contaminant concentrations at Well GW-13B Data from the substrate injections wells, along with a discussion of operation and sampling of these wells should be included in the quarterly groundwater reports. Table 1 should be expanded to include well gauging information for these wells. An ongoing summary of gauging data and groundwater analytical results from these wells should be include in tables 3 and 4, respectively. Monitoring Report text should include a discussion of injections, and sampling that was conducted at the substrate injections wells during the reporting period.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)  
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

**CASTAIC LAKE WATER AGENCY -WHITTAKER OFF-SITE GROUNDWATER CO (Continued)**

**S117038653**

Completed Date: 12/13/2004  
Comments: DTSC issued a letter concurring with the conclusions and recommendations of the study.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Feasibility Study Report  
Completed Date: 08/18/2005  
Comments: DTSC approved document. DTSC did not issued a formal letter approving the FS as this document is identical to the document prepared by CLWA's consultant to serve as the RI for impacted groundwater in the vicinity of water supply wells Saugus 1 & 2. DTSC issued comments via an electronic mail and the revised final IFS was submitted to DTSC (See uploaded document).

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Plan  
Completed Date: 01/20/2006  
Comments: DTSC approved final IRAP.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 04/08/2011  
Comments: CDPH issued Permit Ammendment 1910048-PA-002. This is considered the final component of the Remedial Design as CLWA is now able to fully operate the well head treatment and blend treated water with State Water Project.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 04/03/2011  
Comments: Report submitted for our records. DTSC did not issue any comments but will use it to validate future groundwater modeling and tracking of the perchlorate plume.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: \*Correspondence - Received  
Completed Date: 06/21/2011  
Comments: DTSC received notification that Valencia Well 201 sampling indicates that perchlorate detections exceeded the MCL. CLWA will pursue well head remedy with Whittaker pursuant to the emergency clause in the settlement agreement.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 09/16/2012  
Comments: No comments issued; implementation of this plan needs to be included in Addendum to interim RAP

Alternate Address: 22116 SOLEDAD CANYON RD

Alternate City,St,Zip: SAUGUS, CA 91350

Background Info: Whittaker-Bermite is a former manufacturing facility located on approximately 996 acres in Santa Clarita, Los Angeles County. Residential housing is located to the south and southwest at the boundary of the site. An approximately ten acre portion of the northern border portion of the site has been converted into a commuter rail station. Approximately 12 acres dedicated for Golden Valley Road, has been partially constructed along the eastern portion of the site.

Not reported

The site contained approximately 350 buildings located throughout the site which were used for manufacturing, storage and testing of explosives and administrative purposes.

Not reported

From 1934 until 1987, explosives were manufactured and tested, and off specification items were burned and buried on the site.

These included dynamite, practice bombs, flares, fireworks, oil field explosives, igniters, gas generators, ammunition rounds, Jato rockets, and sidewinder and spin rocket motors.

Not reported

Material or mixtures of materials used at the site include lead azide, red phosphorus, barium, zinc, copper, chromium, and chlorinated solvents such as Tetrachloroethylene (PCE) and Trichloroethylene (TCE). Potassium perchlorate and ammonium perchlorate were also used as the oxidizer component of propellant mixtures.

Not reported

The facility was operating under interim status under RCRA and operating fourteen hazardous waste treatment, storage and disposal units. In November 1983, Whittaker Bermite filed three letters with DTSC describing the closure activities of these fourteen interim status units. DTSC acknowledged Whittaker's certification of closure for thirteen of the fourteen regulated

hazardous waste management units. The one remaining hazardous waste management unit (now operable unit #6), a surface impoundment containing TCE contaminated soil will be cleaned up under the OU2/OU6 RI/FS.

Not reported

In 1987, Whittaker Bermite identified Solid Waste Management Units (SWMUs) to U.S. EPA. In 1992, DTSC executed a search warrant which uncovered paperwork identifying additional potential SWMUs at the site that were not included in the previous reports.

Not reported

In October 1992, Whittaker Corporation submitted a PEA to DTSC for a 10.3 acre parcel of the site containing four SWMUs. This parcel would be used as a commuter rail station by the city of Santa Clarita if the PEA determined that the site did not pose a threat to human health or the environment. DTSC also stipulated that if site conditions differed from those presented in the PEA, then further characterization/remediation would be required.

Not reported

In 1993, a soil investigation by DTSC in the Burn Valley area of the site detected 92,000 mg/kg PCE, 290 mg/kg lead, 36,000 mg/kg copper, 550 mg/kg chromium, 1,300 mg/kg barium. Thirty-two percent of phosphorus was also identified at the New Lead Azide area.

Not reported

On January 11, 1999, the Whittaker Corporation completed the sale of its Bermite facility to Santa Clarita L.L.C. (SCLLC), an affiliated entity of Remedial Financial, Incorporated (RFI). RFI is an Arizona corporation doing business in California. SCLLC is conducting site investigations and required remediations at the Site in order to develop the Site for residential and commercial use.

Not reported

DTSC approved an operable unit (OU) designation for the 996 acre site in April 1999. In designating seven (7) OUs a focused effort is placed on specific areas, migration pathways, and releases in discrete parts of the Site with the emphasis on addressing public health and environmental concerns first along with the needs of the community. The OU boundaries were drawn by drainage basin. OU6 within OU2, is the one remaining RCRA hazardous waste management unit. OU7 is sitewide groundwater.

Not reported

OU1 was broken up into sub-OUs to accommodate the community's need for a road leading to a proposed new school site. The extension of Golden Valley Road traverses the northeastern portion of the site for access to the New Golden Valley High School. To accommodate the City and the district's need for the road and school, the north eastern section of OU1 had to be investigated on an expedited basis. A PEA was conducted on OU1A, OU1B, and OU1C. Golden Valley Road alignment is within these sub-OUs. No SWMU's were ever identified on the portion of the site covered by OU1A, OU1B, and OU1C. A Draft Remedial Investigation Baseline Risk Assessment was prepared for OU1E in December 2000. OU1E has been identified as a source area for perchlorate and VOCs, and will require an interim remedial

measure (IRM) removal action. OU1D North and South was investigated under the Remedial Investigation and Feasibility Study (RI/FS) process. Additional soil characterization for OU1D North and OU1D South is still required. All of these sub-OUs will later be included in the final Remedial Action Plan (RAP) for OU1.

Not reported

Under DTSC's direction, SCLLC's contractors are conducting site-wide ordnance and explosive waste (OEW) clearance work as a part of the restoration process. The work consists of a geophysical instrumentation clearance with anomaly excavation performed by a qualified Unexploded Ordnance (UXO) specialist. Subsequent work consists of a UXO specialist performing construction support during the initial phases of grading. All OEW items recovered will be treated and stored in accordance with a DTSC approved site-wide UXO Removal Action Workplan (RAW).

Not reported

Santa Clarita, L.L.C. (SCLLC) conducted Site investigation activities in OU1 that are nearly complete.

