requirements of ASTM Standard Practice E 1527-13. The information provided is assumed to be correct and complete.
- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Project.

2.3 ASTM E1527 Non-Scope Considerations

At the Client's request, the assessment included a screening approach for the following Non-ASTM Considerations, which are otherwise beyond the Scope of ASTM E1527-13.

Non-ASTM Considerations	
Asbestos Containing Materials:	The identification of suspect asbestos containing materials in accessible areas. Sampling of suspect materials was not performed.
Radon Gas:	Radon gas propensity, through the review of the USEPA's Map of Radon Zones.
Lead-Based Paint:	The identification of lead-based paint for residential and daycare properties constructed prior to 1978. Sampling of suspect materials was not performed.
Lead In Drinking Water:	A screening for lead in water, based on information provided by the municipal water provider.
Moisture Conditions:	The identification of visible moisture conditions and conditions conducive for moisture conditions. In addition, EMG interviewed Project personnel regarding any known or suspected moisture conditions, water intrusion, or mildew like odors.
Wetlands:	Review of readily available wetlands map data available from the US Fish and Wildlife Service. A site specific wetland delineation is beyond the scope of this assessment.
Flood Zone:	Review of readily available flood zone map designations available from regulatory agencies, such as the Federal Emergency Management Agency (FEMA).

3.0 User Provided Information

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "Brownfield's Amendments") (if desired), the user must provide certain information (if available) identified in the User Questionnaire to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Within this Phase I Environmental Site Assessment, EMG's reference to the Client follows the ASTM guide's definition of user, that is, the party that retains EMG for the preparation of a baseline ESA of the Project. A user may include, without limitation, a purchaser, potential tenant, owner, existing or potential mortgagee, lender, or property manager of the Project.

3.1 User Questionnaire

EMG submitted the following User Questionnaire to the user pursuant to the responsibilities described in Section 6 of ASTM Standard E 1527-13. All Appropriate Inquires (40 CFR Part 312) requires that these questions be answered by or on behalf of a party seeking to qualify for limited liability protections to CERCLA liability.

The User Questionnaire was completed by a designated representative of the user. Review of the responses provided by the user did not identify any recognized environmental conditions or environmental concerns with regards to the current or historical use of the Project. A copy of the User Questionnaire is included in Appendix D.

3.2 Environmental Lien/AUL Search

The presence of an Activity and Use Limitation (AUL) at a property is an indication that there may be residual levels of hazardous substances or petroleum products present above unrestricted land use levels. Although Environmental Liens and AULs are often recorded with the property deed at the local land title office, in some cases they are filed in a separate environmental agency database or in project documentation, such as agency closure letters. ASTM E1527-13 does not require the environmental professional to undertake a review of recorded land title records and judicial records for environmental liens and AULs. Such a review is performed at the discretion of the user, based on their need to meet the requirements of 40 CFR 312.20 and 312.25.

The user did not engage EMG to review title and judicial records for environmental liens or AULs recorded against the Project. Furthermore, these documents were not provided to EMG for review. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of the Environmental AUL/Lien search does not represent a significant data gap.

4.0 Physical Setting

ASTM E1527-13 requires that the current 7.5-minute USGS Topographic Map (or equivalent) showing the area on which the Project is located be reviewed. Additional physical setting sources, such as soil survey maps, groundwater maps and geologic maps may be obtained and reviewed at the discretion of the environmental professional. The purpose of this review is to evaluate whether hazardous substances or petroleum products are likely to migrate to the Project.

4.1 Topography

The most recent version of the USGS Topographic Map available is discussed below. Historical USGS Topographic Maps, if available, are discussed in Section 6.

USGS Topographic Map and Google Earth Review	
Topographic Map Name:	Los Angeles, California; South Gate, California
Topographic Map Year:	2015
Project Topography	
Upper Elevation (feet):	145
Lower Elevation (feet):	140
Surface Slope:	Gently sloping
Slope Direction:	Southwest
General Vicinity Topography	
Slope Direction:	Southwest
Nearest Surface Water Feature:	Riverine
Nearest Surface Water Feature Distance:	Approximately 3,700 feet
Nearest Surface Water Feature Direction:	Southwest

4.2 Geology

The generalized geology of the Project area was researched using seamless USGS geological maps provided in the ERIS Physical Setting Report (PSR) and/or readily available geologic maps. The PSR is included in Appendix H.

Generalized Geology	
Source:	ERIS
Unit Name:	Quaternary alluvium and marine deposits
Primary Rock Type:	Alluvium
Secondary Rock Type:	Terrace

4.3 Hydrogeology

Groundwater conditions at the Project are estimated based on reasonably available data such as groundwater maps, previous subsurface investigations conducted at, or in the vicinity of the Project, and local conditions. Shallow groundwater flow is generally

expected to follow the ground level slope of surface elevations towards the nearest open body of water. Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

Hydrogeology	
Source:	Estimated from local topography and presence of nearby surface water features
Estimated Depth to Shallow Groundwater:	Between 20-50 feet below ground surface
Estimated Direction of Shallow Groundwater Flow:	South

4.4 Soils

The Soil Survey Geographic Database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Review of the SSURGO data available in the PSR (Appendix H) and/or from the NRCS Web Soil Survey identified the following soil type(s) at the Project:

Soil Series Name	Drainage	Texture
Urban land-Biscailuz-Hueneme	Somewhat poorly drained	Fine sandy loam

5.0 Site Reconnaissance

The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the property. In accordance with ASTM E1527-13, EMG attempted to visually observe the periphery of the Project and all structures to the extent not obstructed by obstacles. In addition, EMG attempted to visually observe interior common areas, maintenance and repair areas, and a representative sample of occupant spaces. In general, EMG does not look under floors, above ceilings, behind walls, in confined spaces, in transformer vaults, or in other areas not considered to be safe to access.

Site Reconnaissance Conditions	
Date Completed:	July 2, 2018
EMG Project Manager:	Khurram Kazmi
Weather Conditions:	Sunny
Temperature (F):	80s
Percent of Units Observed:	100%
Access Limitations:	No access limitations were encountered.

5.1 Units Observed

The units observed at the Project are discussed below. In addition, EMG accessed the maintenance and mechanical areas, office areas, meeting rooms, lobby, and restrooms.

Commercial Units Observed		
Unit #	Tenant Name	Tenant Operations
Office Building	Unified Grocers Inc.	Commercial office building
Cafeteria Building	Unified Grocers Inc.	Employees' cafeteria

Office Building: Main entrance lobby

Office Building: Common corridor (typical)

Office Building: Office area (typical)

Office Building: Office area (typical)

Office Building: Office area (typical)

Cafeteria Building: Dining room

5.2 Project Use

Environmentally Suspect Project Use	
Project Use	Currently Located at the Project
Cellular Communications Equipment:	No
Commercial Printing:	No
Dry Cleaner:	No
Emergency Generator or Diesel Fire Pump:	Yes. Further discussed at end of Section 5.2.
Gasoline Station:	No
Heavy Industrial Use:	No
Landfill:	No
Machine Shop:	No
Military Use:	No
Oil Well:	No

Environmentally Suspect Project Use	
Project Use	Currently Located at the Project
Photograph/X-Ray Developing:	No
Vehicle Repair:	No

Emergency Generator or Diesel Fire Pump	
Number of Units	2
Location:	Near the northeast corner of the Office building at the Project
Fuel Type:	Diesel fuel
Tank Type:	Belly tanks (ASTs)
Leaks or Spills Observed:	No
Conclusion:	Based on the information provided above, this Project use does not represent a recognized environmental condition.

Office Building: Emergency generator with 300-gallon diesel belly tank (AST)

Office Building: Emergency generator with 350-gallon diesel belly tank (AST)

5.3 Hazardous Materials and Petroleum Products

Accessible interior and exterior areas of the Project were observed for the presence of hazardous materials and petroleum products.

EMG evaluated any observed manways, vent pipes, fill connections, concrete pads, and unknown saw cuts to determine if USTs are present at the Project, or if USTs were historically located at the Project. In addition, the Key Site Manager and other property management personnel were interviewed regarding the presence of USTs at the Project.

EMG observed the Project for the presence of potentially PCB-containing equipment such as electrical transformers and hydraulic lifts. Equipment installed after 1979 is unlikely to contain PCBs.

EMG observed the Project for visual evidence of petroleum and natural gas pipelines, such as pipeline markers.

Storage and Use of Hazardous Materials and Petroleum Products	
Feature	Identified at Project
Drums and Small Containers:	Yes. Further discussed below.
Underground Storage Tanks (USTs):	No
Aboveground Storage Tanks (ASTs):	Yes. Further discussed below.
Oil Cooled Transformers:	Yes. Further discussed below.

Storage and Use of Hazardous Materials and Petroleum Products	
Feature	Identified at Project
Hydraulic Elevators:	No
Hydraulic Lifts:	No
Other Hydraulic Equipment:	No
Petroleum or Natural Gas Pipelines:	No

Drums and Small Containers			
Material	Quantity	Storage Location	Spills or Leaks
Janitorial and maintenance supplies	Retail-size containers	Janitor closets and other designated areas	No
Dish washing supplies	Retail-size containers	Cafeteria building - Kitchen	No
HVAC water treatment chemicals	55-gallon drums	Office Building: Mechanical Room	No

Review of the hazardous materials use and storage at the Project did not identify any recognized environmental conditions or environmental concerns with regards to the materials listed in the table above.

Cafeteria Building: Kitchen area Janitorial supplies

Office Building: Maintenance supplies

Office Building: HVAC water treatment chemicals

Aboveground Storage Tanks	
Tank #:	1
Owner:	Tenant
Year Installed:	Unknown
Contents:	Diesel
Capacity:	5 Gallons
Visually Observable:	Yes
Weep Holes Present:	No
Secondary Containment:	No
Location:	Near the northeast corner of the Office Building
Tank Construction:	Single-wall steel
Registered With State:	Not required
Leaks Observed:	No
Leaks Reported by POC:	No
Conclusion:	The Key Site Manager was unaware of any past releases from the AST. Furthermore, the AST appeared to be in good condition, with no evidence of current or past releases.

5 gallon diesel AST for generator 1

Aboveground Storage Tanks	
Tank #:	2
Owner:	Tenant
Year Installed:	Unknown
Contents:	Diesel
Capacity:	350 gallons
Visually Observable:	Yes
Weep Holes Present:	No
Secondary Containment:	No
Location:	Belly of emergency generator
Tank Construction:	Single-wall steel
Registered With State:	Not required
Leaks Observed:	No
Leaks Reported by POC:	No
Conclusion:	The Key Site Manager was unaware of any past releases from the AST. Furthermore, the AST appeared to be in good condition, with no evidence of current or past releases.

Office Building: Emergency generator with 350-gallon diesel belly tank (AST)

Oil Cooled Transformers	
Type:	Pad-mounted
Number of Units:	1
Owner:	Utility company
Labeled:	Not labeled
Age:	Appears to have been installed prior to 1980
PCB Status:	Potentially contains PCBs
Spills or Leaks Observed:	No
Conclusion:	Based on the information above, the presence of this equipment does not represent a recognized environmental condition.

Utility-owned pad-mounted transformer

Hydraulic Elevators	
Number of Elevators:	1
Owner:	Property
Age:	Appears to have been installed after 1979
PCB Status:	Unlikely to be PCB-contaminated based on the apparent age of the equipment.
Spills or Leaks Observed:	No
Conclusion:	Based on the information above, the presence of this equipment does not represent a recognized environmental condition.

Hydraulic elevator equipment

5.4 Waste Generation, Storage, and Disposal

Visual observation for the generation, treatment, storage, and disposal of wastes was performed. The areas of waste generation and storage were observed for evidence of current and past releases.

Although a waste disposal regulatory compliance audit is beyond the scope of this assessment, general waste disposal procedures were evaluated to determine if any deficiencies exist that are likely to result in a release to the Project.

Waste Generation and Disposal	
Feature	Identified at Project
Waste Generation:	Yes. Further discussed below.
Septic Systems:	No
Sewer Lift Stations:	No
Grease Traps:	No
Oil Water Separators:	No
Unknown Drums or Containers:	No
Waste Disposal Ponds or Lagoons:	No

Waste Generation			
Waste Type	Disposal Method	Storage Location	Spills or Leaks
Domestic sewage	Sanitary sewer	Not applicable	No
Municipal trash	Contracted waste hauler	Dumpsters	No
Cooking grease	Contracted waste hauler	Designated storage area	No

Review of waste storage and disposal information did not identify any recognized environmental conditions or environmental concerns with regards to the wastes listed in the table above.

Trash dumpsters

Cafeteria Building: Trash dumpsters

Cafeteria Building: Waste cooking grease storage

5.5 Surface Areas

The interior and exterior surface areas were observed for environmentally significant features such as wells, sumps, staining, and pits.

Surface Areas	
Feature	Identified at Project
Environmentally Significant Floor Drains, Sumps and Pits:	No
Pools of Liquid Waste:	No
Surface Staining:	No
Unusual or Noxious Chemical Odors:	No
Landfilling:	No
Stressed Vegetation:	No
Stormwater Retention/Detention Basins:	No
Domestic Water Wells:	No
Monitoring Wells:	No
Irrigation Wells:	No
Dry Wells:	No
Railroad Tracks/Spurs:	No

5.6 Utilities, Heating, and Cooling

Utilities	
Domestic Water:	Public utility - California Water Service Company/Sewer
Electricity:	Public utility - Southern California Edison/City of Commerce Electric Department
Natural Gas:	Public utility - SoCalGas
Domestic Sewer:	Public utility - City of Commerce

Heating and Cooling	
Type of Heating:	Electric units
Type of Cooling:	Electric central plant

Chiller unit

Office Building: Cooling tower

Chiller unit

Office Building: Cooling tower

5.7 Adjacent Property Use

The adjacent properties were visually observed for evidence of recognized environmental conditions, such as property uses likely to result in a release, and visual evidence of surface migration of releases. The following adjacent properties were identified:

Adjacent Property Use	
North	
Address Range:	2442 - 2482 South Atlantic Boulevard and 5243 Sheila Street
Property Use / Business Name:	General commercial / Commerce Village (2442-2482 S. Atlantic Boulevard) Institutional / California Water Services (5243 Sheila Street)
East	
Address Range:	5300 Sheila Street
Property Use / Business Name:	General commercial / Supervalu Warehouse
South	
Address Range:	Not Applicable
Property Use / Business Name:	Paved lot / Trailer parking
West	
Address Range:	2548 and 2500 South Atlantic Boulevard)
Property Use / Business Name:	Warehouse / Value Center (2548 S. Atlantic Boulevard) Commercial offices / Springfield (2500 S. Atlantic Bouelvard)
Findings	
Environmentally Suspect Uses:	No environmentally suspect uses, such as gasoline stations or dry cleaners, were identified.
Visual Evidence of a Release:	No visual evidence of a release, such as staining or monitoring wells, was observed.
Releases Reported:	The adjacent property to the northeast was identified on the LUST databases, indicating a release occurred at this facility. Refer to Section 7.1.2 for further discussion.
Conclusion:	Based on the information above, no recognized environmental conditions or environmental concerns were identified.

Northwest adjacent: Multi-tenant general commercial at 2450-2482 S. Atlantic Boulevard

East adjacent: SuperValue warehouse at 5300 Sheila Street

South adjacent: Trailer parking lot

Southwest adjacent: Value Center warehouse at 2548 South Atlantic Boulevard

West adjacent: Springfield office building at 2500 S. Atlantic Boulevard

5.8 Interviews

5.8.1 Key Site Manager

EMG attempted to interview the Key Site Manager as part of this assessment. In addition, a Questionnaire was provided to the Key Site Manager to assist EMG in determining if recognized environmental conditions exist at the Project.

Key Site Manager Interviews			
Name	Relationship To Property	Years With Property	Telephone Number
Steven Hutchinson	EHS Specialist	5	323-313-6694

The Key Site Manager did not identify any recognized environmental conditions or environmental concerns with the current or historical use of the Project. A copy of the Key Site Manager Questionnaire is included in Appendix D.

5.8.2 Current Occupants

EMG made a reasonable attempt to interview all major occupants and also those other occupants whose operations are likely to indicate a recognized environmental condition.

No other occupants of the Project were available or would agree to an interview. The lack of occupant interviews represents a data gap. However, based on the conditions observed in the accessed areas, discussions with the site contact, and review of other available information, the lack of this information does not represent a significant data gap.

5.8.3 Current Owner

EMG submitted an Owner Questionnaire to the client in an effort to identify the owner of the Project who could be interviewed to provide information regarding proceedings involving the Project.

The designated representative of the owner completed a copy of the more comprehensive Key Site Manager Questionnaire. No environmentally significant information was identified based on the responses provided by the owner. A copy of the questionnaire

completed by the owner is included in Appendix D.

5.8.4 Past Owners and Occupants

No past owners of the Project, who likely would have material information regarding recognized environmental conditions at the Project, were identified.

5.8.5 Nearby Owners and Occupants

The Project was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews were not conducted with adjacent or nearby property owners or occupants.

6.0 Historical Use Information

The purpose of the historical review is to determine the previous uses of the Project and surrounding area in order to identify the likelihood of past uses having led to a recognized environmental condition. Historical sources that are both reasonably ascertainable, and likely to be useful are reviewed in an attempt to document the historical use of the Project and surrounding areas dating back to 1940, or the first developed use, whichever is earlier.

Copies of representative historical maps/aerial photographs are included in Appendix C. Other historical documentation, such as City Directory abstracts, copies of building department records, and ownership records are included in Appendix F, when available.

The following standard historical sources were researched:

Standard Historical Sources		
Data Type	Source	Years Covered
Aerial Photographs:	Environmental Risk Information Services (ERIS)	1928, 1938, 1947, 1952, 1960, 1963, 1972, 1980, 1988, 1994, 2005, 2010, 2012, 2014, 2016
Fire Insurance (Sanborn) Maps:	ERIS	1966
USGS Topographic Maps:	ERIS	1894, 1896, 1899, 1900, 1902, 1923, 1924, 1925, 1926, 1936, 1942, 1943, 1949, 1953, 1964, 1966, 1972, 1981, 1994, 2015
Local Street Directories:	ERIS	1941, 1946, 1953, 1959, 1965, 1972, 1975, 1979, 1985, 1990, 1995, 2000, 2006, 2012, 2018
Building Department Records:	City of Commerce Building and Safety Division	1990 - Current
Fire Department Records:	Commerce Fire Department	No records available
Zoning/Land Use Records:	City of Commerce Planning Department	Current
Property Tax Files and Land Title Records:	Los Angeles County Assessor	Current
Key Site Manager Interview:	Pre-Survey Questionnaire	2013 - Current
Oil and Gas Well Map:	ERIS	Current
Other Historical Sources:	Prior environmental report:	2015

EMG was not able to obtain standard historical sources that document the Project history in five-year intervals. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of this information does not represent a significant data gap.

6.1 Project Historical Use

Based on review of the historical resources identified in Section 6.0, the following chronological history was developed for the Project.

Chronological History of Project			
Years	Project Use	Tenants	Environmental Concern
Prior to 1894	No historical data available.	Not applicable	No

Chronological History of Project			
Years	Project Use	Tenants	Environmental Concern
1894 - 1930's	Agricultural	Not applicable	No
1940's	Previous general commercial buildings	Not listed	No
1957 and 1965 - Current	Office	<p>1990 - L A Junction Railway Co, Santa Fe Land IMPRV, Santa Fe PL WY ATMTY, Santa Fe RL WY CAR, Santa Fe RL WY CLMS, Santa Fe RL WY CMNCT, Santa Fe RL WY ENGR, Santa Fe RL WY GEML, Santa Fe RL WY INDS, Santa Fe RL WY Law, Santa Fe RL WY MCHNC, Santa Fe RL WY MNGR, Santa Fe RL WY MSTR, Santa Fe RL WY POL, Santa Fe RL WY QLTY, Santa Fe RL WY RGNL, Santa Fe RL WY TAX, Santa Fe RL WY TOFC, Santa Fe West CR UN</p> <p>2000 - Certified Grocers CA, Grandview Ranch, Thirtysecond Street Market</p> <p>2006 - Grandview Ranch, Staffworks Inc., Unified Western Grocers</p> <p>2012 - Staffworks</p> <p>2018 - Grocers Capital Co, Unified Grocers Inc.</p>	No

Tax files and land title records can include general property information, current and historical ownership names, and title records provided by the user. Readily available ownership records are reviewed from the local tax assessor. A 50-year chain of title search was not performed based on the Scope of Work. The following ownership history was identified.

Ownership History of Project		
Year Purchased	Owner Name	Environmental Concern
1938	Carl Crompton and Olean Crompton	No
1955	Certified Grocers of Calif LTD	No
1977	Santa Fe Pacific Realty Corp	No
1989	iStar HQ I, LP	No
2008	iStar CTL Sheila-Commerce LLC	No
Unknown	TRT Noip Sheila - Commerce LP	No
2015	GPT Sheila Street Owner LP	No

The Project was used for agricultural use until the 1930s, prior to being developed with general commercial buildings in the 1940s.

The Project was developed with numerous offices and laboratories occupied by the Fluor Corporation (1940s - 1960) and a cafeteria building for the Santa Fe Railroad Company (1960s - 1980s). The Project was redeveloped with the existing cafeteria building and food warehouse in 1957 and 1965, respectively. From the 1950s through the 1990s there were additional buildings on the northern portion of the Project. The Project has been occupied by Unified Western Grocers since 1989. The two Project buildings were substantially renovated in 1999. No evidence of historic dry cleaners was identified. No evidence of petroleum exploration or production was identified.

6.2 Off-Site Historical Use

Based on review of the historical resources identified in Section 6.0, the following chronological history was developed for the adjacent properties.

Chronological History of Adjacent Properties		
Years	Adjacent Property Use	Environmental Concern
North		
Prior to 1894	No historical data available	No
1894 - 1930's	Agricultural	No
1940's - 1960's	General commercial	No
1970's	Removal of previous structures and into a Parking lot	No
1980's - Current	General commercial	No
East		
Prior to 1894	No historical data available	No
1894 - 1940's	Agricultural	No
1950's - 1970's	General commercial	No
1980's - Current	New general commercial structure in place	No
South		
Prior to 1894	No historical data available	No
1894 - 1930's	Agricultural	No
1940's - 1950's	General commercial	No
1960's - 1970's	Removal of general commercial structure and replaced with parking lot	No
1980's - Current	New general commercial structure	No
West		
Prior to 1894	No historical data available	No
1894 - 1940's	Highway	No
1950's - 1990's	General commercial beyond Highway	No
Early 2000's - Current	Highway and New general commercial structure	No

Review of the historical adjacent property uses did not identify visible evidence of a release. Furthermore, no releases were identified at the adjacent properties based on review of the regulatory database report (Section 7.1.2). Therefore, the historical adjacent property uses do not represent a recognized environmental condition.

