TETRACHLOROETHYLENE (PCE)

**Site History:**

The Site is approximately 4,617.47 square feet (0.106 acres) in size and is bordered by Chaucer Street and Channing Way. The property was formerly occupied by a dry-cleaning establishment between the 1970's and the 1990's. The property is currently developed with a mixed use residential/commercial building, garden/yard area, and a concrete paved walkway. The western-most portion of the building consisted of a newly remodeled occupied commercial space with an open floor plan and a bathroom. The eastern portion of the building is occupied as a two units family residence. To the east of the building is the garden/yard area. A concrete paved walkway is located along the northern side of the Property. This walkway overlies a sewer line which originates in the commercial space and runs to the north where it makes a 90 degree corner where it heads to the sewer main located under the sidewalk along San Pablo Avenue.

**Status:** ACTIVE  
**Program Type:** VOLUNTARY CLEANUP

TETRACHLOROETHYLENE (PCE)

**Site History:**

The Site is approximately 4,617.47 square feet (0.106 acres) in size and is bordered by Chaucer Street and Channing Way. The property was formerly occupied by a dry-cleaning establishment between the 1970's and the 1990's. The property is currently developed with a mixed use residential/commercial building, garden/yard area, and a concrete paved walkway. The western-most portion of the building consisted of a newly remodeled occupied commercial space with an open floor plan and a bathroom. The eastern portion of the building is occupied as a two units family residence. To the east of the building is the garden/yard area. A concrete paved walkway is located along the northern side of the Property. This walkway overlies a sewer line which originates in the commercial space and runs to the north where it makes a 90 degree corner where it heads to the sewer main located under the sidewalk along San Pablo Avenue.

**Site History:**

The Navy used this site as a steel forge facility. Improvements consisted of administrative buildings, furnace control houses, water tank and tower, water cooling tower, electric crane, several oil tanks, transformer building, oil pump house, and forgings building. Site records show the presence of three 22,000 gallon above-ground tanks, and three 32,000 gallon underground tanks, which were supposedly removed in the early 1960s. Site was purchased by Barker Machinery in 1978, and two small USTs were installed, one for motor oil, and one for waste oil. Site was then purchased in 1987 by Mr. Tim Southwick for use as a car dealership. Soil samples were conducted in five areas, two of which are cause for concern. The area where the above ground tanks were situated shows very high levels of fuel contamination, and the southeast portion of the lot shows elevated levels of petroleum, PCBs and chromium.

**Status:** NO FURTHER ACTION

#### LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No:	01-1147	Potential COC:	Trichloroethylene (TCE), Vinyl chloride, Chlordane, DDD / DDE / DDT, Pentachlorophenol (PCP), Diesel, Total Petroleum Hydrocarbons (TPH)
Local Case No:		How Discovered:	Groundwater Monitoring, Nuisance Conditions, Property Sale/Transaction, Site Assessment/Site Investigation, Subsurface Monitoring, Tank Closure
Begin Date:	7/2/1987	Stop Method:	Close and Remove Tank
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)	Stop Description:	UST area excavated to 10.5 feet, TPH odors noted. Backfill soil contained 1,800 ppm TPH, aerated onsite. Native soils appeared not impacted. Aerated soil reused.
Local Agency:		Case Worker:	CCM
CUF Case:	NO	File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media of Concern:	Soil		
How Discovered Description:	UST removal. Site Assessment and groundwater monitoring.		
Calwater Watershed Name:	Bay Bridges - Berkeley (203.30)		
DWR GW Subbasin Name:	Santa Clara Valley - East Bay Plain (2-009.04)		
Disadvantaged Community:			
Site History:			

The subject property (Site) is a commercially-zoned parcel situated in an area of longstanding commercial and industrial activity on Fourth Street, within West Berkeley, California. A large industrial warehouse resides on the Site, with access from Fourth Street. Neighboring warehouses about the Site and buildings such as a wine distributor and a specialized commercial coating company to the north. Various industrial metals businesses have used the Site including metal fabricators, machine shops, foundries, laboratories and paint manufacturing. Other previous businesses have included pesticide companies who used thinners (solvents) with their pesticide mixes. These solvents included Pentachlorophenol (PCP) mixed with kerosene (a petroleum distillate) and diesel fuel. Use of heavy metals, hydrocarbon fuels, oils, lubricant, degreasers, cutting fluids, solvents, acids, bases, and dyes / paint intermediates were found at previous on-Site business operations. Known and documented releases of these and other hydrocarbon compounds have been documented from the Site. Local soil and groundwater on Site has been impacted from vertical and lateral migration of these hydrocarbon and related contaminants. Detected concentrations of hydrocarbons include total petroleum hydrocarbons as diesel (TPHd) up to 39,000 ug/L in groundwater (Environmental Screening Levels for TPHd in groundwater are 200 ug/L). PCP was identified up to 460 mg/kg in on-Site soil samples. TPH as kerosene (jet fuel) was found up to 6,000 mg/kg in soil and TPH up to 10,000 mg/kg in soil.

**Gndwater Monitoring Freque:**  
**Designated Beneficial Use Desc:** Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply  
**Site History:**

The subject property (Site) is a commercially-zoned parcel situate in an area of longstanding commercial and industrial activity on Fourth Street, within West Berkeley, California. A large industrial warehouse resides on the Site, with access from Fourth Street. Neighboring warehouses about the Site and buildings such as a wine distributor and a specialized commercial coating company to the north. Various industrial metals businesses have used the Site including metal fabricators, machine shops, foundries, laboratories and paint manufacturing. Other previous business have included pesticide companies who used thinners (solvents) with their pesticide mixes. These solvents included Pentachlorophenol (PCP) mixed with kerosene (a petroleum distillate) and diesel fuel. Use of heavy metals, hydrocarbon fuels, oils, lubricant, degreasers, cutting fluids, solvents, acids, bases, and dyes / paint intermediates were found at previous on-Site business operations. Known and documented releases of these and other hydrocarbon compounds have been documented from the Site.

Local soil and groundwater on Site has been impacted from vertical and lateral migration of these hydrocarbon and related contaminants. detected concentrations of hydrocarbons include total petroleum hydrocarbons as diesel (TPHd) up to 39,000 ug/L in groundwater (Environmental Screening Levels for TPHd in groundwater are 200 ug/L). PCP was identified up to 460 mg/kg in on-Site soil samples. TPH as kerosene (jet fuel) was found up to 6,000 mg/kg in soil and TPH up to 10,000 mg/kg in soil.

CHLORDANE, PENTACHLOROPHENOL, PESTICIDES - WASTES FROM PRODUCTION

**Site History:**

A succession of pesticide companies including, Able Termite Control Company, Able Termite Control, Inc., Terminix Norcal, and its successor Terminix International occupied this property. These companies mixed pesticides with thinners. Peerless Electric Company bought the property from Terminix in 1981. Soil investigation conducted in 1983 identified aldrin, heptachlor, and chlordane at hazardous levels and the underlying groundwater detected chlordane and heptachlor.

DTSC reviewed data reports and in February 2008, concurred with the RPs recommendation to cap the embankment on the west side of the property with concrete and requested a VCA for property owner to prepare and record deed restrictions for the areas of the site where contamination remains above residential standards. However, Proponent declined to enter into VCA.

<b>Status:</b>	INACTIVE - ACTION REQUIRED
<b>Program Type:</b>	VOLUNTARY CLEANUP
<b>CalEnviroScreen Score:</b>	76-80%

<b>Document Type:</b>	Site Screening
<b>Date Completed:</b>	12/9/2002
<b>Comments:</b>	No remediation of the property or soil and groundwater investigations have been conducted since 1995. A 1994 groundwater investigation indicated that levels of chlordane, heptachlor epoxide and Pentachlorophenol (PCP) exceed drinking water standards. A PEA is required.

Decertified Site. Completed PEA. In 1994, the SF Regional Water Quality Control Board (RWQCB) and the City of Berkeley required additional soil and groundwater investigations. Soil and groundwater sampling report submitted to the City of Berkeley indicated that the soil was impacted by total petroleum extractable hydrocarbon (1 to 6,100 mg/kg), pentachlorophenol (PCB) (1,300 to 130,000 ug/kg), dieldrin (6 to 2,800 ug/kg), and chlordane (36 ug/kg). Levels of chlordane, dieldrin, and PCP in the soil exceed residential screening values. Groundwater samples collected detected PCP (130 to 52,000 ug/l), total petroleum extractable hydrocarbons (440 to 1,700,000 ug/l), chlordane (56 to 620 ug/l), dieldrin (2.5 ug/l), and heptachlor epoxide.

CHLORDANE, PENTACHLOROPHENOL, PESTICIDES - WASTES FROM PRODUCTION

**Site History:**

A succession of pesticide companies including, Able Termite Control Company, Able Termite Control, Inc., Terminx Norcal, and its successor Terminx International occupied this property. These companies mixed pesticides with thinners. Peerless Electric Company bought the property from Terminx in 1981. Soil investigation conducted in 1983 identified aldrin, heptachlor, and chlordane at hazardous levels and the underlying groundwater detected chlordane and heptachlor.

DTSC reviewed data reports and in February 2008, concurred with the RPs recommendation to cap the embankment on the west side of the property with concrete and requested a VCA for property owner to prepare and record deed restrictions for the areas of the site where contamination remains above residential standards. However, Proponent declined to enter into VCA.

**Site History:**

This Site consists of 2.94 acres. The Department of Defense (DoD) owned the Site from 1942 to 1963. The property was utilized for heavy forging operations (i.e., American Forge Company 1942-1945). Ships and Power Equipment Corporation used the property for general storage from 1950 and

----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

1958. American Tractor and Equipment Corp. occupied the site between 1958 and 1963 for forging productions. Ownership transferred from DoD to Leaner Investment Company in September 1963. The Site is currently occupied by Weatherford BMW as an automobile dealership. DTSC was lead agency for site cleanup case 80000154 (Envirostor database) and cleanup status is no further action as of November 27, 2013.

I spoke again to Andy Lukachevski because no one had called last week to establish a person of contact. He informed me that Jenn Bishop would be our person that would fill that role. She was involved with the remodeling of the buildings and grounds. I added her to the Admin/contacts page and attached some photos.

