

Project Information

Project Title: Parks Final Map Subdivision

Lead Agency

Humboldt County Planning and Building Department – Planning Division
3015 H Street
Eureka, CA 95501
(707) 445-7541

Property Owner

Alan and Sharon Parks
2422 McKinleyville Ave.
McKinleyville, CA 95519

Project Applicant

Same as owner

Project Location

The project site is located in the McKinleyville area, on the west side of McKinleyville Avenue, approximately 130 feet north from the intersection of W. Bates Road and McKinleyville Avenue, on the property known as 2416 and 2422 McKinleyville Avenue.

General Plan Designation

Residential Low Density (RL); Humboldt County General Plan, McKinleyville Community Plan (MCCP); density one to eight dwelling units per acre.

Zoning

Residential One-Family with a combining zone for Noise Impacts (R-1-N).

Project Description

A Major Subdivision of two parcels totaling approximately 1.75 acres into ten lots between 5,002 square feet (net) and 7,728 square feet (net). The site is developed with two single family residences that will remain on proposed Lots 1 and 2, respectively. Pursuant to Section 325-9 of the Subdivision Regulations, an exception request has been submitted to allow a reduced right of way width. The parcels will be served with community water and sewer provided by the McKinleyville Community Services District.

Baseline Conditions: Surrounding Land Uses and Setting

The project site is located along McKinleyville Ave., just north of West Bates Rd., approximately 1.5 miles south of the California Redwood Coast – Humboldt County Airport. It is in a developed neighborhood and surrounded by other similarly sized residential parcels.

Other Public Agencies Whose Approval Is or May Be Required (permits, financing approval, or participation agreement): Humboldt County Public Works Department, Division of Environmental Health, Building Division.

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? No. If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.? n/a

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21080.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3(c) contains provisions specific to confidentiality.

Environmental Factors Potentially Affected: The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- | | | |
|--|--|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agricultural and Forestry Resources | <input type="checkbox"/> Air Quality |
| <input checked="" type="checkbox"/> Biological Resources | <input checked="" type="checkbox"/> Cultural Resources | <input type="checkbox"/> Energy |
| <input type="checkbox"/> Geology/Soils | <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Hazards/Hazardous Materials |
| <input type="checkbox"/> Hydrology/Water Quality | <input type="checkbox"/> Land Use/Planning | <input type="checkbox"/> Mineral Resources |
| <input type="checkbox"/> Noise | <input type="checkbox"/> Population/Housing | <input type="checkbox"/> Public Services |
| <input type="checkbox"/> Recreation | <input type="checkbox"/> Transportation | <input type="checkbox"/> Tribal Cultural Resources |
| <input type="checkbox"/> Utilities/Service | <input type="checkbox"/> Wildfire | <input type="checkbox"/> Mandatory Findings of Significance |

Determination: On the basis of this initial evaluation:

- I find that the proposed project **could not** have a significant effect on the environment, and a **Negative Declaration** will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A **Mitigated Negative Declaration** will be prepared.
- I find that the proposed project **may** have a significant effect on the environment, and an **Environmental Impact Report** (EIR) is required.
- I find that the proposed project **may** have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An **Environmental Impact Report** is required, but it must analyze only those effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier **EIR** or **Negative Declaration** pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier **EIR** or **Negative Declaration**, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

For

Evaluation of Environmental Impacts

- (1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- (2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- (3) Once the lead agency has determined that a particular physical impact may occur, the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- (4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).
- (5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. (California Code of Regulations, title 14 Section 15063(c) (3) (D)). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review. **N/A**
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis. **N/A**
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project. **N/A**

Environmental Checklist

Checklist and Evaluation of Environmental Impacts: An explanation for all checklist responses is included, and all answers take into account the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts. The explanation of each issue identifies (a) the significance criteria or threshold, if any, used to evaluate each question; and (b) the mitigation measure identified, if any, to reduce the impact to less than significance. In the **Checklist**, the following definitions are used:

"Potentially Significant Impact" means there is substantial evidence that an effect may be significant.

