Project Description (Proposed actions, location, and/or consequences).

The project consists of a grading permit to allow for the construction of a pad for a second home and a dual-access driveway. If approved, the applicant intends to extend existing access roads, construct a second home, an outdoor, in-ground pool, and a pool house.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Impacts to waters would result in a loss of habitat and potential take of wildlife species. Mitigation requiring participation in the South Sacramento Habitat Conservation Plan and compliances with its Avoidance and Minimization Measures would mitigate impacts to waters to less than significant.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