Not reported

Attention was focused on a perchlorate and VOC source area in OU1E. DTSC provided oversight during these field activities. A draft Remedial Investigation and Baseline Risk Assessment was submitted in December 2000. DTSC reviewed the Report and provided comments and is still awaiting a response. Draft workplan for OU1E IRM submitted March 30, 2000. DTSC reviewed the OU1E IRM and provided comments; DTSC is still awaiting a response.

Not reported

Field mapping of OU-2/OU-6 and OU-3 occurred in winter of 2000. DTSC staff along with SCLLC's consultants walked each OU identifying areas of artificial fill and areas of concern. The maps produced as a result of these activities will be used for the RI/FS. No fieldwork has been conducted in the OU2/OU6 area.

Not reported

SCLLC submitted a draft RI/FS workplan for the investigation of site-wide groundwater (OU-7). This workplan is in the process of being finalized. To expedite this investigation, four technical memo that address specific areas and components of the investigation were finalized by April 21, 2000. The information produced as a result of these technical memo is necessary for completion of the RI/FS workplan, and is necessary to devise a mutually acceptable strategy for the addressing on-site source areas that impact regional groundwater.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: Operable Unit 5  
Completed Sub Area Name: Area 33  
Completed Document Type: Monitoring Report  
Completed Date: 10/25/2017  
Comments: ESU Staff provided the following comment: I reviewed the Soil Vapor Extraction Progress Report, First Quarter 2017, Area 33, dated September 1, 2017 and prepared by CDM Smith. The report presents summary of operations and monitoring data for the SVE at Area 33. The system removed 0.69 lbs. of VOCs during the quarter. The data presented supports the conclusion of the report that the system is approaching asymptotic conditions, and I concur with the recommendation for rebound testing. Please let me know if you have any questions. Thanks. Tizita Peer reviewed by Ju-tseng Liu, P.E.

Completed Area Name: Operable Unit 2  
Completed Sub Area Name: Area 4/63  
Completed Document Type: Monitoring Report  
Completed Date: 11/30/2017  
Comments: Report approved; ESU recommended that soil matrix and vapor probes sampling be conducted to determine residual contaminant levels.

Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 02/11/2000  
Comments: DTSC completed review of the OU1A, OU1B, and OU1C Preliminary Endangerment Assessment (PEA), and granted "conditional" No Further Action (NFA) status to the Golden Valley Road alignment. Phase 1 of the ordnance and explosive waste (OEW) clearance activities has been completed for the road alignment. Upon completion of Phase 2 of the OEW clearance (which will take place during initial grading), unconditional NFA status will be granted. Once OEW clearance activities have been completed on the remaining portions of OU1A, OU1B, and OU1C, the same NFA status will be granted.

Completed Sub Area Name: Not reported  
Completed Document Type: Site Characterization Workplan  
Completed Date: 11/17/2009  
Comments: This is the Workplan for Further/No Further Investigation sites for Munitions and Explosives of Concern (MEC) Program. Although the plan was originally approved on June 2, 2008, Whittakers consultants still had to complete the DU workplan. The DU workplan was also being reviewed by LA County Health Radiation Assessment Unit. The DU plan was approved on 10/15/2009.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 10/02/2013  
Comments: Comments from GSU Staff: As I mentioned have reviewed the First Quarter 2013 groundwater monitoring report for Whittaker Bermite. The report did not indicate any significant changes in groundwater conditions at the site. Groundwater flow direction and the distribution of contaminants has stayed consistent with previous reports. I spent some time looking at groundwater elevation data from the sentry wells nears Saugus 1, wells AL-12A and AL-12B in conjunction with the off site wells, GW-13A and GW-13B, installed by Saugus Industrial. I was looking at these wells to see if there was any connection based on water levels and contaminant concentrations. Water levels between GW-13B and AL-12B match up very well. The water levels are similar, and they rise and fall together. This indicates that the two wells are hydraulically connected and there does not appear to be a groundwater barrier between them. These wells are screened in the deeper portion of the alluvial aquifer. Based on cross-sections provided in Whittaker Bermite s Tech Memo Number 9 these wells are screened at the bottom of the alluvial aquifer. TCE concentrations in well AL-12B vary quite a bit. I was looking for some correlation to the changes in TCE concentrations. The only one I could find was that as the vertical gradient between the upper portion of the alluvial aquifer and lower portion of the alluvial aquifer increased the TCE concentration decreased. The vertical gradient is a measure of whether groundwater is being pushed up in the aquifer from below ( a positive gradient), or whether it is flowing downwards, so water at the top of the aquifer is flowing into the deeper portions ( a negative gradient). The vertical gradient between the upper portion of alluvial aquifer and the lower is negative. This can be seen by comparing water levels in AL- 12A and AL-12B. The water level in AS-12A is always a little higher,

**S111459847**

indicating more pressure is at the top of the aquifer, so water will flow from the upper portions to the lower portions of the aquifer. The greater the difference in the water levels the higher the gradient. When the vertical gradient is higher the TCE concentrations in AL-12B are lower. This tells me that when more groundwater is flowing from the upper portion of the aquifer to the lower the TCE concentrations decline because the upper aquifer groundwater is not contaminated and dilutes the contaminated groundwater at the bottom of the aquifer. This is in accordance with TCE data from wells AL-12A; AL-12B, and GW-13A;GW-13B, where the upper well does not have TCE, but the lower well shows TCE contamination

Completed Document Type: Operations and Maintenance Report  
Completed Date: 06/27/2014  
Comments: (Email sent on 6/27/2014) The Progress Report includes the most recent soil vapor sample and system influent analytical results which were collected in March 2014. The system has been operating since June 2012. During December 2013 the system was shut down for a month to allow for rebound testing. After the rebound period soil vapor samples did not show a significant increase in concentrations. Once the rebound period was over the system was started up again and has been operating continuously since January 2014. Out of a total of 72 soil vapor probes sampled during the March 2014 sampling event PCE concentrations were below the risk based target concentrations in all but three of the vapor monitoring probes. Vapor monitoring probes 27-VMP-02, 27-VMP-03 and 27-VMP-10 contained PCE at concentrations of 0.37, 0.11, and 0.44 ppmv, respectively. These concentrations exceed the risk based target concentration for PCE of 0.056 ppmv. The Progress Report includes the conclusion that conditions for system shutdown have been achieved, and recommendations shutting down system. Based on overall low concentrations of VOCs in soil vapor, the lack of significant rebound of VOC concentrations after the shutdown period, and the plan to excavate the soil for perchlorate remediation, I concur with the recommendation to shut down the soil vapor extraction system.

Completed Document Type: Monitoring Report  
Completed Date: 05/09/2016  
Comments: Document accepted as final. DTSC will continue tracking groundwater elevations and TCE concentrations between well AL-12B, which is a sentry well for production well Saugus 1, and well GW-13B, which tracks the TCE plume extending from the Saugus Industrial center. The groundwater elevations between the two wells match each other and show the same trends, and the trend of TCE concentrations in the two wells show some correlation.