**Action Type:** Other Regulatory Actions

TPH-DIESEL, TPH-GAS

**Site History:**

Davlin Coatings, Inc operates at the property which is located in an industrial and commercial area in Berkeley. The site is paved and consisted of two buildings a warehouse and building for manufacturing. The property is owned by Pervo Paint Company. There were two releases of chemical that occurred in 1988 during a removal of an underground storage tanks and during the Loma Prieta Quake. In April 1988 seven underground storage tanks (USTs) were removed from the site and replaced with one 10,000 gallon UST. The tanks had been used to store various solvents used in the manufacture of paint. During the removal of the tanks a small amount of water drained from the pipelines. This water was disposed of along with the sludge from the remaining tanks. After cleanup water samples were non-detect for xylene, TPH diesel, ethybenzene. 0.9 ppm of TPH gas was detected in water. The before cleanup soil samples were 40ppm for TPH gas, and 43 ppm for TPH diesel. No after cleanup soil samples were taken. The tanks excavation was over-excavated and backfilled with clean soil. During the 1989 Loma Prieta earthquake five cans containing a total of twenty gallons of paint containing toluene fell from a pallet and spilled open. The next day the spill was cleaned up. In April 2003 the 10,000 gallon underground storage tank was removed from the site. The tank contained methanol.

**Status:** NO ACTION REQUIRED  
**A2 Program Type:** EVALUATION  
**CalEnviroScreen Score:** 76-80%

**Site History:**

In 1979, Aquatic Park Science Center, LLC acquired parcel 56-1952-2-1 parcel and leased it to various tenants including paint, forensic product testing and biotechnology companies. DTSC requested that a Preliminary Endangerment Assessment (PEA) be conducted for the parcel based on its use. The 8.2-acre parcel was divided into four areas (Area 1, 2, 3 and 4) during the PEA investigation. Areas 1,2 and 4 cover about 5.7 acres and Area 3 is about 2.5 acres. Based on the findings of the PEA, DTSC issued a no further action letter for Areas 1,2 and 3. Aquatic Park Science Center Site includes Areas 1,2 and 4 and has a separate EnviroStor entry.

Triangle Coatings Site includes Area 3 where TPH contamination was found during the PEA investigation. Triangle Coatings occupied Area 3 until 1984 and manufactured paints using solvents, pigments, and resin. The PEA report recommends removal of TPH contaminated soil at two locations in Area 3.

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

The TPH contamination appears to be associated with the former underground storage tanks that were removed from this area in 1999 under City's oversight. DTSC referred the TPH contamination in Area 3 to the City of Berkeley, Toxics Management Division.

Aquatic Park Science Center Site includes Areas 1,2 and 4. Based on the findings of the PEA, DTSC issued a no further action letter for Areas 1,2 and 3.

Triangle Coatings Site includes Area 3 and has a separate EnviroStor entry. Triangle Coatings occupied Area 3 until 1984 and manufactured paints using solvents, pigments, and resin. TPH contamination was found during the PEA investigation and the PEA report recommends removal of TPH contaminated soil at two locations in Area 3. The TPH contamination appears to be associated with the former underground storage tanks that were removed from this area in 1999 under the City's oversight. DTSC referred the TPH contamination in Area 3 to the City of Berkeley, Toxics Management Division.

**Status:** NO FURTHER ACTION  
**A2 Program Type:** VOLUNTARY CLEANUP  
**CalEnviroScreen Score:** 76-80%

<b>Date Completed:</b>	3/15/2018
<b>Comments:</b>	The Phase I Environmental Assessment Checklist received. The checklist indicates that there has been disposal of hazardous chemicals or hazardous wastes in, on or under the property and that testing of groundwater revealed possible contamination. The Checklist certifies that further investigation is not necessary to determine the existence, nature and/or extent of contamination at the facility.

<b>RB Case No:</b>	01-0971	<b>CUF Case:</b>	NO
<b>Local Case No:</b>	RO0000548	<b>Case Worker:</b>	JES
<b>Begin Date:</b>	6/5/1989	<b>File Location:</b>	All Files are on GeoTracker or in the Local Agency Database
<b>Stop Method:</b>	Close and Remove Tank		
<b>Lead Agency:</b>	ALAMEDA COUNTY LOP		
<b>Local Agency:</b>	ALAMEDA COUNTY LOP		
<b>Potential COC:</b>	Asbestos Containing Materials (ACM), Other Solvent or Non-Petroleum Hydrocarbon, Vinyl chloride, Polychlorinated biphenyls (PCBs), Lead, Benzene		
<b>Potential Media of Concern:</b>	Other Groundwater (uses other than drinking water)		
<b>How Discovered:</b>	Tank Closure		
<b>How Discovered Description:</b>	UST REMOVAL		
<b>Stop Description:</b>	HOLES IN UST		
<b>Calwater Watershed Name:</b>	Bay Bridges - Berkeley (203.30)		
<b>DWR GW Subbasin Name:</b>	Santa Clara Valley - East Bay Plain (2-009.04)		
<b>Disadvantaged Community:</b>			
<b>Site History:</b>			

The subject site was a part of the San Francisco Bay that was filled in stages beginning in approximately 1947. The site buildings date to approximately 1959. From 1963 to 1979 the site was occupied by Dymo Industries, a label tape and label tape punch manufacturer. Dymo used and stored MIBK and MEK in six USTs at the site. From 1979 to 1989 Mike Roberts Color Production occupied the site and manufactured and printed color postcards and expanded to color printing, lithography, and off-set printing using inks, solvents cleaning compounds and color pigments. Beginning in 1990 Nady Systems occupied the site, largely using it as a warehouse. Six areas of environmental concern were identified and investigated at the site and up to 10 wells and 15 soil bores have been installed at the site. Recent redevelopment interest started in approximately 2015, and since that time over 67 soil vapor wells, 62 soil bores, 19 soil vapor extraction wells, 12 sub-slab vapor points have been installed. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

<b>Site History:</b>						
<p>Nady Systems currently assembles and customizes wireless communication systems at the site. The property is situated on 2.26 acres and houses a warehouse and two-story office building in a commercial and industrial area. The property was part of the San Francisco Bay until 1947, when it was gradually filled through the 1950's. Dymo Industries first operated at the site from 1963 until 1979, manufacturing label tape and label punchers. Dymo built an office and warehouse and also installed three underground storage tanks used for storing methyl isobutyl keytone (MIBK) and methyl ethyl ketone (MIK). In 1979, Mike Roberts Color Productions (MRCP) bought the property and used it for color printing, lithography, and off-set printing operations, until March 1990, when it sold the property to Nady Systems. MRCP stored waste printing ink, solvent cleaning compounds and color pigments in 55 gallon drums behind the warehouse without secondary containment. The drums subsequently leaked and contaminated surface run-off flowing out of the drum storage area and into a ditch along the west property boundary. In 1989, 2,700 gallons of waste materials were removed from 55 gallon drums on site. Contaminated soil was also excavated along the western side of the property and three leaking underground storage tanks (UST) were removed. Follow-up sampling revealed MIBK, benzene, 1,3 dichlorobenzene and 1,4-dichlorobenzene in soil. This suggested that contaminants such as heavy oil, grease and/or coal tar derivatives probably originated from the landfill, and that the MIBK may have acted as a solvent, dissolving the heavy hydrocarbons and transporting them to the groundwater. The Alameda County Health Agency, Department of Environmental Health (County), who remains the lead agency, oversaw the UST removal and remediation activities. Soil vapor and groundwater extraction systems were installed and operated from 1990 to 1991. Based upon sampling results obtained during the extraction treatment operations, it was recommended that Nady Systems be allowed to abandon the soil vapor extraction system and wells. A Work Plan and request for "No Further Action" Alternative Compliance Points Monitoring Program was submitted to the County in October 1994. Sampling analyses determined that the benzene was within the range of values</p>

---------	-------------------	-----------	------------------	----------------	------	----

detected at the site, and the chlorobenzene concentration was below the method detection limit. It was concluded that the contaminated plume had stabilized and that contaminant levels were within the guidelines set forth in the approved Work Plan. In January 1995, as a condition for "no further action status", a Deed Notice was recorded, that addressed conditions for excavated soil, groundwater and construction activities. In December 1996, The County notified Nady Systems that a case closure summary was being prepared for the site but that submittal of a modified Deed Notice was required. On September 23, 2003. The County confirmed the site is still active, pending the submittal of a revised Deed Notice that includes provisions for shallow groundwater and preparation of a Health & Safety Plan and Risk Assessment under certain conditions.

<b>Local Agency:</b>	ALAMEDA COUNTY LOP	<b>Case Worker:</b>	TF
<b>CUF Case:</b>	NO	<b>File Location:</b>	All Files are on GeoTracker or in the Local Agency Database
<b>Potential Media of Concern:</b>	Other Groundwater (uses other than drinking water), Soil		
<b>How Discovered Description:</b>			
<b>Calwater Watershed Name:</b>	Bay Bridges - Berkeley (203.30)		
<b>DWR GW Subbasin Name:</b>	Santa Clara Valley - East Bay Plain (2-009.04)		
<b>Disadvantaged Community:</b>			
<b>Site History:</b>			

Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>. Two 2,000-gallon USTs (one diesel, one unleaded gasoline) were removed in July 1996; limited overexcavation was conducted about a week later. Seven Geoprobe soil bores were proposed to be installed in April 1998; however, three Geoprobe bores were actually installed in May 1998 due to deeper than expected groundwater and a gravel layer causing rig refusal. A pre-existing monitoring well (for the former Clear Print site, a now closed, non-fuel related site) has produced elevated concentrations of TPHg, benzene, and MTBE, suggestive of free-phase (the well was not destroyed and given for use by the McGrath site; all other Clear Print wells have been destroyed). In September 2005 an additional work plan was approved. In December 2005, seven Geoprobe bores were installed and soil and grab groundwater samples were collected. Between September 2011 and December 2013, up to 3 feet of Free Phase (FP) was present in well MW-3. As of February 2014 FP in well MW-3 has been diminished; however, wells have not been sampled since March 2014, and FP appears to return to the well with deeper groundwater levels than present in March 2014. In January 2013 soil bores B-15 to B-25 were installed, and subsequently wells AMW-1 to AMW-3 were installed in August 2013. The more recent work appears to have defined the northern lateral downgradient extent of the groundwater plume between Clear Print and the McGrath site; however, the apparent primary downgradient extent to the southwest and beneath adjacent property buildings, as based on the established groundwater flow direction, has not been defined. November 2014 and June 2015 indoor air sampling events have occurred at the two adjacent probable downgradient properties that appear to indicate slightly elevated indoor air BTEX vapor concentrations are present above RWQCB ESLs and above outdoor air background samples. This data indicates a potential vapor intrusion risk at and downgradient of the site. The generation of explosive levels of methane from the decomposition of petroleum is additionally of concern beneath the subject site building and adjacent downgradient buildings. Based on the depth to groundwater, there does not appear to be a bioattenuation zone beneath the sites. Interim Remedial Actions have been proposed and approved based on the potential for vapor intrusion at and downgradient of the site. An expansion of the interim system has been discussed and is likely to be proposed to address contamination at the downgradient edge of the property (December 2018).