"Potentially Significant Unless Mitigation Incorporated" means the incorporation of one or more mitigation measures can reduce the effect from potentially significant to a less than significant level.

"Less Than Significant Impact" means that the effect is less than significant and no mitigation is necessary to reduce the impact to a lesser level.

"No Impact" means that the effect does not apply to the proposed project, or clearly will not impact nor be impacted by the project.

I. Aesthetics. Except as provided in Public Resources Code Section 21099, would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect on a scenic vista?			X	
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?			X	
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage points). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?			X	
d) Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?			X	

Discussion:

(a-d) Less Than Significant Impact: The project site is not within an area mapped or designated with scenic vistas or resources nor is it in the Coastal Zone where specified areas of scenic values are mapped and certified by the state. The proposed subdivision infills an established development pattern, and is consistent with the planned build-out of the area. The parcels will be served by a private road off of McKinleyville Avenue, a County maintained road. The Department finds no evidence that the creation of ten parcels within an area characterized as urban residential will have a substantial adverse aesthetic impact. There is no indication that the future development likely to occur on the site will significantly increase light or glare or effect nighttime views in the vicinity.

<p>II. Agriculture and Forestry Resources. In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:</p>	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				X
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				X
d) Result in the loss of forest land or conversion of forest land to non-forest use?				X
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				X
<p>Discussion:</p> <p>(a-e) No Impact: Neither the subject property nor adjacent lands are within a Williamson Act contract. Although the site is mapped as agricultural soils, the lands were converted to residential uses with prior General Plans decades ago. The site does not contain unique farmland and is not used for agricultural purposes. The neighborhood is characterized by urban residential development with services provided by the McKinleyville Community Services District. The proposed subdivision infills an established development pattern. One-family residential is a primary and compatible use within the RL designation and is principally permitted in the R-1 zoning district. General agriculture is not a use allowed in the R-1 zone, nor are there any intensive agricultural uses in the immediate vicinity. The Department finds no evidence that the project will result in a significant adverse impact on agricultural resources.</p>				

III. Air Quality. Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Conflict with or obstruct implementation of the applicable air quality plan?			X	
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?			X	
c) Expose sensitive receptors to substantial pollutant concentrations?			X	
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?			X	

Discussion:

(a-e) Less than Significant: The project site is located within the North Coast Air Basin and the jurisdiction of the North Coast Unified Air Quality Management District (NCUAQMD). The North Coast Air Basin generally enjoys good air quality, but has been designated non-attainment (does not meet federal minimum ambient air quality standards) for particulate matter less than ten microns in size (PM₁₀). To address this, the NCUAQMD adopted a Particulate Matter Attainment Plan in 1995. This plan presents available information about the nature and causes of PM₁₀ standard exceedance, and identifies cost-effective control measures to reduce PM₁₀ emissions, to levels necessary to meet California Ambient Air Quality Standards. These include transportation measures (e.g., public transit, ridesharing, vehicle buy-back programs, traffic flow improvements, bicycle incentives, etc.), land use measures (infill development, concentration of higher density adjacent to highways, etc.), and combustion measures (open burning limitations, hearth/wood burning stove limitations; NCUAQMD 1995).

The proposed subdivision results in ten parcels suitable for residential development and would not: (1) obstruct implementation of the applicable air quality plan; (2) violate air quality standards; (3) contribute substantially to an existing or projected air quality violation; (4) expose sensitive receptors to substantial pollutant concentrations; or (5) create objectionable odors.

IV. Biological Resources. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?		X		
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, and regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?			X	
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?			X	
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?		X		
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?			X	
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?			X	

Discussion:

(b, c, e, f) Less Than Significant: Per County resource maps, there are no sensitive biological resources on, or in the vicinity of, the project site. Based on the California Natural Diversity Database, the site is listed as potential habitat for the western snowy plover. Given that the site is over a half mile from the coast and surrounded by residential development, it is unlikely to provide any type of habitat for the species. There are no wetlands or wetland habitat present on the site. The project does not involve any development within a streamside management area. The project site is not within an adopted or proposed habitat conservation plan. The project was referred to the Eureka office of the California Department of Fish and Wildlife which did not respond with concerns. The area is developed to urban residential levels. The Department finds no evidence that the project will result in a significant adverse impact on biological resources.