Completed Date: 01/15/2018  
Comments: Report was accepted provided that future reports address the following comment from ESU The report presents summary of operations and monitoring data for the two SVE systems, 2H and 2L, referring to high and low flow rates, at the above area. 4.6 lbs of VOCs removed by the combined systems. The report indicates that additional VEWs around VMP-06 and VMP-10 were installed and will be connected to the system. But no detail is provided regarding number, exact locations and construction details. I recommend installation details and revised figure be provided in the next quarterly report.

Completed Area Name: Operable Unit 1  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Environmental Impact Report  
Completed Date: 05/07/2004  
Comments: Initial Study completed & Signed

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)  
Completed Date: 11/27/2002  
Comments: I & SE order for RI/FS - RAW/RAP. Whittaker signed Imminent and Substantial Endangerment Determination and Remedial Action Order (Docket No. IS&E 02/03-009), to resume remedial activities at the site that were inclusive of the previous Enforceable Agreement signed by SCLLC. The Health and Safety Code Section 25355.5 (a)(1)(B) authorizes DTSC to issue an order establishing a schedule for removing or remedying a release of a hazardous substance at a site, or for correcting the conditions that threaten the release of a hazardous substance.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Mitigated Neg. Dec. (MND)  
Completed Date: 08/21/2002  
Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Consent Order  
Completed Date: 02/14/2001  
Comments: Santa Clarita LLC signed the Enforceable Agreement (EA) to conduct site investigation and restoration activities as a responsible party pursuant to H&SC section 25187(a)3 and 25323.5. The EA outlines specific DTSC requirements for soil and groundwater investigation and remediation activities.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Consent Order  
Completed Date: 11/21/1994  
Comments: The consent order is entered into by DTSC and the Whittaker Corporation. The actual and/or threatened release of hazardous substances at the site requires respondent to take necessary corrective action to remove the threat of a release, or to determine the nature and extent of the release and adequately characterize the site, prepare a remedial action plan, and complete the necessary removal or remedial actions. Actions required by the consent order are necessary to protect public health, welfare and the environment.

Completed Document Type: Monitoring Report  
Completed Date: 10/25/2017  
Comments: ESU Staff provided the following comment: I reviewed the Soil Vapor Extraction Progress Report, First Quarter 2017, Area 33, dated September 1, 2017 and prepared by CDM Smith. The report presents summary of operations and monitoring data for the SVE at Area 33. The system removed 0.69 lbs. of VOCs during the quarter. The data presented supports the conclusion of the report that the system is approaching asymptotic conditions, and I concur with the recommendation for rebound testing. Please let me know if you have any questions. Thanks. Tizita Peer reviewed by Ju-tseng Liu, P.E.

Completed Area Name: Operable Unit 2  
Completed Sub Area Name: Area 4/63  
Completed Document Type: Monitoring Report  
Completed Date: 11/30/2017  
Comments: Report approved; ESU recommended that soil matrix and vapor probes sampling be conducted to determine residual contaminant levels.

Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Workplan  
Completed Date: 08/22/2002  
Comments: RAW -- Ordnance Explosives (waste) Removal Action Workplan. Provides for the storage and treatment of Ordnance Explosives (OE) items identified during RI/FS for chemicals of potential concern for the entire site. Avoids the need for Emergency Permitting for the treatment of OE items identified during RI/FS. CEQA -- CEQA Review for the Initial Study prepared for the Former Whittaker-Bermite Facility - NOD was also prepared for Negative Declaration.

Completed Area Name: Operable Unit 1  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 02/11/2000  
Comments: DTSC completed review of the OU1A, OU1B, and OU1C Preliminary Endangerment Assessment (PEA), and granted "conditional" No Further Action (NFA) status to the Golden Valley Road alignment. Phase 1 of the ordnance and explosive waste (OEW) clearance activities has been completed for the road alignment. Upon completion of Phase 2 of the OEW clearance (which will take place during initial grading), unconditional NFA status will be granted. Once OEW clearance activities have been completed on the remaining portions of OU1A, OU1B, and OU1C, the same NFA status will be granted.

Comments: Comments from GSU Staff: As I mentioned have reviewed the First Quarter 2013 groundwater monitoring report for Whittaker Bermite. The report did not indicate any significant changes in groundwater conditions at the site. Groundwater flow direction and the distribution of contaminants has stayed consistent with previous

MAP FINDINGS

reports. I spent some time looking at groundwater elevation data from the sentry wells nears Saugus 1, wells AL-12A and AL-12B in conjunction with the off site wells, GW-13A and GW-13B, installed by Saugus Industrial. I was looking at these wells to see if there was any connection based on water levels and contaminant concentrations. Water levels between GW-13B and AL-12B match up very well. The water levels are similar, and they rise and fall together. This indicates that the two wells are hydraulically connected and there does not appear to be a groundwater barrier between them. These wells are screened in the deeper portion of the alluvial aquifer. Based on cross-sections provided in Whittaker Bermite s Tech Memo Number 9 these wells are screened at the bottom of the alluvial aquifer. TCE concentrations in well AL-12B vary quite a bit. I was looking for some correlation to the changes in TCE concentrations. The only one I could find was that as the vertical gradient between the upper portion of the alluvial aquifer and lower portion of the alluvial aquifer increased the TCE concentration decreased. The vertical gradient is a measure of whether groundwater is being pushed up in the aquifer from below ( a positive gradient), or whether it is flowing downwards, so water at the top of the aquifer is flowing into the deeper portions ( a negative gradient). The vertical gradient between the upper portion of alluvial aquifer and the lower is negative. This can be seen by comparing water levels in AL- 12A and AL-12B. The water level in AS-12A is always a little higher, indicating more pressure is at the top of the aquifer, so water will flow from the upper portions to the lower portions of the aquifer. The greater the difference in the water levels the higher the gradient. When the vertical gradient is higher the TCE concentrations in AL-12B are lower. This tells me that when more groundwater is flowing from the upper portion of the aquifer to the lower the TCE concentrations decline because the upper aquifer groundwater is not contaminated and dilutes the contaminated groundwater at the bottom of the aquifer. This is in accordance with TCE data from wells AL-12A; AL-12B, and GW-13A;GW-13B, where the upper well does not have TCE, but the lower well shows TCE contamination

Completed Document Type: Operations and Maintenance Report  
Completed Date: 06/27/2014  
Comments: (Email sent on 6/27/2014) The Progress Report includes the most recent soil vapor sample and system influent analytical results which were collected in March 2014. The system has been operating since June 2012. During December 2013 the system was shut down for a month to allow for rebound testing. After the rebound period soil vapor samples did not show a significant increase in concentrations. Once the rebound period was over the system was started up again and has been operating continuously since January 2014. Out of a total of 72 soil vapor probes sampled during the March 2014 sampling event PCE concentrations were below the risk based target concentrations in all but three of the vapor monitoring probes. Vapor monitoring probes 27-VMP-02, 27-VMP-03 and 27-VMP-10 contained PCE at concentrations of 0.37, 0.11, and 0.44 ppmv, respectively. These concentrations exceed the risk based target concentration for PCE of 0.056 ppmv. The Progress Report includes the conclusion that conditions for system shutdown have been achieved, and recommendations shutting down system. Based on overall low concentrations of VOCs in soil vapor, the lack of significant rebound of VOC concentrations after the shutdown period, and the plan to excavate the soil for perchlorate remediation, I concur with the recommendation to shut down the soil vapor extraction system.

