

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: City of Escondido Climate Action Plan Update

Lead Agency: City of Escondido

Contact Name: Mike Strong, Assistant Director of Planning

Email: mstrong@escondido.org Phone Number: (760) 839-4556

Project Location: City of Escondido, San Diego County
City County

Project Description (Proposed actions, location, and/or consequences).

The City of Escondido proposes to adopt the Climate Action Plan Update (CAP update) that would establish a comprehensive framework to reduce greenhouse gas ("GHG") emissions in the City. The CAP update also provides a range of adaptation strategies and measures for improving community resiliency and adaptation. The CAP update also provides a range of adaptation strategies and measures as an additional component to climate action planning. Through "adaptation planning" the City is undertaking a process of identifying climate risks and opportunities, assessing the options to manage these risks and opportunities, and implementing actions to sustain and even improve the community's quality of life. The City has also developed a Climate Action Plan Consistency Review Checklist, in conjunction with the CAP, to provide a streamlined review process for proposed new development projects that are subject to discretionary review and trigger environmental review pursuant to CEQA. The project does not include any development proposals and would not directly result in physical environmental effects because of the construction or operation of facilities.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Cultural Resources: Construction activities associated with future projects would have the potential to disturb archaeological resources. Implementation of Mitigation Measures CR-1 through CR-8, would reduce impacts associated with archaeological resources to a less than significant level by requiring the performance of professionally accepted and legally compliant procedures for the discovery of previously undocumented archaeological and tribal cultural resources.

Tribal Cultural Resources: Construction activities associated with future projects would have the potential to disturb tribal cultural resources. Implementation of Mitigation Measure CR-1 through CR-8 would reduce impacts associated with tribal cultural resources to a less than significant level by requiring the performance of professionally accepted and legally compliant procedures for the discovery of previously undocumented tribal cultural resources.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

NA

Provide a list of the responsible or trustee agencies for the project.