6.3 Historical Environmental Documentation

In accordance with ASTM E1527-13, EMG requested that the user provide copies of previous environmental assessments for review. Furthermore, EMG may have obtained prior environmental assessments and regulatory records from local, state, and federal regulatory agencies. The purpose of reviewing prior environmental assessments is to determine if any recognized environmental conditions have previously been identified. Documentation provided to EMG which is unrelated to the completion of this report may not be reviewed.

Report Title	Prepared By	Report Date	Obtained From	Copy of Report	Concerns Identified
Phase I Environmental Site Assessment	EMG	6-19-2015	Client	Available Upon Request	Yes. Further discussed below.
ALTA/ACSM Land Title Survey	Bock & Clark Corporation	2-27-2015	Client	Appended	No

Historical Underground Storage Tank (UST)

EMG reported that a previous assessment indicated that a 1,000-gallon fuel oil UST was reportedly installed at the Project in 1979 and removed in 1989. Information obtained from prior reports and the on-site personnel indicated this UST may have been located on an adjacent property that is not part of the Project. However, information from a March 1994 Phase I ESA, prepared by ATC indicated that the tank was removed in 1989 by Conservtech Inc. A limited subsurface investigation was performed, by GTI in 1994 in which no contaminants were detected. No further action was required by the LADPW. A letter from the Los Angeles County Department of Public Works (LACDPW) dated 1989 indicated that based on subsurface investigations, the LACDPW concluded the Project was not formerly utilized as a disposal site. No further action or investigation was recommended regarding historical USTs at the Project.

Adjacent Properties

EMG's review of a 1992 Phase I ESA, prepared by ATC for the Project and adjacent parcels indicated that the Project had not been significantly impacted by hazardous substances. Review of a Phase II, prepared by GTI, and dated September 22, 1994 indicated that soil and groundwater samples were collected from the Project to investigate the impact from off-site sources. The report indicated that "the [Project] did not, nor has it historically had an underground storage tanks or other potential contamination source areas." Metals were detected in soil and groundwater samples (below state action levels). No total petroleum hydrocarbons (TPH), volatile organic compounds, or semi-volatile organic compounds were detected in soil. One semi-volatile organic compound, di-n-butylphthalate, was detected in two groundwater wells at concentrations of 23 ppb and 18 ppb (no action level reported); this compound is a plasticizer and the source of this constituent was likely from laboratory or field contamination. TPH was not detected in any of the groundwater samples. No further action or investigation was recommended regarding the properties adjacent to the Project.

Previously-Identified Asbestos-Containing Materials

EMG identified previously-identified asbestos-containing material in the form of spray-on fireproofing, located in an exhaust shaft which originated from the chiller room and extended through the third and fourth floors. EMG was provided a copy of an Asbestos Operations & Maintenance (O&M) Program for the Project, prepared by EMG and dated October 19, 2011. The program was properly designed to meet regulatory standards. Refer to Section 1.1 for additional information.

Suspect Lead-Based Paint

Based on the age of the Project buildings, EMG concluded that there was a potential that lead-based paint was utilized at the Project. EMG was provided a copy of a Lead-Based Paint Operations & Maintenance (O&M) Program for the Project, prepared by EMG and dated October 18, 2011. The program is properly designed to meet regulatory standards.

7.0 Environmental Records Review

The purpose of the records review is to obtain and review records that will help identify recognized environmental conditions. ASTM E1527-13 requires the review of reasonably ascertainable records from standard sources as defined in Section 8.2.1 of ASTM E1527-13. Additional records sources, such as local fire department records, local building department records, and local environmental health department records may be obtained and reviewed at the discretion of the environmental professional.

The availability of record information varies widely, depending on the source. Reasonably ascertainable records are those records that are publicly available, obtainable within reasonable time and cost constraints, and practically reviewable. In addition, the records must be provided by the agency within 20 calendar days of receiving a request, at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information.

7.1 Regulatory Database Review

EMG obtained a regulatory database report from a commercial database provider in an effort to determine if the Project is a listed regulatory site and whether there are any mappable regulatory database sites within the search distances specified by ASTM E1527-13. EMG attempted to field-verify the locations of the identified regulatory sites, as well as confirm distances and locations relative to the Project using available mapping software. Therefore, the distances and/or directions noted in this section may not match the Database Report. In addition, EMG reviewed the unmappable sites in the database report, cross-referencing addresses and site names.

In accordance with ASTM E1527-13, regulatory files and/or records associated with standard environmental record sources may be obtained and reviewed when the files and/or records are reasonably ascertainable, the files/records are expected to contain significant information for the purpose of identifying recognized environmental conditions, and an alternative source of the information is not available. Furthermore, review of regulatory files and/or records may be limited by the scope of work. Unless otherwise noted in Section 1.1, further review of regulatory agency files and/or records is not considered to be warranted based on the general nature of the regulatory database listing, the level of detail provided in the regulatory database, the availability of information from alternative sources, and/or the low likelihood that the agency files and/or records will contain information indicating the presence of a recognized environmental condition.

A copy of the full regulatory database report is included in Appendix H.

Regulatory Report Summary

Database	Search Radius	Target Property	Within 0.12mi	0.12mi to 0.25mi	0.25mi to 0.50mi	0.50mi to 1.00mi	Total

7.1.1 Project Regulatory Database Review

On-Site Regulatory Database Listings		
Facility Name	Facility Address	Databases
Unified Western Grocers	5200 Sheila Street	FINDS, ICIS, RCRA-Generators, LA-HMS
Supervalu	5200 Sheila Street	FINDS, LA-HMS
Certified Grocers	5200 Sheila Street	EMISSIONS, PRP
5200 Sheila Street	5200 Sheila Street	Historical Manifest
Atchinson, Topeka & Santa Fe Railroad	5200 Sheila Street	HAZNET
1X Santa Fe Land Improvement Company	5200 Sheila Street	HAZNET, HHSS, Historical Tank
1X Santa Fe Pacific Realty Company	5200 Sheila Street	HAZNET
Santa Fe Realty	5200 Sheila Street	LA-HMS

Facility Index System (FINDS)

The FINDS database cross-references various federal and state database listings and does not, in and of itself, typically contain environmentally significant information. The FINDS database provides the following pertinent information:

- Facility Name: Unified Western Grocers
- Facility Address: 5200 Sheila Street
- Program Cross Referenced: ICIS, NCDB, CA-ENVIROVIEW
- Facility Name: Supervalu
- Facility Address: 5200 Sheila Street
- Program Cross Referenced: RCRA Info

The information provided is not indicative of a recognized environmental condition and no further action or investigation is recommended.

ICIS

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program. The ICIS database provides the following pertinent information:

- Facility Name: Unified Western Grocers
- Facility Address: 5200 Sheila Street
- FRS ID Number: 110011642222
- Enforcement Action Identifier: 09-2007-0169
- Enforcement Action Description: Administrative - Formal
- Enforcement Action Type Code: 14A (FIFRA 14A Action For Penalty)

No other pertinent information was provided in this regulatory database listing. The information provided is not indicative of a recognized environmental condition and no further action or investigation is recommended.

EMISSIONS

EMISSIONS is a list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years. The EMISSIONS database provides the following pertinent information:

- Facility Name: Certified Grocers of CAL LTD
- Facility Address: 5200 East Sheila
- 1990 Criteria Data
Facility ID: 74064 CERR Code:
Facility SIC Code: 5141 TOGT: .3
Air Basin: South Coast
DISN: South Coast AQMD PMT: .3
- 1990 Toxic Data
Facility ID: 74064 COID: LA
Facility SIC Code: 5141 DISN: SOUTH COAST AQMD
CO: 19 CHAPIS:
Air Basin: SC CERR Code:
District: SC

No other pertinent information was provided in this regulatory database listing. The information provided is not indicative of a recognized environmental condition and no further action or investigation is recommended.

RCRA Generators

The RCRA Generators database is a listing of facilities that generate, transport, store, treat and/or dispose of hazardous waste and does not necessarily indicate that a release to the environment has occurred. Refer to Section 5.4 for further discussion of wastes currently generated at the Project. The RCRA Generators database provides the following pertinent information:

- Facility Name: Unified Western Grocers
- Facility Address: 5200 Sheila Street
- Classification: Large Quantity Generator
- Compliance Status: As of Jan 24 2018, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility.

No further pertinent information was provided in this regulatory database listing. The information provided in this database is not indicative of a recognized environmental condition and no further action or investigation is recommended.

Historical Manifest

The Historical Hazardous Waste Manifest database is a list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The Manifest database provides the following pertinent information:

- Site Name: 5200 East Sheila Street
- EPA ID: CAC000065453
- Create Date: 2/18/1988
- Inactive Date: 10/25/2000
- File Years: 1988-1989
- Wastes generated: Asbestos-containing wastes & hydrocarbon solvents (benzene, hexane, Stoddard, Etc.)

- Site Name: 5200 East Sheila Street
- EPA ID: CAC000194768
- Create Date: 7/25/1989
- Inactive Date: 10/25/2000
- File Years: 1989
- Wastes generated: Polychlorinated biphenyls (PCBs) and material containing PCBs

HAZNET

The Manifest database includes information related to the transport of hazardous wastes by licensed hazardous waste disposal contractors and does not necessarily indicate that a release to the environment has occurred. The Manifest database provides the following pertinent information:

- Site Name: Atchison Topeka & Santa Fe Railroad
- EPA ID: CAX000037960
- Create Date: 5/18/1983
- Inactive Date: 4/30/1986
- TSD EPA ID: AZR000501510
- State Waste Code: 352
- State Waste Code Description: Other organic solids
- Method Description: Storage, bulking and/or transfer off-site - No on-site treatment or recovery
- Site Name: 1X Santa Fe Land Improvement Company, Inc.
- EPA ID: CAC000065453
- Create Date: 2/18/1988
- Inactive Date: 10/25/2000
- TSD EPA ID: AZR000501510
- State Waste Code: 352
- State Waste Code Description: Other organic solids
- Method Description: Storage, bulking and/or transfer off-site - No on-site treatment or recovery
- Site Name: 1X Santa Fe Pacific Realty Company
- EPA ID: CAC000194768
- Create Date: 7/25/1989
- Inactive Date: 10/25/2000
- TSD EPA ID: AZR000501510
- State Waste Code: 352
- State Waste Code Description: Other organic solids
- Method Description: Storage, bulking and/or transfer off-site - No on-site treatment or recovery

Additional review of regulatory records is not recommended as these records are not reasonably ascertainable or anticipated to contain useful information. The information provided in this database is not indicative of a recognized environmental condition and no further action or investigation is recommended.

HHSS

The Historical Hazardous Substance Storage (HHSS) database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker. The HHSS database provides the following pertinent information:

- Date: 6/01/1888
- Facility Name: Santa Fe Land Improvement Comp
- Facility Address: 5200 East Sheila Street
- Container Type: Tank
- Year of MFG: 1979
- Year Installed: 1979
- Capacity (gallons): 1,000
- Repairs: None
- Stores: Waste
- Motor Vehicle Fuel/Waste Oil: No
- Container located on a farm: No
- Thickness: X inches
- Vaulting: Non Vaulted
- Walling: Unknown
- Material: Unknown
- Lining: Unknown
- Wrapping: Unknown
- Aboveground piping: Unknown
- Leak detection: None
- Chemical Composition of Substances currently stored in container: None

No further pertinent information was provided in this regulatory database listing. The information provided is not indicative of a recognized environmental condition and no further action or investigation is recommended.

LA HMS

The Los Angeles County Department of Public Works Hazardous Materials System (HMS) database is a list of sites That have or have had permits for industrial waste, underground storage tanks, or stormwater disposal. The LA HMS database provides the following pertinent information:

- Facility Address: 5200 Sheila Street

- File No: 013747
- File Name: Santa Fe Realty
- Status Code: Removal
- Status Description: Equipment Removed
- Permit No: 00005287T
- Permit Category: T
- Permit Category Description: Underground Storage Tank
- Permit Status Description: Equipment Removed

- File No: 041593
- File Name: Unified Western Grocers
- Status Code: Closed
- Status Description: Permit Closed
- Permit No: 000415912
- Permit Category: I
- Permit Category Description: Industrial Waste Permit
- Permit Status Code: Closed
- Permit Status Description: Permit Closed
- Permit Type: 01
- Permit Type Description: Operating Industrial Waste Permit - Local Sewer

- File No: 048124
- File Name: Unified Western Grocers
- Status Code: CLOSED
- Status Description: Permit Closed
- Permit No: CGI006760
- Permit Category: S
- Permit Category Description: Stormwater Permit

- File No: 064236
- File Name: Supervalu
- Status Code: Open
- Status Description: File Opened (no permit exists)

- File No: I16932
- File Name: Unified Western Grocers
- Status Code: Permit
- Status Description: Equipment Permitted
- Permit No: 000211946
- Permit Category: I

- Permit Category Description: Industrial Waste Permit
- Permit Status Code: Removal
- Permit Status Description: Equipment Removal
- Permit Type: 01 Permit Type Description: Operating Industrial Waste Permit - Local Sewer

No further pertinent information was provided in this regulatory database listing. Refer to Section 6.3 and Section 1.1 for further discussion of the former UST listed for the Project. .

HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated. The Hist. Tank database provides the following pertinent information:

- Facility Address: 5200 East Sheila Street
- Owner Name: Santa Fe Land Improvement Company
- No. of Containers: 1
- Owner Street: 3230 East imperial Highway
- County: Los Angeles
- Owner City: BREA
- Facility State: CA
- Owner State: CA
- Facility Zip: 90040
- Owner Zip: 92621

No other pertinent information was provided in this regulatory database listing. Refer to Section 6.3 for further discussion of the former UST listed for the Project.

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. The PRP database provides the following pertinent information:

- PRP Name: Certified Grocers
- PRP Address: 5200 Sheila Street
- Site Name: Casmailia Resources
- EPA_ID: CAD020748125
- Site Address: 539 San Ysidro Road, Casmalia, CA 93429
- Site ID: 0901257
- NPL Status: Currently on the Final NPL

No other pertinent information was provided in this regulatory database listing. The information provided is not indicative of a recognized environmental condition and no further action or investigation is recommended.

7.1.2 Off-Site Regulatory Database Review

Regulatory database listings which have a reasonable potential to impact the Project are discussed below. This determination is based on, but not limited to, factors such as the topographic gradient in relation to the Project, the estimated groundwater flow direction in the vicinity of the Project, the distance between the listed site and the Project, the type of site or materials involved, and/or whether a release to the environment is known or likely to have occurred.

California Water Service Co.	
Facility Address:	5243 Sheila Street East
Databases:	LUST, AST, CERS TANK, FINDS/FRS, HIST MANIFEST, LA HMS, HAZNET
Distance:	Adjacent
Direction:	Northeast
Estimated Groundwater Flow:	South
Relationship to Project:	Parallel to the Project
Release Reported:	Yes
Release Date:	1995
Contaminant(s) of Concern:	Gasoline
Media Impacted:	Soil
Regulatory Status of Release:	Completed - Case Closed
Regulatory Status Date:	1996
Other Significant Database Information:	Leak reported
Significant Information from Other Sources:	Not Applicable
Significant Factors:	Current regulatory status. Lack of reported groundwater contamination. Estimated direction of groundwater flow.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

So Cal Gas, Fluor Western, Inc., 1X 2500 South Atlantic Blvd Associates, Classic Distributing & Beverage GRP Inc., San Francisco Federal Savings & Loan, Fluor Corporation Disposal Site	
Facility Address:	2500 South Atlantic Blvd
Databases:	FINDS, Historical Manifest, Historical MLTS, LA-HMS, HAZNET, LA-SWF
Distance:	Adjacent
Direction:	West
Estimated Groundwater Flow:	South
Relationship to Project:	Away from the Project
Release Reported:	Yes
Release Date:	2/18/2016
Contaminant(s) of Concern:	Natural Gas

Media Impacted:	Vapor
Regulatory Status of Release:	Closed
Regulatory Status Date:	Closed
Other Significant Database Information:	RP states that due to a rupture in an 8" pipeline by a third party, a natural gas vapor release occurred. Corresponding agencies were on scene to assess the area and attempts to contain the release are in place. RP states that there is no threat to the public or environment. No reports of a vapor cloud. Investigation is underway. Updates will be provided if information becomes available.
Significant Information from Other Sources:	Not Applicable
Significant Factors:	Current regulatory status. Lack of reported soil or groundwater contamination.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

Commerce Petrofuel, LLC, Southland Fereal Enterprise	
Facility Address:	2445 Ralph Lieberman
Databases:	DELISTED TNK, CERS TANK, FINDS/FRS, LA HMS, LUST
Distance:	Approximately 240 feet
Direction:	Northeast
Estimated Groundwater Flow:	South
Relationship to Project:	Away from the Project
Release Reported:	Yes
Release Date:	1993
Contaminant(s) of Concern:	Gasoline
Media Impacted:	Aquifer used for drinking water supply
Regulatory Status of Release:	Open - Remediation
Regulatory Status Date:	2015
Other Significant Database Information:	LUST Cleanup site Action: Well Installation Workplan - Regulator Responded Date: 2018-01-15 Action: Corrective Action Plan / Remedial Action Plan Date: 2018-06-06 Action: Monitoring Report - Semi-Annually Date: 2018-07-15 Site has also had multiple violations but no reported releases with the violations.
Significant Information from Other Sources:	Not Applicable

Significant Factors:	Distance from the Project. Estimated direction of groundwater flow.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

There are no open release cases currently requiring active remediation located within 700 feet of the Project. Therefore, it is unlikely that this poses a significant environmental risk to the operators/occupants of the Project at this time.

7.1.3 Vapor Migration

Indoor air quality concerns are generally excluded from the scope of ASTM E1527-13 and this assessment. However, the migration of vapors caused by a release of hazardous substances or petroleum products to the environment can represent a recognized environmental condition in certain conditions.

For the purposes of this assessment, the potential for migrating vapors to represent a recognized environmental condition was evaluated using a limited screening method based on technical guidance documents from the US EPA and *ASTM E2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. In addition, screening tools created by regulatory agencies may be used to evaluate the significance of a release with respect to the vapor migration and/or vapor intrusion potential. EMG's vapor migration screening is not a human health risk assessment and is not intended to comply with regulatory requirements that might exist for the evaluation of vapor migration.

Based on the review of regulatory database records in Section 7.1.1 and 7.1.2, no vapor migration concerns were identified.

7.2 Local Agency Records

The following additional environmental records were reviewed to supplement the standard environmental record sources discussed in Sections 7.1.1 and 7.1.2.

Reasonably ascertainable records for the Project may be reviewed for evidence of recognized environmental conditions and other environmental concerns such as underground storage tanks, significant hazardous materials use, the presence of septic systems, and/or the presence of wells.

In the case of pending requests, upon receipt and review any significant information not identified through other sources will be provided to the Client.

Building Department	
Name of Agency:	City of Commerce Building and Safety Division
Contact Name/Telephone:	Domi Melendrez, Building Permit Technician / 323-887-4455
Review Method:	In person records review.
Records Date Back To:	1990 - Current
Summary of Records Reviewed:	General building permits for the Project including permits were on file, but they did not reveal any information or condition that could impact the environmental integrity of the Project.
Environmentally Significant Information:	No environmentally-significant information was identified.

Fire Department

Name of Agency:	Commerce Fire Department
Contact Name/Telephone:	Not applicable
Review Method:	A written request for information has been submitted. A response is currently pending.
Records Date Back To:	No records available
Summary of Records Reviewed	Not applicable
Environmentally Significant Information:	No environmentally-significant information was identified.

Planning/Zoning Department	
Name of Agency:	City of Commerce Planning Department
Contact Name/Telephone:	Erick Lopez, Planner / 323-722-4805
Review Method:	In person records review.
Records Date Back To:	Current
Current Zoning:	M2 - Heavy Industrial
Historical Zoning:	No historical zoning information was identified.
Environmentally Significant Information:	No environmentally-significant information was identified.

8.0 ASTM E1527 Non-Scope Considerations

The items discussed in this section are outside the scope of ASTM E1527-13. These are included at the discretion of the user based upon the scope of work.

8.1 Asbestos

In accordance with the scope of work, EMG performed a screening to document the presence of known and/or suspect asbestos containing materials (ACM) at the Project. This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition or renovation purposes. All materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication Managing Asbestos in Place (the "Green Book") are considered suspect.

Some non-friable building products, such as sheet vinyl floor tile, vinyl floor tile, floor tile mastic, asbestos-cement board, and roofing materials can still be manufactured with asbestos and installed in the United States. However, U.S. manufacturers have largely excluded asbestos fibers from their building products since 1981. In addition to a visual assessment, EMG reviewed provided documentation to determine if asbestos has been previously documented at the Project.

Suspect Asbestos Containing Materials		
Material	Friable	Condition
Roofing materials	No	Good
Wallboard/joint compound	No	Good
Vinyl composition tile	No	Good
Mastic	No	Good

Previously Identified Asbestos Containing Materials			
Material	Still Present	Friable	Condition
Sprayed-on fireproofing	NA	Yes	Unknown

Based on the scope of work, sampling of suspect asbestos containing materials was not performed. The Project currently maintains an Asbestos O&M Program prepared by EMG and dated October 19, 2011. Refer to Section 1.1 for further discussion.

8.2 Radon Gas

Radon originates from the natural (radioactive) breakdown of uranium in soil, rock, and water and is the second leading cause of lung cancer in the United States. Radon can move up through the ground and into living spaces through cracks and other holes in the foundation. The USEPA has developed the EPA Map of Radon Zones to assist National, State, and local organizations in implementing radon-resistant building codes. This map assigns each county in the U.S. to one of three zones based on radon potential. The USEPA uses a continuous exposure level of 4.0 pCi/L (picoCuries per liter of air) as an action level at which additional action is recommended.