Completed Area Name: Operable Unit 7  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 05/09/2016  
Comments: Document accepted as final. DTSC will continue tracking groundwater elevations and TCE concentrations between well AL-12B, which is a sentry well for production well Saugus 1, and well GW-13B, which tracks the TCE plume extending from the Saugus Industrial center. The groundwater elevations between the two wells match each other and show the same trends, and the trend of TCE concentrations in the two wells show some correlation.

Comments: Report was accepted provided that future reports address the following comment from ESU The report presents summary of operations and monitoring data for the two SVE systems, 2H and 2L, referring to high and low flow rates, at the above area. 4.6 lbs of VOCs removed by the combined systems. The report indicates that additional VEWs around VMP-06 and VMP-10 were installed and will be connected to the system. But no detail is provided regarding number, exact locations and construction details. I recommend installation details and revised figure be provided in the next quarterly report.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Consent Order  
Completed Date: 02/14/2001  
Comments: Santa Clarita LLC signed the Enforceable Agreement (EA) to conduct site investigation and restoration activities as a responsible party pursuant to H&SC section 25187(a)3 and 25323.5. The EA outlines specific DTSC requirements for soil and groundwater investigation and remediation activities.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Consent Order  
Completed Date: 11/21/1994  
Comments: The consent order is entered into by DTSC and the Whittaker Corporation. The actual and/or threatened release of hazardous substances at the site requires respondent to take necessary corrective action to remove the threat of a release, or to determine the nature and extent of the release and adequately characterize the site, prepare a remedial action plan, and complete the necessary removal or remedial actions. Actions required by the consent order are necessary to protect public health, welfare and the environment.

Description: Whittaker-Bermite is a former manufacturing facility located on approximately 996 acres in Santa Clarita, Los Angeles County. Residential housing is located to the south and southwest at the boundary of the site. An approximately ten acre portion of the northern border portion of the site has been converted into a commuter rail station. Approximately 12 acres dedicated for Golden Valley Road, has been partially constructed along the eastern portion

**FORMER WHITTAKER BERMITE FACILITY (Continued)**

**S111459847**

of the site. The site contained approximately 350 buildings located throughout the site which were used for manufacturing, storage and testing of explosives and administrative purposes. From 1934 until 1987, explosives were manufactured and tested, and off specification items were burned and buried on the site. These included dynamite, practice bombs, flares, fireworks, oil field explosives, igniters, gas generators, ammunition rounds, Jato rockets, and sidewinder and spin rocket motors. Material or mixtures of materials used at the site include lead azide, red phosphorus, barium, zinc, copper, chromium, and chlorinated solvents such as Tetrachloroethylene (PCE) and Trichloroethylene (TCE). Potassium perchlorate and ammonium perchlorate were also used as the oxidizer component of propellant mixtures. The facility was operating under interim status under RCRA and operating fourteen hazardous waste treatment, storage and disposal units. In November 1983, Whittaker Bermite filed three letters with DTSC describing the closure activities of these fourteen interim status units. DTSC acknowledged Whittaker's certification of closure for thirteen of the fourteen regulated hazardous waste management units. The one remaining hazardous waste management unit (now operable unit #6), a surface impoundment containing TCE contaminated soil will be cleaned up under the OU2/OU6 RI/FS. In 1987, Whittaker Bermite identified Solid Waste Management Units (SWMUs) to U.S. EPA. In 1992, DTSC executed a search warrant which uncovered paperwork identifying additional potential SWMUs at the site that were not included in the previous reports. Several investigations were conducted at the Site by various consultants from the mid-1980s to 1997. These investigations have included soil-gas sampling, trenching and soil sampling, soil borings, soil excavations, geophysical surveys, groundwater sampling, and remedial operations. Wenck Associates Inc. (WAI) conducted trenching and soil sampling at several areas across the Site in 1986 and 1987. WAI also collected soil-gas and soil-matrix samples associated with a large excavation and soil vapor extraction (SVE) remedial operations in the Area 1 of OU2 (OU6), the former Building 317 impoundment, between 1986 and 1991 (WAI, 1986, 1987, 1988a, 1988b, 1988c, 1989a, 1989b, 1989c, and 1991). WAI also conducted confirmation soil sampling associated with a small remedial excavation conducted in Area 14 of OU3 in 1988 (WAI, 1988). IT Corporation (IT) conducted trenching and soil sampling at several areas across the Site in 1990 (IT, 1990). AME conducted a site-wide remedial investigation from 1995 to 1997 that included trenching, soil borings, geophysical surveys, radiological surveys, installation of wells, and the collection of soil-gas, soil-matrix, surface water, and groundwater samples (AME, 1997). AME also conducted monitoring of the Area 1 SVE system, which operated at the Site from 1988 to 2002, and the Area 1 groundwater pump & treat (P&T) remediation system, which operated from 1989 to 1992. The results of these investigations were previously summarized in the work plans prepared for OU2/OU6, OU3, OU4, and OU5 by MKC (MKC, 2000) and Knight Pi sold (Knight Pi sold, 2003a, 2003b, and 2004) are not discussed in detail herein. Brief summaries of the site history and previous investigations that highlight key features and/or findings are presented in the background sections for each of the individual investigation areas in Sections 2, 3, 4, and 5. In October 1992, Whittaker Corporation submitted a PEA to DTSC for a 10.3 acre parcel of the site containing four SWMUs. This parcel would be used as a commuter rail station by the city of Santa Clarita if the PEA determined that the site did not pose a threat to human