<b>Begin Date:</b>	2/25/1988	<b>File Location:</b>	All Files are on GeoTracker or in the Local Agency Database

**Stop Method:** Close and Remove Tank  
**Lead Agency:** ALAMEDA COUNTY LOP  
**Local Agency:**  
**Potential COC:** Waste Oil / Motor / Hydraulic / Lubricating  
**Potential Media of Concern:** Other Groundwater (uses other than drinking water)  
**How Discovered:** Tank Closure  
**How Discovered Description:** tank closure  
**Stop Description:**  
**Calwater Watershed Name:** Bay Bridges - Berkeley (203.30)  
**DWR GW Subbasin Name:** Santa Clara Valley - East Bay Plain (2-009.04)  
**Disadvantaged Community:**

**Site History:**

Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>. Prior to the 1930's the site was in the San Francisco Bay; until the early 1950's the site was a part of the City of Emeryville municipal waste landfill. The site has been a commercial facility since at least the 1960's. Three adjacent USTs were removed between August and October 1989 (one diesel in August, two gasoline USTs in October); black petroleum product is reported to have flowed from the south wall of the excavation adjacent to the diesel UST. An estimated 2,000 gallons of product was removed from the excavations. Limited overexcavation may have occurred between August 1989 and February 1990 when the excavations were backfilled; the records are unclear. Impacts to soil and groundwater have been characterized as oil and grease, extractable hydrocarbons (TPHd), purgeable hydrocarbons (TPHg), and BTEX. In January 1990 seven bores were installed (B-1 to B-7). Two offsite wells (adjacent property; MW-5 and MW-7; 50 to 75 feet distant) have been used since 1989 in an attempt to help define groundwater. The wells were sampled regularly between November 1989 and June 1997. In June 1996 six soil bores (SB-1 to SB-6) were installed. Preferential pathway and sensitive receptor surveys were conducted in May 2010. Soil bores SB-7 to SB-9 were also installed to collect soil samples, and soil bores GGW-1 to GGW-4 were installed to collect grab groundwater samples. In December 2011 four sub-slab vapor points were installed and sampled beneath the building located at the site, and at the offsite downgradient building. An additional sub-slab vapor was collected approximately six months later in May 2012 beneath the downgradient building. A third vapor monitoring round at the downgradient building was conducted in December 2014. The site appears eligible for closure under the LTCP. It meets all General Criteria. The site qualifies for closure under Class 5 of the Groundwater Media Specific Criteria due to the presence of free product in pockets in soil in the vicinity of the former USTs. Additionally, based on grab groundwater sample concentrations free product (LNAPL) may also be present in limited quantities in groundwater on- and offsite in close proximity to the former UST locations. This LNAPL does not appear to be mobile based on analytical concentrations in wells MW-5 and MW-7 that are located between the former UST excavation and the downgradient offsite building. Consequently a commercial / industrial land use restriction has been placed on the subject property. Additionally a pre-existing commercial / industrial land use restriction was placed on the adjacent downgradient property at the time of the closure of that UST case (Emery Bay Plaza, RO0000440; T0600100511) and is expected to manage contamination at that offsite downgradient location. The site meets the Vapor Intrusion Media Specific Criteria by Class 2c, controlling exposure by use of mitigation measures and institutional controls. The site also meets the Direct Contact and Outdoor Air Criteria by meeting the concentrations contained in Table 1 of the LTCP. Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

<b>Site History:</b>			

Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

Prior to the 1930's the site was in the San Francisco Bay; until the early 1950's the site was a part of the City of Emeryville municipal waste landfill. The site has been a commercial facility since at least the 1960's. Three adjacent USTs were removed between August and October 1989 (one diesel in August, two gasoline USTs in October); black petroleum product is reported to have flowed from the south wall of the excavation adjacent to the diesel UST. An estimated 2,000 gallons of product was removed from the excavations. Limited overexcavation may have occurred between August 1989 and February 1990 when the excavations were backfilled; the records are unclear. Impacts to soil and groundwater have been characterized as oil and grease, extractable hydrocarbons (TPHd), purgeable hydrocarbons (TPHg), and BTEX. In January 1990 seven bores were installed (B-1 to B-7). Two offsite wells (adjacent property; MW-5 and MW-7; 50 to 75 feet distant) have been used since 1989 in an attempt to help define groundwater. The wells were sampled regularly between November 1989 and June 1997. In June 1996 six soil bores (SB-1 to SB-6) were installed. Preferential pathway and sensitive receptor surveys were conducted in May 2010. Soil bores SB-7 to SB-9 were also installed to collect soil samples, and soil bores GGW-1 to GGW-4 were installed to collect grab groundwater samples. In December 2011 four sub-slab vapor points were installed and sampled beneath the building located at the site, and at the offsite downgradient building. An additional sub-slab vapor was collected approximately six months later in May 2012 beneath the downgradient building. A third vapor monitoring round at the downgradient building was conducted in December 2014.

The site appears eligible for closure under the LTCP. It meets all General Criteria. The site qualifies for closure under Class 5 of the Groundwater Media Specific Criteria due to the presence of free product in pockets in soil in the vicinity of the former USTs. Additionally, based on grab groundwater sample concentrations free product (LNAPL) may also be present in limited quantities in groundwater on- and offsite in close proximity to the former UST locations. This LNAPL does not appear to be mobile based on analytical concentrations in wells MW-5 and MW-7 that are located between the former UST excavation and the downgradient offsite building. Consequently a commercial / industrial land use restriction has been placed on the subject property. Additionally a pre-existing commercial / industrial land use restriction was placed on the adjacent downgradient property at the time of the closure of that UST case (Emery Bay Plaza, RO0000440; T0600100511) and is expected to manage contamination at that offsite downgradient location. The site meets the Vapor Intrusion Media Specific Criteria by Class 2c, controlling exposure by use of mitigation measures and institutional controls. The site also meets the Direct Contact and Outdoor Air Criteria by meeting the concentrations contained in Table 1 of the LTCP.

Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

<b>Title Description Comments:</b>						
REPORT OF ADDITIONAL SITE INVESTIGATION AND 2012 REQUEST FOR SITE CLOSURE, 6601/6603 SHELLMOUND STREET, EMERYVILLE, CALIFORNIA - This is a historic report, previously responded to verbally with an inquiry as to the suitability of a land use restriction to an offsite property owner who leases to the same tenant. The presence of residual FP at the site, in proximity to the immediate downgradient property line, as well as the offsite migration of the FP, has been a concern. The depth to groundwater is approximately 7 feet. The suitability of a land use restriction on the downgradient property, to allow the FP to remain, has been a sticking point that appears to have been resolved more recently.

<b>How Discovered Description:</b>			
<b>Calwater Watershed Name:</b>	Bay Bridges - Berkeley (203.30)		
<b>DWR GW Subbasin Name:</b>	Santa Clara Valley - East Bay Plain (2-009.04)		
<b>Disadvantaged Community:</b>			
<b>Site History:</b>			

Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>. Prior to the 1930's the site was in the San Francisco Bay; until the early 1950's the site was a part of the City of Emeryville municipal waste landfill. The site has been a commercial facility since at least the 1960's. Three adjacent USTs were removed between August and October 1989 (one diesel in August, two gasoline USTs in October); black petroleum product is reported to have flowed from the south wall of the excavation adjacent to the diesel UST. An estimated 2,000 gallons of product was removed from the excavations. Limited overexcavation may have occurred between August 1989 and February 1990 when the excavations were backfilled; the records are unclear. Impacts to soil and groundwater have been characterized as oil and grease, extractable hydrocarbons (TPHd), purgeable hydrocarbons (TPHg), and BTEX. In January 1990 seven bores were installed (B-1 to B-7). Two offsite wells (adjacent property; MW-5 and MW-7; 50 to 75 feet distant) have been used since 1989 in an attempt to help define groundwater. The wells were sampled regularly between November 1989 and June 1997. In June 1996 six soil bores (SB-1 to SB-6) were installed. Preferential pathway and sensitive receptor surveys were conducted in May 2010. Soil bores SB-7 to SB-9 were also installed to collect soil samples, and soil bores GGW-1 to GGW-4 were installed to collect grab groundwater samples. In December 2011 four sub-slab vapor points were installed and sampled beneath the building located at the site, and at the offsite downgradient building. An additional sub-slab vapor was collected approximately six months later in May 2012 beneath the downgradient building. A third vapor monitoring round at the downgradient building was conducted in December 2014. The site appears eligible for closure under the LTCP. It meets all General Criteria. The site qualifies for closure under Class 5 of the Groundwater Media Specific Criteria due to the presence of free product in pockets in soil in the vicinity of the former USTs. Additionally, based on grab groundwater sample concentrations free product (LNAPL) may also be present in limited quantities in groundwater on- and offsite in close proximity to the former UST locations. This LNAPL does not appear to be mobile based on analytical concentrations in wells MW-5 and MW-7 that are located between the former UST excavation and the downgradient offsite building. Consequently a commercial / industrial land use restriction has been placed on the subject property. Additionally a pre-existing commercial / industrial land use restriction was placed on the adjacent downgradient property at the time of the closure of that UST case (Emery Bay Plaza, RO0000440; T0600100511) and is expected to manage contamination at that offsite downgradient location. The site meets the Vapor Intrusion Media Specific Criteria by Class 2c, controlling exposure by use of mitigation measures and institutional controls. The site also meets the Direct Contact and Outdoor Air Criteria by meeting the concentrations contained in Table 1 of the LTCP. Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

<b>Site History:</b>			

Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

Prior to the 1930's the site was in the San Francisco Bay; until the early 1950's the site was a part of the City of Emeryville municipal waste landfill. The site has been a commercial facility since at least the 1960's. Three adjacent USTs were removed between August and October 1989 (one diesel in August, two gasoline USTs in October); black petroleum product is reported to have flowed from the south wall of the excavation adjacent to the diesel UST. An estimated 2,000 gallons of product was removed from the excavations. Limited overexcavation may have occurred between August 1989 and February 1990 when the excavations were backfilled; the records are unclear. Impacts to soil and groundwater have been characterized as oil and grease, extractable hydrocarbons (TPHd), purgeable hydrocarbons (TPHg), and BTEX. In January 1990 seven bores were installed (B-1 to B-7). Two offsite wells (adjacent property; MW-5 and MW-7; 50 to 75 feet distant) have been used since 1989 in an attempt to help define groundwater. The wells were sampled regularly between November 1989 and June 1997. In June 1996 six soil bores (SB-1 to SB-6) were installed. Preferential pathway and sensitive receptor surveys were conducted in May 2010. Soil bores SB-7 to SB-9 were also installed to collect soil samples, and soil bores GGW-1 to GGW-4 were installed to collect grab groundwater samples. In December 2011 four sub-slab vapor points were installed and sampled beneath the building located at the site, and at the offsite downgradient building. An additional sub-slab vapor was collected approximately six months later in May 2012 beneath the downgradient building. A third vapor monitoring round at the downgradient building was conducted in December 2014.