The USEPA Radon Zones are defined as:

- Zone 1 (Highest potential) - Average indoor radon screening level greater than 4 pCi/L
- Zone 2 (Moderate potential) - Average indoor radon screening level between 2 and 4 pCi/L.
- Zone 3 (Lowest potential) - Average indoor radon screening level less than 2 pCi/L.

For the purposes of this assessment, the radon zone and the use of the Project have been used to determine the level of risk associated

with radon. However, the USEPA and the Surgeon General recommend testing all homes for radon, regardless of geographic location.

The property is located in USEPA Radon Zone 2.

Radon sampling was not performed based on the Scope of Work. No further action or investigation is recommended regarding radon.

8.3 Lead-Based Paint

All paint applied prior to 1978 is considered suspect. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. This screening approach does not comply with Requirements for Disclosure of Known Lead-Based Paint and/or Lead-Based Paint Hazards in Housing. This approach does not constitute a pre-occupancy survey or the basis of attainment of "Lead Free" certification.

Considering the date of construction (1957 and 1965), there is a potential that the paint at the Project is lead-based. The painted surfaces were observed to be in generally good condition, with no chipping, peeling, or cracking paint observed. Furthermore, the Project is not a residential use and there is no regulatory requirement to sample suspected lead-based painted surfaces at this time. Therefore, no samples were collected. EMG was provided a copy of a Lead-Based Paint Operations & Maintenance (O&M) Program for the Project, prepared by EMG and dated October 18, 2011. The program is properly designed to meet regulatory standards. No further action or investigation is recommended regarding lead-based paint.

8.4 Lead in Drinking Water

Lead is commonly used in household plumbing materials and water service lines. Exposure to lead in drinking water above the USEPA action level can result in adverse health effects in children and adults. Lead is rarely found in source water, but enters tap water through corrosion of plumbing materials. Homes built before 1986 are more likely to have lead pipes, fixtures and solder. The most common problem is with brass or chrome-plated brass faucets and fixtures which can leach significant amounts of lead into the water. The USEPA action level for lead-in-drinking water is 15 parts per billion (ppb).

According to information from the local water utility, the water supplied to the Project is within federal, state, and local drinking water quality standards. No further action or investigation is recommended regarding lead in drinking water at the Project.

8.5 Moisture Conditions

EMG performed a limited visual and olfactory assessment for evidence of moisture conditions in readily accessible interior areas of the Project. In addition, the Key Site Manager was interviewed regarding the presence of current and historical moisture conditions. This assessment was not designed to discover all areas which may be affected by moisture conditions. Rather, it is intended to provide an indication of significant moisture conditions observed during the site visit. Moisture conditions may be present in areas not observed, such as pipe chases, HVAC systems, and behind enclosed walls and ceilings. De minimis moisture conditions, such as small, isolated, water stains on ceiling tiles, and mildew at bathtubs and sinks are considered to be routine maintenance issues and are not addressed in this Report.

EMG did not observe visual or olfactory indications of significant moisture conditions in readily accessible interior areas of the Project. Furthermore, the Key Site Manager did not report any significant current or historical moisture conditions at the Project. No further action or investigation is recommended regarding moisture conditions at the Project.

8.6 Wetlands

For regulatory purposes under the Clean Water Act, wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas." A wetlands delineation is beyond the scope of this assessment. However, review of National Wetlands Inventory (NWI) data, provided by the PSR and/or the United States Fish and Wildlife Service, indicated the following:

Wetlands Review	
Project	Adjacent Properties
Review of the NWI data did not identify any wetlands.	Review of the NWI data did not identify any wetlands.

No wetlands were identified. No further action or investigation is recommended regarding wetlands.

8.7 Flood Zone

FEMA identifies flood hazards, assesses flood risks and partners with states and communities to provide accurate flood hazard and risk data to guide them to mitigation actions. Flood hazard mapping is the basis for the National Flood Insurance Program (NFIP) and flood insurance requirements. FEMA maintains and updates data through Flood Insurance Rate Maps (FIRMs) and risk assessments. FIRMs include statistical information such as data for river flow, storm tides, hydrologic/hydraulic analyses and rainfall and topographic surveys. Review of the FIRM available from the PSR and/or from the FEMA website indicated the following:

Flood Zone Map Review		
Map Date	Area	Project Flood Zone
September 26, 2008	Entire Project	Zone X (unshaded), minimal risk areas outside the one percent and 0.2 percent annual chance floodplains. No base flood elevations or base flood depths are shown within these zones.

The flood zone designation is provided for informational purposes only. A determination of the need for flood insurance is beyond the scope of this assessment.

9.0 Limitations, Key Terms, and References

9.1 Limitations

The opinions EMG expresses in this report were formed utilizing the degree of skill and care ordinarily exercised by any prudent Environmental Professional in the same community under similar circumstances. EMG assumes no responsibility or liability for the accuracy of information contained within this report that has been obtained from the Client or the Client's representatives, from other interested parties, or from the public domain. The conclusions presented represent EMG's professional judgment based on information obtained during the course of this assignment.

Factual information regarding operations, conditions, and test data provided by the Client or the Client's representative has been assumed to be correct and complete. The conclusions presented within this report are based on the data provided, observations made, and conditions that existed specifically on the date of the assessment.

EMG's ESA cannot wholly eliminate the uncertainty regarding the presence of recognized environmental conditions and environmental business risk. The report is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the Project. The report is limited in budget and scope. The nature of subsurface soil and ground water at the Project cannot be confirmed, given the limited budget and scope of this ESA. The report is not and should not be considered a warranty or guarantee about the presence or absence of environmental contaminants which might affect the Project. It should be understood that EMG's suggested remedy may be determined under time constraints or may be formed without the aid of engineering calculations, testing, exploratory probing, the removal of materials, or design. Furthermore, there may be other alternate or more appropriate schemes or methods to remedy the noted environmental conditions.

9.3 Key Terms

Business environmental risk - A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations. For the purposes of this assessment, a significant business environmental risk is both included in the agreed upon scope of work and requires further action at this time.

Controlled recognized environmental condition - A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Data gap - The lack of or inability to obtain information required by ASTM E 1527-13 despite good faith efforts is considered a data gap. A data gap is considered significant if it affects the ability of the environmental professional to identify recognized environmental conditions.

De minimis condition - A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

Environmental Professional - A person meeting the education, training, and experience requirements set forth in 40 CFR 312.10(b).

Historical recognized environmental condition - A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g. property use restriction, AULS, institutional controls, or engineering controls), at the time the Phase I ESA is conducted (e.g., if there has been a change in the regulatory criteria). If the EP considers this past release to be a REC at the time the Phase I ESA is conducted, the

condition shall be included in the conclusion section of the report as a REC.

Material threat - A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment.

Practically reviewable - Information that is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data.

Release - Any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant), with certain exclusions as defined in 42 U.S.C. 9601 (22).

Reasonably ascertainable - Information that is publicly available, obtainable from its source within reasonable time and cost constraints, and practically reviewable.

Recognized environmental condition - The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

Standard environmental record sources - Environmental records contained in various regulatory databases, with search distances defined by ASTM E1527-13, unless otherwise specified by client in the scope of work.

Standard historical sources - Reasonably ascertainable records, including aerial photographs, fire insurance maps, property tax files, recorded land title records, USGS topographic maps, local street directories, building department records, and zoning/land use records.

Appendix D: Questionnaires

PHASE I: KEY SITE MANAGER QUESTIONNAIRE

Name of person completing questionnaire: Khurram Kazmi with Steven Hutchinson

Association with property: EH&S Specialist

Length of association with property: 5 years

Are you a representative of the Owner?: Yes

Phone Number: 323-313-6694

Property Name: 5200 Sheila Street

EMG Project Number: 132423.18R000-004.135

Signature: _____ Date: _____

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any **yes or unknown responses** should be provided in the "Comments" column.

QUESTION		RESPONSE			COMMENTS
		Y	N	Unk	
1	Are the Property or any adjoining properties currently or previously in industrial use?		X		
2	Have the Property or adjoining properties currently or previously been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?			X	
3	Are there currently or previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Property?	X			Water treatment, diesel
4	Are there currently or have there been previously any industrial drums (typically 55 gallon) or sacks of chemicals located on the Property?	X			
5	Are there currently or previous any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Property?		X		
6	Are there currently or previously any pits, ponds, or lagoons located on the Property in connection with waste treatment or waste disposal?		X		
7	Are there any significant areas of stained soil on the Property (currently or previously)?		X		
8	Are there currently or previously any storage tanks (above or underground) located on the Property? If so, please indicate the material stored and if the tank is registered.	X			(2) 300-gallon diesel generators

QUESTION		RESPONSE			COMMENTS
		Y	N	Unk	
9	Are there currently or previously any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the Property or adjacent to any structure located on the Property?		X		
10	Are there currently or previously any flooring, drains, or walls located at the Property that are stained by substances other than water or are emitting foul odors?		X		
11	If the Property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system? Has the well been designated as contaminated by any government environmental/health agency?		X		
12	Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Property or any facility located on the Property?		X		
13	Have there been any environmental site assessments of the Property that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Property or recommended further assessment of the Property?		X		
14	Does the Property discharge waste water on or adjacent to the Property, other than storm water, into a storm water sewer system?		X		
15	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials been dumped above grade, buried, and/or burned on the Property?		X		
16	Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?			X	
17	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Property?			X	Likely given building age
18	Has there ever been any asbestos-containing materials testing conducted on the Property?			X	
19	Is there an Asbestos Operations and Maintenance (O&M) program in place at the Property?			X	Likely, but unable to locate for assessment
20	Is there now or has there ever been any lead-based paint (LBP) applications on the Property?			X	
21	Has there ever been lead-based paint testing conducted on the Property?			X	
22	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Property?			X	
23	Has the water at the Property ever been tested for lead?			X	
24	Has radon testing ever been conducted at the Property?			X	
25	Has any part of the Property ever contained visible mold growth?		X		
26	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s)?			X	

QUESTION		RESPONSE			COMMENTS
		Y	N	Unk	
27	Is there a Mold Operations and Maintenance (O&M) program in place at the Property?			X	
28	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of? If so, please provide details.			X	
29	Has fill dirt been brought onto the Property which originated from a contaminated site or is of an unknown origin?			X	
30	Is the Property or any portion of the Property located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species)?		X		
31	Have you been informed of the past existence of environmental violations with respect to the Property or any facility located on the Property?		X		
32	Are there any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the Property or any facility located on the Property?		X		
33	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances of petroleum products in, on or from the Property?		X		
34	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Property?		X		
35	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
Summarize historical Property use (when was the Property developed with the current improvements, what modifications have taken place, what was the Property used for prior to its current use)					
On the day of the site visit, provide EMG's Field Observer access to all of the available documents listed below.					
<ul style="list-style-type: none"> ▪ Previous Environmental Site Assessment and Compliance Audit reports ▪ Site plans, ALTA surveys, etc. ▪ Asbestos, Lead Based Paint, Mold Operations and Maintenance Programs (O&Ms) ▪ Environmental permits, including registrations for aboveground and underground storage tanks and registrations for underground injection systems ▪ Material Safety Data Sheets ▪ Hazardous waste generator notices or reports ▪ Community Right-to-Know Plan, Risk Assessments, Safety plans, SPCC plans, FRP Plans, etc. ▪ Reports regarding hydrogeological conditions on the Property or adjoining properties ▪ Notices from government agencies regarding past or current violations of environmental laws ▪ Environmental liens and recorded Activity and Use Limitations ▪ Geotechnical surveys 					

KEY SITE MANAGER – POC PRE-SURVEY QUESTIONNAIRE

Name of person completing questionnaire: Beth Ann Wolstenholme

Association with property: DUE DILIGENCE AND COMPLIANCE ASSOCIATE

Length of association with property: _____

Date: May 30, 2018

Phone Number: 267-620-3018

Property Name: Tier 1, Tier 2 and Tier 3 Properties

EMG Project Number: _____

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the “Comments” column.

Note: U/NR indicates “Unknown” or “No Response”. **– Please refer to historical ESA Phase I Report provided for each property.**

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1A.	Is the Project used for an industrial use?			X	– Please refer to historical ESA Phase I Report provided for each property.
1B.	Are any adjoining properties used for an industrial use?			X	– Please refer to historical ESA Phase I Report provided for each property.
2A.	To the best of your knowledge, has the Project been used for an industrial use in the past?			X	– Please refer to historical ESA Phase I Report provided for each property.
2B.	To the best of your knowledge, has any adjoining properties been used for an industrial use in the past?			X	– Please refer to historical ESA Phase I Report provided for each property.
3A.	Is the Project used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?			X	– Please refer to historical ESA Phase I Report provided for each property.
3B.	Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?			X	– Please refer to historical ESA Phase I Report provided for each property.
4A.	To the best of your knowledge, has the Project been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?			X	– Please refer to historical ESA Phase I Report provided for each property.
4B.	To the best of your knowledge, has any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?			X	– Please refer to historical ESA Phase I Report provided for each property.
5A.	Are there currently any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
5B.	To the best of your knowledge, have there been previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
6A.	Are there currently any industrial drums (typically 55 gallon) or sacks of chemicals located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
6B.	To the best of your knowledge, have there been previously any industrial drums (typically 55 gallon) or sacks of chemicals located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
7A.	Are there currently any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
7B.	To the best of your knowledge, have there been previously any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property– Please refer to historical ESA Phase I Report provided for each property..
8A.	Has fill dirt been brought onto the Project which originated from a contaminated site?			X	– Please refer to historical ESA Phase I Report provided for each property.
8B.	Has fill dirt been brought onto the Project which is of an unknown origin?			X	– Please refer to historical ESA Phase I Report provided for each property.
9A.	Are there currently any pits, ponds or lagoons located on the Project in connection with waste treatment or waste disposal?			X	– Please refer to historical ESA Phase I Report provided for each property.
9B.	To the best of your knowledge, have there been previously any pits, ponds or lagoons located on the Project in connection with waste treatment or waste disposal?			X	– Please refer to historical ESA Phase I Report provided for each property.
10A.	Is there currently, any stained soil on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
10B.	To the best of your knowledge, has there been previously any stained soil on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
11A.	Are there currently any registered or unregistered storage tanks (above or underground) located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
11B.	To the best of your knowledge, have there been previously any registered or unregistered storage tanks (above or underground) located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
12A.	Are there currently any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Project or adjacent to any structure located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
12B.	To the best of your knowledge, have there been previously any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Project or adjacent to any structure located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
13A.	Are there currently any flooring, drains, or walls located at the Project that are stained by substances other than water or are emitting foul odors?			X	– Please refer to historical ESA Phase I Report provided for each property.
13B.	To the best of your knowledge, have there been previously any flooring, drains, or walls located at the Project that are stained by substances other than water or are emitting foul odors?			X	– Please refer to historical ESA Phase I Report provided for each property.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
14A.	If the Project is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system?				\\N/A
14B.	If the Project is served by a private well or non-public water system, has the well been designated as contaminated by any government environmental/health agency?				\\N/A
15A.	Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Project or any facility located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
15B.	Have you been informed of the current existence of hazardous substances or petroleum products with respect to the Project or any facility located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
16A.	Are there any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the Project or any facility located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
16B.	Have you been informed of the past existence of environmental violations with respect to the Project or any facility located on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
16C.	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on or from the property?			X	– Please refer to historical ESA Phase I Report provided for each property.
16D.	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?			X	– Please refer to historical ESA Phase I Report provided for each property.
16E.	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?			X	– Please refer to historical ESA Phase I Report provided for each property.
17.	Have there been any environmental site assessments of the Project that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Project or recommended further assessment of the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
18.	Does the Project discharge waste water on or adjacent to the project, other than storm water, into a storm water sewer system?			X	– Please refer to historical ESA Phase I Report provided for each property.
19.	Does the Project discharge waste water on or adjacent to the project, other than storm water, or into a sanitary system?			X	– Please refer to historical ESA Phase I Report provided for each property.
20.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
21.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?			X	– Please refer to historical ESA Phase I Report provided for each property.
22.	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
23.	Has there ever been any ACM testing conducted on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
24.	Is there an asbestos Operations and Maintenance (O&M) program in place at the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
25.	Is there now or has there ever been any lead-based paint (LBP) applications on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
26.	Has there ever been LBP testing conducted on the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
27.	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
28.	Has the water at the Project ever been tested for lead?			X	– Please refer to historical ESA Phase I Report provided for each property.
29.	Has Radon testing ever been conducted at the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
30.	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of?			X	– Please refer to historical ESA Phase I Report provided for each property.
31.	Is the Project or any portion of the Project located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species, etc.)?			X	– Please refer to historical ESA Phase I Report provided for each property.
32.	Do you know or suspect that mold was or is present in the building(s) or HVAC system? - If “Yes”, proceed to question #33. - If “No”, skip question #33 and proceed to question #34.			X	– Please refer to historical ESA Phase I Report provided for each property.
33.	Are there reliable procedures that specify the actions (i.e. operations and maintenance) to be taken to prevent and/or respond to mold or mold producing problems?			X	– Please refer to historical ESA Phase I Report provided for each property– Please refer to historical ESA Phase I Report provided for each property..
34.	Is there a mold Operations and Maintenance (O&M) program in place at the Project?			X	– Please refer to historical ESA Phase I Report provided for each property.
35.	Is the HVAC system inspected at least annually?			X	– Please refer to historical ESA Phase I Report provided for each property.
36.	Have identified HVAC problems been corrected in a timely manner?			X	– Please refer to historical ESA Phase I Report provided for each property.
37.	Is there now, or has there ever been evidence of mold or mildew present at the building(s)? If so, when?			X	– Please refer to historical ESA Phase I Report provided for each property.
38.	Is there now, or has there ever been any water damage in the building(s), whether from flooding, plumbing, roof leaks, or other sources? If so, when?			X	– Please refer to historical ESA Phase I Report provided for each property.
39.	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s)?			X	– Please refer to historical ESA Phase I Report provided for each property.
Summarize historical Project use (when was the Project developed with the current improvements, what modifications have taken place, what was the Project used for prior to it's current use)					– Please refer to historical ESA Phase I Report provided for each property.

**ASTM E1527-13 USER QUESTIONNAIRE
 PHASE I ENVIRONMENTAL SITE ASSESSMENT**

EMG has been retained to conduct a Phase I Environmental Site Assessment (ESA) on your behalf as contacted in EMG Project # 1_____.18R The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM E1527-13 Scope of Work, we are required to ask the following questions to the User of the report seeking to fulfill the User Requirements of the Standard. Please complete and return this questionnaire to Eric Wagner via email at ewagner@emgcorp.com or via fax at 410-785-6220 (within two days of receipt).

Date: 5/23/18

Company name:	Blackstone		
Portfolio Name/Project #:	Project Glacier /		
Property City/State/Zip:	As identified under Exhibit "A" of client agreement		
Name of person completing questionnaire:	Aaron Goldstein	Phone Number:	+1 (646) 482-6144
Role/Title:	Analyst	Fax Number:	N/A
Length of association with property:	N/A	E-mail address:	Aaron.Goldstein@Blackstone.com
Please check one:	User: <input type="checkbox"/>	User Representative:	<input checked="" type="checkbox"/>

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column. Note: *U/NR* indicates "Unknown" or "No Response", and "N/A" indicates not applicable.

1	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
2	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
3	Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
4	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
5	Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
6	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
7	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
8 (a)	Do you know the past uses of the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
8 (b)	Do you know of specific chemicals that are present or once were present at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
8 (c)	Do you know of spills or other chemical releases that have taken place at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
8 (d)	Do you know of any environmental cleanups that have taken place at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
9	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

If you have access to any of the following helpful documents, please indicate them below and then send them to EMG via standard mail or e-mail/fax along with this questionnaire. Mailing address: 222 Schilling Circle, Suite 275, Hunt Valley, MD 21031

Helpful Documents to be forwarded EMG:

- Environmental site assessment reports (i.e., Phase I, Phase II, tank testing results, radon, lead paint, or asbestos testing, etc.)
- Environmental compliance audit reports; risk assessments; and recorded Activity and Use Limitations (AULs)
- Environmental permits (i.e., solid waste disposal, hazardous waste disposal, wastewater, NPDES, underground injection, etc.)
- Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs)
- Registrations for underground injection systems
- Material safety data sheets
- Community right-to-know plan
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans, etc
- Reports regarding hydrogeological or geotechnical conditions on the property and surrounding area
- Notices/correspondence from any agency relating to past/current violations of environmental laws, or liens encumbering the property
- Hazardous waste generator notices or reports
- Other:

RE: CITY DIRECTORY RESEARCH
5200 Sheila Street
5200 Sheila Street Commerce, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Executive Summary

Property Information:

Project Property: *5200 Sheila Street
5200 Sheila Street Commerce CA 90040*

Project No: *132423.18R000-004.135*

Coordinates:

Latitude: *34.001117*
Longitude: *-118.16792*
UTM Northing: *3,762,894.57*
UTM Easting: *392,143.72*
UTM Zone: *UTM Zone 11S*

Elevation: *152 FT*

Order Information:

Order No: *20180525058*
Date Requested: *May 25, 2018*
Requested by: *EMG, Inc*
Report Type: *Database Report*

Historicals/Products:

Aerial Photographs *Historical Aerials Photographs*
City Directory Search *CD - 1 Street Search*
ERIS Xplorer *[ERIS Xplorer - Interactive Viewer](#)*
Excel Add-On *Excel Add-On*
Fire Insurance Maps *US Fire Insurance Maps*
Physical Setting Report (PSR) *PSR*
Topographic Map *Topographic Maps*

Violations

Violation Date: 07-01-2016
Violation Division: Los Angeles County Fire Department
Citation: 19 CCR 6.95 25508(a)(1) - California Code of Regulations, Title 19, Chapter 6.95, Section(s) 25508(a)(1)
Violation Program:
Violation Source:

Returned to compliance on 11/06/2017. OBSERVATION: The Owner/Operator page has been submitted but facility marked "YES" for remote site storage even though facility does not have remote site to store hazardous waste.. CORRECTIVE ACTION: Correct the Owner/Operator page and submit electronically in the California Environmental Reporting System (CERS).

Violation Description:

Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Admin Agency:	LACoFD Health Haz-Mat		
Notification Area:	DFG-OSPR,DTSC,RWQCB,US EPA,USFWS,AIR RESOURCES BD,DOG,SFM,Co/WP,Co/Hlth,Co/E-Hlth		
Location:	2500 South Atlantic Blvd		
Description:	RP states that due to a rupture in an 8" pipeline by a third party, a natural gas vapor release occurred. Corresponding agencies were on scene to assess the area and attempts to contain the release are in place. RP states that there is no threat to the public or environment. No reports of a vapor cloud. Investigation is underway. Updates will be provided if information becomes available.