**FORMER WHITTAKER BERMITE FACILITY (Continued)**

**S111459847**

health or the environment. DTSC also stipulated that if site conditions differed from those presented in the PEA, then further characterization/remediation would be required. In 1993, a soil investigation by DTSC in the Burn Valley area of the site detected 92,000 mg/kg PCE, 290 mg/kg lead, 36,000 mg/kg copper, 550 mg/kg chromium, 1,300 mg/kg barium. Thirty-two percent of phosphorus was also identified at the New Lead Azide area. In November 1994, DTSC and Whittaker entered into a Consent Order requiring further investigation and possible remedial action. Exhibit 3 of the consent order lists 7 potential solid waste management units (SWMUs). Acton Mickelson Environmental (AME) conducted a comprehensive sampling and testing program during the period from 1995 to 1997. AME identified a comprehensive list of chemicals used at the former Bermite plant, including a wide range of organic and inorganic substances for the production of ammunition, flares, solid rocket fuel, and specialty explosive products. Sampling results showed that some chemicals of potential concern were detected in soils up to depths of 200 feet. AME and DTSC together identified 76 areas of concern within the seven OUs. These areas were identified as former waste management units or former production/manufacturing facilities (AME, 1997). On January 11, 1999, the Whittaker Corporation completed the sale of its Bermite facility to Santa Clarita L.L.C. (SCLLC), an affiliated entity of Remedial Financial, Incorporated (RFI). RFI is an Arizona corporation doing business in California. SCLLC is conducting site investigations and required remedial actions at the Site in order to develop the Site for residential and commercial use. Santa Clarita LLC (SCLLC) entered a similar enforceable agreement with DTSC after taking over responsibility for the cleanup in 1999 (Docket No. HAS-A 00/01-174). DTSC approved an operable unit (OU) designation for the 996 acre site in April 1999. In designating seven (7) OUs a focused effort is placed on specific areas, migration pathways, and releases in discrete parts of the Site with the emphasis on addressing public health and environmental concerns first along with the needs of the community. The OU boundaries were drawn by drainage basin. OU6 within OU2, is the one remaining RCRA hazardous waste management unit. The extent of groundwater impacts was designated as OU7. OU1 was broken up into sub-OUs to accommodate the community's need for a road leading to a proposed new school site. The extension of Golden Valley Road traverses the northeastern portion of the site for access to the New Golden Valley High School. A workplan for the investigation of OU1A and OU1C and a portion of OU1B that included the footprint of the proposed Golden Valley Road construction was submitted and approved by DTSC in May 1999. Results of the investigation were submitted in the PEA (Knight Piesold 2000) and by DTSC issuing a "No Further Action" determination cleared the way for construction of the road. In August 2002, a Removal Action Work Plan (RAW) for the removal and disposal of ordnance and explosive waste (OE) and associated CEQA documents was public noticed and approved by DTSC. The OE RAW provided for the storage and treatment of Ordnance Explosives (OE) items identified during RI/FS for chemicals of potential concern for the entire site thus avoiding the need for Emergency Permitting for the treatment of OE items identified during RI/FS. A CEQA Initial Study and Negative Declaration was prepared for this RAW. EODT Technology, Inc. (EODT), under subcontract to the United States Army Corps of Engineers (USACE), conducted a landfill removal demonstration project in OU4 in 2002 (EODT, 2003a and 2003b) In November 2002, after it became apparent that SCLLC was not

financially capable of complying with the consent order, DTSC issued a unilateral order to Whittaker to resume the Site investigation and remediation work (DTSC, 2002). In the Order, Whittaker was required to submit monthly progress reports to DTSC documenting the investigation and cleanup activities at the Site. In 2004, DTSC approved the Operable Unit 1 Feasibility Study, the Draft Remedial Action Workplan and the final Public Participation Plan. DTSC completed the Initial Study for the cleanup of soils in Operable Unit 1 as described in the Feasibility Study and Remedial Action Workplan, in compliance with California Environmental Quality Act. A Fact Sheet describing the proposed cleanup of contaminants in Operable Unit 1 soils was prepared and distributed to the community. DTSC initiated and advertised the 30-day public (May 10 through June 11, 2004), comment and review of the Draft Remedial Action Plan and the Negative Declaration. As part of the comment period DTSC held an open house and public meeting on May 19, 2004 to discuss the proposed cleanup, answer questions and record oral and written comments from the community. Copies of Operable Unit 1 Feasibility Study, Draft Remedial Action Workplan and the Public Participation Plan were delivered to the information repositories for public review and were also available at the public meeting for review. During the public comment meeting, community members and stakeholders requested additional detail of the technologies and process conceptually introduced in the draft OU1 RAP. DTSC held a second public comment period and meeting. DTSC responded to comments received and approved the OU1 RAP and RD for implementation in February 2005. The RAP/RD were implemented through January 2008. Bi-monthly progress reports were submitted to DTSC. In October 2005 DTSC approved the Workplan for Unexploded Ordnance/Ordnance and Explosive Waste Investigation (UXO/OEW) Investigation, Clearance and Construction Support and Geophysical Investigation Plan. The OU2-OU6 RI/FS Reports were submitted to DTSC in early 2006. DTSC approved the RI Reports in July 2006 and the FS in September 2006. In October 2006, EOD Technologies (EODT) submitted the Historical Site Assessment documenting their research on historical production-related assembly and waste management practices and on the potential for these to have resulted in the release of munitions and explosives of concern (MEC) into the environment. DTSC reviewed the document and approved on November 2006. Portions of the OU7 RI Report were first submitted to DTSC in August of 2006. Additional sections of the document were added in the following months. DTSC approved the RI in November 2007. In May 2008, EODT submitted the Work Plan Addendum (WPA) for Munitions and Explosives of Concern Clearance Activities at Hula Bowl II and III associated Drainage Area and the Depleted Uranium Impacted Area. This WPA is an addendum to the DTSC approved EODT Work Plan for UXO/OE Investigation, Clearance, and Construction Support (October 2005). The clearance activities at Hula Bowl drainage area are based upon recommendations presented to DTSC in the EODT Historical Site Assessment Report (October 2006). MEC clearance activities for the DU area are in support of evaluation and removal of DU impacted soil. DTSC approved the WPA in June 2008. In June 2009, Energy Solutions Inc. submitted the Work Plan to remove and dispose of approximately 4200 cubic yards of soil containing depleted uranium (DU) at concentrations exceeding a Derived Concentration Limit (DCGL) of 18.8 picocuries/gram total uranium within the study area in Area 14 in OU3. The workplan included summaries of previous investigations and removal bench studies. The California Department of Public(DPH),

