Owner James Hopkins

AP # 122-300-01

Address 11020 Sky High Ridge Rd  
Lower Lake, CA

Date: April 14, 2020

I have inspected the existing bridge at this location.

The bridge is constructed from an 60' Trailer Train rail car. The bridge driving width is 10'

The bridge is adequate for single lane vehicles weighing no more than 80,000 lb with axles spaced in accordance with the California Vehicle Code for standard highway vehicles.

Overweight loads should not be driven across this bridge.

If you have any questions please call me.

Thank You

Marvin Chapman PE