The site appears eligible for closure under the LTCP. It meets all General Criteria. The site qualifies for closure under Class 5 of the Groundwater Media Specific Criteria due to the presence of free product in pockets in soil in the vicinity of the former USTs. Additionally, based on grab groundwater sample concentrations free product (LNAPL) may also be present in limited quantities in groundwater on- and offsite in close proximity to the former UST locations. This LNAPL does not appear to be mobile based on analytical concentrations in wells MW-5 and MW-7 that are located between the former UST excavation and the downgradient offsite building. Consequently a commercial / industrial land use restriction has been placed on the subject property. Additionally a pre-existing commercial / industrial land use restriction was placed on the adjacent downgradient property at the time of the closure of that UST case (Emery Bay Plaza, RO0000440; T0600100511) and is expected to manage contamination at that offsite downgradient location. The site meets the Vapor Intrusion Media Specific Criteria by Class 2c, controlling exposure by use of mitigation measures and institutional controls. The site also meets the Direct Contact and Outdoor Air Criteria by meeting the concentrations contained in Table 1 of the LTCP.

Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

**Potential Contaminant of Concern:**

TPH-GAS, VOLATILE ORGANICS (8260B VOCS)

**Site History:**

The University of California Warehouse site consists of three multi-parcel properties in the area where the cities of Berkeley, Oakland and Emeryville meet. The warehouse property at 6701 San Pablo Avenue, Berkeley, houses a shipping and receiving warehouse, printing facilities, laboratories, offices and an art store. The other two properties are west of the warehouse. One of these is used for parking by workers at the warehouse. The other property is leased to other businesses. The University has owned and used the warehouse property since 1979. The property was formerly occupied by: the Smith-Corona Marchant Corporation (SCM) Data Processing Division; the Marchant Corporation, which manufactured calculating machines; storage and drayage businesses; metal fabrication operations; a neon sign factory; and a storage yard for painting contractors.

<b>Sub Area Link:</b>						
<b>Document Type:</b>		Correspondence				
<b>Date Completed:</b>		2/21/2017				
<b>Comments:</b>		CEQA Notice of Preparation (NOP) for Marchant Corporation. DTSC determined that the proposed project would not conflict with the remedial design and previous indoor air investigations.				
		The remedy is in the basement boiler room and would not be affected by the proposed project, which consists of converting previous office spaces to Medical Practitioner use on "portions of the first and second floors, plus all of the third and fourth floors" (delineated in the Project Plans on the City of Berkeley website: <a href="http://www.ci.berkeley.ca.us/uploadedFiles/Planning_and_Development/Level_3_-_ZAB/2017-02-09_ZAB_ATT2_3100%20San%20Pablo_Project%20Plans.pdf">http://www.ci.berkeley.ca.us/uploadedFiles/Planning_and_Development/Level_3_-_ZAB/2017-02-09_ZAB_ATT2_3100%20San%20Pablo_Project%20Plans.pdf</a> ).				
		The NOP anticipates that the project will not have significant impacts related to Hazards and Hazardous Materials and, therefore, analysis of Hazards and Hazardous Materials will be included in the IS checklist as an appendix, but not studied and analyzed at length in the DEIR. However, the NOP anticipates that Air Quality will be analyzed in the DEIR.				
		According to the State Clearinghouse memo, DTSC must respond to the Lead Agency if "review of the Notice of Preparation (NOP) indicates that DTSC has discretionary approval power over the project as a Responsible Agency". Based on review, DTSC does not need to act as a Responsible Agency and provide discretionary review/approval of the DEIR, so DTSC response to the NOP (due by 2/24/207) is not required.

<b>Document Type:</b>					Removal Action Workplan w/ESD	
<b>Date Completed:</b>					2/12/2015	
<b>Comments:</b>					The Addendum to the Removal Action Workplan provides basic background information for the site, describes the findings of additional investigations conducted in 2012 and 2013, evaluates remedial alternatives based on the results of those investigations, and selects DPE and ISCO with ozone and hydrogen peroxide as the modified remedy for consideration. The DPE remediation activities will be conducted over the course of several years until CVOC mass removal rates become asymptotic.

**Site History:**

The University of California Warehouse site consists of three multi-parcel properties in the area where the cities of Berkeley, Oakland and Emeryville meet. The warehouse property at 6701 San Pablo Avenue, Berkeley, houses a shipping and receiving warehouse, printing facilities, laboratories, offices and an art store. The other two properties are west of the warehouse. One of these is used for parking by workers at the warehouse. The other property is leased to other businesses. The University has owned and used the warehouse property since 1979. The property was formerly occupied by: the Smith-Corona Marchant Corporation (SCM) Data Processing Division; the Marchant Corporation, which manufactured calculating machines; storage and drayage businesses; metal fabrication operations; a neon sign factory; and a storage yard for painting contractors.

<i>Map Key</i>	<i>Number of Records</i>	<i>Direction</i>	<i>Distance (mi/ft)</i>	<i>Elev/Diff (ft)</i>	<i>Site</i>	<i>DB</i>
<b>Document Type:</b>		Correspondence				
<b>Date Completed:</b>		2/21/2017				
<b>Comments:</b>		<p>CEQA Notice of Preparation (NOP) for Marchant Corporation. DTSC determined that the proposed project would not conflict with the remedial design and previous indoor air investigations.</p> <p>The remedy is in the basement boiler room and would not be affected by the proposed project, which consists of converting previous office spaces to Medical Practitioner use on "portions of the first and second floors, plus all of the third and fourth floors" (delineated in the Project Plans on the City of Berkeley website: <a href="http://www.ci.berkeley.ca.us/uploadedFiles/Planning_and_Development/Level_3_-_ZAB/2017-02-09_ZAB_ATT2_3100%20San%20Pablo_Project%20Plans.pdf">http://www.ci.berkeley.ca.us/uploadedFiles/Planning_and_Development/Level_3_-_ZAB/2017-02-09_ZAB_ATT2_3100%20San%20Pablo_Project%20Plans.pdf</a>).</p> <p>The NOP anticipates that the project will not have significant impacts related to Hazards and Hazardous Materials and, therefore, analysis of Hazards and Hazardous Materials will be included in the IS checklist as an appendix, but not studied and analyzed at length in the DEIR. However, the NOP anticipates that Air Quality will be analyzed in the DEIR.</p> <p>According to the State Clearinghouse memo, DTSC must respond to the Lead Agency if "review of the Notice of Preparation (NOP) indicates that DTSC has discretionary approval power over the project as a Responsible Agency". Based on review, DTSC does not need to act as a Responsible Agency and provide discretionary review/approval of the DEIR, so DTSC response to the NOP (due by 2/24/207) is not required.</p>

**Potential Media of Concern:** Other Groundwater (uses other than drinking water)  
**How Discovered Description:**  
**Calwater Watershed Name:** Bay Bridges - Berkeley (203.30)  
**DWR GW Subbasin Name:** Santa Clara Valley - East Bay Plain (2-009.04)  
**Disadvantaged Community:**  
**Site History:**

On December 2, 2003, one 10,000-gallon gasoline UST and one dispenser island was removed from the site. Low petroleum hydrocarbon concentrations were detected in soil samples collected from soil in the UST excavation pit and beneath the dispenser island. MTBE was detected at a maximum of 7.06 ppm in the UST excavation. Soil from the excavation was reused to backfill the excavations. In February through May 2004 soil was excavated and groundwater extracted from the former UST location. Groundwater sampled from the tank pit contained petroleum hydrocarbons and elevated oxygenate concentrations. Subsequently further investigations were performed and an ozone-sparge pilot test work plan was submitted and approved in 2008. No results have been submitted.

<b>Designated Beneficial Use Desc:</b>	REASONS FOR QUARTERLY OR MONTHLY OR OTHER GROUNDWATER MONITORING: Well Being Sampled During Remedial Action for Progress Assessment - Pilot test scheduled or in progress Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply		
<b>Site History:</b>			

On December 2, 2003, one 10,000-gallon gasoline UST and one dispenser island was removed from the site. Low petroleum hydrocarbon concentrations were detected in soil samples collected from soil in the UST excavation pit and beneath the dispenser island. MTBE was detected at a maximum of 7.06 ppm in the UST excavation. Soil from the excavation was reused to backfill the excavations. In February through May 2004 soil was excavated and groundwater extracted from the former UST location. Groundwater sampled from the tank pit contained petroleum hydrocarbons and elevated oxygenate concentrations. Subsequently further investigations were performed and an ozone-sparge pilot test work plan was submitted and approved in 2008. No results have been submitted.

**Cleanup Status:** CERTIFIED O&M - LAND USE RESTRICTIONS ONLY AS OF 2/17/2017  
**Cleanup Oversight Agencies:** DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY  
**Site Type:** STATE RESPONSE OR NPL  
**Office:** CLEANUP BERKELEY  
**Past Use that Caused Contam:** RECYCLING - DRUM  
**Potential Media Affected:** OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER)  
**Potential Contaminant of Concern:**

DIELDRIN, METALS, POLYCHLORINATED BIPHENYLS (PCBS), VOLATILE ORGANICS (8260B VOCS)

**Site History:**

A drum recycling facility operated at the site from 1939 to 1991. Drum recycling activities resulted in contamination of soil and groundwater with volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), pesticides, polychlorinated biphenyls (PCBs), lead, and arsenic. A Remedial Action Plan (RAP) was prepared to clean up the site under the regulatory oversight of DTSC which was implemented by 2003. The elements of the RAP included 1) building demolition, decontamination and disposal, 2) excavation and off-site disposal of contaminated soils 3) backfilling the area with clean soils 4) groundwater treatment by pumping and in situ treatment of groundwater with hydrogen releasing compounds and excavation of a contaminant source area below the water table 5) groundwater monitoring and 6) placement of a Land Use Covenant on a small portion of the former Site to prohibit groundwater usage. In 2017, DTSC approved discontinuation of groundwater monitoring and terminated operations and maintenance requirements. Documentation is provided to DTSC on an annual basis which ensures that groundwater is not being used at the site in accordance with the Land Use Covenant. TP 8-21-18

**Status:** CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS

**Title Link:** [http://www.envirostor.dtsc.ca.gov/public/final\\_documents2?global\\_id=01340111&doc\\_id=6019096](http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=01340111&doc_id=6019096)  
**Area Name:**  
**Area Link:**  
**Sub Area:**  
**Sub Area Link:**  
**Document Type:** Monitoring Report  
**Date Completed:** 9/29/2008  
**Comments:** The Report presents the results of sampling of two groundwater monitoring wells performed in June 2008. Vinyl chloride and cis-1,2-dichloroethylene still exceed the groundwater cleanup goals in one monitoring well and the detected concentrations were 29 and 180 micrograms per liter, respectively.

