

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Pleasanton Stream Maintenance Project

Lead Agency: City of Pleasanton

Contact Name: Rita Di Candia

Email: rdicandia@cityofpleasantonca.gov

Phone Number: 925-931-5513

Project Location: Pleasanton, Alameda County

City

County

Project Description (Proposed actions, location, and/or consequences).

The purpose of the proposed Project is to conduct maintenance activities in stream segments and stormwater detention ponds throughout the City of Pleasanton to improve stormwater conveyance and quality. This would be accomplished through maintenance activities such as weed abatement and silt and rock removal in seventeen stream sections and eight stormwater detention ponds throughout Pleasanton.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

No archaeological or tribal resources were identified in the Project Area. However, there remains the possibility that previously unrecorded archaeological resources are present in the Project Area. Potentially significant impacts would be reduced to less-than-significant by incorporation of Mitigation Measures CULT-1 and CULT-2.

Temporary impacts to sensitive natural communities have the potential to occur during maintenance activities and would be potentially significant without mitigation. To mitigate these impacts to a less than significant level, implementation of mitigation measures BIO MM-1.1 to BIO MM-1.4 would be required. Measures include implementation of BMPs, vegetation management mitigation, silt and rock removal mitigation, and riparian woodland mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.

None