(a, d) Less Than Significant with Mitigation Incorporated: There are some small trees and brush on the property that may need to be removed to facilitate development. In order to comply with the Migratory Bird Treaty Act and Fish and Game Code, tree removal and brush clearing must be conducted outside of the nesting season. This measure is included in Mitigation Measure No. 1.

Mitigation Measure No.1. The Development Plan shall include the following language: "Tree removal and vegetation clearing associated with the Project should be conducted outside of the bird breeding season (the nesting season is generally considered to be March 1 – August 15) in order to avoid 'take' as defined and prohibited by Fish and Game Code (FGC) §3503, 3503.5, 3513, and by the Federal Migratory Bird Treaty Act (16 U.S. Code 703 et seq.). If work must be conducted during the bird nesting season, a qualified ornithologist (someone who is able to identify Northern California birds, and who has experience in nest-searching for passerines and raptors) should thoroughly survey the area no more than seven days prior to tree/vegetation removal to determine whether active nests (nests containing eggs or nestlings) are present. If active nests are found, appropriate buffers should be developed in consultation with CDFW to avoid take."

V. Cultural Resources. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?				X
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?		X		
c) Disturb any human remains, including those interred outside of formal cemeteries?		X		

Discussion:

(a) No Impact: No historical resources have been documented on site. The site is currently developed with a two single family residences and accessory buildings that show no evidence of being considered a historical resource, therefore, the project will have no impact on historical resources defined in California Environmental Quality Act (CEQA) §15064.5.

(b,c) Less Than Significant with Mitigation Incorporated: The project was referred to the Northwest Information Center (NWIC), the Blue Lake Rancheria, the Bear River Band of the Rohnerville Rancheria and the Wiyot Tribe. Although the response from the NWIC recommended a study, further consultation with the Blue Lake Rancheria and the Wiyot Tribe recommended approval with no further study provided a note regarding inadvertent discovery is included in the project. If archaeological resources are encountered during construction activities, the contractor will execute Mitigation Measure No. 2. by halting construction and coordinating with a professional archaeologist, who meets the Secretary of the Interior's Standards and Guidelines and appropriate tribes so resources can be evaluated so that there is not a substantial adverse change in the significance of an archaeological resource. The project is not expected to disturb any human remains, including those interred outside of formal cemeteries. However, implementation of Mitigation Measure No. 2 has been included in the event that human remains are accidentally discovered during construction.

Mitigation Measure No. 2. The following note shall be place on the Development Plan and carried out through project implementation: "If suspected archaeological resources are encountered during the project: 1. Stop work within 100 feet of the find; 2. Call the Calfire project representative, a professional archaeologist and representatives from the Blue Lake Rancheria, Bear River Band of the Rohnerville Rancheria and the Wiyot Tribe; 3. The professional historic resource consultant, Tribes and Calfire

officials will coordinate and provide an assessment of the find and determine the significance and recommend next steps.

"If human remains are encountered: 1. All work shall stop and per CA Health and Safety Code Section 7050.5: 2. Call the Humboldt County Coroner at (707) 445-7242; 3. The Coroner will determine if the remains are of prehistoric/historic Native American origin. If the remains are Native American Heritage Commission within 24 hours. 5. The NAHC is responsible under CA PRC 5097.98. (a) for identifying the most likely descendent (MLD) immediately and providing contact information. The MLD may, with the permission of the owner of the land, or his or her authorized representative, inspect the site of the discovery of the Native American human remains and may recommend to the owner or the person responsible for the excavation work means for treatment or disposition, with appropriate dignity, of the human remains and any associated grave goods. The descendants shall complete their inspection and make recommendations or preferences for treatment within 48 hours of being granted access to the site."

The applicant is ultimately responsible for ensuring compliance with this condition."