HW

Violation Source:

CERS

Violation Notes:

Returned to compliance on 05/08/2017.

Violation Description:

Failure to inspect hazardous waste tanks at least once each operating day for the following, when present:

- (1) Discharge control equipment (e.g., waste feed cutoff systems, by-pass systems, and drainage systems) to ensure that it is in good working order;
- (2) Data gathered from monitoring equipment (e.g., pressure and temperature gauges) to ensure that the tank is being operated according to its design;
- (3) The level of waste in the tank.

Violation Division: Los Angeles County Fire Department
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Program:

HW

Violation Source:

CERS

Violation Notes:

Returned to compliance on 10/05/2016. OBSERVATION: Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or release of hazardous waste to air, soil, or surface water which could threaten human health or the environment. Observed unmanaged oil spills inside the secondary containment of the used oil area. CORRECTIVE ACTION: Immediately [fix leak, clean stains, etc.], and manage according to Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed by 10/26/16.

Violation Description:

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violations

Violation Date: 10-24-2014
Violation Division: Los Angeles County Fire Department
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Program:
Violation Source:

Violation Notes:
Returned to compliance on 09/30/2016. OBSERVATION: A review of record indicated this facility does not have a federal EPA ID number to manage federally-regulated hazardous waste. A review of the manifest#007781001 indicated 55 gallon of paint waste D001 was disposed using a California EPA ID CAL00138067 on July 21, 2014. CORRECTIVE ACTION: Obtain a Federal EPA ID if your business generates more than 100 kg per month of a federally-regulated waste. (Useful conversion: 100 kg is about 220 pounds which is about 27 gallons of liquid.) Please call (415) 495-8895 or go to <http://www.epa.gov/Region9/waste/epanums.html> to get information on federal ID numbers.

Returned to compliance on 10/24/2014. Failed to provide weekly inspection logs of HW

Violation Description:

Failure to inspect hazardous waste storage areas at least weekly.

Violations

Violation Date: 10-23-2014 **Violation Program:**
Violation Division: Los Angeles County Fire Department **Violation Source:**
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 03/04/2016. OBSERVATION: Facility installed a new waste oil(s) tanks in 2014 and removed two waste oil tanks but failed to update site map as to the proper orientation of the tank. CORRECTIVE ACTION: Complete an accurate site map and place in revised SPCC plan and amendment.

Violation Description:

Failure to complete and electronically submit a site map with all required content.

Violations

Violation Date: 07-25-2013 **Violation Program:**
Violation Division: Los Angeles County Fire Department **Violation Source:**
Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Notes:

Returned to compliance on 10/24/2014. Failed to provide daily inspection logs for HW tanks

Violation Description:

Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment:
 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order;
 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste;
 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design;
 4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and
 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

Violations

Violation Date: 10-24-2014 **Violation Program:**
Violation Division: Los Angeles County Fire Department **Violation Source:**
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Notes:

Returned to compliance on 09/30/2016. OBSERVATION: The Owner/Operator failed to properly train personnel who handle hazardous waste. All employees shall be trained within six months of assignment and take part in an annual review of the initial training received. At a minimum, the training program shall be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment, and emergency systems, including where applicable: 1) procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment; 2) key parameters for automatic waste feed cut-off systems; 3) communications or alarm systems; 4) response to fires or explosions; 5) response to ground-water contamination incidents; and 6) shutdown of operations. The owner or operator shall

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

maintain the following documents and records at the facility: 1) the job title for each position at the facility related to hazardous waste management, [Truncated]; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure to obtain and/or maintain an Active EPA ID.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 03/04/2016. OBSERVATION: No periodic testing for underground diesel fueling tanks Lot 7, storm water -waste oil skimmer to storage tank lot 7 fueling area, Crane waste oil 2000 gal tank or ~1000 gal tank near truck wash area. CORRECTIVE ACTION: Provide integrity testing or inspection results for all tanks containing APSA / SPCC regulated petroleum products. Provide evidence of integrity testing for all buried piping transferring petroleum products regulated under the SPCC.

Violation Description:

Failure to perform periodic integrity and leak testing of buried piping.

Violations

Violation Date: 10-23-2014
Violation Division: Los Angeles County Fire Department
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 03/04/2016. OBSERVATION: No integrity testing available for all regulated tanks for all tanks containing or storing petroleum products regulated under their APSA / SPCC program. Section 5.7.4 of the 06/2014 SPCC plan only states that "outside contractors can be hired to perform these tasks". No statement was made in the 06/2014 plan as to what standards would be used for the various tanks present on site. CORRECTIVE ACTION: Provide integrity testing or inspection results for all tanks containing APSA / SPCC regulated petroleum products.

Violation Description:

Failure to test or inspect aboveground tanks for integrity by a person qualified in accordance with industry standards.

Violations

Violation Date: 10-23-2014
Violation Division: Los Angeles County Fire Department
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 03/04/2016. OBSERVATION: Facility engineer attested to in the SPCC; that all tanks have been tested to applicable industry standards and that for the procedures for inspections in place but failed to document these standards within the plan. CORRECTIVE ACTION: PE to document relevant industry standards used to test all tanks containing petroleum products regulated under the APSA program.

Violation Description:

Failure to have a professional engineer certify and review the SPCC Plan.

Violations

Violation Date: 07-25-2013
Violation Division: Los Angeles County Fire Department
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Notes:

Returned to compliance on 10/24/2014. Failed to clean/maintain a secondary HW container

Violation Description:

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.

Violation Notes:

Returned to compliance on 10/24/2014. Failed to provide current manifest for HW

Violation Description:

Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violations

Violation Date: 10-24-2014

Violation Division: Los Angeles County Fire Department

Citation: 22 CCR 15 66265.193 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.193

Violation Notes:

Returned to compliance on 09/30/2016. OBSERVATION: Aerosol cans puncher for spray paint. Employees who handle universal wastes (UW) must be trained initially and annually thereafter. At a minimum, personnel who manage UW shall be trained and thoroughly familiar with proper universal waste management and emergency response procedures relative to those persons' responsibilities, including where applicable: 1) types and hazards associated with the UW managed at the facility; 2) proper disposition of UW managed at the facility (e.g. locations of UW containers, or location of centralized UW area); 3) proper procedures for responding to releases of UW including the position titles and the means of contacting those personnel at the facility who are designated to respond to releases; 4) labeling, collecting, handling, consolidating, and shipping UW at the facility, including, but not limited to the prohibition on the disposal of UW. The UW handler shall maintain a written record by date indication the names of [Truncated]; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure of the LQG and/or TP generator, on all new and existing hazardous waste tank systems and ancillary equipment, to meet the following secondary containment requirements:

- 1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and
- 2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed.
- 3) Constructed of or lined with materials that are compatible with the waste(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrological forces), physical contact with the waste to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation (including stresses from nearby vehicular traffic);
- 4) Placed on a foundation or base capable of providing support to the secondary containment system and resistance to pressure gradients above and below the system and capable of preventing failure due to settlement, compression, or uplift;
- 5) Provided with a leak detection system that is designed and operated so that it will detect the failure of either the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the existing detection technology or site conditions will not allow detection of a release within 24 hours;
- 6) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health or the environment, if removal of the released waste or accumulated precipitation cannot be accomplished within 24 hours.
- 7) Secondary containment for tanks shall include one or more of the following devices:
 - a) A liner (external to the tank); b) a vault; c) a double-walled tank; or d) an equivalent device as approved by the Department.
- 8) The secondary containment systems shall satisfy the following requirements:
 - a) External liner systems shall be designed or operated to contain 100 percent of the capacity of the largest tank within its boundary; or
 - b) Designed or operated to prevent run-on and infiltration of precipitation into the secondary containment system unless the collection system has sufficient excess capacity to contain run-on and infiltration. Such additional capacity shall be sufficient to contain run-on and infiltration of precipitation from a 25-year, 24-hour rainfall event;
 - c) Free of cracks or gaps; and
 - d) Designed and installed to completely surround the tank and to cover all surrounding earth likely to come into contact with the waste if released from the tank(s) (i.e., capable of preventing lateral as well as vertical migration of the waste).
- 9) Vault systems shall be:
 - a) Designed or operated to contain 100 percent of the capacity of the largest tank within its boundary;
 - b) Designed or operated to prevent run-on and infiltration of precipitation into the secondary containment system unless the collection system has sufficient excess capacity to contain run-on and infiltration. Such additional capacity shall be sufficient to contain run-on and infiltration of precipitation from a 25-year, 24-hour rainfall event;
 - c) Constructed with chemical-resistant water stops in place at all joints (if any);
 - d) Provided with an impermeable interior coating or lining that is compatible with the waste being transferred, stored or treated and that will prevent migration of waste into the concrete;
 - e) Provided with a means to protect against the formation of and ignition of vapors within the vault, if the w; Note: data in [Violation Description] field for some records is truncated from the source.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 03/04/2016. OBSERVATION: General containment not provided for 1,590 gallon diesel refueler that remains on site. Max height of bermed area ~ 4" by field measurement. According to Javier Noriega this tank is single walled and not double walled as described in the plan. Rainfall containment valve from containment area found open. Small spills noted from dispensing port. No secondary containment berm as described for occasional off-site mobile refueler(s). Only one noted on site in plan 06/2014 when two present. CORRECTIVE ACTION: Provide integrity testing or inspection results for all tanks containing APSA / SPCC regulated petroleum products. Provide adequate secondary containment for this and all mobile / portable storage tanks.

Violation Description:

Failure to provide adequate secondary containment, or no secondary containment for mobile or portable storage tanks.

Violations

Violation Date: 10-24-2014 **Violation Program:**
Violation Division: Los Angeles County Fire Department **Violation Source:**
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Notes:

Returned to compliance on 10/24/2014. Observation: 1-accumulation of crystalized spills on the ground next to the Diesel Exhaust Fluid containers in Lot 7. 2-oily debris/dirt accumulation on the ground along the fence near the dumpster at the truck repair area. Corrective action: Properly clean and maintain the facility in timely manner to prevent release into the environment. 22CCR15 66265.31/ 40CFR1 265.31

Violation Description:

Failure to meet the following requirements of excluded recyclable materials:

- 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed,
- 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed,
- 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks,
- 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity,
- 5) The material is recycled within the applicable generator accumulation time,
- 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes,
- 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste,"
- 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil",
- 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and
- 10) The material shall be stored and handled in accordance with all local ordinances and codes.

Site History:

FROM THE CORPS PUBLIC GIS SYSTEM: Property Description - The 91.48-acre site, acquired in 1943 for an Army air field, is located in Bell, California, immediately east of 1-710 (Long Beach Freeway) and 0.5 mile south of 1-5 (Santa Ana Freeway). In 1972, the property was transferred from GSA to the USPS. The method of transfer required that the USPS would have to reimburse GSA either in funds or by exchange of other USPS-owned property at fair market value. It appears that USPS paid fair market value for the land. None of the transfers mention restoration. The final transfer of 64.68 acres of land to the USPS was by letter dated 23 January 1976. The remaining 27 acres of the former Cheli AFS were transferred to the U.S. Army in 1974 for the Patton United States Army Reserve enter. Currently, approximately 27 acres remain the property of the Army Reserves. The remaining area is being owned and used by private interests and the Postal Service, who uses their property for a bulk mail handling facility.

Property History - The 91.48-acre site was acquired in 1943 for an Army air field, constructed for the US Army as Cheli Army Airfield. Real estate property responsibility transferred to U.S. Air force when the Air Force became separate branch. The Army transferred property to GSA 1961. GSA transferred property to U.S. Postal Service in 1976. Currently, approximately 27 acres remain the property of the Army Reserves. The remaining area is being owned and used by private interests and the Postal Service, who uses their property for a bulk mail handling facility.

Potential Contaminants:

TPH-MOTOR OIL
 TPH-DIESEL
 TRICHLOROETHYLENE (TCE)

Site History:

The area bounded by the Atlantic Avenue, Sheila Street, Washington Boulevard and Long Beach Freeway in the City of Commerce - CA, belongs to the GATWICK GROUP LLC COMMERCE and consists of 19 buildings and a few parking lots. The area is currently zoned as C/M1 and the immediate neighbors are C/M1, M2 and R2; Los Angeles River is 4,000 feet away.

Since the fifties several industrial facilities (including a former gas station, a former railroad and a former plugged oil well) were installed here doing all sorts of potentially polluting activities. Thereby is the site namely contaminated by leaks and spill of hazardous chemicals/waste. Also, 55-gallon drums of unknown material were left behind in the area. According to the "Summary of historical soil gas VOC data" made for the site by the TAIT Environmental, March 2012; Lead, VOCs as TPH, Chloro Compounds (1500 µg/L at 5 feet below the ground and TCE 540 µg/L at 40 feet below the ground as highest levels) and derivatives are distributed throughout the site.

Department of Toxic Substances Control (DTSC) and the property owner entered into a Voluntary Cleanup Agreement on 1/7/2014 for DTSC to oversee the investigation and any cleanup necessary at the site. DTSC has divided the investigation into two Operable Units (OUs); OU1 for the soil investigation at the Site and the OU2 for the groundwater beneath the Site.

To date, the site has gone through soil matrix, soil vapor and groundwater remedial investigation. DTSC has reviewed and commented on the remedial investigation reports. A Human Health Risk Assessment Report will be submitted to DTSC to assess risk to human health at the site. A new parcel of land has been added to the property and has been added to the current investigation. Groundwater is biannually sampled for monitoring and the movement of the plume.

Facility Information

TRICHLOROETHYLENE (TCE)

Site History:

The Univar USA, Inc. Jillson Street facility is a 6.8-acre property located in a mixed industrial, commercial, and residential area within the City of Commerce. From mid-1950 until 2002, the facility was used for the distribution of a wide range of chemicals (e.g., acids, alkalis, various organic chemicals, pesticides, and fertilizers). During this period of time, the property was owned by Mefford Chemical, Medford Chemical, McKesson Chemical, Van Waters and Rogers, Vopak USA, and Univar USA, Inc. The Van Waters and Rogers, and Vopak USA are subsidiary companies of Univar USA, Inc. Van Waters and Rogers/Vopak acquired the site from McKesson Chemical Company in October 1986. In October 2002, the site was sold to Boss Office Products, and is currently used for the storage of office furniture.

The site formerly contained 10 USTs. The solvent tanks were removed in 1980 and the fuel tanks were removed in 1985 under the oversight of Los Angeles County Department of Public Works. In August 1984, a DTSC permit was issued for a drum storage unit. This unit was certified closed by DTSC in June 2002. In 2001, during closure activities, DTSC discovered subsurface contamination. The primary chemicals of concern were determined to be perchloroethylene (PCE), trichloroethylene (TCE), and 1, 1 dichloroethylene (1, 1-DCE). The discovery of this contamination resulted in a Corrective Action Consent Agreement that was executed on February 14, 2002. Subsequent facility investigations conducted between 2001 and October 2002 identified a groundwater plume. Although the release of free-product was remediated as part of the USTs removal action, the soil remains contaminated due to the migration of soil gas containing VOCs/chlorinated hydrocarbons.

Within the framework of the Consent Agreement, the RFI is being implemented in phases. Phase I of the RFI encompassed investigations associated with the former clarifier and former RCRA Storage Area. The Phase II RFI included additional characterization of the vertical and horizontal extent of VOCs, an evaluation of ground water quality, and an assessment of hydrogeologic conditions at the site. Based on the investigation results, DTSC identified the need to evaluate off-site contamination in soil gas and groundwater. In 2003 and 2004 additional groundwater and soil-gas sampling was conducted as part of the RFI. Based on data collected by Univar through January 2004, PCE was determined to be the highest risk driver, as compared to the sampling results for TCE and 1, 1-DCE. The highest on-site PCE concentrations in soil gas (5,774 µg/l) were found at a depth interval of five feet below ground surface near the former solvent underground storage tanks area. The highest off-site PCE concentrations in soil gas (221 µg/l) were found near the intersection of Strong Avenue and Jardine Street at a depth of five feet below ground surface. The highest on-site concentrations of TCE and 1, 1-DCE in soil gas was 1448 and 298 µg/l, respectively. DTSC performed a screening-level risk assessment using the J&E model and data collected by Univar through January 2004.

The evaluation of subsurface vapor intrusion into buildings was performed based on conservative assumptions, and the modeling results indicated the possibility of a risk for residents along the western property boundary and workers in the West Warehouse. DTSC determined that further soil gas investigation needed to be performed. Based upon conclusions reached by technical support staff from HERD and GSU and in accordance with Health and Safety Code section 25249.6, a Proposition 65 notification was issued on May 7, 2004 by DTSC to the Los Angeles County Public Health Officer and the Board of Supervisors.

DTSC, through the assistance of US EPA, conducted initial screening indoor air sampling of 11 homes in Sept 2004. The overall objective of this contingency plan was to identify residences with elevated levels of indoor air contaminants. On February 14, 2005, Univar submitted the Soil Remediation - Vapor Monitoring Plan. This plan is for the purpose of monitoring the effectiveness of the operation of the SVET system. DTSC review and comments required revision of the plan. A revised plan, Soil Remediation - Vapor Monitoring Plan (revision 1), dated April 22, 2005 was submitted by Univar to DTSC.

On March 5, 2005, DTSC held a public meeting for the community surrounding the Univar Jillson Street site. The results of the September 2004 indoor air sampling were discussed as well as any questions posed by the community. Spanish translators were provided. The City of Commerce taped the meeting for airing on the local cable channel. In April 2005, construction of the Soil Vapor Extraction System was completed and startup testing began. The startup testing data will be used for the CEQA analysis and DTSC final approval of the interim measures.

On January 22, 2013, George Sylvester retired from Univar and Michael Gaudette took over as the Univar project manager.

Permitting

Site Code: 300410
Site Facility Type: CLOSED
 - PERMIT AUTHORITY: RCRA
Program Type: HAZARDOUS WASTE FACILITY
Assembly District: 58
Senate District: 32
Facility Type: HIST PERMITTED
Facility History:

The Univar USA, Inc. Jillson Street facility is a 6.8-acre property located in a mixed industrial, commercial, and residential area within the City of Commerce. From mid-1950 until 2002, the facility was used for the distribution of a wide range of chemicals (e.g., acids, alkalis, various organic chemicals, pesticides, and fertilizers). During this period of time, the property was owned by Mefford Chemical, Medford Chemical, McKesson Chemical, Van Waters and Rogers, Vopak USA, and Univar USA, Inc. The Van Waters and Rogers, and Vopak USA are subsidiary companies of Univar USA, Inc. Van Waters and Rogers/Vopak acquired the site from McKesson Chemical Company in October 1986. In October 2002, the site was sold to Boss Office Products, and is currently used for the storage of office furniture. The site formerly contained 10 USTs. The solvent tanks were removed in 1980 and the fuel tanks were removed in 1985 under the oversight of Los

Angeles County Department of Public Works. In August 1984, a DTSC permit was issued for a drum storage unit. This unit was certified closed by DTSC in June 2002. In 2001, during closure activities, DTSC discovered subsurface contamination. The primary chemicals of concern were determined to be perchloroethylene (PCE), trichloroethylene (TCE), and 1, 1 dichloroethylene (1, 1-DCE). The discovery of this contamination resulted in a Corrective Action Consent Agreement that was executed on February 14, 2002. Subsequent facility investigations conducted between 2001 and October 2002 identified a groundwater plume. Although the release of free-product was remediated as part of the USTs removal action, the soil remains contaminated due to the migration of soil gas containing VOCs/chlorinated hydrocarbons.

Within the framework of the Consent Agreement, the RFI is being implemented in phases. Phase I of the RFI encompassed investigations associated with the former clarifier and former RCRA Storage Area. The Phase II RFI included additional characterization of the vertical and horizontal extent of VOCs, an evaluation of ground water quality, and an assessment of hydrogeologic conditions at the site. Based on the investigation results, DTSC identified the need to evaluate off-site contamination in soil gas and groundwater. In 2003 and 2004 additional groundwater and soil-gas sampling was conducted as part of the RFI. Based on data collected by Univar through January 2004, PCE was determined to be the highest risk driver, as compared to the sampling results for TCE and 1, 1-DCE. The highest on-site PCE concentrations in soil gas (5,774 µg/l) were found at a depth interval of five feet below ground surface near the former solvent underground storage tanks area. The highest off-site PCE concentrations in soil gas (221 µg/l) were found near the intersection of Strong Avenue and Jardine Street at a depth of five feet below ground surface. The highest on-site concentrations of TCE and 1, 1-DCE in soil gas was 1448 and 298 µg/l, respectively. DTSC performed a screening-level risk assessment using the J&E model and data collected by Univar through January 2004.

The evaluation of subsurface vapor intrusion into buildings was performed based on conservative assumptions, and the modeling results indicated the possibility of a risk for residents along the western property boundary and workers in the West Warehouse. DTSC determined that further soil gas investigation needed to be performed. Based upon conclusions reached by technical support staff from HERD and GSU and in accordance with Health and Safety Code section 25249.6, a Proposition 65 notification was issued on May 7, 2004 by DTSC to the Los Angeles County Public Health Officer and the Board of Supervisors.

DTSC, through the assistance of US EPA, conducted initial screening indoor air sampling of 11 homes in Sept 2004. The overall objective of this contingency plan was to identify residences with elevated levels of indoor air contaminants. On February 14, 2005, Univar submitted the Soil Remediation - Vapor Monitoring Plan. This plan is for the purpose of monitoring the effectiveness of the operation of the SVET system. DTSC review and comments required revision of the plan. A revised plan, Soil Remediation - Vapor Monitoring Plan (revision 1), dated April 22, 2005 was submitted by Univar to DTSC.

On March 5, 2005, DTSC held a public meeting for the community surrounding the Univar Jillson Street site. The results of the September 2004 indoor air sampling were discussed as well as any questions posed by the community. Spanish translators were provided. The City of Commerce taped the meeting for airing on the local cable channel. In April 2005, construction of the Soil Vapor Extraction System was completed and startup testing began. The startup testing data will be used for the CEQA analysis and DTSC final approval of the interim measures.