Radiological Health Branch and DTSC provided joint regulatory oversight for the removal project. DTSC issued a conditional approved letter in October 2009 indicating that any DPH and DTSC comments and requests for additional information be resolved prior to implementation of the workplan. The First draft RAP for the cleanup of soils in OU2 through OU6 was submitted to DTSC in August 2008. This version of the draft RAP proposed to cleanup of the property while grading for development. DTSC rejected this concept because of the status of the sale of the property. The second version of the draft RAP was submitted in May 2010. This draft incorporated the Porta Bella Plan grading envelope, which the City of Santa Clarita has stated would remain essentially unchanged even under alternative redevelopment plans. This strategy ensured that the remedial efforts will render the Site safe for human health and the environment under both the current Site conditions and future anticipated uses and grades. After another round of revisions, DTSC approved the Draft RAP dated July 12, 2010 for public notice. A CEQA Initial Study and a draft Mitigated Negative Declaration was prepared. The public comment period was held from July 19, 2010 to August 19, 2010. A public meeting was held on July 29, 2010. DTSC received and responded to public and other agency comments and approved the RAP for implementation on December 6, 2010. The first draft of the Feasibility Study for OU7-Groundwater was submitted in April 2010; DTSC provided comments and the FS was resubmitted and approved by DTSC in May 2011. The primary treatment technology for contaminated water was biological treatment in fluidized bed reactors. Other proposed remedies included permeable reactive zone barriers and in-situ treatment for perched water. The OU1 Remedial Action Completion Report (RACR) was submitted in March 2010. Perchlorate and chlorinated volatile organic compound (VOC) impacted soils were treated using a combination of remedial technologies which included excavation, ex-situ bioremediation, and in-situ and ex-situ soil vapor extraction (SVE) systems. The RACR was approved by DTSC but required further evaluation of some areas upon completion of the cleanup of the rest of the OUs. Remedial excavations were initiated on May 2, 2006 and completed on October 27, 2008. Approximately 393,945 cubic yards of perchlorate contaminated soils were excavated, treated and reused onsite for backfilling excavated areas. It is estimated that over 3,352 pounds of VOC mass was removed during these operations. In addition, 17,000 cubic yards of excavated soils containing residual VOC concentrations were processed and treated using SVE ex-situ operations. The Site-Wide (OU2-6) Soils Remedial Design (RD) was approved by DTSC for implementation in correspondence dated January 4, 2013. Subsequently, excavation and remediation of the OU5 soils started in October 2014 and were completed in November 2015. The grading plans for OU2-OU4 were approved by the City of Santa Clarita (the City) on July 14, 2015 and field activities and implementation of soil remediation in these remaining OUs started on September 3, 2015 and are ongoing. The OU7 RAP was first submitted in October 2011. DTSC prepared a CEQA Initial Study and Mitigated Negative Declaration and held a public comment period from April 28 to June 30, 2014 and a public meeting on May 15, 2014. DTSC addressed public comments received and approved the RAP on in December 2014. The Saugus Aquifer Treatment Plant (SATP) was completed in June 2017.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 01/14/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 01/14/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020  
Date Data Arrived at EDR: 01/14/2021

Telephone: 703-603-8704  
Last EDR Contact: 12/23/2020  
Next Scheduled EDR Contact: 04/12/2021  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/30/2020  
Date Data Arrived at EDR: 01/14/2021  
Date Made Active in Reports: 02/18/2021

Next Scheduled EDR Contact: 04/26/2021  
Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: 800-424-9346
Date Made Active in Reports: 02/18/2021	Last EDR Contact: 01/14/2021
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2021

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/11/2020	Source: Department of the Navy
Date Data Arrived at EDR: 11/17/2020	Telephone: 843-820-7326
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 02/08/2021
Number of Days to Update: 84	Next Scheduled EDR Contact: 05/24/2021
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 13	Next Scheduled EDR Contact: 03/08/2021
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 13	Next Scheduled EDR Contact: 03/08/2021
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

	Data Release Frequency: Varies

## INDIAN UST R8: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 8 (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming and 27 Tribal Nations).

Date of Government Version: 04/14/2020	Source: EPA Region 8
Date Data Arrived at EDR: 05/20/2020	Telephone: 303-312-6137
Date Made Active in Reports: 08/13/2020	Last EDR Contact: 12/16/2020
Number of Days to Update: 85	Next Scheduled EDR Contact: 05/03/2021
	Data Release Frequency: Varies

## INDIAN UST R4: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 4 (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee and Tribal Nations)

Date of Government Version: 04/14/2020	Source: EPA Region 4
Date Data Arrived at EDR: 05/26/2020	Telephone: 404-562-9424
Date Made Active in Reports: 08/12/2020	Last EDR Contact: 12/16/2020
Number of Days to Update: 78	Next Scheduled EDR Contact: 05/03/2021
	Data Release Frequency: Varies

## INDIAN UST R6: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).

Date of Government Version: 04/08/2020	Source: EPA Region 6
Date Data Arrived at EDR: 05/20/2020	Telephone: 214-665-7591
Date Made Active in Reports: 08/12/2020	Last EDR Contact: 12/16/2020
Number of Days to Update: 84	Next Scheduled EDR Contact: 05/03/2021
	Data Release Frequency: Varies

## INDIAN UST R5: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).

Date of Government Version: 04/14/2020	Source: EPA Region 5
Date Data Arrived at EDR: 05/20/2020	Telephone: 312-886-6136
Date Made Active in Reports: 08/12/2020	Last EDR Contact: 12/16/2020
Number of Days to Update: 84	Next Scheduled EDR Contact: 05/03/2021
	Data Release Frequency: Varies

## ***State and tribal voluntary cleanup sites***

### INDIAN VCP R1: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015	Source: EPA, Region 1
Date Data Arrived at EDR: 09/29/2015	Telephone: 617-918-1102
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 12/15/2020
Number of Days to Update: 142	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## INDIAN VCP R7: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008	Source: EPA, Region 7
Date Data Arrived at EDR: 04/22/2008	Telephone: 913-551-7365
Date Made Active in Reports: 05/19/2008	Last EDR Contact: 04/20/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/20/2009
	Data Release Frequency: Varies

## VCP: Voluntary Cleanup Program Properties

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 10/26/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 10/26/2020	Telephone: 916-323-3400
Date Made Active in Reports: 01/13/2021	Last EDR Contact: 01/26/2021
Number of Days to Update: 79	Next Scheduled EDR Contact: 05/10/2021
	Data Release Frequency: Quarterly

## **State and tribal Brownfields sites**

### BROWNFIELDS: Considered Brownfields Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 09/21/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 09/22/2020	Telephone: 916-323-7905
Date Made Active in Reports: 12/11/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 80	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2020	Telephone: 202-566-2777
Date Made Active in Reports: 12/10/2020	Last EDR Contact: 12/11/2020
Number of Days to Update: 86	Next Scheduled EDR Contact: 03/29/2021
	Data Release Frequency: Semi-Annually

### **Local Lists of Landfill / Solid Waste Disposal Sites**

#### WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Local Lists of Hazardous waste / Contaminated Sites**

### **US HIST CDL: National Clandestine Laboratory Register**

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 03/18/2020	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/19/2020	Telephone: 202-307-1000
Date Made Active in Reports: 06/09/2020	Last EDR Contact: 02/22/2021
Number of Days to Update: 82	Next Scheduled EDR Contact: 06/06/2021
	Data Release Frequency: No Update Planned

### **HIST CAL-SITES: Calsites Database**

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### **SCH: School Property Evaluation Program**

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 10/26/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 10/26/2020	Telephone: 916-323-3400
Date Made Active in Reports: 01/13/2021	Last EDR Contact: 01/26/2021
Number of Days to Update: 79	Next Scheduled EDR Contact: 05/10/2021
	Data Release Frequency: Quarterly

### **CDL: Clandestine Drug Labs**

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 06/30/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 05/28/2020	Telephone: 916-255-6504
Date Made Active in Reports: 08/12/2020	Last EDR Contact: 01/19/2021
Number of Days to Update: 76	Next Scheduled EDR Contact: 04/19/2021
	Data Release Frequency: Varies

### **TOXIC PITS: Toxic Pits Cleanup Act Sites**

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 01/26/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: No Update Planned

### **CERS HAZ WASTE: CERS HAZ WASTE**

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/19/2020

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/18/2020  
Date Data Arrived at EDR: 03/19/2020

