WATER SYSTEM #: 3910001

PROJECT TITLE: Operation of California Water Service-Stockton (CWS-Stockton) – 2.5 to 2.6-Million Gallon Tank Project (Project)

PROJECT LOCATION: 1201 South El Dorado Street, Stockton, within San Joaquin County

PROJECT DESCRIPTION: California Water Service-Stockton proposes to begin operating a new 32-foot high, 128-foot diameter, 2.5 to 2.6-million-gallon tank and a 1,120-foot² cinderblock pump station. The cinderblock pump station operation will involve the use of two 1,700-gpm pumps and one 1,200-gpm pump, a Pacific Gas and Electric meter panel, a transformer, an emergency generator with a 500-gallon fuel tank, and electrical controls. An eight-foot diameter, 20-foot long hydropneumatic tank will also be used to pressurize and store water. Storm drain piping on site and 70-feet off-site will direct and discharge stormwater to the city's storm drain system. A retention basin and vegetated areas will infiltrate runoff and reduce flows to the city storm drain system. Chain link fencing around the 87,616 foot² site will provide security. The Project will assist in providing drinking water to the City of Stockton.

PUBLIC AGENCY APPROVING PROJECT AND CARRYING OUT PROJECT: This is to advise that the State Water Resources Control Board (State Water Board) has issued a drinking water supply permit amendment 01-10-20PA-009 for the above described Project on October 20, 2020. A record of permit issuance for the Project is available to the general public at the State Water Board, Division of Drinking Water District Office noted above.

Categorical Exemption Status:

Class 1 Existing Facilities
(California Code of Regulations, Title 14, Division 6, Chapter 3, Article 19, Section 15301)

Reason why Project is exempt: The Project is the operation of an existing facility involving investor or publicly owned utilities used to provide public utility services (Class 1 (b)).