Site History:

The Site is a slab on grade tilt up building comprised of about a 146,000 square foot structure located on a 255,101 square foot lot. The building is divided into different suites, used for warehousing and distribution. This Site is located near what was formerly the Cheli Air Force Base. To the west and south are the 710 Freeway and Los Angeles River. The nearest residential land use is on the opposite side of the Los Angeles River, about 0.25 miles from the site. Based on the information available to DTSC and Proponent, the Site is or may be contaminated with hazardous substances, including

LEAD

Site History:

The Site is approximately 300ft long by 65 ft wide, with three metal sheds and one office building. Railroad tracks are located directly adjacent to the south side of the property. The Site is located in an industrial area, surrounded by a battery manufacturing company, auto parts manufacturing company and metal industries. From 1946 to 1960 the Site was utilized for manufacturing lead oxide products. From 1984 to 1998, the Site was owned by Jesus R. Cabral & Maria Y. Cabral, who operated a roofing business on the property. In 2000, the property was leased to a tenant who used the property to store automotive products, such as brake pads & brake shoes. The property is currently not in use. The Site is currently owned by the Cabrals. Removal activities were recently performed at the Union Pacific Right-of-way area.

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)

Site History:

The Site comprises two parcels; Parcel D and Parcel E, located within the Bell Federal Service Center at 5600 Rickenbacker Road, Bell, California (see Figure 1). The total acreage of the Site is 13.049 acres. As presented in Exhibit A (see Appendix C), the parcel on the northern portion of the Site is designated Parcel D, covering 10.456 acres. This parcel is bounded by I Street to the North, 5th Street to the East, J Street to the South and Bldg #1101 to the west. The second parcel, located southwest relative to Parcel D is designated Parcel E, covering a total of 2.593 acres. Parcel E is broken into two sub parcels by a 22-foot wide strip with a perpetual easement in favor of the Federal Government. The sizes of the individual sub parcels are 2.385 acres (north) and 0.208 acres (south). The overall parcel is bounded by Building #1101 to the north, Building #2 to the east and K Street and the Long Beach Freeway to the southwest.

During the PEA, elevated levels of Arsenic and polynuclear aromatic hydrocarbons (PAHs) were detected up to depths of approximately 4 feet below ground surface, and therefore requires a removal action at the Site.

The removal action consists of excavation and offsite disposal of approximately 1000 Cubic Yards (approx. 70 truck loads) of soil contaminated with arsenic and PAHs. The Removal Action Workplan (RAW) was open for public comments from September 24, 2009 to October 26, 2009. Approximately four written comments from the community were received and DTSC is currently in the process of responding to these public comments in next few weeks.

Potential Contaminants:			

HYDROCARBON SOLVENTS
NICKEL

Site History:

The Site has historically been utilized as a plating facility from the 1960's through the 1980's. Premier Plating conducted a plating operation of chrome truck rims and bumpers for a period of four years. Hazardous substances such as chlorinated hydrocarbons and heavy metals were released into the soil. The release was presumably a result of on site activities. The Los Angeles Regional Water Quality & Control Board (LA-RQWB) provided oversight for sampling and remediation activities conducted at the site. Phase II work began in 1993 & concluded with a removal action in 1998. The LA-RWQB issued a "No Further Action" for soil investigation, for soil and clean-up investigation. However, PCE contaminated perched groundwater was identified @61 bgs. It appears that groundwater underlying the site may have not been adequately investigated.

TETRACHLOROETHYLENE (PCE)
TOTAL CHROMIUM (1:6 RATIO CR VI:CR III)
UNDER INVESTIGATION

Site History:

The Site historically used chemicals such as chromium and solvents in its operations. The facility uses heat treatment processing to alter materials such as metals and alloys. A Voluntary Cleanup Agreement has been executed for this Site to conduct soil and soil gas investigation and remediation. Investigations have identified elevated concentrations of volatile organic compounds (VOCs). Additional sampling was recently performed to delineate the contamination. Based on available data, remediation, such as soil vapor extraction, will be necessary to reduce contaminants to acceptable health risk levels.

Permitting

Site Code:	300488
Site Facility Type:	OPERATING PERMIT - PERMITTED ACTIVITIES: CONTAINER, OTHER TREATMENT, THERMAL UNIT - PERMIT AUTHORITY: Standardized
Program Type:	HAZARDOUS WASTE FACILITY
Assembly District:	63
Senate District:	33
Facility Type:	HIST PERMITTED
Facility History:	

QUARTERLY UPDATE

Quarterly Update Period: April through June 2017

Permit Maintenance: The facility is currently operating under a permit with an expiration date of 2/17/2019.

Facility Closure:

DTSC continued to review the revised Closure Plan submitted by David H. Fell on August 6, 2014. When the Closure Plan is determined to be complete, the facility will proceed with closure.

FACILITY DESCRIPTION/HISTORY

David H. Fell & Co., Inc. (DHF) is located in Bell, CA in the country of Los Angeles. The facility is located on land zoned "M" for manufacturing and is surrounded by mainly industrial facilities. The site is located approximately one mile northeast of the Long Beach Freeway (710). The Santa Ana Freeway (5) is located 0.7 miles northeast of the site. The nearest residential area is 2640 ft or 0.5 miles away. The property is approximately 60,750 square feet in size and is occupied by a masonry warehouse structure. Union Pacific Railroad which runs parallel to Randolph Street is located about 1 mile south of the facility and the Metrolink Railroad is located approximately 1/3 mile North of the facility.

David H. Fell is a precious metal recycling facility. DHF receives hazardous waste containing silver and other precious metals from off-site generators. The hazardous waste is analyzed in the DHF laboratory to determine its precious metals content. The waste is then processed to maximize the reclamation of precious metals.

PERMITTING REGULATORY DESCRIPTION/HISTORY

David H Fell (DHF) was first authorized to operate under a Series B Standardized Permit issued by DTSC on December 22, 1997 which expired on

December 22, 2007. A new Standardized Permit was issued to DHF on February 18, 2009. Since the permit was issued in 2007, DHF has made three Class 2 permit modifications. The first was processed in 2010 and was for changes to the storage areas. The second was processed in 2013 and was for changes to the locations of units and addition of a piece of equipment to the operation. The third was processed in 2014 and was for minor corrections to the operation plan and addition of a process stream to the evaporator unit.

On August 6, 2014, DTSC received notification of DHF's intent to close the facility, along with a revised closure plan. The Closure Plan has been under review by DTSC. When the closure plan is determined to be complete, DHF can proceed with the closure process.

There are currently no corrective action/cleanup activities being conducted by DTSC or the Regional Water Quality Control Board at the facility.

On May 16, 2015, DTSC approved a Class 1* Modification request to change the closure procedures for three units, #6-A V-Blender, #20 Gas Furnace and #3 Screener.

On July 22, 2015, DTSC acknowledged closure of units #6A V-Blender, #3 Screen and #20 Gas Furnace.

On April 15, 2016, DTSC acknowledged closure of units #2 Screen and #22 Gas Furnace.

David H Fell (DHF) was first authorized to operate under a Series B Standardized Permit issued by DTSC on December 22, 1997 which expired on December 22, 2007. A new Standardized Permit was issued to DHF on February 18, 2009. Since the permit was issued in 2007, DHF has made three Class 2 permit modifications. The first was processed in 2010 and was for changes to the storage areas. The second was processed in 2013 and was for changes to the locations of units and addition of a piece of equipment to the operation. The third was processed in 2014 and was for minor corrections to the operation plan and addition of a process stream to the evaporator unit.

On August 6, 2014, DTSC received notification of DHF's intent to close the facility, along with a revised closure plan. The Closure Plan has been under review by DTSC. When the closure plan is determined to be complete, DHF can proceed with the closure process.

There are currently no corrective action/cleanup activities being conducted by DTSC or the Regional Water Quality Control Board at the facility.

On May 16, 2015, DTSC approved a Class 1* Modification request to change the closure procedures for three units, #6-A V-Blender, #20 Gas Furnace and #3 Screener.

On July 22, 2015, DTSC acknowledged closure of units #6A V-Blender, #3 Screen and #20 Gas Furnace.

On April 15, 2016, DTSC acknowledged closure of units #2 Screen and #22 Gas Furnace.

Site History:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

The site is presently owned by Valley Plating Works, Inc. and the Commerce Refuse to Energy Authority (CREA), a joint powers authority between the City of Commerce and the County Sanitation District of Los Angeles. Valley Plating Works, Inc. owns 5900 Sheila Street and CREA owns 5926 Sheila Street. At one time, both parcels were owned by Crown Zellerbach Corporation, predecessor of Fort James Operating Company. Fort James Operating Company is now owned by Georgia Pacific Corporation.

The site is comprised of light industrial facilities and the Commerce Refuse to Energy Authority facility (CREF). The Site formerly operated as a plastics manufacturing facility from 1948 to 1981. It was subsequently occupied by industrial operators with similar operations. The CREA portion of the site was previously used as a parking lot. Crown Zellerbach Corporation owned the 5900 Sheila Street portion of the site from approximately 1951 until 1981. That portion of the site was occupied by Noble Mountain Tree Farms starting on October 29, 1981; by the Artcraft Paper Company starting on May 6, 1982; by Finn Industries, who occupied the building from 1982 to January 1992, and most recently, by Valley Plating Works Inc., who has owned and occupied 5900 Sheila Street from 1994 to the present. The 5926 portion of the site was not developed until the construction of the CREA facility starting in 1984.

The site is presently owned by Valley Plating Works, Inc. and the Commerce Refuse to Energy Authority (CREA), a joint powers authority between the City of Commerce and the County Sanitation District of Los Angeles. Valley Plating Works, Inc. owns 5900 Sheila Street and CREA owns 5926 Sheila Street. At one time, both parcels were owned by Crown Zellerbach Corporation, predecessor to For James Operating Company. Fort James Operating Company is now owned by Georgia Pacific Corporation.

The site is comprised of light industrial facilities and the CREA Facility. The site formerly operated as a plastics manufacturing facility from 1949 to 1981. It was subsequently occupied by industrial operators with similar operations. The CREA portion of the site was previously used as a parking lot. Crown Zellerbach Corporation owned the 5900 Sheila Street port of the site form approximately 1951 until 1981. That portion of the site was occupied by Noble Mountain Tree Farms starting on October 29, 1981; by the Artcraft Paper Company starting on May 6, 1982; by Finn Industries, who occupied the building form 1982 to January 1992, and most recently, by Valley Plating Works Inc., who has owned and occupied 5900 Sheila Street from 1994 to the present. The 5926 portion of the site was not developed until the construction of the CREA starting in 1984. Construction on the CREA began in 1985, and operation began in December 1986. The CREA converts approximately 360 tons of municipal waste into approximately ten mega-watts of electricity per day through an incineration process.

A Site Investigation was completed on February 2, 1999. Soil gas survey and soil sampling conducted at the Site indicated that alcohol, total petroleum hydrocarbon (TPH), volatile organic compounds (VOCs) and some metal compounds are present at certain locations within the property. These locations were associated with former underground tank locations, chemical storage areas, chemical processing areas, designated industrial sumps, pits, clarifiers, trench areas and sewer pipeline alignments.

Groundwater data indicates that groundwater beneath the site is currently impacted by trichloroethylene (TCE), tetrachloroethene (PCE), 1,1-dichloroethane (1,1-DCA), 1,1 dichloroethene (1,1-DCE). Some of these chemically affected areas, such as an area surrounding former monitoring well MW-2 (decommissioned in 1994) were mitigated to a degree by previous soil removal actions. These results also indicated that the perched ground water found in a limited area in the upper 50 feet near piezometer P-2 has been found to contain VOCs at concentrations greater than drinking water standards. Regional ground water is at approximately 104 feet below ground surface. Those VOCs are benzene, carbon tetrachloride, ethylbenzene, xylene, TCE, PCE, 1,1-DCA and cis-1,2,-dichloroethylene.

TCE concentrations in samples collected from wells MW-1 and MW-3 through MW-8 have fluctuated since the wells has begun (2003/2007). Overall, there has been a noticeable decline in concentrations of TCE in wells MW-1, MW-6, and MW-7. The presence of both increasing and decreasing VOC concentration trends observed on these wells suggests that an up-gradient off-site source(s) and an on-site source contribute to the VOCs concentration trends observed for wells MW-5 and MW-8. This assessment is supported by the presence of a changing spectrum of detected VOCs along the up-gradient boundary of the site (wells MW-3, MW-4, and MW-7). For example, Freon-12 has been detected in up-gradient wells MW-3 and MW-4 and in wells MW-1, MW-5, and MW-8, which are located cross-gradient to downgradient of wells MW-3 and MW-4. However, carbon tetrachloride has historically been detected only in the downgradient wells MW-5 and MW-8.

In up-gradient wells MW-3, MW-4, and MW-7, PCE concentrations are stable at non-detect (<5.0 µg/l) concentrations. In cross-gradient= to= downgradient= well= mw-5, between= june= 2011= and= may= 2017, pce= concentrations= has= declined= slightly= and= was= detected= below= the= laboratory= reporting= limit= since= december= 2015= sampling= event= well= mw-1= has= reported= low= pce= concentrations= or= non-detect= <5.0 µg/l)= results= since= december= 2012.= according= to= the= most= recent= groundwater= monitoring= results= (may= 2017), out= of= a= total= of= nine= wells= that= are= sampled= during= this= semi-annual= groundwater= monitoring= event, three= wells= (mw-3, mw-5, mw-9a)= at= the= southwest= portion= of= the= site= reported= presence= of= 1,1-dca.= however,= 1,1-dca= does= not= appear= to= be= from= any= potential= onsite= >5.0>

In June 2016, step and constant-rate hydraulic tests were conducted at well MW-9A to support the evaluation of a conceptual hydrogeological model for a portion of the site and evaluation of remediation options for groundwater impacted with VOCs related to the historic operations at the site. The effect of pumping on groundwater levels in surrounding area was recorded in observation wells MW-9B, MW-8, and MW-5 during pumping. The step-rate test was conducted at well MW-9A at pumping rate steps of approximately 5.2, 10.2, 15.0, and 13.1 gallons per minute (gpm). The constant-rate testing was conducted at MW-9A for 28 hours with sustained pumping rate at approximately 7.5 gpm.

Based on the hydraulic testing data, the transmissivity was estimated to range from 493 to 2,491 ft²/day based on drawdown and recovery data collected during the pumping test. The saturated thickness of the aquifer was assumed to be 44.5 feet, resulting in bulk hydraulic conductivity values ranging from 11.1 to 56.0 ft/day. Storage coefficient values ranged from 0.066 to 0.17 indicating specific yield and storage coefficients of an unconfined aquifer

On June 9, 2017, DTSC approved an in-situ chemical oxidation (ISCO) pilot test work plan that will be conducted at the Site. This ISCO pilot study will consist of one injection well (IW-1) and one down-gradient groundwater extraction well (EW-1) pair to create a dynamic groundwater treatment zone by pumping groundwater from the extraction well, adding oxidant (sodium permanganate - NaMnO₄) into the extracted groundwater and then re-injecting the amended ground water to the impacted aquifer via the injection well.

<i>Map Key</i>	<i>Number of Records</i>	<i>Direction</i>	<i>Distance (mi/ft)</i>	<i>Elev/Diff (ft)</i>	<i>Site</i>	<i>DB</i>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

Injection of a chemical oxidant (sodium permanganate) into the subsurface is expected to reduce the VOC concentrations to an acceptable level and reduce the mobility of the VOCs through groundwater movement from the Site and its immediate surroundings to the south. Extraction of groundwater from a down-gradient location will capture VOCs in ground water by controlling and containing the movement of VOCs and the injected oxidant, and recirculation of treated ground water and oxidant replenishment will enhance the transport rate and direction of the injected oxidant. Existing monitoring wells within and down-gradient of the pilot test area will be used for performance monitoring during the pilot test.

Site History:

The property has been subjected to numerous environmental investigations and remedial actions since 1997. In August 2011, Phase I and Phase II Environmental Site Assessments were conducted at the property indicating the presence of residual, elevated concentrations of shallow metals contaminated soil under the southeastern portion of the site and residual, elevated concentrations of tetrachloroethene (aka perchloroethene aka PCE) and trichloroethene (aka TCE) degreasing solvents under the south-central portion of the site. Hazardous concentrations of barium, lead, and nickel were measured in soil boring at a depth of five feet. Maximum soil gas concentrations of PCE and TCE were measured at 180 and 210 ppbillion. In November 2011, a Human Health Risk Assessment (HHRA) was conducted by Environmental Health Decisions (EHD) on behalf of the City of Vernon Health Department, indicating elevated concentrations of metals (especially lead) present an unacceptable health risk that requires mitigation (i.e. excavation and offsite disposal) prior to site development. Elevated concentrations of volatile organic compounds especially PCE and TCE present an unacceptable health risk to potential future residential occupants and/or indoor commercial workers without implementing additional remedial or mitigation measures. Upon review of the HHRA conclusions and available remedial actions, the City of Vernon (owner) conducted discussions with the purchaser/developer of the subject property concerning acceptable remedial actions. A consensus was reached to implement excavation and offsite disposal of metals contaminated soil and treatment of elevated volatile contaminant concentrations by soil vapor extraction (SVE). In addition, the City of Vernon contracted with PIC to assess groundwater quality and other conditions from the three completed wells (VEW1, VEW2, and VEW3). The SVE system started in 2/2013. The City of Vernon and DTSC entered into a Voluntary Cleanup Agreement (VCA) in 8/2013 to oversee the cleanup and completion of the project. In 11/19/2013, DTSC and City of Vernon entered into an amended VCA to conduct investigation and Cleanup in three designated Operational Units (OUs). OU1 is a 2 acre portion in the southwest side of the property, intended for residential redevelopment. The remaining 8.5 acre of the property is designated as OU2. OU3 is the groundwater underlying OU2. On 1/10/2014, DTSC issued a No Further Action Determination letter for OU1. In 2015, OU2 was cleaned up up to the industrial scenario by the SVE system and the injection of the oxidizer in to the source area. Based on the approved Risk Assessment, DTSC determined that the site is cleaned up industrial level and a Land Use Covenant was recorded to restrict the land use. Thereafter, DTSC and City of Vernon entered in to an Operation and Maintenance Agreement, after DTSC approved the Cost Estimate for the long term operation and maintenance of the soil vapor barrier and the passive ventilation of the newly build commercial building at the Site. In early 2016, the industrial portion of the Former Thermador site was sold by City of Vernon to Golden Estate FC LLC c/o Amazon LAX6 Real Estate. the new property owner and DTSC entered into a new VCA in order for DTSC to oversee the modification and reconstruction of the operation and maintenance plan as part of the building needed to be redeveloped to meet the needs of the new property owner. City of Vernon continues to sample soil gas and indoor air as part of the long term operation and maintenance.

Potential Contaminants:

1,1,1,2-TETRACHLOROETHANE
 1,1,2,2-TETRACHLOROETHANE
 LEAD
 TRICHLOROETHYLENE (TCE)

Site History:

The Site is a 1.5 acre plastic recycling company that generates plastic scrap as a byproduct of their production process. Reprocessed polypropy, and polyethylene pellets are made from the scrap plastic. These pellets are then ground, or melted into Mud Flaps for trucks, and for other industrial products. The Site began operations in 1974 . In 1994, The EPA conducted a Preliminary Assessment, (PA). In the PA, during an onsite visit it was discovered that PCE was used to clean the machinery, and stored in drums. The PA concluded that the Site did not qualify for further remedial site assessment under CERCLA, and that No Further Federal Action, (NFFA) should be warranted. The DTSC recommends the EPA to conduct a Site Investigation, as a Preliminary Assessment was already done in 1994. Groundwater CoC is associated with the Site and potentially the Sites historical use. A Site Investigation would serve as a useful study to address the extent of the CoC's by surrounding Sites which may have also impacted regional groundwater.

Document Type: Site Screening
Doc Link:
Comments: The Department received a U.S. EPA PA report dated 5/2/1994. The site consists of approximately 2 acres. Joe's Plastics, a plastic recycler operated at the site since 1976. From 1966 to 1976 Calmec Manufacturing operated at the site. Small quantities of perchloroethene (PCE) are used to clean the machinery onsite, and the oil used in onsite machinery is periodically changed are the only hazardous wastes stored at the site. There is no evidence of a hazardous substances release that may constitute a threat to public health or the environment at the site. In addition, the site is a hazardous waste generator and holds the City of Vernon Hazardous Materials Permit. Therefore, the Dept. referred the site to the City of Vernon.

Site History:

Residentially and commercially developed before 1938 to the present. The western portion of the site, along Cudahy Avenue, has remained residentially developed. The eastern portion of the site, along Atlantic Boulevard, has been mixed commercially and residentially developed, with two service stations, a machine shop, a model maker, a restaurant and a comforter manufacturer. The central area of the sites was a wood finishing facility, including a spray booth and an auto repair facility. Four pole mounted transformers on site.

Comments:	The Department received a referral from the County of Los Angeles Fire Department dated August 3, 1994. The site is contaminated with PCE (100 ppm), PCBs (range to 1-81 ppm), and petroleum hydrocarbons (6400 ppm). The contaminated area is capped. There is a potential for groundwater contamination exists at the site because the depth to groundwater is approximately 70 feet. Due the evidence of contamination at the site, the Department

Estor/EPA ID: 60001596 **Funding:** SITE PROPONENT
Site Type: VOLUNTARY CLEANUP **County:** LOS ANGELES
Site Code: 301616 **Assembly District:** 58
Ntnl Priority List: NO **Senate District:** 32
Acres: 1.46 ACRES **Latitude:** 34.0151850092926
Special Program: **Longitude:** -118.173397813492
Address Desc: 1350,1362,1368 SOUTH EASTERN AVENUE
Address Desc 2: 1350,1362,1368 South Eastern Avenue
Clean Up Status: ACTIVE AS OF 12/12/2013
Clean Up Oversight Agencies:
School District:
Program Type: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY
Past Caused Contamination: METAL PLATING - OTHER
APN: 5241013016, 5241013017, 5241013018, 5241013019
Potential Media Affected: SOIL, SOIL VAPOR
Potential Contaminants:

TETRACHLOROETHYLENE (PCE)
TRICHLOROETHYLENE (TCE)

Site History:

The Site was occupied by Specific Plating, an electroplating company from the 1960s. DTSC conducted soil and soil gas sampling at the Site as part of a discovery project. Sampling data indicated elevated levels of volatile organic compounds. DTSC determined that additional sampling and remediation is required at this Site. The Site is undergoing litigation currently to identify the legal owner, causing a delay in evaluation and cleanup of the Site.