VI. Energy. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?			X	
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			X	

Discussion:

(a-b) Less Than Significant Impact: The project will result in short-term energy consumption during the construction phase, with long-term energy consumption associated with the ongoing occupancy of the homes. The construction phase is not anticipated to utilize excessive energy and the homes will be constructed compliant with the energy requirements of Title 24 of the Building Code. Therefore, a less than significant impact will occur.

VII. Geology and Soils. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				X
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.				X
ii) Strong seismic ground shaking?				X
iii) Seismic-related ground failure, including liquefaction?				X
iv) Landslides?				X
b) Result in substantial soil erosion or the loss of topsoil?			X	
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				X
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?				X
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?				X
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?				X

Discussion:

(a) No Impact: There are no known earthquake faults located within the site.

(i-iv) No impact: The project site is located outside an Alquist-Priolo Earthquake Fault Zone. The proposed project divides two parcels into ten. Eight of the parcels will be vacant and suitable for residential development. All development associated with the subdivision will not expose people or structures to potential substantial adverse effects from rupture of a known earthquake fault, strong seismic ground shaking, or seismic-related ground failure, including liquefaction. The project is not within an area subject to landslides; therefore the project will not expose people or structures to risk of lost, injury, or death involving landslides.

(b) Less Than Significant impact: Any future home construction or road improvements will utilize appropriate Best Management Practices (BMPs) which will prevent soil erosion and loss of topsoil.

(c) No impact: The project is not located on geologic units or soils that are unstable or that will become unstable as a result of the project. The project will not result in the creation of new unstable areas either on or off site due to physical changes in a hill slope affecting mass balance or material strength.

(d) No impact: The project site is not located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994); therefore, the project will not create substantial risks to life or property.

(e) No Impact: The project will connect to community sewer provided by the McKinleyville Community Services District.

(f) No Impact: There are no known paleontological resources or unique geologic features on site.

VIII. Greenhouse Gas Emissions. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			X	
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			X	

Discussion:

(a-b) Less Than Significant Impact: In 2002 the California legislature declared that global climate change was a matter of increasing concern for the state's public health and environment, and enacted law requiring the California Air Resources Board (CARB) to control GHG emissions from motor vehicles (Health & Safety Code §32018.5 et seq.). In 2006, the California Global Warming Solutions Act (Assembly Bill 32) definitively established the state's climate change policy and set GHG reduction targets (health & Safety Code §38500 et sec.), including setting a target of reducing GHG emissions to 1990 levels by 2020. AB 32 requires local governments to take an active role in addressing climate change and reducing greenhouse gas (GHG) emissions. While methodologies to inventory and quantify local GHG emissions are still being developed, recommendations to reduce residential GHG emissions include promoting energy efficiency in new development.

The proposed project involves creation of ten parcels, all suitable for residential development. The eventual residential construction on the vacant lots would contribute temporary, short-term increases in air pollution from equipment usage. Because of the temporary nature of the greenhouse gas contributions, coupled with the modest quantity of emission, the proposed project would not have a significant impact on the environment, nor conflict with applicable plan, policy, or regulation for the purposes of reducing greenhouse gas emissions. Future residential use would emit limited greenhouse gases.

IX. Hazards and Hazardous Materials. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			X	
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			X	
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			X	
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?			X	
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?			X	
f) Impair implementation of, or physically interfere with an adopted emergency response plan or emergency evacuation plan?			X	
g) Expose people or structures, either directly or indirectly to a significant risk of loss, injury or death involving wildland fires?			X	

Discussion:

(a-g) Less Than Significant impact: The project site is not included on a list of hazardous material sites, nor does the proposed subdivision involve routine transport, use or disposal of hazardous materials. The project site is approximately 1.5 miles from the nearest airport and outside of any compatibility zone. There are no private airstrips within the vicinity of the project site. The site will not result in unanticipated risk to the occupants of the site. The Department finds no evidence that the project will create, or expose people or property to, hazardous materials, or impair implementation of, or physically interfere with, an adopted emergency response plan. The site is within the Arcata Fire Protection District. Future development of the site will require compliance with the Uniform Fire Code and UBC. According to the Fire Hazard map, the parcel is located in a low fire hazard area. Arcata Fire Protection District approved the proposed project. For these reasons, the Planning Division expects that the subdivision will not result in significant impacts in terms of hazardous materials.

