

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Produced Water Pre-Treatment & Advanced Water Solutions Project by Blue Water Resources

Lead Agency: City of Wasco

Contact Name: Keri Cobb

Email: kecobb@cityofwasco.org Phone Number: 559-386-5776

Project Location: Wasco, Kern

*City*

*County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project consists of a Conditional Use Permit for a wastewater processing facility on a 7-acre parcel within an existing 33,000 square foot industrial building. The wastewater treatment facility is designed to treat industrial, non-hazardous wastewater, which will be brought to the facility by truck transportation.

Process equipment will be installed in an existing industrial building and will be designed to process between 100,000 to 700,000 gallons per day (GPO) of wastewater. The primary objective of the treatment process is to cleanse the water so that it can be sold back to the oil field service companies and re-used in oil extraction operations. The water treatment plant will reduce the need for groundwater extraction.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

MM BIO-1 and MM BIO-2 would reduce any potentially significant impacts to biological resource to less than significant levels. MM-CUL 1, and MM CUL-2 would reduce any potentially significant impacts to cultural resource to less than significant levels. MM GEO-1 and MM GEO-2 would mitigate any potentially significant impacts to geological resources less than significant. MM HAZ-1 would mitigate any potentially significant impacts related to hazards less than significant. MM HYD-1 would mitigate any potentially significant impacts to hydrology and water quality to less than significant. MM NSE-1 would mitigate any potentially significant impacts related to noise to less than significant. MM TRAF-1 would mitigate any potentially significant impacts related to traffic to less than significant.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.

Local Agencies:

- Pacific Gas and Electric (PG&E), San Joaquin Valley Air Pollution Control District (SJVAPCD), Southern California Edison Company (SCE), Southern California Gas Company (SCG)

State Agencies:

- California Air Resources Board (CARB)
- California Department of Transportation (Caltrans)
- California Department of Fish and Wildlife (CDFW)
- California Integrated Waste Management Board
- Department of Water Resources
- Governor's Office of Planning and Research
- Office of Historic Preservation
- Regional Water Quality Control Board (RWQCB), Central Valley Region
- California Department of Consumer Affairs, Bureau of Medical Cannabis Control
- California Department of Food and Agriculture
- California Department of Pesticide Regulation
- Board of Equalization
- Franchise Tax Board
- California Department of Justice
- California Department of Public Health
- California Environmental Protection Agency

Federal Agencies:

- U.S. Environmental Protection Agency