Site History:

The Site will be investigated under 710 Corridor SI grant during 15/16 FY. The Dunn Edwards site is located at 4885 E. 52nd Place, Vernon, California. The Dunn Edwards site occupies approximately 7.8 acres in an urban industrial area. The Dunn Edwards Corporation was founded in 1925 in Los Angeles and moved manufacturing operations to the site in approximately 1955 to keep up with the increased demand caused by the post-war economic expansion in the area. The original 5,000 ft2 manufacturing plant continued to expand across the site through the 1960s and 1970s until, due to lack of available on-site space, a new plant was constructed in Tempe, Arizona. In June 2011, the Dunn Edwards Corporation opened a new facility in Phoenix, Arizona where the majority of manufacturing operations were consolidated. As of March 2014, the only paint manufacturing operations being conducted at the Dunn-Edwards site were for the production of oil-based paints, which were being conducted within the Oil Plant at the central portion of the site. The remaining portions of the site were being used for administrative and storage activities As of April 2014, the site consisted of five primary areas including the Main Office building at the northwestern portion, the Lacquer Plant at the northern portion, the 4905 Former Lease Building at the north-central portion, the Oil Plant at the south-central portion, and the Water Plant at the southern portion. The site has been used for the manufacturing of lacquers, oil-based paints, and/or water based paints since approximately 1955. In addition, portions of the site were used for printing/decal, garment, and furniture manufacturing from approximately 1967 to 2007. Environmental investigations conducted at the site have identified elevated concentrations of volatile organic compounds (VOCs) in groundwater including, but not limited to trichloroethylene (TCE); tetrachloroethylene (PCE); 1,1,1-trichloroethane (TCA); benzene; toluene; methyl ethyl ketone (MEK); Ethylene glycol monobutyl ether (EGBE); acetone; and carbon disulfide.

CONSIGNEE REFUSED SEVERAL CARTONS DURING DELIVERY BECAUSE THEY WERE WET AND STAINED. THE CARTONS WERE RETURNED TO THE TERMINAL FOR INSPECTION AND ONE CARTON WAS FOUND TILTED. THE VALVES ON FOUR OF THE INNER CONTAINERS WERE APPARENTLY NOT PROPERLY SECURED ALLOWING THE LIQUID TO LEAK INTO THE BOX. THE SHIPPER WAS CONTACTED AND THE CONTAINERS HELD FOR DISPOSITION.

Container MATU 249437-7 was opened for inspection at the BNSF Railroad because it contained hazardous material. They removed seal # SPICT 732226 but noted that seal# MATU 123577 which was the seal of record was on the floor inside the container. BNSF rejected the load because of the seal discrepancy and because they discovered 2 boxes of fireworks had been ripped open in what we think was an attempt to pilfer. The SPICT seal is consistent with Shanghai Pudong International Container Terminal the terminal it came from in China therefore we assume the alleged attempt to pilfer took place before it left China. Matson sent the container to us for evaluation and correction. We opened the container and discovered a large inspection hole in the center of the plywood and blocking & bracing. Two of the cartons had been ripped open but the weight of the cartons above prevented removal of the roman candles. Matson contacted the consignee and they Fedexed 2 new cartons to us. We removed the blocking & bracing and the 2 cartons transferred the roman candles to the new cartons and replaced the blocking & bracing. Matson paid the trucker \$285.00 to round trip the container between BNSF and our yard and we charged \$285.00 to rework block & brace the load.

Recommend Actions Taken:

We suggested to Matson that they advise the shipper to cut smaller inspection holes in the plywood which are only slightly larger than the hazmat stickers. This would make it very difficult for anyone to rip open a carton in an attempt to pilfer and is all that the BNSF requires for inspection purposes.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Feb 6, 2018

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Feb 6, 2018

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Feb 6, 2018

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Apr 11, 2018

SEMS List 8R Archive Sites:

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Apr 11, 2018

Comprehensive Environmental Response, Compensation and Liability Information System -

CERCLIS

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 24, 2018

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jan 24, 2018

RCRA Generator List:

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 24, 2018

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 24, 2018

RCRA Conditionally Exempt Small Quantity Generators List:

[RCRA CESQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt Small Quantity Generators (CESQG) generate 100 kilograms or less per month of hazardous waste or one kilogram or less per month of acutely hazardous waste.

Government Publication Date: Jan 24, 2018

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 24, 2018

Federal Engineering Controls-ECs:

FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 20, 2016

Federal Institutional Controls- ICs:

FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Jan 20, 2016

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 8, 2017

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 20, 2018

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

LIEN on Property:

SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Apr 11, 2018

State

State Response Sites:

RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Sep 22, 2017

EnviroStor Database:

ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Dec 21, 2017

Delisted State Response Sites:

[DELISTED ENVS](#)

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Sep 22, 2017

Solid Waste Information System (SWIS):

[SWF/LF](#)

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: May 7, 2018

EnviroStor Hazardous Waste Facilities:

[HWP](#)

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jan 30, 2018

Land Disposal Sites:

[LDS](#)

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Dec 04, 2017

Leaking Underground Fuel Tank Reports:

[LUST](#)

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Apr 3, 2018

Delisted Leaking Storage Tanks:

[DELISTED LST](#)

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Apr 3, 2018

Permitted Underground Storage Tank (UST) in GeoTracker:

[UST](#)

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Mar 11, 2018

Proposed Closure of Underground Storage Tank Cases:

[UST CLOSURE](#)

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Jan 31, 2018

Historical Hazardous Substance Storage Information Database:

[HHSS](#)

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Aboveground Storage Tanks:

[AST](#)

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

Delisted Storage Tanks:

[DELISTED TNK](#)

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Mar 11, 2018

California Environmental Reporting System (CERS) Tanks:

[CERS TANK](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Mar 22, 2018

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Mar 22, 2018

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Sep 12, 2017

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2018

Deed Restrictions and Land Use Restrictions:

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jan 11, 2018

Voluntary Cleanup Program:

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Sep 7, 2017

GeoTracker Cleanup Sites Data:

[CLEANUP SITES](#)

A list of cleanup sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Apr 3, 2018

California Environmental Reporting System (CERS) Hazardous Waste Sites:

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Mar 22, 2018

Delisted California Environmental Reporting System (CERS) Tanks:

[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Mar 22, 2018

Historical Hazardous Substance Storage Container Information - Facility Summary:

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:

[INDIAN LUST](#)

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Dec 31, 2017

Underground Storage Tanks (USTs) on Indian Lands:

[INDIAN UST](#)

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Dec 31, 2017

Delisted Tribal Leaking Storage Tanks:

[DELISTED ILST](#)

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

Delisted Tribal Underground Storage Tanks:

[DELISTED IUST](#)

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

County

Alameda County - City of Berkeley CUPA Facilities:

[BERKELEY CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs at the City of Berkeley in Alameda County. This list is maintained by the Toxics Management Division at the City of Berkeley.

Government Publication Date: Feb 13, 2018

Alameda County - Hayward City CUPA List:

[HAYWARD CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Hayward City. This list is maintained by the Hayward City Fire Department.

Government Publication Date: Feb 23, 2018

Alameda County - San Leandro City CUPA Facilities List:

[SANLEANDRO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Leandro City, Alameda County. This list is made available by San Leandro City Environmental Services Section.

Government Publication Date: Aug 17, 2016

Alameda County - Union City CERS CUPA List:

[UNION CUPA](#)

A list of CERS registered facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. This list is made available by the City of Union Economic and Community Development Department.

Government Publication Date: Jan 18, 2018

Alameda County - Union City CUPA Facilities:

[UNION CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. This list is made available by the City of Union Economic and Community Development Department.

Government Publication Date: Jan 18, 2018

Alameda County LOP Sites List:

[ALAMEDA LOP](#)

A list of Leaking Underground Storage Tanks (LUST) facilities in Alameda County. This list is made available by Alameda County Department of Environmental Health (ACEH). ACEH implements a Local Oversight Program (LOP) under contract with the State Water Resources Control Board to provide regulatory oversight of the investigation and cleanup of soil and groundwater contamination from leaking petroleum USTs.

Government Publication Date: Jan 22, 2018

Alameda County UST List:

[UST ALAMEDA](#)

A list of all registered Underground Storage Tanks (USTs) in the County of Alameda. The list is made available by Alameda County Department of Environmental Health.

Government Publication Date: Jan 22, 2018

Alpine County CUPA List:

[ALPINE CUPA](#)

The Alpine County Health Department has been certified by Cal / EPA to implement the Unified program and maintains a list of Certified Unified Program Agency (CUPA) facilities.

Government Publication Date: Feb 24, 2015

Amador County CUPA List:

[AMADOR CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Amador County. This list is made available by Amador County Environmental Health Department which is the CUPA for Amador County and administers a consolidated hazardous materials program.

Government Publication Date: Mar 1, 2018

Butte County CUPA List:

[BUTTE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Butte County. This list is made available by Butte County Public Health Department, Environmental Health Division which was certified by the California Environmental Protection Agency as the CUPA for Butte County.

Government Publication Date: Dec 20, 2017

Calaveras County CUPA Facilities List:

[CALAVERAS CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Calaveras. This list is made available by Calaveras County Environmental Health Department which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Jan 31, 2018

Calaveras County Landfills List:

[CALAVERAS LF](#)

A list of landfills in Calaveras County. This list is made available by Calaveras County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jan 31, 2018

Calaveras County UST Remediation Sites:

[CALAVERAS LUST](#)

A list of Leaking Underground Storage Tank (LUST) facilities in Calaveras County. This list is made available by Calaveras County Environmental Health Department. Local Implementing Agency (LIA) provides oversight of site remediation with soil contamination while CalEPA - California Regional Water Quality Control Board - Central Valley Region oversees remediation of sites with groundwater contamination.

Government Publication Date: Jan 31, 2018

Calaveras County Underground Storage Tanks List:

[CALAVERAS UST](#)

A list of Underground Storage Tanks (UST) in Calaveras County provided by the Calaveras County Environmental Health Department.

Government Publication Date: Feb 2, 2018

Colusa County CUPA List:

[COLUSA CUPA](#)

A list of facilities associated with Business Plan and Hazardous Generator programs in the County of Colusa. This list is made available by Colusa County Environmental Health which was certified by the California Environmental Protection Agency as Certified Unified Program Agency for Colusa County.

Government Publication Date: Jan 31, 2017

Contra Costa County CUPA List:

[CONTRACO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Contra Costa. This list is made available by Contra Costa County which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Nov 20, 2017

Del Norte County CUPA Facility List:

[DELNORTE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Del Norte County. This list is made available by Del Norte County Environmental Health Division which is the designated CUPA for the county.

Government Publication Date: Jan 5, 2018

Delisted County Records:

[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: May 17, 2018

El Dorado County CUPA Facility List:

[ELDORADO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in El Dorado County. This list is made available by El Dorado County Department of Environmental Management - Hazardous Waste Division which is approved by CalEPA as CUPA for El Dorado County.

Government Publication Date: Mar 6, 2018

Fresno County CUPA/Solid Waste Programs Resource List:

[FRESNO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Fresno County. This list is made available by Fresno County Department of Environmental Health Division which is approved by Cal-EPA as CUPA for the County.

Government Publication Date: Oct 4, 2017

Glenn County CUPA List:

[GLENN CUPA](#)

The Glenn County Air Pollution Control District is the Administering Agency and the Certified Unified Program Agency (CUPA) for Glenn County with responsibility for regulating hazardous materials handlers, hazardous waste generators, underground storage tank facilities, above ground storage tanks, and stationary sources handling regulated substances.

Government Publication Date: Jan 16, 2018

Humboldt County CUPA Facility List:

[HUMBOLDT CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Humboldt County. This list is made available by Humboldt County Division of Environmental Health which is approved by the State Secretary for Environmental Protection as CUPA for the County.

Government Publication Date: Mar 5, 2018

Imperial County CUPA Facility List:

[IMPERIAL CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Imperial County. This list is made available by the California Department of Toxic Substances Control (DTSC) which is appointed as CUPA for Imperial County.

Government Publication Date: Feb 14, 2018

Inyo County CUPA Facility List:

[INYO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Inyo. This list is made available by the Inyo County Environmental Health Services Department which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Nov 28, 2017

Kern County - City of Bakersfield CUPA List:

[BKRSFIELD CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Bakersfield. This list is made available by the City of Bakersfield Fire Department.

Government Publication Date: Apr 9, 2018

Kern County CUPA List:

[KERN CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Kern. This list is made available by Kern County Environmental Health Services Department which has been certified by CalEPA to implement the Unified program as a CUPA for Kern County.

Government Publication Date: Dec 05, 2017

Kern County UST List:

[KERN UST](#)

A list of active and inactive Underground Storage Tanks made available by the Environmental Health Division of Kern County, California.

Government Publication Date: Dec 5, 2017

Kings County CUPA Facility List:

[KINGS CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Kings County. This list is made available by Kings County Department of Public Health which is appointed as CUPA for the county.

Government Publication Date: Dec 12, 2017

Lake County CUPA Facility List:

[LAKE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Lake County. This list is made available by Lake County Division of Environmental Health which is CUPA for the entire county.

Government Publication Date: Jan 2, 2018

Lassen County CUPA List:

[LASSEN CUPA](#)

The Environmental Health Program of Lassen County tracks Certified Unified Program Agencies (CUPA) facilities.

Government Publication Date: Jan 22, 2018

Los Angeles County - Burbank City CUPA List:

[BURBANK CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Burbank. This list is made available by the City of Burbank Fire Department.

Government Publication Date: Feb 15, 2018

Los Angeles County - El Segundo City Underground Storage Tanks List:

[UST ELSEGUNDO](#)

List of registered Underground Storage Tanks (USTs) in the City of El Segundo of Los Angeles County, made available by El Segundo City Fire Department.

Government Publication Date: Jan 17, 2017

Los Angeles County - Santa Fe Springs Underground Storage Tank:

[UST SANTAFESP](#)

A list of registered active Underground Storage Tanks (USTs) in the City of Santa Fe Springs. This list is made available by Santa Fe Springs Department of Fire-Rescue.

Government Publication Date: Jun 30, 2017

Los Angeles County - Santa Monica City Aboveground Storage Tank List:

[SANTAMON AST](#)

List of registered Aboveground Storage Tanks (ASTs) made available by the Santa Monica Fire Department in the City of Santa Monica of Los Angeles County, California.

Government Publication Date: Mar 13, 2017

Los Angeles County - Santa Monica City CUPA Facilities List:

[SANTAMON CUPA](#)

The Santa Monica Fire Department's office maintains a list of CUPA Facilities located in Santa Monica city.

Government Publication Date: Mar 23, 2017

Los Angeles County - Santa Monica City Hazardous Materials Facilities:

[SANTAMON HAZ](#)

A list of Hazardous Materials Facilities in the City of Santa Monica, Los Angeles county. This list is made available by Santa Monica Fire Prevention Division which has been designated as the CUPA for the City.

Government Publication Date: Mar 13, 2017

Los Angeles County - Santa Monica City Hazardous Waste Facilities:

[SANTAMON HW](#)

A list of Hazardous Waste Facilities in Los Angeles County, City of Santa Monica. This list is made available by Santa Monica Fire Prevention Division.

Government Publication Date: Mar 13, 2017

Los Angeles County - Santa Monica City Underground Storage Tank List:

[UST SANTA MONICA](#)

A list of registered active Underground Storage Tanks (USTs) in the City of Santa Monica made available by Santa Monica Fire Prevention Division.

Government Publication Date: Nov 16, 2017

Los Angeles County - Torrance City Underground Storage Tanks:

[UST TORRANCE](#)

A list of registered Underground Storage Tank (UST) sites in Torrance City of Los Angeles County. This list is made available by Torrance City Office of Clerk.

Government Publication Date: Mar 19, 2018

Los Angeles County - Vernon City CUPA List:

[VERNON CUPA](#)

The Vernon City Fire Department's office maintains a list of CUPA Facilities located in Vernon city.

Government Publication Date: Dec 11, 2017

Los Angeles County - Vernon City UST List:

[UST VERNON](#)

A list of Underground Storage Tanks (UST) in Vernon City provided by the Vernon City Fire Department.

Government Publication Date: Dec 11, 2017

Los Angeles County HMS List:

[LA HMS](#)

List of sites in the Los Angeles County Department of Public Works Hazardous Materials System (HMS) Database which have or have had permits for Industrial Waste, Underground Storage Tanks, or Stormwater in the county of Los Angeles.

Government Publication Date: Jan 25, 2018

Los Angeles County Long Beach UST List:

[UST LONGB](#)

List of registered Underground Storage Tanks (USTs) in the City of Long Beach, Los Angeles County, made available by the Long Beach Certified Unified Program Agency (CUPA). The Long Beach CUPA operates under oversight shared by the Long Beach Fire Department and Health Department.

Government Publication Date: Mar 15, 2017

Los Angeles County Solid Waste Sites:

[LA SWF](#)

List of permitted solid waste facilities, closed landfills, historical dumpsites and other solid waste sites in Los Angeles County, made available by the Department of Public Works in Los Angeles County.

Government Publication Date: Jan 25, 2018

Madera County CUPA Facility List:

[MADERA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Madera County. This list is made available by Madera County Environmental Health Department which is CUPA for the entire county.

Government Publication Date: Feb 22, 2018

Marin County CUPA List:

[MARIN CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Marin. This list is made available by Marin County which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Dec 14, 2017

Mariposa County CUPA List:

[MARIPOSA CUPA](#)

Mariposa County Health Department, Environmental Health Services, is certified by Cal-EPA as the Certified Unified Program Agency (CUPA) that administers specific hazardous materials/hazardous waste programs.

Government Publication Date: Oct 27, 2017

Mendocino County CUPA Facilities List:

[MENDOCINO CUPA](#)

A list of Certified Unified Program Agency (CUPA) facilities in Mendocino County. This list is made available by the Mendocino County Environmental Health Division.

Government Publication Date: Nov 27, 2017

Mendocino County UST List:

[MENDOCINO UST](#)

A list of facilities in Mendocino County with active Underground Storage Tanks (USTs). This list is made available by Mendocino County Environmental Health.

Government Publication Date: Mar 27, 2018

Merced County CUPA Facilities List:

[MERCED CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Merced. This list is made available by Merced County which has been certified by CalEPA to implement the Unified program as a CUPA for the entire county.

Mono County CUPA Facility List:

[MONO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Mono County. This list is made available by Mono County Environmental Health Department which has been certified by CalEPA to implement the Unified program as a CUPA for the entire county.

Government Publication Date: Jan 10, 2018

Monterey County CUPA Facility List:

[MONTEREY CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Monterey County. This list is made available by Monterey County Hazardous Materials Management Services which is designated as the CUPA in Monterey County.

Government Publication Date: Jan 9, 2018

Napa County LOP Site List:

[NAPA LOP](#)

A list of Local Oversight Program (LOP) and non-LOP sites in Napa County, including leaking underground storage tanks. This list is made available by the Napa County Environmental Health Division.

Government Publication Date: Jan 4, 2018

Napa County UST List:

[UST NAPA](#)

A list of all registered active Underground Storage Tanks (USTs) in the County of Napa. This list is made available by Napa County Environmental Health Division.

Government Publication Date: Jan 4, 2018

Nevada County CUPA Facility List:

[NEVADA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Nevada County. This list is made available by Nevada County Department of Environmental Health which is the CUPA for all cities and unincorporated areas within Nevada County.

Government Publication Date: Dec 15, 2017

Orange County - Anaheim City AST List:

[ANAHEIM AST](#)

List of Aboveground Storage Tanks (ASTs) in Anaheim City, Orange County made available by Anaheim Fire & Rescue.

Government Publication Date: Jul 21, 2017

Orange County - Anaheim City UST List:

[ANAHEIM UST](#)

A list of Underground Storage Tanks in Anaheim City, Orange County. This list is made available by Anaheim Fire & Rescue Department.

Government Publication Date: Jul 21, 2017

Orange County - Hazardous Waste Facilities:

[ORANGE HW](#)

A list of Hazardous Waste Facilities in Orange County. This list is made available by Orange County Environmental Health Department.

Government Publication Date: Mar 2, 2018

Orange County Aboveground Petroleum Storage Tank Listing:

[ORANGE AST](#)

A list of Aboveground Petroleum Storage Tank (APST) facilities inspected by Orange County Certified Unified Program Agency (CUPA) Under the Aboveground Petroleum Storage Act (APSA). This list is made available by the Environmental Health Division of Orange County Health Care Agency.

Government Publication Date: Mar 2, 2018

Orange County LOP Lead Cases List:

[ORANGE LOP](#)

The Local Oversight Program of the County of Orange provides regulatory cleanup oversight for cleanup of leaking underground storage tanks (USTs). This dataset is provided by the Orange County Health Care Agency.

Government Publication Date: Feb 5, 2018

Orange County Underground Storage Tanks Listing:

[UST ORANGE CNTY](#)

A list of registered Underground Storage Tank (UST) sites in Orange County. This list is made available by Orange County Health Care Agency (OCHCA), Environmental Health Division which oversees the underground storage tank inspection program in most of the cities of Orange County, with the exception of Anaheim, Fullerton, and Orange.

Government Publication Date: Mar 2, 2018

Placer County - City of Roseville CUPA Facilities:

[ROSEVILLE CUPA](#)

List of CUPA facilities for the City of Roseville, California. Maintained by the Roseville City Fire Department.

Placer County CUPA Facilities List:

[PLACER CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Placer County. This list is made available by Placer County Environmental Health which is designated CUPA for all areas of the county except for the City of Roseville.

Government Publication Date: Feb 6, 2018

Plumas County CUPA List:

[PLUMAS CUPA](#)

In Plumas County, the Environmental Health Department is the designated Certified Unified Program Agency (CUPA) that consolidates and coordinates administrative activities such as permits, inspections, and enforcement. CUPA Programs include Hazardous Materials Business Plan (HMBP), Underground Storage Tanks (USTs), Above Ground Storage Tanks (AGTs), Hazardous Waste Generators (HWG) and CAL-ARP.