<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					5/1/2013	
<b>Comments:</b>					The groundwater monitoring is conducted on a biennial schedule (one sampling event every 2 years). There is only 1 monitoring well that is sampled and tested; a low concentration of vinyl chloride was detected. The vinyl chloride is a biodegradation breakdown product of the former chlorinated solvent plume in groundwater at the Site.

<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					9/28/2015	
<b>Comments:</b>					A groundwater sample from the single site well continues to exceed the drinking water standard for vinyl chloride. For that reason, the request for site closure which was included in the groundwater monitoring report could not be approved.	
<b>Title:</b>					2011 Second Semi-Annual Groundwater Monitoring Report	
<b>Title Link:</b>					<a href="http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=01340111&amp;doc_id=6027619">http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=01340111&amp;doc_id=6027619</a>	
<b>Area Name:</b>						
<b>Area Link:</b>						
<b>Sub Area:</b>						
<b>Sub Area Link:</b>						
<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					9/22/2011	
<b>Comments:</b>					The report included responses to DTSC's comment letter dated June 23, 2011. In response the those comments the report included information related to boring logs, monitoring well construction details, and groundwater elevation data and gradient evaluations; the responses that were provided were adequate. The results of the groundwater monitoring program were consistent with previous results which showed low levels of chlorinated volatile organic compounds (VOCs) in shallow groundwater; the groundwater data also showed that natural biodegradation of those chlorinated VOCs is occurring since breakdown compounds are present.

<b>Document Type:</b>					Well Decommissioning Report	
<b>Date Completed:</b>					3/27/2013	
<b>Comments:</b>					The workplan describes procedures for abandonment of one monitoring well (MW-10). The procedure includes drilling out the upper 5-feet, removal of the pipe, and grouting according to the local water agency requirements. Since the well is located in a City of Oakland street, an encroachment permit will be obtained.

<b>Document Type:</b>			Monitoring Report			
<b>Date Completed:</b>			1/24/2013			
<b>Comments:</b>			The schedule for collection of groundwater samples has been reduced to bi-annual (once every other year). Two groundwater monitoring wells were sampled this period however DTSC recently approved decommissioning of one well (MW-10) so only one well will continue to be monitored. The samples were tested for chlorinated solvents and only vinyl chloride exceeded the drinking water Maximum Contaminant Level (MCL) of 0.5 micrograms per liter (ug/L). The next sampling event is scheduled to occur by January 31, 2013.

<b>Potential Contamin of Concern:</b>	

DIELDRIN, METALS, POLYCHLORINATED BIPHENYLS (PCBS), VOLATILE ORGANICS (8260B VOCS)

**Site History:**

A drum recycling facility operated at the site from 1939 to 1991. Drum recycling activities resulted in contamination of soil and groundwater with volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), pesticides, polychlorinated biphenyls (PCBs), lead, and arsenic. A Remedial Action Plan (RAP) was prepared to clean up the site under the regulatory oversight of DTSC which was implemented by 2003. The elements of the RAP included 1) building demolition, decontamination and disposal, 2) excavation and off-site disposal of contaminated soils 3) backfilling the area with clean soils 4) groundwater treatment by pumping and in situ treatment of groundwater with hydrogen releasing compounds and excavation of a contaminant source area below the water table 5) groundwater monitoring and 6) placement of a Land Use Covenant on a small portion of the former Site to prohibit groundwater usage. In 2017, DTSC approved discontinuation of groundwater monitoring and terminated operations and maintenance requirements. Documentation is provided to DTSC on an annual basis which ensures that groundwater is not being used at the site in accordance with the Land Use Covenant. TP 8-21-18

**Status:** CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS  
**A2 Program Type:** STATE RESPONSE  
**CalEnviroScreen Score:** 66-70%

<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					1/24/2013	
<b>Comments:</b>					The schedule for collection of groundwater samples has been reduced to bi-annual (once every other year). Two groundwater monitoring wells were sampled this period however DTSC recently approved decommissioning of one well (MW-10) so only one well will continue to be monitored. The samples were tested for chlorinated solvents and only vinyl chloride exceeded the drinking water Maximum Contaminant Level (MCL) of 0.5 micrograms per liter (ug/L). The next sampling event is scheduled to occur by January 31, 2013.

<b>Document Type:</b>					Remedial Investigation Report	
<b>Date Completed:</b>					9/3/1992	
<b>Comments:</b>					RI approved. VOCs and SVOCs found in soil to depths ranging from 3 to 5 feet. VOCs detected in groundwater. No contaminants detected by air monitoring.	
<b>Title:</b>					2011 Second Semi-Annual Groundwater Monitoring Report	
<b>Title Link:</b>					<a href="http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=01340111&amp;doc_id=6027619">http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=01340111&amp;doc_id=6027619</a>	
<b>Area Name:</b>						
<b>Area Link:</b>						
<b>Sub Area:</b>						
<b>Sub Area Link:</b>						
<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					9/22/2011	
<b>Comments:</b>					The report included responses to DTSC's comment letter dated June 23, 2011. In response the those comments the report included information related to boring logs, monitoring well construction details, and groundwater elevation data and gradient evaluations; the responses that were provided were adequate. The results of the groundwater monitoring program were consistent with previous results which showed low levels of chlorinated volatile organic compounds (VOCs) in shallow groundwater; the groundwater data also showed that natural biodegradation of those chlorinated VOCs is occurring since breakdown compounds are present.

<b>Sub Area Link:</b>						
<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					5/1/2013	
<b>Comments:</b>					The groundwater monitoring is conducted on a biennial schedule (one sampling event every 2 years). There is only 1 monitoring well that is sampled and tested; a low concentration of vinyl chloride was detected. The vinyl chloride is a biodegradation breakdown product of the former chlorinated solvent plume in groundwater at the Site.

**Office:** CLEANUP BERKELEY

**Special Program:** VOLUNTARY CLEANUP PROGRAM

**Funding:** SITE PROPONENT

**Cleanup Status:** INACTIVE - ACTION REQUIRED AS OF 7/12/2017

**Cleanup Oversight Agencies:** ALAMEDA COUNTY;DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY

**School District:**

**Past Use that Caused Contam:** UNKNOWN

**Potential Media Affected:** OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL, SOIL VAPOR

**Potential Contaminant of Concern:**

1,2-DICHLOROETHYLENE (CIS), 1,2-DICHLOROETHYLENE (TRANS), TRICHLOROETHYLENE (TCE)

**Site History:**

The property is currently developed with one 8,100-square foot two-story commercial office building. There have been various commercial operations on the Site since around 1946. These operations have included an oil warehouse, shampoo factory, chartered bus company, soda fountain company, and bottled gas distributor.

TCE, cis-1,2-DCE found in the shallow (monitored by 25 feet wells) and deeper (monitored by 40 feet deep wells) groundwater. TCE found at concentrations up to 870 ug/L in shallow groundwater (MW-3A) and up to 24,000 ug/L in deeper groundwater, MW-3B. Site is not used for sensitive land uses.

**Status:** INACTIVE - ACTION REQUIRED

**A2 Program Type:** VOLUNTARY CLEANUP

**CalEnviroScreen Score:** 66-70%

<b>Document Type:</b>					Removal Action Completion Report	
<b>Date Completed:</b>					10/26/2011	
<b>Comments:</b>					Approval of the Removal Action Completion and Third Quarter 2010 Groundwater Monitoring Report for the site located at 1171 Ocean Avenue in Oakland, California. The report documents the implementation of the Removal Action Workplan, which was approved by the Department of Toxic Substance Control in June 2010. The remedy entailed the injection of the in-situ Regeneration compounds RegenOx™ and HRC™. These compounds were advanced into separate areas of the trichloroethylene-dominated plume underlying the site. Following a year of quarterly post injection monitoring a workplan will be developed to propose the additional injections along with additional wells and monitoring analytes indicated by the data reviewed.

<b>Date Completed:</b>					1/26/2010	
<b>Comments:</b>					Based on groundwater, soil, soil gas, and indoor air sampling data collected at the Site, DTSC will not require restrictions on the use of the Site as part of the cleanup. Since in-situ groundwater cleanup is the proposed remedy in the Draft Removal Action Workplan (Draft RAW), access must be provided for implementation (injections) and monitoring of the wells. If conditions at the site change, (i.e. groundwater concentrations rise significantly) DTSC would need to re-evaluate the potential for indoor air effects.

<b>Date Completed:</b>		1/8/2009				
<b>Comments:</b>		Indoor air sampling performed without formal approval from DTSC. Per letter dated 10/06/2009, data from sampling incorporated into draft RAW. Results indicate concentrations of VOCs were not detected if HVAC system was operated on a normal schedule. A follow up indoor air survey was performed subsequently to show results from worst case scenario under HVAC operation (run HVAC Friday, turn off end of Friday and leave off for duration of weekend, and samples taken on Monday.)

<b>Sub Area Link:</b>						
<b>Document Type:</b>		Remedial Investigation Report				
<b>Date Completed:</b>		9/26/2007				
<b>Comments:</b>		Report with results of sampling to supplement Phase III and IV Investigations- greatest detections of TCE found in southeast corner of site near warehouse roll-up door: greatest groundwater detection of 10,000 micrograms per liter TCE at 36 feet below ground surface, and soil-gas detection of 860 micrograms per cubic meter (only soil gas detection onsite.) Five off-site soil and groundwater samples taken- no detections of same magnitude as onsite detections, indicating onsite TCE is not from an upgradient, off-site source.

**Site History:**

The Transo/Lacoste Site was the former location of the Transo Envelope Company (Transo) and the Lacoste Meat Company (Lacoste). Transo occupied 1600 64th Street and was an envelope manufacturing facility in the early 1900s. Lacoste occupied 6401 Bay Street and was a slaughter house and meat packing facility in the early 1900s. The City of Emeryville purchased both properties in 1990 as part of the Bay Street-Shellmound Street Extension Project. Both facilities were located at the corner of 64th Street and Bay Street in Emeryville. The two buildings were demolished in February and March 1990 by the City of Emeryville Redevelopment Agency. The City redeveloped the Site as the EmeryBay II Apartments.