X. Hydrology and Water Quality. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?			X	
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?			X	
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner, which would:				
(i) result in substantial erosion or siltation on- or off-site;			X	
(ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;			X	
(iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or			X	
(iv) impede or redirect flood flows?			X	
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?			X	
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?			X	

Discussion:

(a-e) Less than significant Impact: The proposed subdivision infills an established development pattern, and is consistent with the planned build-out of the area, in terms of both the County's Housing Element, the McKinleyville Community Plan (MCCP) adopted in 2002 and the recently adopted Humboldt County General Plan 2017. The project site is an area served by community water and sewer. The McKinleyville Community Services District (MCSD) has indicated that it is able to provide water and sewer service to the proposed subdivision upon the payment of the appropriate fees. MCSD has not identified any concerns with regard to the project interfering with groundwater recharge. The Department finds no evidence indicating that the subdivision will violate any water quality or waste discharge standards, or otherwise substantially degrade water quality. According to the Flood Insurance Rate Map, the project site is located in Flood Zone C, which is defined as "areas of minimal flooding", and is outside the 100- and 500-year floodplains. The project site is not within a mapped dam or levee inundation area, and is outside the areas subject to tsunami run-up. The site is at an elevation of approximately 100 feet.

A preliminary drainage report was prepared and reviewed by Public Works and they recommended as a condition of approval that the applicant submit a complete hydraulic report and drainage plan for their approval. The applicant has proposed Low Impact Development techniques to comply with the State Water Board's Phase II Small Municipal Separate Storm Sewer System (MS4) Program. In addition, the project will comply with Section 3310.5 of the McKinleyville Community Plan which

states: "Development shall only be allowed in such a manner that the downstream peak flows will not be increased." No streams, creeks or other waterways will be altered as a result of this subdivision. The Department finds no evidence that the proposed project will result in significant hydrologic or water quality impacts.

XI. Land Use and Planning. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Physically divide an established community?			X	
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?			X	

Discussion:

(a-b) Less Than Significant Impact: The project site is designated Residential Low Density (RL) by the Humboldt County General Plan 2017, and is zoned Residential One-Family with a 5,000 square foot minimum parcel size. One-family residential is a primary and compatible use within the RL designation and is principally permitted in the R-1 zoning district. The neighborhood is characterized as urban residential. The creation of ten parcels for residential development is consistent with the zoning and land use density (one to eight dwelling units per acre). The proposed subdivision infills an established development pattern, is consistent with the planned build-out of the area, and is consistent with the policies and regulations specified in the McKinleyville Community Plan and Humboldt County General Plan. There are no habitat conservation or natural community conservation plans proposed or adopted for this area. The Department finds there is no evidence that the project will result in significant adverse impact with regard to land use and planning.

XII. Mineral Resources. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X
b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				X

Discussion:

(a and b) No Impact: On-site soils and geologic resources are not suitable as commodity materials that would be of value to the region or the state. The site is not designated as an important mineral resource recovery site by a local general plan, specific plan, or other land use plan.

XIII. Noise. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			X	
b) Generation of excessive groundborne vibration or ground borne noise levels?			X	
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?			X	

Discussion:

(a) Less Than Significant Impact: This parcel is located within the Noise Impact combining zone due to the proximity to McKinleyville Avenue. The EIR for the McKinleyville Community Plan established a distance of 20 feet from the noise source to be outside the area of concern. Given that all existing and proposed development on all parcels within the subdivision will be beyond 20 feet from McKinleyville Ave., no mitigation is required in order to comply with this combining zone.

(b) Less Than Significant Impact: Noises generated by the proposed project will result in a temporary increase during construction because the proposed project may require the use of heavy equipment (excavator, grader, loader and backhoe). The construction does not include equipment that would result in groundborne vibration. These activities are consistent with the current uses at the site and no permanent change in noise from the existing conditions would result from this project.

