

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Bijou Park Creek Watershed Restoration Project

Lead Agency: City of South Lake Tahoe

Contact Name: Jason Burke

Email: jburke@cityofslt.us Phone Number: (530) 542-6038

Project Location: City of South Lake Tahoe
City

El Dorado
County

Project Description (Proposed actions, location, and/or consequences).

The Bijou Park Creek Watershed is an approximately 850-acre watershed that extends from Heavenly Mountain Resort (California Base Lodge) in the upper watershed down to the connection to Lake Tahoe at the Ski Run Marina, encompassing upper Ski Run Boulevard, residential neighborhoods along Glenwood and Blackwood Avenues, and the Bijou Elementary School. Urban development within stream environment zone (SEZ) areas has exacerbated localized flooding issues. The Project includes a series of stormwater and SEZ restoration improvements that would be constructed throughout the eastern portion of the City of South Lake Tahoe. The project includes restoration activities in two sections of Bijou Park Creek and various stormwater conveyance and treatment upgrades to achieve the Project objectives of improving water quality, reducing nuisance flooding, and restoring function of the Bijou Park Creek SEZ. The Project has been designed to address pollutant loading in urban runoff including fine sediment particles and nutrients, that contributes to the impairment of Lake Tahoe's clarity and must be reduced in accordance with the Lake Tahoe Total Maximum Daily Load (TMDL) program.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

To minimize potentially significant impacts, the following mitigation measures were prescribed:

- Biological Resources Mitigation Measure No. 1 (BIO-1)
- Biological Resources Mitigation Measure No. 2 (BIO-2)
- Traffic/Transportation/Circulation Mitigation Measures No. 1 (TR-1), see Initial Study and draft NMD for full mitigation measure description.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no known areas of controversy for the project.

Provide a list of the responsible or trustee agencies for the project.

El Dorado County Air Quality Management District
Tahoe Regional Planning Agency
California Tahoe Conservancy
U.S. Forest Service