<b>Potential Contamin of Concern:</b>			

METALS, PETROLEUM, VOLATILE ORGANICS (8260B VOCS)

**Site History:**

The Site is bounded by the Bay Center Apartments on the north across 64th Street, a theater on the east, a parking lot for the Emery Bay Marketplace on the south, and the Avenue64 multi-family residential development on the west across Christie Avenue. The Site is approximately 1.2 acres and is located in a neighborhood consisting of commercial and residential properties. An approximately 14,400-square foot commercial building and parking lot is located on the 6340 Christie parcel, and an approximately 12,000-square foot commercial building and parking lot is located on the 6390 Christie parcel.

The Site is currently owned by Rockwood Christie LLC and the development manager is TMG Partners. Previous occupants of 6340 Christie Avenue included industrial machinery warehousing in the 1960s and Lerer Brothers Transmission Service from 1980 through 1998. In 1988, a 2,000-gallon gasoline underground storage tank was removed from the southeast corner of the parcel. The former tank is under the jurisdiction of the Alameda County Department of Environmental Health.

Previous occupants in the western portion of the building at 6390 Christie Avenue included a tool warehouse (dates unknown), Sybase (1989 to 1994), and Inter-Tel Technologies (1994 to present). Previous occupants in the eastern portion of the building included a photo lab, an advertising firm, Dictaphone, and a software developer.

Redevelopment plans consist of demolition of the existing structures and removal of all existing pavement, and construction of a new five-story wood-framed building that will cover nearly the total area of the Site. The lowest level will be a subgrade parking garage. The ground level will consist of additional parking, a leasing office, and residential units. Ground-level units will be situated above the subgrade parking level; no residential areas will be situated directly on soil. There will be four levels of residential units above the ground-level floor.

Excavation of soil to depths ranging from 11 to 15 feet bgs will be required to construct the subgrade parking garage. The floor of the subgrade parking level will be at approximately 10 feet bgs. The footprint of the subgrade parking level encompasses the majority of the Site. Based on the proposed depth of development and shallow groundwater conditions, the concrete floor slab and subgrade basement walls will have a water-proofing barrier. The lower garage level will be mechanically ventilated.

DTSC provided review and concurrence based on a Memorandum of Agreement with the City of Emeryville.

**Document Type:** Removal Action Completion Report  
**Date Completed:** 6/26/2015  
**Comments:** A total of approximately 42,580 tons of soil and debris fill was disposed off-site. Approximately 17,967 tons of soil and debris excavated from cells designated as Class I were loaded into licensed hazardous waste trucks for transport to and disposal at the Clean Harbors Buttonwillow Landfill in Buttonwillow, California. Approximately 24,613 tons of Class II material was transported to the Waste Management Altamont Landfill facility in Livermore, California for disposal. Soil containing constituents that exceeded the remedial goals was excavated and disposed off-site. Constituents in verification samples collected from soil at the bottom of the excavation and from soil remaining on the perimeter of the Site did not exceed the remedial goals. DTSC concurs with the Conditional No Further Action Issued by the City.

LEAD, TPH-DIESEL

**Site History:**

The Site activities involved the replacement of a portion of the 63rd Street sewer. Historically, the site was used for the manufacture of bituminous roofing products (tar paper), blending and packaging oil-based paint and enamels, and trucking.

LEAD

**Site History:**

K and S Management Company managed 32 units in a four-plex building located between Hearst and Delaware Street. On June 1983, an inspection of the 32 units was conducted in response to a citizen complaint. Paint chips (lead-based) from water blasting operation prior to repainting had accumulated around the bases of the building. The blasting company removed from all areas where paint chips were present and a few inches of soil to an appropriate landfill. All visible evidence of the blasting was removed.

LEAD, POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS), TPH-MOTOR OIL, TPH-DIESEL

**Site History:**

The approximately 1.2-acre site is bounded by 62nd Street to the north, Doyle Street to the east, 61st Street to the south, and Hollis Street to the west. Most of the site was covered with a building and concrete slab. The rectangular parcel contained one approximately 32,000-square-foot warehouse. Based on the Phase I Environmental Site Assessment (ESA), the site appeared to have been occupied by residential structures in the early 1900s and subsequently was used to manufacture concrete water meter boxes in the mid-1900s. From 1979 to 2000, the site was occupied by the Dutro Company and various other businesses. The Dutro Company used the site for the manufacturing and assembling of hand trucks and dollies. The City took possession of the site in January 2004. In the Phase I ESA, Ninyo & Moore (2002) identified the following areas of environmental concern: a spray booth, compressor and oil storage location, former truck bay, and two former 1,000-gallon underground storage tanks containing gasoline and diesel.

The Phase I ESA reported that both underground tanks were removed from the site in 1990, and received regulatory closure from the Alameda County Department of Environmental Health (Alameda County) in 1998. The Alameda County closure document indicated that trichloroethene (TCE) impacted groundwater was identified within the site boundaries (although no sampling information or analytical data were found during document review, and that further evaluation should be performed to confirm TCE in the groundwater.

DTSC provided review and concurrence based on a Memorandum of Agreement with the City of Emeryville.

The site will be developed into a park; the conceptual design for the park includes a multiuse lawn area in the park center, a basketball court in the northwest corner, an amphitheater in the southwest corner, and a children's play area in the southeast corner.

**Sub Area:**  
**Sub Area Link:**  
**Document Type:** Removal Action Completion Report  
**Date Completed:** 1/18/2011  
**Comments:** The remedial plan consisted of excavation and off-site disposal of soil containing constituents of concern exceeding the remedial goals. Several pre-remediation activities were conducted prior to soil excavation, including demolition of site buildings and other infrastructure, additional soil sampling to further refine the areas and depths of soil to be excavated, permitting, and locating utilities.

A total of approximately 1,800 cubic yards of soil classified as Class I non-RCRA hazardous waste were transported to and disposed at WMI's Kettleman Hills Facility located in Kettleman City, California. Approximately 3,400 cubic yards of soil designated as Class II waste was transported to and disposed at the West Contra Costa Sanitary Landfill in Richmond, California.

A total of 225 confirmation samples were collected to verify that cleanup goals were met. Confirmation soil sample results and locations are presented in Tables 8 and 14 and on Figures 4 through 7 of the Completion Report, respectively. Concentrations of constituents of concern were below cleanup goals in all of the final confirmation samples collected on the Site.

LEAD

**Site History:**

The site was a roadway construction and resurfacing project undertaken by the City of Emeryville as part of the Shellmound/40th Street Overhead project. A new city street was constructed from 64th Street to what is now called Shellmound Way. Historically, the project area was tideland and marshland that was eventually filled in with soil mixed with industrial wastes and various debris.

**Sub Area Link:**  
**Document Type:** Land Use Restriction - Site Inspection/Visit  
**Date Completed:** 5/2/2018  
**Comments:** DTSC staff performed a Site visit on April 18, 2018. There was construction activity on Shellmound Street south of 64th Street related to the Emeryville Marketplace development. The construction activities were being implemented in accordance with a DTSC-approved Soil Management Plan. Minor cracking was observed and the roadway, medians, and sidewalks were in generally good condition. A portion of Shellmound Street has been abandoned and replaced with a section of street that has been realigned to the west. There was no evidence of any activities prohibited by the Land Use Covenant.

**Document Type:** Public Notice  
**Date Completed:** 9/11/2009  
**Comments:** The Department of Toxic Substances Control (DTSC) has completed a Five-Year Review of the cleanup of contaminated soil at the Bay Street Extension (Site) located at 64TH and Powell in Emeryville, California. DTSC has prepared this five-year report and determined that the cap and land use restrictions continue to be an effective barrier to the contaminated soil and protective of human health and the environment. The public notice is published in Oakland Tribune 9/11/2009.

EXPLOSIVES (UXO, MEC)

**Site History:**

Emeryville Ordnance Depot specialized in the distribution of military vehicles to overseas bases of operation. The site occupied a 72,000 square foot building, which included office space, motor pool, and parts storage. Since the site processed AFV's and other armed vehicles, there is some concern as to whether the depot handled munitions. At present, documentation doesn't mention whether the depot handled any munitions.

FROM THE CORPS PUBLIC GIS SYSTEM: Property Description - The 42.415-acre site is located in the city of Emeryville, California. The depot consisted of three separate parcels of real estate. The Depot is now utilized by light industry and commercial interest. Much of the area is used for office space and very little remains that might indicate prior U.S. ownership. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.

Property History - The site was acquired on 15 March 1942 in response to wartime needs for reliable and speedy delivery of vehicles to overseas bases of operations. The function of the depot was to receive, inspect, service, and prepare for shipment wheeled vehicles passing through the San Francisco Port of Embarkation for overseas destinations. Documentation indicates the presence of tanks and amphibious vehicles; however, no mention of the munitions associated with these vehicles was noted. The site was abandoned in 1946. Processing continued on a limited scale.

<b>Site History:</b>						

The site is Emeryville Market Place. The Site has been used for the manufacture of bituminous roofing products (tar paper), blending and packaging of oil-based paints and enamels, and as a trucking facility. The contaminants detected at the site include hydrocarbons, asphalt-like materials, and waste tar paper material. The Alameda County Environmental Health Department oversaw the site remediation. The hydrocarbon material was excavated, treated, and transported off-site for disposal.

**Potential Contamin of Concern:**

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)

**Status:** CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS

<b>Date Completed:</b>					6/23/2009	
<b>Comments:</b>					Upon observing the current site conditions, DTSC concludes that the selected remedial action remains protective of human health and the environment. Petroleum-impacted soil remains under the asphalt and concrete surfaces and landscaped areas, effectively eliminating any potential for exposure. However, the cracks observed during the inspection should be repaired so the cap covering the Site will continue to be protective of human health.

<b>Potential Media Affected:</b>	SOIL		
<b>Potential Contamin of Concern:</b>			

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)

**Site History:**

The site is Emeryville Market Place. The Site has been used for the manufacture of bituminous roofing products (tar paper), blending and packaging of oil-based paints and enamels, and as a trucking facility. The contaminants detected at the site include hydrocarbons, asphalt-like materials, and waste tar paper material. The Alameda County Environmental Health Department oversaw the site remediation. The hydrocarbon material was excavated, treated, and transported off-site for disposal.

**Status:** CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS

**A2 Program Type:** STATE RESPONSE

**CalEnviroScreen Score:** 66-70%

<b>Comments:</b>			The property is currently the location of an asphalt parking lot landscaped with palm trees, a grassy area containing trees (at 18" above grade) and other trees contained by concrete planters in the Woodfin Suite Parking Lot. Cracks were observed along the west side of the Emeryville Marketplace building and need repair. Otherwise, the cap covering the Site is in good condition.