(c) Less Than Significant Impact: The project area is approximately 1.5 miles from the California Redwood Coast – Humboldt County Airport and outside of the area governed by the Airport Land Use Compatibility Plan. The noise impacts associated with the airport are not anticipated to be excessive. Therefore, noise impacts will remain less than significant.

XIV. Population and Housing. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Induce substantial unplanned population growth in an area, either directly (e.g., by proposing new homes and/or businesses) or indirectly (e.g., through extension of roads or other infrastructure)?			X	
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?			X	

Discussion:

(a, b) Less Than Significant Impact. The proposed project divides two parcels into ten parcels, two that will be developed and eight suitable for future residential development. One-family residential uses are primary and compatible uses within the plan designation and zoning district. The subdivision is consistent with the planned density of the area, one to eight units per acre. The Department finds no evidence that the project will result in a significant adverse impact on population and housing.

XV. Public Services. Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Fire protection?			X	
b) Police protection?			X	
c) Schools?			X	
d) Parks?			X	
e) Other public facilities?			X	

Discussion:

(a-e) Less Than Significant: The parcels will be accessed via a new private road off of McKinleyville Avenue, a County maintained road. The Department of Public Works has recommended improvements to the access road to meet current standards. The Arcata Fire Protection District did not identify any fire protection issues. The Department finds no evidence that the project will result in a significant adverse impact on public services.

XVI. Recreation. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?			X	
b) Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?			X	

Discussion:

(a-b) Less Than Significant Impact: The project does not include recreational facilities. The project has been conditioned upon payment of parkland dedication fees in lieu of creating a neighborhood park on the site. The Department finds no evidence that the project will require construction or expansion of recreational facilities which might have an adverse physical effect on the environment.

XVII. Transportation. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?			X	
b) Would the project conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?			X	
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			X	
d) Result in inadequate emergency access?			X	

Discussion:

(a-d) Less Than Significant Impact: The property is accessed by McKinleyville Avenue, a public road. The Land Use Division of Public Works has recommended standard conditions of approval including the improvement of the encroachment and improvement of the access road. The new road will provide two travel lanes and a parking lane within the subdivision.

CEQA Guidelines Section 15064.3(b) requires land use projects to analyze traffic impacts based on vehicle miles traveled (VMT). While no thresholds of significance have been adopted by the County, the Office of Planning and Research (OPR) uses household VMT per capita as a recommended threshold with a threshold of 15% less than existing city household VMT per capita or regional household VMT per capita.

Given the proposed project's geographic location in the center of McKinleyville, it would likely have a VMT per capita similar to the town average. However, in a regional context, the proposed project site is closer to the urbanized portion of the town than most areas of the region. Therefore, the proposed project would likely have a lower than average VMT per capita in comparison to the regional average. Based on this qualitative analysis, VMT impacts are expected to be less than significant.

XVIII. Tribal Cultural Resources.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resource Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resource Code section 5020.1(k), or			X	
ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe?			X	

Discussion:

(a-b) Less Than Significant Impact: The project was referred to the Northwest Information Center at Sonoma State University, the Blue Lake Rancheria, the Wiyot Tribe and the Bear River Band of the Rohnerville Rancheria. Although the response from the NWIC recommended a study, further consultation with the Blue Lake Rancheria and the Wiyot Tribe recommended approval with no further study provided a note regarding inadvertent discovery is included in the project. The standard condition of inadvertent discovery has been included as Mitigation Measure No. 2.

XIX. Utilities and Service Systems. Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?			X	
b) Have insufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			X	
c) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it does not have adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			X	
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?			X	
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?			X	

Discussion:

(a-e) Less than significant: The Department finds there is no evidence that the project will be inconsistent with the planned build-out of the area or will result in a significant adverse to utilities and service systems. The parcel is not zoned for commercial or industrial uses. The lots will be served by community water and sewer provided by the McKinleyville Community Services District. The Department of Environmental Health has recommended approval of the project. The parcel currently drains easterly towards McKinleyville Avenue. Stormwater detention as well as Low Impact Development (LID) techniques will be utilized as part of the improvement plans submitted to Public Works in order to comply with the McKinleyville Community Plan requirement of no increase in downstream flows and the Regional Water Board's MS4 program. The Division of Public Works reviewed the project and did not identify any drainage issues. The applicant will be required to provide a complete hydraulic report and drainage plan. The Department finds the project impact to be less than significant.