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 11/30/2020	Source: DTSC and SWRCB
Date Data Arrived at EDR: 12/01/2020	Telephone: 916-323-3400

Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021

### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 09/29/2020	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 11/17/2020	Telephone: 202-528-4285
Date Made Active in Reports: 01/25/2021	Last EDR Contact: 02/17/2021
Number of Days to Update: 69	Next Scheduled EDR Contact: 05/31/2021
	Data Release Frequency: Varies

### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 01/15/2021
Number of Days to Update: 62	Next Scheduled EDR Contact: 04/26/2021
	Data Release Frequency: Semi-Annually

### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 04/02/2018	Source: U.S. Geological Survey

Date Made Active in Reports: 11/06/2019	Last EDR Contact: 01/07/2021
Number of Days to Update: 574	Next Scheduled EDR Contact: 04/19/2021
	Data Release Frequency: N/A

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995  
Date Made Active in Reports: 08/07/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A

Data Release Frequency: No Update Planned

#### **EDR Hist Auto: EDR Exclusive Historical Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A

#### **EDR Hist Cleaner: EDR Exclusive Historical Cleaners**

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C0820F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
Not Reported	

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NEWHALL	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile West
Site Name:	HASA CHEM INC
Site EPA ID Number:	CAD009656075
Groundwater Flow Direction:	GENERALLY W IN BOTH THE ALLUVIAL AND SAUGUS AQUIFERS.
Inferred Depth to Water:	approximately 52 feet.
Hydraulic Connection:	The site is underlain by a near-surface alluvial aquifer and the underlying Saugus aquifer that are separated by a relatively impermeable layer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	7 inches	70 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 2**

Soil Component Name: Saugus

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 4

Soil Component Name: Ojai

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
2	25 inches	53 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
3	53 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1

### Soil Map ID: 5

Soil Component Name: Sandy alluvial land

Soil Surface Texture: sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Excessively drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 25 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
2	9 inches	29 inches	stratified sand to loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
3	29 inches	59 inches	stratified gravelly sand to gravelly loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

Soil Component Name: Ojai

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
2	25 inches	53 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
3	53 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1

**Soil Map ID: 8**

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	7 inches	70 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION

<u>DATABASE</u>	<u>SEARCH DISTANCE (miles)</u>
Federal USGS	1.000
Federal FRDS PWS	Nearest PWS within 1 mile
State Database	1.000

## FEDERAL USGS WELL INFORMATION

<u>MAP ID</u>	<u>WELL ID</u>	<u>LOCATION FROM TP</u>
No Wells Found		

## FEDERAL FRDS PUBLIC WATER SUPPLY SYSTEM INFORMATION

<u>MAP ID</u>	<u>WELL ID</u>	<u>LOCATION FROM TP</u>
M87	CA1900029	1/2 - 1 Mile West

Note: PWS System location is not always the same as well location.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## EXECUTIVE SUMMARY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.625 miles of the target property.

SMITH AND THOMPSON P	244 WEST AVENUE	NE 1/8 - 1/4 (0.192 mi.)	500	1271

#### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.375 miles of the target property.

## EXECUTIVE SUMMARY

EPA ID:: CAL000003415

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 52 RCRA-SQG sites within approximately 0.375 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.375 miles of the target property.

### **Federal ERNS list**

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2

## EXECUTIVE SUMMARY

ERNS sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/26/2020 has revealed that there are 3 ENVIROSTOR sites within approximately 1.125 miles of the target property.

### **State and tribal landfill and/or solid waste disposal site lists**

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.625 miles of the target property.

### **State and tribal leaking storage tank lists**

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 50 LUST sites within approximately 0.625 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.625 miles of the target property.

## EXECUTIVE SUMMARY

### ***State and tribal registered storage tank lists***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 20 UST sites within approximately 0.375 miles of the target property.

### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 31 SWEEPS UST sites within approximately 0.375 miles of the target property.

### ***Records of Emergency Release Reports***

HMIRS: The Hazardous Materials Incident Report System contains hazardous material spill incidents reported to the Department of Transportation. The source of this database is the U.S. EPA.

A review of the HMIRS list, as provided by EDR, and dated 09/20/2020 has revealed that there is 1 HMIRS site within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	330 W PILLSBURY	SSE 0 - 1/8 (0.057 mi.)	C283	627

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 09/30/2020 has revealed that there are 2 CHMIRS sites within approximately 0.125 miles of the target property.

LDS: Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LDS list, as provided by EDR, and dated 12/04/2020 has revealed that there is 1 LDS site within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 67 RCRA NonGen / NLR sites within approximately 0.375 miles of the target property.

## EXECUTIVE SUMMARY

EPA ID:: CAL000299078

RMP: When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

A review of the RMP list, as provided by EDR, and dated 11/02/2020 has revealed that there is 1 RMP site within approximately 0.125 miles of the target property.

LACDPW-SITE01	419 W AVENUE J	S 0 - 1/8 (0.010 mi.)	C21	55

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, has revealed that there is 1 FTTS site within approximately 0.125 miles of the target property.

Database: FTTS, Date of Government Version: 04/09/2009				
Docket Number:: 09-87-0016				
Close Date:: / /				

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, has revealed that there is 1 HIST FTTS site within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

**FINDS:** The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/04/2020 has revealed that there are 71 FINDS sites within approximately 0.125 miles of the target property.

Facility Id: 4547

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 85 HAZNET sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

GEPAID: CAC002572581

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 26 HIST CORTESE sites within approximately 0.625 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 10/19/2020 has revealed that there are 42 CERS sites within approximately 0.125 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 24 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

### EDR RECOVERED GOVERNMENT ARCHIVES

#### ***Exclusive Recovered Govt. Archives***

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 21 RGA LUST sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID: 129230  
Site Name: LAC PUBLIC WORKS WATERWORKS  
Violation Date: 01-24-2018  
Citation: 19 CCR 4.5 2760.8(a) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.8(a)  
Violation Description: Failure of the owner or operator to certify that they have evaluated compliance with the provisions of this article at least every three years to verify that the procedures and practices developed under 19 CCR 4.5 the are adequate and are being followed.  
Violation Notes: Returned to compliance on 06/05/2019. OBSERVATION: The owner/operator failed to certify that they have evaluated compliance with the provisions of this article at least every three years to verify that the procedures and practices developed under the chapter are adequate and are being followed. Document review shows the compliance audit dates were more than 3 years. Compliance audits were conducted in 2009, 2014 and 2017. CORRECTIVE ACTION: Submit a certification to the CUPA that the owner/operator has evaluated compliance with the provisions of this article at least every three years to verify that the procedures and practices developed under the chapter are adequate and are being followed.