Government Publication Date: Jan 31, 2017

Riverside County Local Oversight Program List:

[RIVERSIDE LOP](#)

A list of Leaking Underground Storage Tank (LUST) facilities in Riverside County. This list is made available by Riverside County Department of Environmental Health. Environmental Cleanup Program provides oversight of assessments and cleanups at properties that have been, or may have been, contaminated with hazardous substances from LUSTs or releases associated with other commercial/industrial use.

Government Publication Date: Feb 15, 2018

Riverside County Underground Storage Tanks List:

[UST RIVERSIDE](#)

A list of registered Underground Storage Tank (UST) sites in Riverside County. This list is made available by Riverside County Department of Environmental Health. The Hazardous Materials Management Branch (HMMB) regulates and oversees the inspections of constructions, repairs, upgrades, system operation and removal of UST systems.

Government Publication Date: Feb 15, 2018

Sacramento County Master Hazardous Materials Facility List:

[SACRAMENTO HAZ](#)

A list of Hazardous Materials Facilities in Sacramento County. This list is made available by Sacramento County Environmental Management Department which has been designated as the Certified Unified Program Agency (CUPA) for the County.

Government Publication Date: Feb 2, 2018

Sacramento Toxic Site Cleanup List:

[SACRAMENTO TOX](#)

Sacramento County Environmental Management Department (EMD)'s Toxic Site Cleanup List includes sites where unauthorized releases of potentially hazardous materials have occurred. The EMD's Site Assessment & Mitigation Program, also referred to as Toxic Site Cleanup Program, provides mandated regulatory oversight of the assessment and remediation of properties on which there has been a release of hazardous materials to soil and/or groundwater.

Government Publication Date: Feb 2, 2018

San Benito CUPA List:

[SAN BENITO CUPA](#)

List of Certified Unified Program Agency (CUPA) facilities made available by the San Benito County Environmental Health Department.

Government Publication Date: Jan 17, 2018

San Bernardino County CUPA List:

[SANBERN CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Bernardino County. This list is made available by San Bernardino County Fire Department which is the CUPA for all areas of the County except the city of Victorville.

Government Publication Date: Jan 23, 2018

San Diego County Hazardous Materials Management Division Database:

[SANDIEGO HAZ](#)

A list of facilities with Unified Program Facility Permit in San Diego County. This list has been made available by County of San Diego Environmental Health.

Government Publication Date: Apr 24, 2018

San Diego County Site Assessment and Mitigation Investigation Sites:

[SANDIEGO SAM](#)

List of sites which have undergone a Site Assessment and Mitigation investigation. This list is made available by the County of San Diego Department of Environmental Health.

Government Publication Date: Feb 15, 2018

San Diego County Solid Waste Facility List:

[SANDIEGO SWF](#)

A list of open and closed Solid Waste Facilities in the County of San Diego. The list is made available by San Diego County Department of Environmental Health.

Government Publication Date: Jan 9, 2018

San Diego County UST List:

[SANDIEGO UST](#)

A list of registered Underground Storage Tanks in the County of San Diego. The list is made available by the San Diego County Hazardous Materials Division.

Government Publication Date: Jan 15, 2018

San Diego County Local Oversight Program List:

[SAN DIEGO LOP](#)

A list of Underground Storage Tank (UST) release sites in the County of San Diego. This list is made available by San Diego County Department of Environmental Health.

Government Publication Date: Jan 11, 2018

San Francisco County Aboveground Storage Tanks List:

[SANFRAN AST](#)

A list of Aboveground Storage Tanks (ASTs) facilities inspected by San Francisco Department of Public Health's (SFDPH) Hazardous Materials and Waste Program. Aboveground storage containers or tanks include oil-filled equipment (such as hydraulic systems/reservoirs and heat transfer systems) which have a petroleum storage capacity of 55 gallons or greater.

Government Publication Date: Apr 20, 2018

San Francisco County CUPA Facilities List:

[SANFRAN CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Francisco County. This list is made available by San Francisco County Hazardous Materials and Waste Program which is the CUPA for all areas of the County.

Government Publication Date: Apr 20, 2018

San Francisco County LOP Sites:

[SANFRAN LOP](#)

A list of Underground Storage Tank (UST) release sites in the County of San Francisco. This list is made available by San Francisco County Department of Public Health Environmental Health Protection Branch.

Government Publication Date: Aug 8, 2017

San Francisco County UST List:

[SANFRAN UST](#)

A list of all registered Underground Storage Tanks (USTs) in the County of San Francisco. This list is made available by San Francisco County Environmental Health Division. The Hazardous Materials and Waste Program provides regulatory oversight for the construction, operation, repair and removal of USTs in San Francisco.

Government Publication Date: May 17, 2018

San Joaquin County Aboveground Tank List:

[SANJOAQUIN AST](#)

A list of Aboveground Storage Tanks (ASTs) inspected by San Joaquin County Environmental Health Department (SJCEHD) under Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Jan 29, 2018

San Joaquin County UST List:

[SANJOAQUIN UST](#)

A list of all registered Underground Storage Tanks in the County of San Joaquin. The list is made available by San Joaquin County Environmental Health Division.

Government Publication Date: Jan 29, 2018

San Joaquin Hazardous Waste Facilities:

[SANJOAQUIN HW](#)

A list of Hazardous Waste Facilities in San Joaquin County. This list is made available by San Joaquin County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jan 29, 2018

San Luis Obispo County CUPA Facilities List:

[SANLUI SOB CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Luis Obispo County. This list is made available by County of San Luis Obispo Environmental Health Services Division which has been designated as the CUPA for the County.

Government Publication Date: Feb 13, 2018

San Mateo County CUPA Facilities List:

[SANMATEO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Mateo County. This list is made available by San Mateo County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jan 29, 2018

San Mateo County LOP List:

[SANMATEO LOP](#)

A list of Leaking Underground Storage Tank (LUST) facilities in San Mateo County. This list is made available by San Mateo County Environmental Health Services Division.

Government Publication Date: Jan 3, 2018

Santa Barbara County Site Mitigation Unit (SMU) Master Site List:

[SANTA BARB SMU](#)

The Site Mitigation Unit Program (SMU) oversees the assessment and mitigation of hazardous substances releases that occur (which are not related with the Leaking Underground Fuel Tank Program). The SMU Master Site List is maintained by the Santa Barbara County Public Health Department Environmental Health Services Division.

Government Publication Date: Mar 6, 2018

Santa Clara County - City of San Jose Hazardous Material Facilities:

[SANJOSE HM](#)

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Jan 29, 2018

Santa Clara County - Gilroy City CUPA Facilities List:

[GILROY CUPA](#)

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Sep 13, 2017

Santa Clara County CUPA Facilities List:

[SANTA CLARA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental Health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: Jan 11, 2018

Santa Clara Historic Solvent Case Listing:

[SANTA CLARA HSOL](#)

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

Government Publication Date: Aug 22, 2016

Santa Clara Local Oversight Program Listing:

[SANTA CLARA LO](#)

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jun 14, 2017

Santa Cruz County CUPA Facility List:

[SANTACRUZ CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Cruz County. This list is made available by Santa Cruz County Environmental Health Services (EHS) Division which has been designated as the CUPA for the County.

Government Publication Date: Jul 25, 2017

Shasta County CUPA Facility List:

[SHASTA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Shasta County. This list is made available by Shasta County Environmental Health Division which has been designated as the CUPA for Shasta County by CalEPA.

Government Publication Date: Jan 24, 2018

Siskiyou County CUPA List:

[SISKIYOU CUPA](#)

The Hazardous Materials Management Group of Siskiyou County's Environmental Health Division Certified Unified Program Agency (CUPA) regulates underground tanks, hazardous materials (including but not limited to: hazardous substances, hazardous waste, and any material which a handler or the CUPA has reasonable basis for believing that it would be injurious to the health and safety of persons or harmful to the environment if released into the workplace or the environment.

Government Publication Date: Oct 7, 2016

Solano County CUPA List:

[SOLANO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Solano. This list is made available by Solano County Environmental Health Division which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Dec 14, 2017

Solano County Local Oversight Program List:

[SOLANO LOP](#)

A list of Leaking Underground Storage Tank (LUST) facilities in the Solano County. This list is made available by the Solano County Environmental Health Services. Since April 1993, the State Water Resources Control Board has contracted with the County of Solano to provide regulatory oversight for the cleanup of LUSTs under Local Oversight Program (LOP) contract.

Government Publication Date: Dec 14, 2017

Solano County Underground Storage Tanks List:

[SOLANO UST](#)

A list of registered Underground Storage Tanks (USTs) in the County of Solano made available by the Solano County Environmental Health Services Division. There are approximately 190 facilities throughout the county that are subject to the regulatory requirements of the UST program.

Government Publication Date: Dec 14, 2017

Sonoma County - Petaluma City CUPA Facilities:

[PETAL CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Petaluma City, as well as Closed files including pre-CUPA sites. This list is made available by Petaluma Fire Prevention Bureau which is the CUPA for Petaluma City in Sonoma County.

Government Publication Date: Jan 31, 2018

Sonoma County CUPA Facilities List:

[SONOMA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sonoma County. This list is made available by Sonoma County Hazardous Materials (HazMat) Division which has been designated as the CUPA for the County.

Government Publication Date: Jan 31, 2018

Sonoma County LOP Site List:

[SONOMA LOP](#)

A list of Leaking Underground Storage Tank (LUST) facilities in Sonoma County. This list is made available by Sonoma County Department of Health Services. Sonoma County Local Oversight Program (LOP) oversees the investigation and cleanup of fuel releases from underground storage tanks in all areas of the County with the exception of the Cities of Santa Rosa and Healdsburg.

Government Publication Date: Jan 4, 2018

Stanislaus County CUPA List:

[STANISLAUS CUPA](#)

The Environmental Resources Department of Stanislaus County maintains a list of Certified Unified Program Agency (CUPA) facilities.

Government Publication Date: Jan 24, 2018

Sutter County CUPA List:

[SUTTER CUPA](#)

A list of facilities associated with Aboveground Petroleum Storage Tank (APSA) regulation, Hazardous Materials Business Plan (HMBP) Program and Underground Storage Tank (UST) regulation of Certified Unified Program Agency (CUPA) programs in Sutter County. This list is made available by Sutter County Environmental Health Division which has been designated as the CUPA for the County.

Government Publication Date: Dec 19, 2017

Tehama County CUPA List:

[TEHAMA CUPA](#)

A list of registered Certified Unified Program Agency (CUPA) facilities made available by the Environmental Health Department of Tehama County.

Government Publication Date: Jan 26, 2018

Trinity County CUPA List:

[TRINITY CUPA](#)

On January 1, 2005, the Department of Toxic Substances Control (DTSC) was authorized by the California Environmental Protection Agency (Cal/EPA) as the Trinity County Certified Unified Program Agency (CUPA). This CUPA list was made available by the DTSC.

Government Publication Date: Jan 29, 2018

Tulare County CUPA List:

[TULARE CUPA](#)

The Certified Unified Program Agency (CUPA) unifies and consolidates under one roof the various requirements for businesses handling hazardous materials, generating or treating hazardous wastes, or operating aboveground or underground storage tanks. CUPA thereby enhances consistency, reduces duplication, and simplifies compliance for the regulated public. The Tulare County Environmental Health Division was certified as a CUPA in December, 1996.

Government Publication Date: Dec 21, 2017

Tuolumne County CUPA Facility List:

[TUOLUMNE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Tuolumne County. This list is made available by Tuolumne County Environmental Health which is the CUPA for all areas of the County.

Government Publication Date: Jan 22, 2018

Ventura County CUPA Facilities List:

[VENTURA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Ventura County. This list is made available by Ventura County Environmental health Division.

Government Publication Date: Dec 26, 2017

Ventura County City of Oxnard CUPA Facility List:

[OXNARD CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Oxnard City. This list is made available by Oxnard City Fire Department which is the CUPA for Oxnard City in Ventura County.

Government Publication Date: Dec 05, 2017

Ventura County Inactive Underground Storage Tanks Sites:

[UST VENTURA INACT](#)

A list of inactive Underground Storage Tank (UST) sites in Ventura County. This list is made available by Ventura County Environmental Health Division.

Government Publication Date: Feb 9, 2018

Ventura County Leaking Underground Fuel Tanks - Historic:

[VENTURA HLUFT](#)

A historical list of cleanup oversight of the Leaking Underground Fuel Tank (LUFT) program provided by Ventura County Environmental Health Division. All new and existing underground fuel storage tank releases are now referred to the Los Angeles Regional Water Quality Control Board.

Government Publication Date: May 31, 2008

Yolo County AST List:

[YOLO AST](#)

A list of registered Aboveground Storage Tank (AST) in Yolo County. This list is made available by Yolo County Department of Community Services, Division of Environmental Health.

Government Publication Date: Jan 26, 2018

Yolo County CUPA List:

[YOLO CUPA](#)

The Department of Community Services, Division of Environmental Health of Yolo County maintains a list of Certified Unified Program Agency (CUPA) facilities.

Government Publication Date: Jan 26, 2018

Yolo County UST List:

[UST YOLO](#)

A list of registered Underground Storage Tank (UST) sites in Yolo County. This list is made available by Yolo County Environmental Health Department which regulates the construction, operation, repair and removal of USTs throughout Yolo County.

Government Publication Date: Jan 26, 2018

Yuba County CUPA Facilities List:

[YUBA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Yuba County. This list is made available by Yuba County Environmental Health Division which is the CUPA for all areas of the County.

Government Publication Date: Feb 15, 2018

Yuba County UST List:

[YUBA UST](#)

A list of inactive UST sites, active UST sites and active UST tank information. This is provided by the Yuba County Environmental Health Department.

Government Publication Date: Jan 9, 2017

Alameda County - City of Livermore and Pleasanton CUPA Facilities:

[LIVERMORE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in City of Livermore and City of Pleasanton in Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 23, 2017

Alameda County - City of Livermore and Pleasanton UST List:

[LIVERMORE UST](#)

A list of registered Underground Storage Tank (UST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 23, 2017

Alameda County - City of Livermore and Pleasanton AST List:

[LIVERMORE AST](#)

A list of registered Aboveground Storage Tank (AST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 23, 2017

San Joaquin County LOP Sites List:

[SAN JOAQUIN LOP](#)

An archived list of Local Oversight Program clean-up sites in San Joaquin County. The program has since returned to the State of California's oversight. This list is made available by San Joaquin County Environmental Health Department (EHD).

Government Publication Date: Oct 30, 2017

San Joaquin County Solid Waste Facilities:

[SAN JOAQUIN SWF](#)

A list of Solid Waste Program Facilities in San Joaquin County. The list is made available by San Joaquin County Environmental Health Department.

Government Publication Date: Feb 6, 2018

Los Angeles County - City of Los Angeles UST List:

[UST LA CITY](#)

A list of active and inactive underground storage tank facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Apr 1, 2018

Los Angeles County - City of Los Angeles AST List:

[AST LA CITY](#)

A list of active and inactive above ground petroleum storage tanks made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Sep 01, 2017

Los Angeles County - City of Los Angeles Hazardous Materials Facilities:

[LA CITY HAZMAT](#)

A list of active and inactive hazardous materials facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Apr 1, 2018

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

Government Publication Date: Apr 17, 2018

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Dec 31, 2016

Hazardous Materials Information Reporting System:

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Dec 21, 2017

Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA of the Act) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

EPA Report on the Status of Open Dumps on Indian Lands:

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Jun 30, 2017

Hist TSCA:

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Oct 10, 2017

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Nov 18, 2016

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Sep 14, 2016

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Sep 14, 2016

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Nov 22, 2016

Material Licensing Tracking System (MLTS):

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Sep 13, 2016

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Jul 31, 2017

Alternative Fueling Stations:

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Apr 25, 2018

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 1, 2018

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 30, 2017

State

EnviroStor Inspection, Compliance, and Enforcement:

[INSP COMP ENF](#)

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Nov 24, 2017

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Jun 30, 2017

School Property Evaluation Program Sites:

[SCH](#)

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Sep 20, 2017

California Hazardous Material Incident Report System (CHMIRS):

[CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Aug 21, 2017

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

[SWAT](#)

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Hazardous Waste Manifest Data:

[HAZNET](#)

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:

[SWRCB SWF](#)

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Hazardous Waste and Substances Site List - Site Cleanup:

[HWSS CLEANUP](#)

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Feb 1, 2018

List of Hazardous Waste Facilities Subject to Corrective Action:

DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

Historical Hazardous Waste Manifest Data:

HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

Historical California Hazardous Material Incident Report System (CHMIRS):

HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Historical Cortese List:

HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

Drycleaner Facilities:

DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Jan 18, 2018

Delisted Drycleaners:

DELISTED DRYC

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jan 18, 2018

Waste Discharge Requirements:

WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Oct 3, 2017

Toxic Pollutant Emissions Facilities:

EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2015

Tribal

No Tribal additional environmental record sources available for this State.

County

Ventura County Inactive Hazardous Waste Sites:

[VENTURA IHW](#)

A list of Inactive Hazardous Waste Sites in Ventura County collected by Ventura County's Environmental Health Division.

Government Publication Date: Feb 9, 2018

Orange County Industrial Cleanup Program Cases Listing:

[ORANGE ICP](#)

Orange County Health Care Agency's Environmental Health Division has an Industrial Cleanup (IC) program which oversees the voluntary cleanup of contaminated property. This is a list of cases (by city) which the IC program has overseen in the past, or is currently overseeing.

Government Publication Date: Feb 5, 2018

Ventura County Hazardous Material Release (Prop 65) Sites:

[VENTURA HAZR](#)

A historic list of hazardous material releases from the Hazardous Material Release Report collected by the Environmental Health Division of Ventura County. As per the department this report contains records from 1987 to 2014.

Government Publication Date: 1987 - 2014

San Joaquin County Hazardous Materials Facilities List:

[SANJOAQUIN HM](#)

A list of Hazardous Materials Facilities in San Joaquin County. This list is made available by San Joaquin County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jan 29, 2018

Riverside County Hazardous Waste Generator Sites List:

[RIVERSIDE HWG](#)

A list of Hazardous Waste Generator Sites in the County of Riverside. This list is made available by Riverside County Department of Environmental Health which has been designated as the CUPA for the County.

Government Publication Date: Feb 15, 2018

Riverside County Disclosure Facility List:

[RIVERSIDE HZH](#)

A list of facilities disclosed to Riverside County Department of Environmental Health (DEH). This list is made available by Riverside County DEH which has been designated as the CUPA for the County. A business is required to establish and submit a Business Plan if the facility handles hazardous material equal to or greater than 55 gallons, 500 pounds or 200 cubic feet at any time during the year.

Government Publication Date: Feb 15, 2018

Los Angeles County Site Mitigation List:

[LA SML](#)

A Site Mitigation List in the County of Los Angeles. The list is made available by Los Angeles County Fire Department. Site mitigation is handled by the Site Mitigation Unit (SMU) which facilitates completion of site clean-up projects of contaminated sites in an expeditious manner in all cities of the Los Angeles County except El Segundo, Glendale, Long Beach, Santa Fe Springs, and Vernon.

Government Publication Date: Nov 30, 2017

San Joaquin County Site Mitigation List:

[SJ SML](#)

A list of Site Mitigation sites in San Joaquin County. The county's Site Mitigation Program includes: the permitting and inspection of well installations and destructions at all local, state, and federal assessment and cleanup sites, as well as the oversight of local cleanup of releases pursuant to California Health and Safety, Sections 5412 and 101480. Activities in this program are similar to those in the Local Oversight Program but are directed at cases that do not meet criteria for the LOP and are within the scope of Environmental Health Department (EHD) staff expertise. This list is provided by San Joaquin County EHD.

Government Publication Date: Oct 30, 2017

San Joaquin County Complaints and Incident Reports:

[SJ COMPLAINTS](#)

A list of sites associated with complaints received by San Joaquin County Environmental Health Department, including spill and release reports.

Government Publication Date: Feb 1, 2018

Placer County Site Mitigation List:

[PLACER SML](#)

A list of active and inactive Site Clean-up Mitigation facilities in Placer County, provided by the County's Health and Human Services Department. This is not a complete list of contaminated sites in Placer County.

Government Publication Date: Nov 07, 2017

Santa Cruz County Site Mitigation List:

[SC SML](#)

A list of Site Mitigation sites that may have become contaminated with toxic chemicals through illegal dumping or disposal, from leaking underground storage tanks, or through industrial or commercial activities. This list is provided by County of Santa Cruz Department of Environmental Health.