<b>Sub Area Link:</b>						
<b>Document Type:</b>					5 Year Review Reports	
<b>Date Completed:</b>					6/23/2009	
<b>Comments:</b>					Upon observing the current site conditions, DTSC concludes that the selected remedial action remains protective of human health and the environment. Petroleum-impacted soil remains under the asphalt and concrete surfaces and landscaped areas, effectively eliminating any potential for exposure. However, the cracks observed during the inspection should be repaired so the cap covering the Site will continue to be protective of human health.

**Site History:**

The site is bound by an industrial building to the south, by Fifth Street to the west, by a residential property to the north and by an alley to the east. The surrounding land use is mixed light industrial and residential. A residence occupied the Site from at least 1911 through the early 1970s. The Site was used for construction staging from approximately 1986 to 1987. Soil samples were collected across the Site.

**Document Type:** Phase 1  
**Date Completed:** 10/10/1997  
**Comments:** Pursuant to the MOU, DTSC has reviewed a risk assessment and other documents for the Lifelong Medical Care (LMC) facility. The property, owned by LMC, is a vacant lot which was formerly the site of a Chevron service station. The underground tanks have been removed per City of Berkeley oversight. A risk assessment has been completed and approved by the City of Berkeley and Alameda County. An Indemnification Agreement has been signed by Chevron. A Supplemental Phase I Environmental Assessment was prepared by DTSC and concluded that no action was needed for this property, there is no contamination on the property.

**Evaluation Type Description:** FOCUSED COMPLIANCE INSPECTION  
**Violation Short Description:** LDR - General  
**Return to Compliance Date:** 19881102  
**Evaluation Agency:** State

**Evaluation Start Date:** 19880330  
**Evaluation Type Description:** FINANCIAL RECORD REVIEW  
**Violation Short Description:** TSD - Financial Requirements  
**Return to Compliance Date:** 19881102  
**Evaluation Agency:** State

**Handler Summary**

**Importer Activity:** No  
**Mixed Waste Generator:** No  
**Transporter Activity:** No  
**Transfer Facility:** No  
**Onsite Burner:** No  
**Smelting, Melting and Refining:** No  
**Underground Injection Control:** No  
**Commercial TSD:** No  
**Used Oil Transporter:** No  
**Used Oil Transfer Facility:** No  
**Used Oil Processor:** No  
**Used Oil Refiner:** No  
**Used Oil Burner:** No  
**Used Oil Market Burner:** No  
**Used Oil Spec Marketer:** No

**Hazardous Waste Handler Details**

CONTAMINATED SOIL, LEAD, POLYCHLORINATED BIPHENYLS (PCBS), POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS), VOLATILE ORGANICS (8260B VOCS)

#### Site History:

Westinghouse entered into a Consent Agreement and Final Order with US EPA in 1984 in accordance with the Toxic Substances Control Act (TSCA) due to the presence of PCBs. In accordance with the Consent Agreement, Westinghouse constructed a subsurface slurry wall and surface cap on the Site in 1985. PCB contaminated soils from areas adjacent to and outside the slurry wall were placed within the slurry wall, and the areas was covered with a composite cap. CBS/Viacom is the current land owner. Wareham Development has leased the Site for surface parking of automobiles.

<b>Document Type:</b>		Technical Workplan				
<b>Date Completed:</b>		1/23/2017				
<b>Comments:</b>		DTSC concurs with the following changes to geosynthetic clay liner (GCL) installation: 1. The GCL anchor trench shall be omitted; 2. The GCL shall be extended at least 2 feet beyond the outside of the slurry wall where possible; 3. The GCL shall be run at least one foot up the side of the sheet pile (if sheet pile is within 2 feet) or of he remaining aggregate base outside of the slurry wall; and 4. The GCL/slurry wall interface will continue to be inspected to verify a good contact between the GCL and slurry wall.

<b>Sub Area:</b>						
<b>Sub Area Link:</b>						
<b>Document Type:</b>		Design/Implementation Workplan				
<b>Date Completed:</b>		4/2/2015				
<b>Comments:</b>		The proposed modification fine tunes the injection locations based on the final building foundation plan and updates the associated text and table.				
<b>Title:</b>		Cleanup Schedule				
<b>Title Link:</b>		<a href="http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=01360057&amp;doc_id=60364117">http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=01360057&amp;doc_id=60364117</a>				
<b>Area Name:</b>						
<b>Area Link:</b>						
<b>Sub Area:</b>						
<b>Sub Area Link:</b>						
<b>Document Type:</b>		Other Report				
<b>Date Completed:</b>		6/25/2014				
<b>Comments:</b>		Conducting the cleanup activities during the dry season is critically important to (a) alleviate the burden in pumping and treating enormous volume of PCB-impacted storm water accumulated in open excavation, (b) reduce the potential for PCB-impacted storm water from discharging into the San Francisco Bay, and (c) ensure that the Total Maximum Daily Load for PCBs is not exacerbated. Therefore, DTSC strongly recommends against soil excavation during the rainy months.				
<b>Title:</b>		Human Health Risk Assessment Amendment

The Site is located at 1301 – 59th Street, Emeryville, California (see Figure 1, Site Location Map). Records at the City of Emeryville Planning Department show that the Site has an area of approximately 11,782.10 square feet (0.27 acres), and it is located within the area of the city that is zoned Open Space – Recreation. The Site has Assessor Parcel Numbers of 049-1329-005-02, 03, 04 and 05. The Site is owned by HSP, a California limited partnership, but is currently in the possession of the City of Emeryville Redevelopment Agency as part of a pending eminent domain action. The Agency has fenced the Site with chained link fence. With the exception of a small wooden shed located at the northwestern corner, the Site is a vacant lot. The surface area of the Site is paved with asphalt/concrete.

Pertinent historical accounts appear to show that in 1931 or earlier a rail spur traversed the Site in a northeast to southwest direction. The rail spur was owned by Southern Pacific Railroad. Union Pacific Railroad subsequently acquired Southern Pacific and thus obtained ownership of the rail spur. The Site also was used as a vehicle parking lot by the surrounding businesses or neighbors. There appears to be no record of any commercial building structures or commercial/industrial activities on the Site.

The Site is bordered by 59th Street to the north, and across the street are the Emeryville Organic Garden and other commercial buildings. To the south are commercial buildings, and the Greenway, which is used for civic and recreational activities. To the east are commercial and residential buildings, and to the west are commercial buildings. The neighborhood surrounding the Site is characterized by mostly commercial buildings, residential buildings and civic centers.

**Potential Contamin of Concern:**

**Location:** Hexcel Corp. @ 4th St.  
**Description:** HISTORICAL REPORT: Per fax from the NRC: Caller stated that there was a chemical process that took place during 1964-1967 that released heavily contaminated rinse water hexavalent chromium. Most people during that time were unaware of the toxicity of this product. The material left the plant (which then was located in Berkeley, CA near the San Francisco Bay) and into a storm drain and into the San Francisco Bay. In 1967 the plant closed and transferred to Graham, TX. They were then advised that they could not release this product into the water any longer. They built a treatment plant to alleviate this release. There was a period during the 1970s that the treatment system failed and the material made it's way into the Brazos River in San Antonio, TX.

**Description of Incident:** CALLER STATED THAT THERE WAS A CHEMICAL PROCESS THAT TOOK PLACE DURING 1964-1967 THAT RELEASED HEAVILY CONTAMINATED RINSEWATER HEXAVALENT CHROMIUM. MOST PEOPLE DURING THAT TIME WERE UNAWARE OF THE TOXICITY OF THIS PRODUCT. THE MATERIAL LEFT THE PLANT (WHICH THEN WAS LOCATED IN BERKELY, CA NEAR THE SAN FRANCISCO BAY) AND INTO A STORM DRAIN AND INTO THE SAN FRANCISCO BAY. IN 1967 THE PLANT CLOSED AND TRANSFERRED TO GRAHAM, TX. THEY WERE THEN ADVISED THAT THEY COULD NOT RELEASE THIS PRODUCT INTO THE WATER ANY LONGER. THEY BUILT A TREATMENT PLANT TO ALLEVIATE THIS RELEASE. THERE WAS A PERIOD DURING THE 1970'S THAT THE TREATMENT SYSTEM FAILED AND THE MATERIAL MADE IT'S

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

## Standard Environmental Record Sources

### Federal

#### Facility Response Plan:

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date: Mar 26, 2020**

#### National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

**Government Publication Date: Jun 26, 2020**

#### National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

**Government Publication Date: Jun 26, 2020**

#### Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

**Government Publication Date: Jun 26, 2020**

#### SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date: May 22, 2020**

#### Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date: Jun 1985**

**SEMS List 8R Archive Sites:**

[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date: May 22, 2020**

**Comprehensive Environmental Response, Compensation and Liability Information System -**

[CERCLIS](#)

**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date: Oct 25, 2013**

**EPA Report on the Status of Open Dumps on Indian Lands:**

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date: Dec 31, 1998**

**CERCLIS - No Further Remedial Action Planned:**

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date: Oct 25, 2013**

**CERCLIS Liens:**

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Jan 30, 2014**

**RCRA CORRACTS-Corrective Action:**

[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date: Jul 27, 2020**

**RCRA non-CORRACTS TSD Facilities:**

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date: Jul 27, 2020**

**RCRA Generator List:**

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Jul 27, 2020**

**RCRA Small Quantity Generators List:**

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Jul 27, 2020**

**RCRA Conditionally Exempt and Very Small Quantity Generators List:**

[RCRA CESQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt and Very Small Quantity Generators (VSQG and CESQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG and CESQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date: Jul 27, 2020**

**RCRA Non-Generators:**

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Jul 27, 2020**

**Federal Engineering Controls-ECs:**

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Aug 26, 2020**

**Federal Institutional Controls- ICs:**

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date: Aug 26, 2020**

**Emergency Response Notification System:**

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1982-1986**

**Emergency Response Notification System:**

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1987-1989**

**Emergency Response Notification System:**

[ERNS](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Nov 25, 2019**

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Sep 3, 2019**

**FEMA Underground Storage Tank Listing:**

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date: Dec 31, 2017**

**Petroleum Refineries:**

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date: Jul 10, 2020**

**Petroleum Product and Crude Oil Rail Terminals:**

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

**Government Publication Date: Apr 28, 2020**

**LIEN on Property:**

[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date: May 22, 2020**

**Superfund Decision Documents:**

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date: Jun 26, 2020**

**State**

**State Response Sites:**

[RESPONSE](#)

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

**Government Publication Date: Jul 14, 2020**

**EnviroStor Database:**

[ENVIROSTOR](#)

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

**Government Publication Date: Jul 14, 2020**

**Delisted State Response Sites:**

[DELISTED ENVS](#)

