Present Land Use/Zoning/General Plan Designation: The General Order will be applicable statewide use by the regional water boards.
 Land use/zoning/General Plan design will vary by location of the winery and process water treatment design.

Project Description: (please use a separate page if necessary)

The State Water Board has prepared draft General Waste Discharge Requirements for Winery Process Water (General Order) available statewide to regulate the discharges to land of winery process water with a potential threat to water quality. The General Order will cover discharges of winery process water to land starting at 10,000 gallons per year and can cover larger discharges (e.g., 100,000,000 gallons per year). The General Order includes minimum treatment levels, monitoring, and management practices based on the number of gallons of winery process water discharged per year. The General Order also requires compliance with regional water quality control board water quality control plans (Basin Plans), applicable statewide water quality plans or policies, and mitigation measures required by this General Order and future site-specific CEQA evaluations. The General Order will be used by the regional water quality boards to streamline permitting of wineries discharging process water to land and increase water quality protection from these discharges statewide. The General Order was publicly noticed July 3, 2020 for a public comment period ending August 5, 2020.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in. Revised 2010

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
