

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Aratina Solar Farm Project

Lead Agency: County of Kern

Contact Name: Ronelle Candia

Email: candiar@kerncounty.com Phone Number: 661-862-8997

Project Location: N/A Unincorporated Kern County  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The Aratina Solar Farm Project, as proposed by 64NB 8lv1E LLC (project proponent), would develop a photovoltaic solar facility and associated infrastructure necessary to generate up to 600 megawatt-alternating current (MW-AC) of renewable energy, including up to 600 megawatts of energy storage, on approximately 2,672.53 acres of privately-owned land. The project site consists of five sites (Sites 1 through 5) located on 27 parcels located within Sections 5 and 6, Township 10N, Range 7W; Sections 1 and 2, Township 10N, 8W; and Sections 33 and 34, Township 11N, Range 8W, San Bernardino Base Meridian. The proposed project would be supported by a 230-kilovolt (kV) gen-tie overhead and/or underground electrical transmission line(s) originating from one or more on-site substations and terminating at the Southern California Edison's Holgate Substation to the north. Alternatively, the proposed project may interconnect at Southern California Edison's Kramer Substation to the east, located in San Bernardino County via an up to 230kV transmission line located within an Edwards Air Force Base utility corridor. The project includes service roads, a power collection system, energy (battery) storage, communication cables, overhead and underground transmission lines, and other facilities.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

An EIR will be prepared to determine potentially significant impacts. Potential impacts may include those to aesthetics, air quality, biological resources, cultural resources, geology and soils, land use and planning, agricultural and forestry resources, energy, hazards/hazardous materials, public services, tribal cultural resources, GHG emissions, wildfire, transportation, utilities/service systems, noise, and/or hydrology/water quality.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