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

**Government Publication Date: Jul 14, 2020**

**Solid Waste Information System (SWIS):**

[SWF/LF](#)

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

**Government Publication Date: May 1, 2020**

**EnviroStor Hazardous Waste Facilities:**

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

**Government Publication Date: Jul 14, 2020**

**Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:**

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

**Government Publication Date: Dec 31, 1995**

**Land Disposal Sites:**

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

**Government Publication Date: Jul 15, 2020**

**Leaking Underground Fuel Tank Reports:**

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

**Government Publication Date: Jul 15, 2020**

**Delisted Leaking Storage Tanks:**

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

**Government Publication Date: Jul 15, 2020**

**Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:**

SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

**Government Publication Date: Sep 20, 2006**

**Permitted Underground Storage Tank (UST) in GeoTracker:**

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

**Government Publication Date: Jul 12, 2020**

**Proposed Closure of Underground Storage Tank Cases:**

UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

**Government Publication Date: Jul 7, 2020**

**Historical Hazardous Substance Storage Information Database:**

HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

**Government Publication Date: Aug 27, 2015**

**Aboveground Storage Tanks:**

AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

**Government Publication Date: Aug 31, 2009**

**Oil and Gas Facility Tanks:**

TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

**Government Publication Date: Jul 21, 2020**

**Delisted Storage Tanks:**

DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

**Government Publication Date: Sep 15, 2020**

**California Environmental Reporting System (CERS) Tanks:**

CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

**Government Publication Date: Aug 7, 2020**

**Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:**

LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

**Government Publication Date: Jul 14, 2020**

**Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:**

HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

**Government Publication Date: Apr 8, 2020**

**Deed Restrictions and Land Use Restrictions:**

DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

**Government Publication Date: Jul 15, 2020**

**Voluntary Cleanup Program:**

VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

**Government Publication Date: Jul 14, 2020**

**GeoTracker Cleanup Program Sites:**

CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

**Government Publication Date: Jul 15, 2020**

**Delisted County Records:**

DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

**Government Publication Date: Sep 16, 2020**

**Delisted California Environmental Reporting System (CERS) Tanks:**

[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

**Government Publication Date: Aug 7, 2020**

**Historical Hazardous Substance Storage Container Information - Facility Summary:**

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

**Government Publication Date: May 27, 1988**

**Tribal**

**Leaking Underground Storage Tanks (LUSTs) on Indian Lands:**

[INDIAN LUST](#)

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

**Government Publication Date: Apr 8, 2020**

**Underground Storage Tanks (USTs) on Indian Lands:**

[INDIAN UST](#)

USTs on Tribal/Indian Lands in Region 9, which includes California.

**Government Publication Date: Apr 8, 2020**

**Delisted Tribal Leaking Storage Tanks:**

[DELISTED ILST](#)

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

**Government Publication Date: Apr 14, 2020**

**Delisted Tribal Underground Storage Tanks:**

[DELISTED IUST](#)

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

**Government Publication Date: Apr 14, 2020**

**County**

**Alameda County - LOP Sites List:**

[ALAMEDA LOP](#)

List of sites in the Alameda County Department of Environmental Health's (ACDEH) Local Oversight Program (LOP). The ACDEH LOP program oversees the investigation and cleanup of hazardous materials releases to the environment under two programs. The Leaking Underground Fuel Tank (LUFT) program is specific to unauthorized releases associated with petroleum underground storage tank systems. The Site Cleanup Program (SCP) oversees the investigation and cleanup of releases from hazardous materials, including but not limited to releases of pesticides, heavy metals, dry cleaner solvents, etc., including redevelopment of sites with residual contamination from historic uses.

**Government Publication Date: Jan 16, 2019**

**Alameda County - UST List:**

[UST ALAMEDA](#)

A list of registered Underground Storage Tanks (USTs) in the County of Alameda. The list is made available by Alameda County Department of Environmental Health.

**Government Publication Date: Jul 9, 2019**

**Alameda County - City of Berkeley CUPA Facilities:**

[BERKELEY CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs at the City of Berkeley in Alameda County. This list is maintained by the Toxics Management Division at the City of Berkeley.

**Government Publication Date: Sep 2, 2020**

**Alameda County - Hayward City CUPA List:**

[HAYWARD CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Hayward City. This list is maintained by the Hayward City Fire Department.

**Government Publication Date: Jul 16, 2019**

**Alameda County - San Leandro City CUPA Facilities List:**

[SANLEANDRO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Leandro City, Alameda County. This list is made available by San Leandro City Environmental Services Section.

**Government Publication Date: Apr 11, 2019**

**Alameda County - Union City USTs:**

[UNION UST](#)

A list of Underground Storage Tanks (USTs) in the city of Union in Alameda County. This data is made available by the Environmental Programs Division of Economic & Community Development, Union City.

**Government Publication Date: Aug 31, 2020**

**Alameda County - Union City CERS CUPA List:**

[UNION CUPA](#)

A list of CERS registered facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. This list is made available by the City of Union Economic and Community Development Department.

**Government Publication Date: Aug 31, 2020**

**Alameda County - Union City CUPA Facilities:**

[UNION CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. Includes facilities with active and inactive statuses. This list is made available by the City of Union Economic and Community Development Department.

**Government Publication Date: Aug 31, 2020**

**Alameda County - City of Livermore and Pleasanton UST List:**

[LIVERMORE UST](#)

A list of registered Underground Storage Tank (UST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

**Government Publication Date: May 1, 2019**

**Alameda County - City of Livermore and Pleasanton AST List:**

[LIVERMORE AST](#)

A list of registered Aboveground Storage Tank (AST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

**Government Publication Date: May 1, 2019**

**Alameda County - City of Livermore and Pleasanton CUPA Facilities:**

[LIVERMORE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in City of Livermore and City of Pleasanton in Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

**Government Publication Date: May 1, 2019**

## **Additional Environmental Record Sources**

### **Federal**

**PFOA/PFOS Contaminated Sites:**

[PFAS NPL](#)

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

**Government Publication Date: Jul 7, 2020**

**Facility Registry Service/Facility Index:**

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

**Government Publication Date: Jun 15, 2020**

**Toxics Release Inventory (TRI) Program:**

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

*Government Publication Date: Feb 19, 2020*

**Perfluorinated Alkyl Substances (PFAS) Releases:**

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

*Government Publication Date: Feb 19, 2020*

**Perfluorinated Alkyl Substances (PFAS) Water Quality:**

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

*Government Publication Date: Jul 20, 2020*

**Hazardous Materials Information Reporting System:**

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

*Government Publication Date: Jan 8, 2020*

**National Clandestine Drug Labs:**

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

*Government Publication Date: Mar 19, 2020*

**Toxic Substances Control Act:**

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

*Government Publication Date: Apr 11, 2019*

**Hist TSCA:**

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

*Government Publication Date: Dec 31, 2006*

**FTTS Administrative Case Listing:**

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

*Government Publication Date: Jan 19, 2007*

**FTTS Inspection Case Listing:**

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

*Government Publication Date: Jan 19, 2007*

**Potentially Responsible Parties List:**

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

**Government Publication Date: Jul 29, 2020**

**State Coalition for Remediation of Drycleaners Listing:**

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

**Government Publication Date: Nov 08, 2017**

**Integrated Compliance Information System (ICIS):**

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

**Government Publication Date: Nov 18, 2016**

**Drycleaner Facilities:**

[FED DRYCLEANERS](#)

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

**Government Publication Date: Jan 20, 2020**

**Delisted Drycleaner Facilities:**

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

**Government Publication Date: Jan 20, 2020**

**Formerly Used Defense Sites:**

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

**Government Publication Date: Jan 28, 2020**

**PHMSA Pipeline Safety Flagged Incidents:**

[PIPELINE INCIDENT](#)

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

**Government Publication Date: Jul 7, 2020**

**Material Licensing Tracking System (MLTS):**

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Government Publication Date: Aug 5, 2020**

**Historic Material Licensing Tracking System (MLTS) sites:**

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

**Government Publication Date: Jan 31, 2010**

**Mines Master Index File:**

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

**Government Publication Date: May 1, 2020**

**Alternative Fueling Stations:**

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

**Government Publication Date:** Jun 22, 2020

**Registered Pesticide Establishments:**

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

**Government Publication Date:** Mar 31, 2020

**Polychlorinated Biphenyl (PCB) Notifiers:**

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

**Government Publication Date:** Oct 9, 2019

**State**

**Dry Cleaning Facilities:**

DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

**Government Publication Date:** Aug 12, 2020

**Delisted Drycleaners:**

DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

**Government Publication Date:** Aug 12, 2020

**Non-Toxic Dry Cleaning Incentive Program:**

DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

**Government Publication Date:** Feb 28, 2018

**Per- and Polyfluoroalkyl Substances (PFAS):**

PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

**Government Publication Date:** Jul 15, 2020

**PFOA/PFOS Groundwater:**

PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.Y

**Government Publication Date:** Jul 28, 2020

**Hazardous Waste and Substances Site List - Site Cleanup:**

HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

**Government Publication Date:** Aug 19, 2020

**List of Hazardous Waste Facilities Subject to Corrective Action:**

DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

**Government Publication Date: Jul 18, 2016**

**EnviroStor Inspection, Compliance, and Enforcement:**

INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

**Government Publication Date: Jul 20, 2020**

**School Property Evaluation Program Sites:**

SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

**Government Publication Date: Jul 14, 2020**

**California Hazardous Material Incident Report System (CHMIRS):**

CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date: Jul 22, 2020**

**Hazardous Waste Manifest Data:**

HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date: Oct 24, 2016**

**Historical California Hazardous Material Incident Report System (CHMIRS):**

HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date: Jan 1, 1993**

**Historical Hazardous Waste Manifest Data:**

HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date: Dec 31, 1992**

**Historical Cortese List:**

HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

**Government Publication Date: Nov 13, 2008**

**Cease and Desist Orders and Cleanup and Abatement Orders:**

CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

**Government Publication Date: Feb 16, 2012**

**California Environmental Reporting System (CERS) Hazardous Waste Sites:**

CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

**Government Publication Date: Aug 7, 2020**

**Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:**

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

**Government Publication Date: Nov 29, 2018**

**Sites in GeoTracker:**

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

**Government Publication Date: Jul 15, 2020**

**Waste Discharge Requirements:**

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

**Government Publication Date: Jul 15, 2020**

**Toxic Pollutant Emissions Facilities:**

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

**Government Publication Date: Dec 31, 2018**

**Clandestine Drug Lab Sites:**

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

**Government Publication Date: Jun 30, 2018**

**Tribal**

**No Tribal additional environmental record sources available for this State.**

**County**

**No County additional environmental databases were selected to be included in the search.**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