XX. Wildfire. If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?			X	
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of wildfire?			X	
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?			X	
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?			X	

Discussion:

(a-d) Less than significant: The project is located within the Local Responsibility Area (LRA) for fire protection and served by the Arcata Fire Protection District. State responsibility lands are located approximately one mile to the west with the majority of these lands owned and managed by Green Diamond Resource Company. The project is within an urbanized area of McKinleyville and not subject to substantial wildfire risk. The Department finds the project impact to be less than significant.

XXI. Mandatory Findings of Significance.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?			X	
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects).			X	
c) Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?			X	

Discussion:

(a through c) Less Than Significant Impact: The proposed project divides two parcels into ten – two developed and eight vacant and suitable for future residential development. Staff finds no evidence that the proposed project will significantly degrade the quality of the environment, nor will it have impacts that are individually limited but cumulatively considerable. Based on the project as described in the administrative record, comments from reviewing agencies, a review of the applicable regulations, and discussed herein, the Department finds there is no significant evidence to indicate the proposed project as mitigated will have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly.

Proposed Mitigation Measures, Monitoring, and Reporting Program

Biological Resources

Mitigation Measure No. 1. The Development Plan shall include the following language: "Tree removal and vegetation clearing associated with the Project should be conducted outside of the bird breeding season (the nesting season is generally considered to be March 1 – August 15) in order to avoid 'take' as defined and prohibited by Fish and Game Code (FGC) §3503, 3503.5, 3513, and by the Federal Migratory Bird Treaty Act (16 U.S. Code 703 et seq.). If work must be conducted during the bird nesting season, a qualified ornithologist (someone who is able to identify Northern California birds, and who has experience in nest-searching for passerines and raptors) should thoroughly survey the area no more than seven days prior to tree/vegetation removal to determine whether active nests (nests containing eggs or nestlings) are present. If active nests are found, appropriate buffers should be developed in consultation with CDFW to avoid take."

Timing for Implementation/Compliance: Throughout project construction

Person/Agency Responsible for Monitoring: Applicant and successors

Monitoring Frequency: Throughout construction

Evidence of Compliance: Visible evidence

Cultural Resources

Mitigation Measure No. 2. The following note shall be placed on the Development Plan and carried out through project implementation: "If suspected archaeological resources are encountered during the project: 1. Stop work within 100 feet of the find; 2. Call the Calfire project representative, a professional archaeologist and representatives from the Blue Lake Rancheria, Bear River Band of the Rohnerville Rancheria and the Wiyot Tribe; 3. The professional historic resource consultant, Tribes and Calfire officials will coordinate and provide an assessment of the find and determine the significance and recommend next steps.

"If human remains are encountered: 1. All work shall stop and per CA Health and Safety Code Section 7050.5: 2. Call the Humboldt County Coroner at (707) 445-7242; 3. The Coroner will determine if the remains are of prehistoric/historic Native American origin. If the remains are Native American Heritage Commission within 24 hours. 5. The NAHC is responsible under CA PRC 5097.98. (a) for identifying the most likely descendent (MLD) immediately and providing contact information. The MLD may, with the permission of the owner of the land, or his or her authorized representative, inspect the site of the discovery of the Native American human remains and may recommend to the owner or the person responsible for the excavation work means for treatment or disposition, with appropriate dignity, of the human remains and any associated grave goods. The descendants shall complete their inspection and make recommendations or preferences for treatment within 48 hours of being granted access to the site."

The applicant is ultimately responsible for ensuring compliance with this condition."

Timing for Implementation/Compliance: Throughout project construction

Person/Agency Responsible for Monitoring: Applicant and successors

Monitoring Frequency: Throughout construction

Evidence of Compliance: Visible evidence