Site ID: 129230  
Site Name: LAC PUBLIC WORKS WATERWORKS  
Violation Date: 01-24-2018  
Citation: 19 CCR 4.5 2760.5(e) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.5(e)  
Violation Description: Failure to correct deficiencies in equipment that are outside acceptable limits before further use or in a safe and timely manner when necessary means are taken to assure safe operation.  
Violation Notes: Returned to compliance on 06/05/2019. OBSERVATION: The owner/operator failed to correct deficiencies in equipment that are outside acceptable limits before further use or in a safe and timely manner when necessary means are taken to assure safe operation. Observed inadequately operating emergency eye wash station and the shower installed at the exterior of the chlorine storage building. Only one side of the eye wash spout was functioning and the emergency shower was leaking. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating the owner/operator has corrected deficiencies in the equipment that is outside acceptable limits. Repair and maintain the eye wash and shower equipment in working order at all the times.

LAC PUBLIC WORKS WATERWORKS (Continued)

S123500503

Violation Description: 6.95, Section(s) 25508(a)(3)  
Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 10/17/2019. OBSERVATION: The business failed to complete and electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. Site map didn't include the 2nd buiding that is used for hazaroud materials storage. CORRECTIVE ACTION: Complete and electronically submit a site map with all required content. Update the sitemap to include all hazmat storage areas and resubmit to CERS.

Violation Division: Los Angeles County Fire Department  
Violation Program: HMRRP  
Violation Source: CERS

Site ID: 129230  
Site Name: LAC PUBLIC WORKS WATERWORKS  
Violation Date: 01-24-2018  
Citation: 19 CCR 4.5 2765.2(a) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2765.2(a)

Violation Description: Failure to develop, implement, and maintain at the stationary source an emergency response program that includes the following elements: 1. Procedures for informing and interfacing with the public and local emergency response agencies about accidental releases, emergency planning, and emergency response. 2. Documentation of proper first-aid and emergency medical treatment necessary to treat accidental human exposures. 3. Procedures and measures for emergency response after an accidental release of a regulated substance. 4. Procedures for the use of emergency response equipment and for its inspection, testing, and maintenance are developed by the stationary source. 5. Training for all employees in relevant procedures and relevant aspects of the Incident Command System. 6. Procedures to review and update the emergency response plan to reflect changes at the stationary source are developed and employees are informed of these changes.

Violation Notes: Returned to compliance on 06/05/2019. OBSERVATION: The owner/operator failed to develop, implement, and maintain at the stationary source an emergency response program that includes the following elements: procedures for informing and interfacing with the public and local emergency response agencies about accidental releases, emergency planning, and emergency response; documentation of proper first-aid and emergency medical treatment necessary to treat accidental human exposures; procedures and measures for emergency response after an accidental release of a regulated substance; procedures for the use of emergency response equipment and for its inspection, testing, and maintenance are developed by the stationary source; training for all employees in relevant procedures and relevant aspects of the Incident Command System; procedures to review and update the emergency response plan to reflect changes at the stationary source are developed and employees are informed of these changes. Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Notes: previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan. Returned to compliance on 07/14/2020. OBSERVATION: The business failed to update business plan within 30 days of a 100 percent or more increase in the quantity of a previously disclosed material, and any handling of a previously undisclosed hazardous material. Observed 330-gal of motor oil on-site when previously disclosing 110 gallons maximum on-site storage. Observed the following undisclosed hazardous materials on-site: 1 x 85-gal tank of automatic transmission fluid, 1 x 337-ft3 cylinder of oxygen, 1 x 55-gal drum of used antifreeze and 1 x 55-gal drum of waste oily mop water. CORRECTIVE ACTION: Updated all submittal elements effected by the changes and electronically submitted the updates through CERS at time of inspection. This violation was corrected on-site.

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 12/13/2016. OBSERVATION: The annotated site map submitted to the CUPA does not include adjacent streets, emergency response equipment, access and exit points, and evacuation staging areas. CORRECTIVE ACTION: Revise the annotated Site Map to include all required content and submit electronically in the California Environmental Reporting System (CERS).

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: DANNY'S AUTOMOTIVE & TRANS  
Address: 44506 N SIERRA HWY  
City,State,Zip: LANCASTER, CA 93534  
Site ID: 23878  
CERS ID: 10288630  
CERS Description: Chemical Storage Facilities

**Violations:**

Site ID: 23878  
Site Name: DANNY'S AUTOMOTIVE & TRANS  
Violation Date: 05-20-2016  
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)  
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.  
Violation Notes: OBSERVATION: A business plan has not been received by the CUPA. The facility was previously sent a notice/request from the CUPA for the submittal of a business plan by compliance date. CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately.

Violation Date: 09-04-2019  
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 11/19/2019. OBSERVATION: Oily water waste was observed on the concrete floor inside the North service bay near the parts washer in the Northeast corner. CORRECTIVE ACTION: Submit photos/documentation to this division demonstrating the spill has been properly removed and managed.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 128830  
Site Name: LASD - LANCASTER STATION  
Violation Date: 07-20-2016  
Citation: 23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637

Violation Description: Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test within six months of installation and every 36 months thereafter. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician or a licensed tank tester.

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)  
Violation Description: Failure to complete and electronically submit a site map with all required content.  
Violation Notes: Returned to compliance on 05/04/2018. OBSERVATION: The business failed to complete and electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. Site map uploaded through CERS is missing the following required information: evacuation staging area, emergency shut offs (electrical, water, gas, fuel), all entry/exit points, all hazardous materials storage locations (diesel UST for generator, bleach and paint not identified on map) and a view of the entire site indicating locations of other buildings and entry/exit points for the property. CORRECTIVE ACTION: Update and electronically submit a site map with all required content through CERS.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 142323  
Site Name: Penske Truck Leasing Co., LP  
Violation Date: 03-15-2018  
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 04/10/2018. OBSERVATION: 1 x 5-gallon bucket of waste paper oil filters located in the hazardous waste accumulation area was observed accumulating on-site for an unknown amount of time and a manifest/receipt demonstrating disposal within the past 180 days was not available. Operator stated that the bucket had been there since they started segregating the paper and metal filters back in 2017, and that they had not had a disposal of the paper filters since that time. CORRECTIVE ACTION: Dispose of waste paper oil filters and submit a copy of the manifest/receipt to this division.

Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS

Site ID: 142323  
Site Name: Penske Truck Leasing Co., LP  
Violation Date: 03-15-2018  
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 04/10/2018. OBSERVATION: The business did not maintain records of employee training available for review. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response equipment. Maintain records of training available for 3 years.

Violation Notes: Returned to compliance on 04/10/2018. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. Observed inaccurate/incomplete information in the hazardous materials inventory and the incorrect phone numbers on the emergency response plan for the local unified program agency and the nearest hospital. CORRECTIVE ACTION: Update and electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA. Update the following information in the inventory: for ATF change the storage container to "aboveground storage tank," for used filters change the physical state to "solid," for use oil change the common name to "used oil" and for used antifreeze provide storage pressure and storage temperature as "ambient." On the emergency response plan page 1, update the local unified program agency phone number to (323) 890-4317 and update the [Truncated]

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 04/10/2018. OBSERVATION: The business failed to complete and electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. Site map uploaded is missing the following information: adjacent streets and entry/exit points for the property. CORRECTIVE ACTION: Update and electronically submit a site map with all required content through CERS.
