

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: TBP

Project Title: City of Ventura Eastside to Westside Waterline Interconnection Project

Lead Agency: City of Ventura, Public Works Department

Contact Name: Travis Gonsalves, Associate Engineer

Email: tgonsalves@cityofventura.ca.gov Phone Number: 805-654-7765

Project Location: Telegraph Road and Foothill Road, City of Ventura, County of Ventura
City *County*

Project Description (Proposed actions, location, and/or consequences).

The City is proposing to construct the infrastructure necessary to move water from the eastside of the City to the westside, primarily when westside supplies have been reduced or are otherwise less available and during peak demand scenarios. Currently the City's water system does not have a way to move a sufficient amount of water from the eastside to the westside of the City. The majority of the proposed project would be located within the City limits, with a small portion in Ventura County. The project will be constructed in two main pipeline segments; one to bring water from the eastern most portion of the city to the midtown area (Eastside to Midtown), and one to bring the water from the midtown area to the western side (Midtown to Westside). The Eastside to Midtown pipeline would follow Foothill Road between Kimball Road and Elizabeth Road, with a small portion in Kimball Road. The Midtown to Westside pipeline would follow Telegraph Road between Ashwood Avenue and Hill Road.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Project construction and operation would not result in significant impacts. However, with the incorporation of mitigation identified throughout the evaluation, the project's potential impacts would be less than significant and would not considerably contribute to regional cumulative impacts in the region.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no areas of controversy known to the Lead Agency, the City of Ventura.

Provide a list of the responsible or trustee agencies for the project.

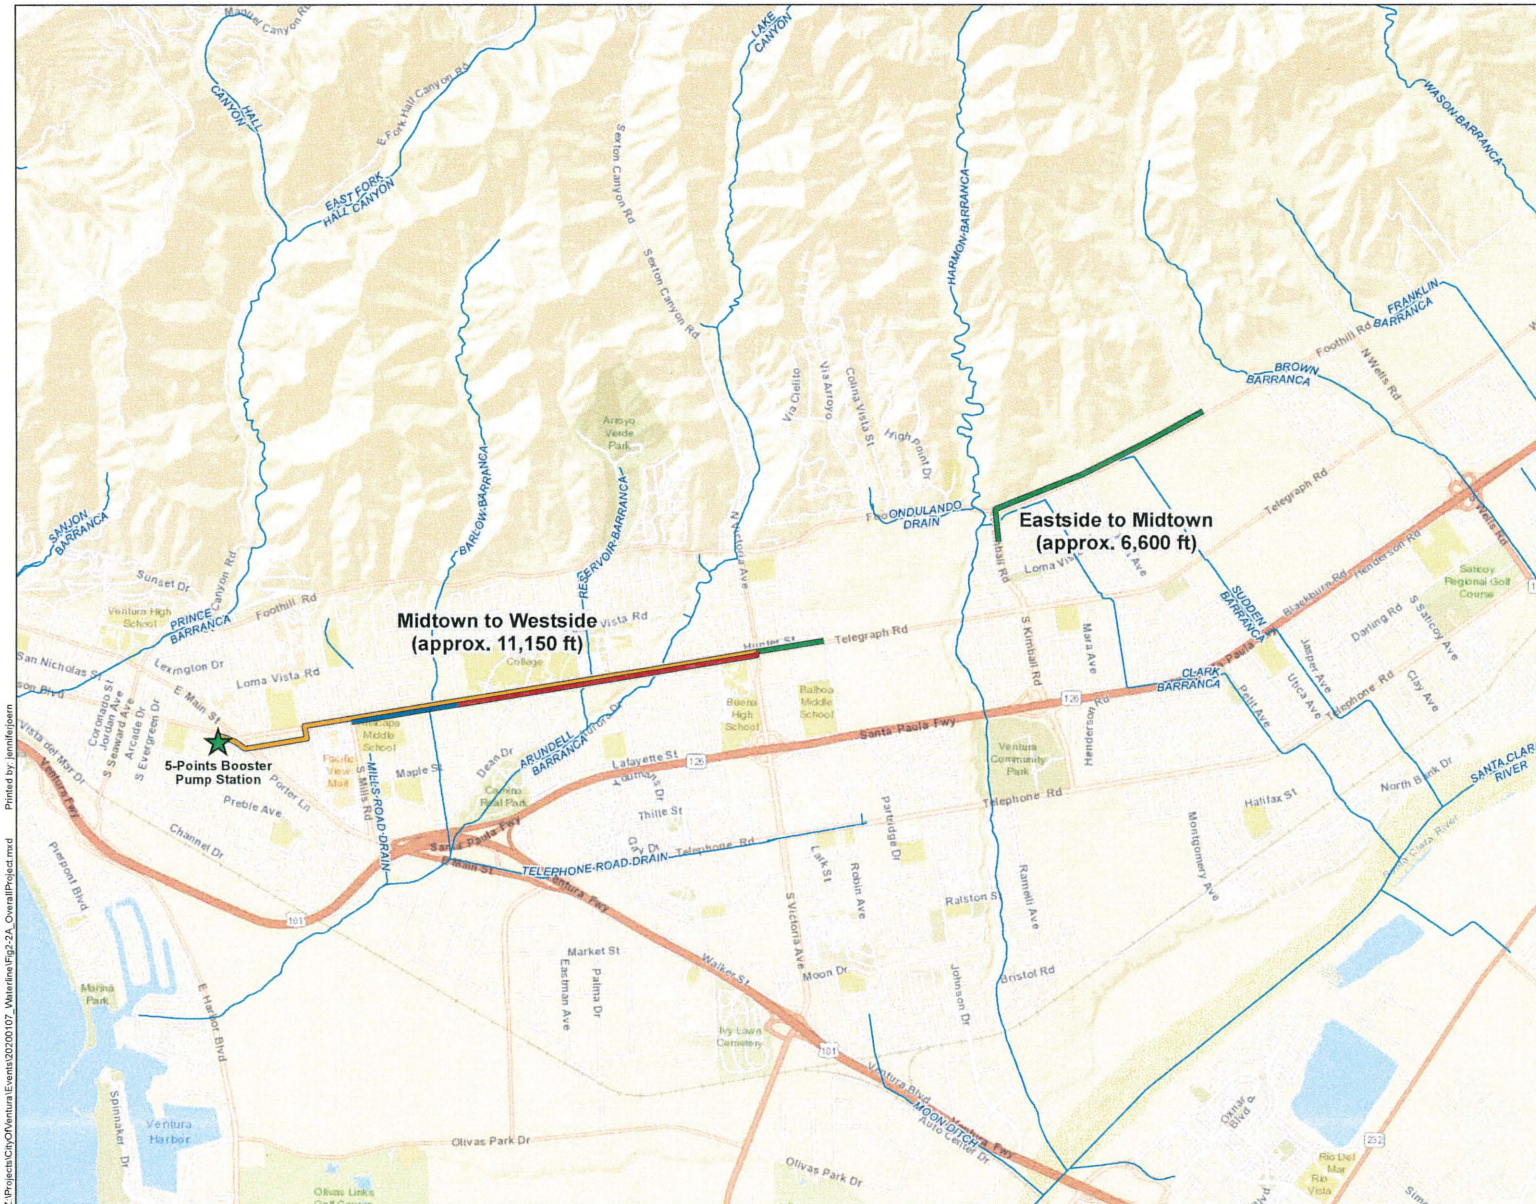

City of Ventura – operator and owner of proposed facilities

Ventura Water

Ventura City Planning Commission

Ventura City Council

Other possible review agencies haven been identified on the Notice of Completion form included with this submittal.