Government Publication Date: Sep 15, 2017

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Property Information

Order Number:	20180525058p
Date Completed:	May 27, 2018

Liability Notice.....	101

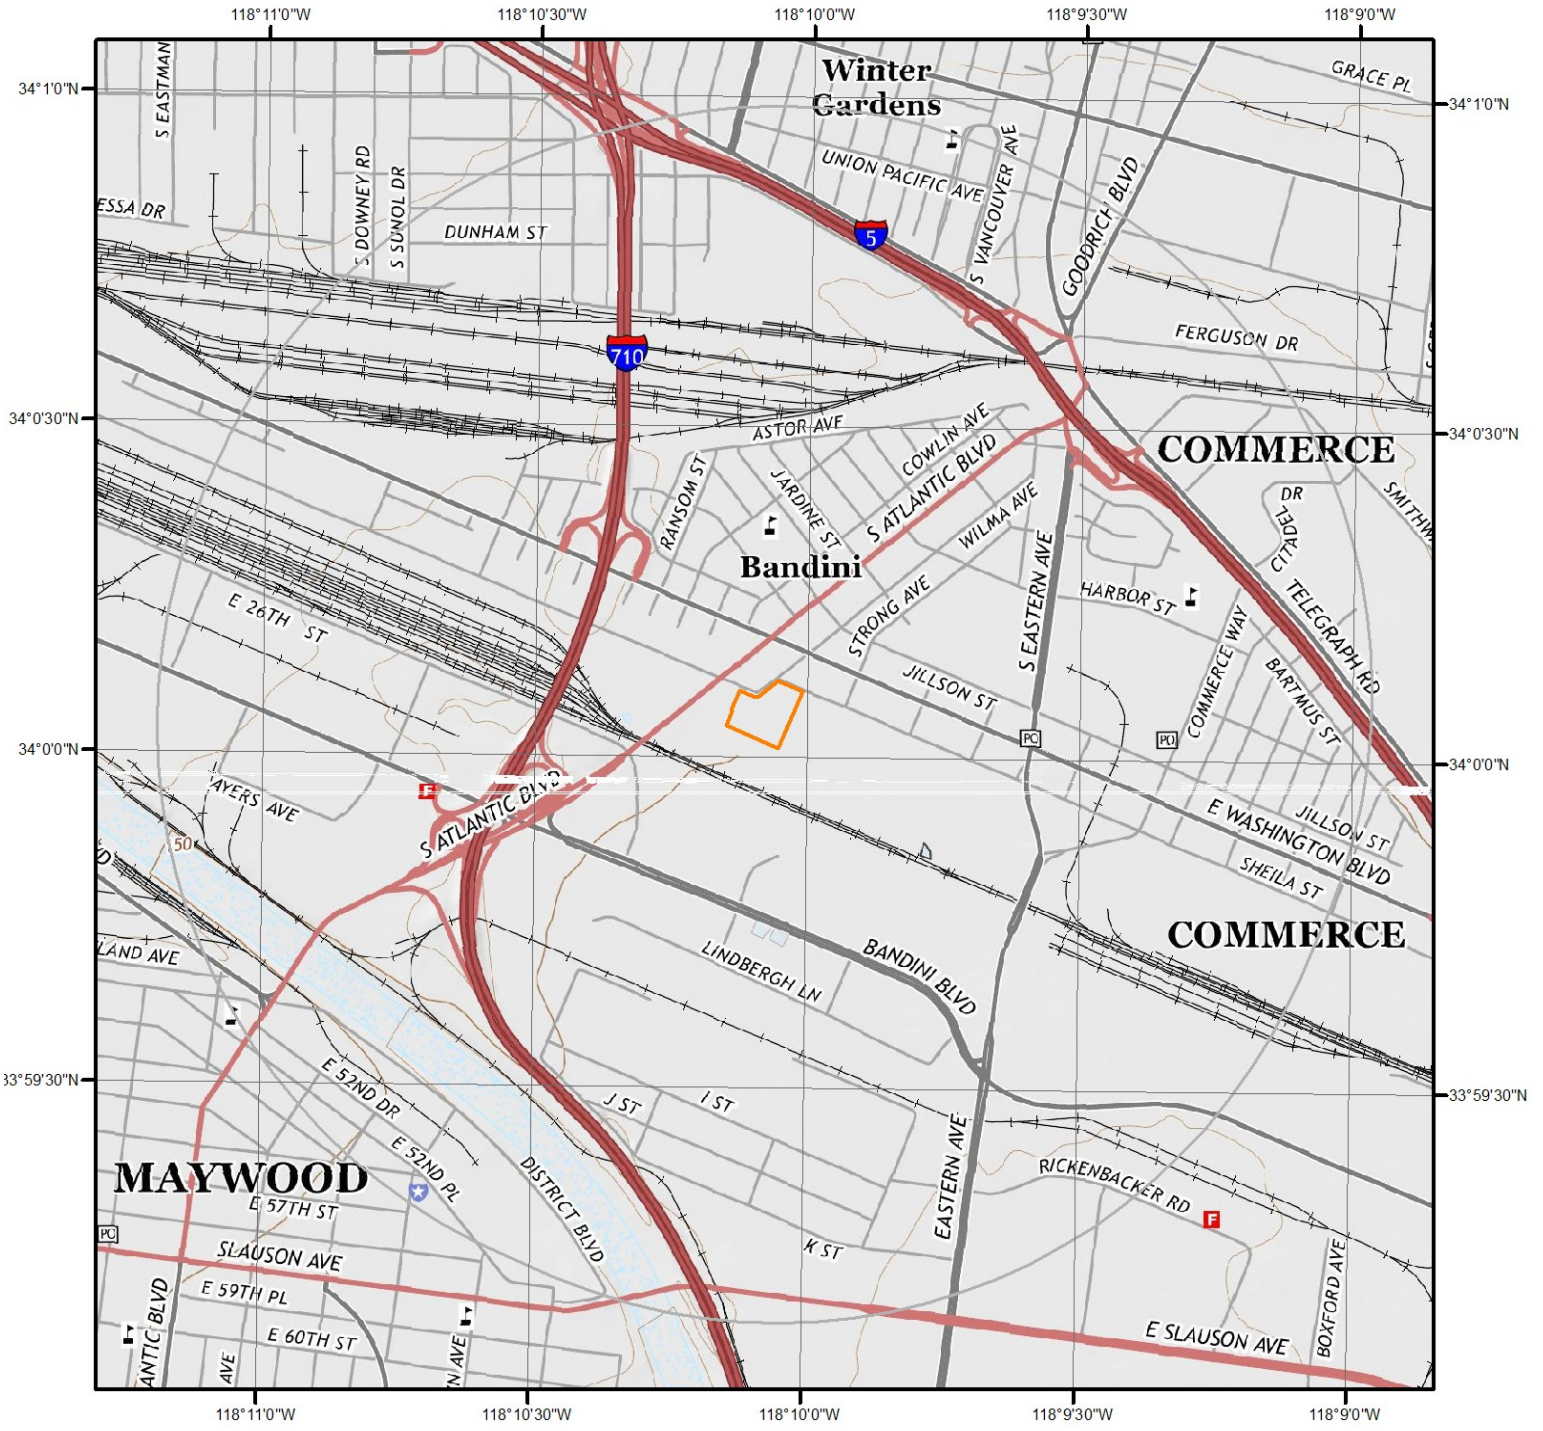

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information

Current USGS Topo

Quadrangle(s): Los Angeles, CA; South Gate, CA

Source: USGS 7.5 Minute Topographic Map

Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

Elevation: 152.29 ft
Slope Direction: S

The Wetland Type map shows wetland existence overlaid on an aerial imagery. The Flood Hazard Zones map shows FEMA flood hazard zones overlaid on an aerial imagery. Relevant FIRM panels and detailed zone information is provided below.

Available FIRM Panels in area: 06037C1810F(effective:2008-09-26) 06037C1643F(effective:2008-09-26)

Flood Zone X-12

Zone: X
Zone subtype: AREA OF MINIMAL FLOOD HAZARD

Geologic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

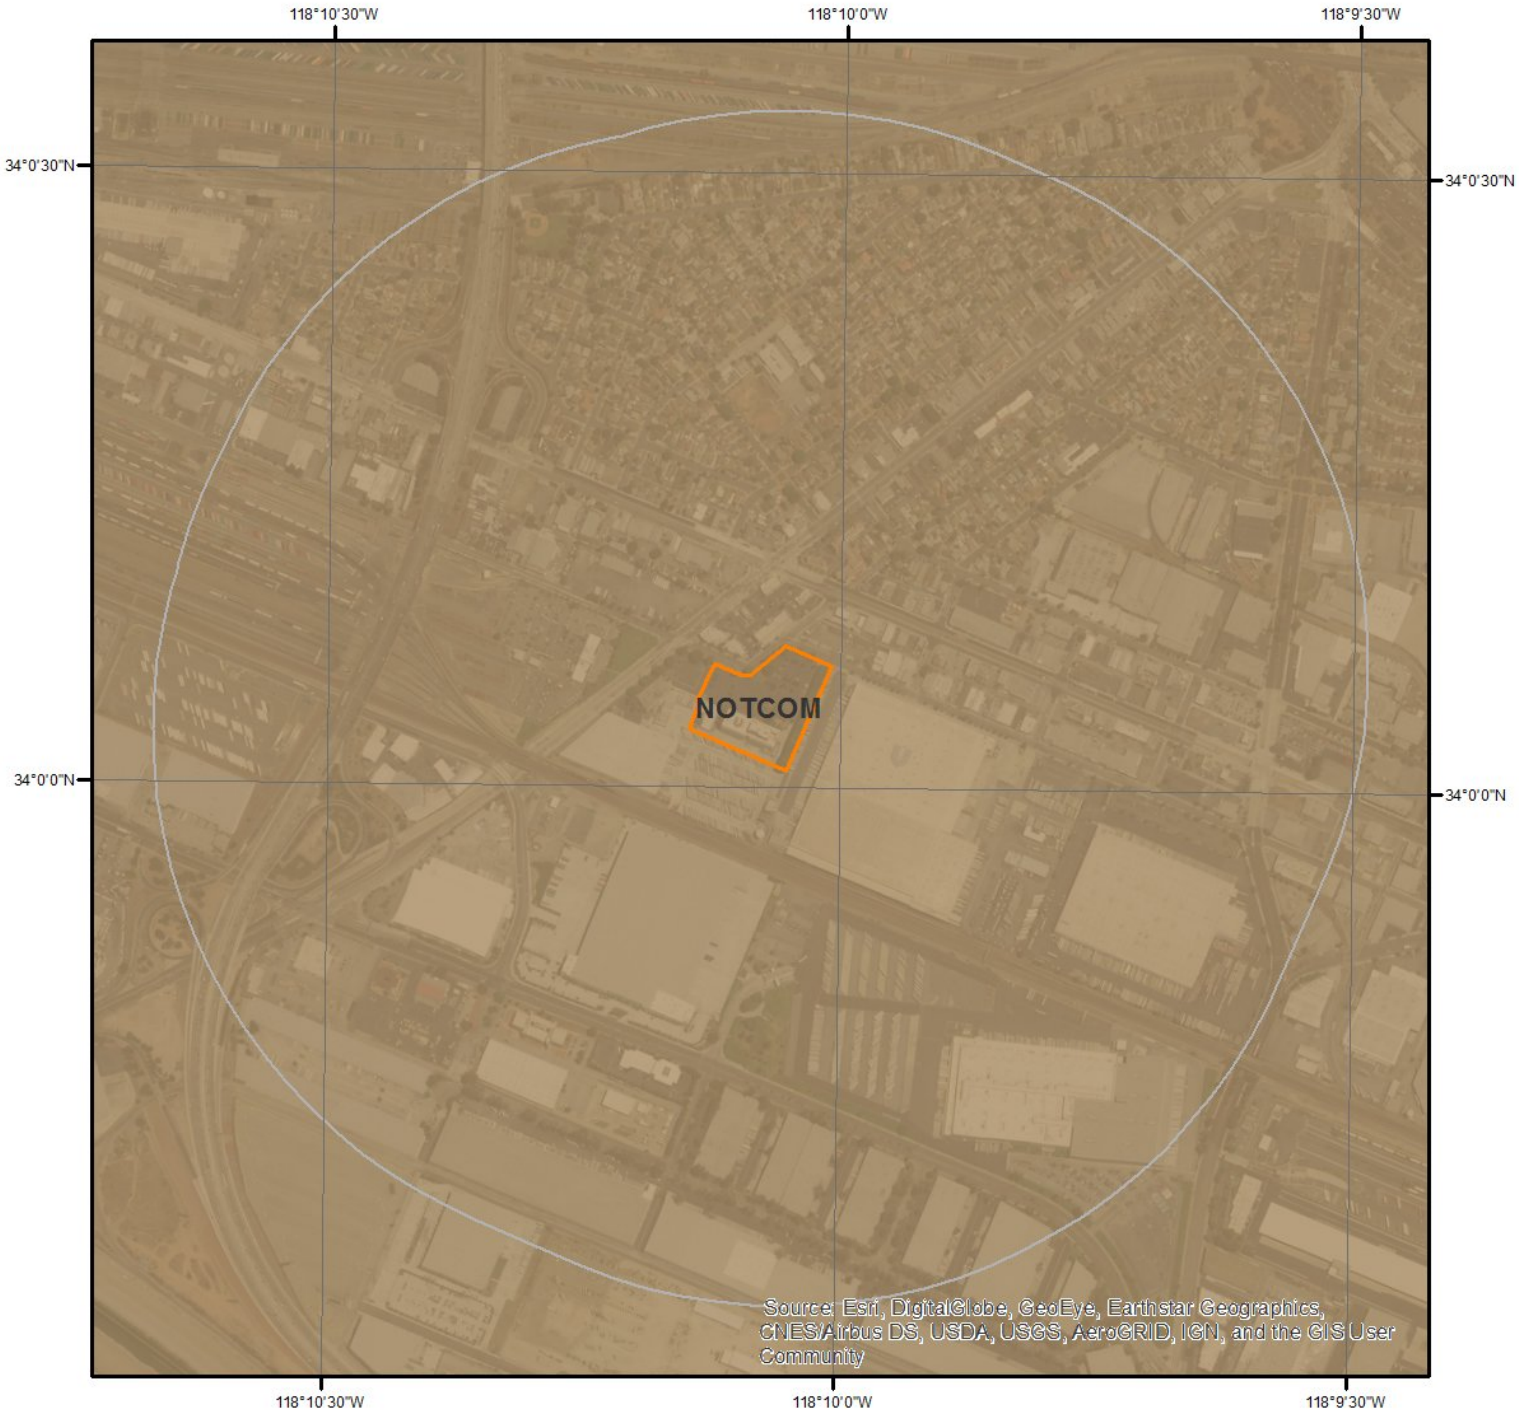

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *LOS ANGELES* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L

Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *LOS ANGELES* County

No Measures/Homes:	69
Geometric Mean:	0.4
Arithmetic Mean:	0.7
Median:	0.5
Standard Deviation:	1
Maximum:	5.6
% >4 pCi/L:	1
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data

US WETLAND

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells

OGW

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Public Water Supply Wells

PWSW

List of community water supply wells in California. This data was made available by California Department of Water Resources, Division of Statewide Integrated Water Management, who indicates that the management of the data in an ongoing project, and some county data is not represented. Location information is provided using the Public Land Survey System (PLSS) and is subject to the accuracy limitations inherent to the PLSS system.

Water Wells

WATER WELLS

A list of water wells maintained by the Department of Water Resources (DWR) Water Data Library.

Well Investigation Program Case List

WIP

The Well Investigation Program (WIP) was developed by the State Water Resources Control Board (SWRCB) to locate, assess and remediate sources of solvent contamination impacting drinking water wells. This list contains WIP cases (active and historical) for the San Gabriel and San Fernando Valley area and was provided by the Los Angeles Regional Water Quality Control Board.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix I: Key Personnel Resumes

Heather Bell

SENIOR ENVIRONMENTAL CONSULTANT

Education

Bachelor of Science, Environmental Policy & Behavior -
University of Michigan at Ann Arbor, 1999

Project Experience

Phase I Environmental Site Assessments – Ms. Bell has been performing, writing, and reviewing Phase I Environmental Site Assessments for various types of national and international properties for over 14 years. Since joining EMG in 2004, Ms. Bell has reviewed more than 2,500 environmental site assessment reports prepared by others, including technical oversight for most of those Projects. Since 2001, Ms. Bell has also completed over 600 assessments for debt and equity market clients.

Portfolio Management – Ms. Bell has managed over 50 Phase I environmental site assessment portfolios, including large scale and high profile portfolios such as 350 hotel properties, 100 industrial parks, 300 nursing centers, 50 department stores, 75 lumber yards, 250 self storage facilities, 65 multi-family properties, 500 telecommunication locations, 60 vacant land parcels in Mexico, and 150 gas stations. Ms. Bell has also supervised and assisted in the completion of document and regulatory database reviews for more than 600 total properties.

Agency File Reviews – Ms. Bell has managed EMG's agency file review program since 2011. Ms. Bell has facilitated and provided efficient procurement of agency documents as well summarized the data and provided a professional opinion for over 100 properties. Ms. Bell continues to develop agency relationships to provide files in a timely manner for quick turn business transactions.

- California Waste Association (2007)

SPECIAL SKILLS & TRAINING

- AAI/ASTM E 1527-05 Environmental Professional (EP)
- National Environmental Protection Act (NEPA) compliance
- Vapor intrusion
- Industrial Hygiene (radon, mold, asbestos, lead paint, lead in drinking water)

REGIONAL LOCATION

Essexville, MI

Project Experience Cont.

Former Air Force Base – Ms. Bell supervised the completion of a Phase I assessment and was involved in the completion of a Phase II assessment of an office building located on a portion of a former air force base. Numerous prior reports and documents were reviewed to determine the regulatory status of the former facility. Ms. Bell provided exemplary environmental services and the client found her observations critical to their final business decision.

Gas Stations/Auto Repair Centers – Ms. Bell supervised the completion of Phase I assessments of current and former gas stations and auto repair facilities. Numerous USTs, other types of subsurface equipment, and regulated wastes were identified at each facility in addition to some with various levels of contamination. Ms. Bell was crucial in determining the additional required actions and regulatory compliance.

Extended Stay Hotel Portfolio – Ms. Bell completed numerous Phase I reports for extended stay hotel facilities located throughout California. Although most were constructed, several of the hotels were under construction or being renovated. Several of the facilities conducted dry cleaning. Ms. Bell evaluated the location of the dry cleaning equipment, length of time in operation and likely potential for impact. Asbestos, radon, lead paint and lead in water were also addressed.

Telecommunication Portfolio – Ms. Bell actively participated in Phase I, Phase II and NEPA report development to satisfy due diligence and Federal Communication Commission (FCC) requirements. Properties located throughout the Pacific Southwest included unimproved and mountainous land, auto repair facilities, multi-story office complexes, industrial parks, retail strip malls, and multi-family residences.

Higher Education Facility – Ms. Bell completed Phase I and Phase II work for a vacant college built in the early 1900s. The college encompassed several hundred acres. RECs were revealed as a result of unregulated chemical handling within a large grounds maintenance facility, several chiller buildings, and various sumps.

Automotive Research & Development Complex – Ms. Bell completed a Phase I assessment for a multi-building automotive complex near Detroit. Several days of assessment activities were required as well as security clearances. Ms. Bell interviewed numerous onsite personnel and reviewed various documents in order to obtain a clear understanding of the classified operations.

Alicia Asmus

PROJECT MANAGER/TECHNICAL REPORT REVIEWER

Education

Bachelor of Science, Environmental Science, Christopher Newport University, 2001

Project Experience

Milwaukee Steel Manufacturing Plant; Milwaukee, WI – Ms. Asmus served as the Project Manager for the performance of a Phase I environmental site assessment for the Milwaukee Steel Manufacturing Plant. This investigation included the review of numerous prior reports and documentation, a review of historical information, and on-site activities. Several areas of concern were identified, including an on-site leaking underground storage tank (LUST) case, and a Phase II investigation was subsequently recommended.

Former Missile Testing Facility; Orlando, FL – Ms. Asmus served as Project Manager for the Phase I environmental site assessment for this 600 acre former industrial site. Her duties included the review of numerous prior reports and documentation, a review of historical information, and on-site activities. Her expertise and recommendations were highly valued by the client.

Residential Multi-family Portfolio; Nationwide – Ms. Asmus served as a Technical Report Reviewer and coordinator as part of a residential multi-family residential Phase I environmental site assessment portfolio, consisting of over 50 sites. Her duties included the review of prior reports and documentation, a review of historical information, and review of on-site activities. The client found her observations critical to their final business decision.

Project Experience Cont.

Hospitality Portfolio; Domestic and International – Ms. Asmus served as a Technical Report Reviewer as part of a hospitality Phase I environmental site assessment portfolio, consisting of over 150 sites. Her duties included the review of prior reports and documentation, a review of historical information, and review of on-site activities. The client found her observation critical to their final business decision.

Residential Homes; Eastern Shore, VA – Ms. Asmus served as the Mold Inspector on a Mold Inspection survey of residential homes. Her experience over ten years conducting mold surveys qualified her to provide exemplary environmental services to the client.

David W. Barton

PROJECT MANAGER

Education

BA in Environmental Design, State University of New York at Buffalo, 1984

Project Experience

Nevele Grande Resort and Country Club: Ellenville, NY – Mr. Barton served as the Project Manager on the Phase I Environmental Site Assessment of a 487-acre resort and country club facility that has been in operation since 1901. This investigation included the review of a prior report and numerous documents, a review of historical information, and an inspection of on-site activities. His expertise and experience lead to the identification of several areas of concern including the historical use of a portion of the Project as a gasoline service station; numerous on-site aboveground and underground storage tanks; a PCB spill; the handling, storage and disposal of hazardous material and wastes; and the Project's listing twice as an active Spills site. As result of his investigation, Mr. Barton recommended numerous subsurface investigations and remedial activities. In addition, Mr. Barton also recommended several administrative and management activities including the renewal of the Project's expired SPDES permit, the proper closure of four long-time out-of-service water wells, and the installation of spill prevention equipment for the Project's six aboveground storage tanks at the Project.

500 Bic Drive; Millford, CT – Mr. Barton served as the Project Manager on the Phase I Environmental Site Assessment of a 32.7-acre light industrial/manufacturing, warehouse, and office facility that has been in operation since 1953. The Project was listed on the FINDS, TRIS, RCRA-LQG, CORRACTS, CERC-NFRAP, SDADB, ERNS, CT SPILLS (seven times), and UST databases. EMG identified that a Phase II Subsurface Investigation was being conducted to further evaluate over 100 previously identified Potential Release Areas (PRA), Release Areas (RA) and Satellite Storage Areas (SSA) at the Project, and to determine if any releases have occurred at the Project and, more specifically to determine what, if any, contribution the noted RAs/PRA's may have related to documented TCE contamination in the area. The Client found Mr. Barton's observations critical to their final business decision.

Khurram Kazmi

PROJECT MANAGER

Education

Bachelor of Science, Environmental Science, Oregon State University, 2011

Master of Science, Environmental Engineering, California State University-Fullerton, 2014

Project Experience

The Cosmopolitan of Las Vegas; Las Vegas, NV – As a Project Manager, Mr. Kazmi performed a Phase I Environmental Assessment of this 9-acre resort and casino. He reviewed the condition of the structures and systems and developed a thorough report. The client found his observations and thorough report critical to their final business decision.

Kindred Hospital; Springfield, MA – Mr. Kazmi served as the Project Manager on the Phase I Assessment of this 17-acre, approximately 100-year old, community hospital. He reviewed the condition of the building structure and systems and developed a thorough report. His work helped EMG complete this project on schedule and within the budget.

Hilton-Hawaiian Village; Honolulu, HI – Mr. Kazmi served as the Project Manager on the Phase I Environmental Assessment of this 22-acre beach-front resort complex. Mr. Kazmi conducted a thorough analysis of the property and documented his findings in his report, which was delivered ahead of schedule. The client found his observations critical to their final business decision.

West Colorado; Pasadena, CA – As a Project Manager, Mr. Kazmi performed a Phase I Environmental Assessment of this 4-acre retail property located in historic downtown Pasadena. His research included an in-depth analysis of the past usage of the 150-year old property. His report was completed on schedule and within the allotted budget.
