

## Traffic Technical Memorandum

**TO:** Brandon Larsen, Senior Environmental Planner  
**FROM:** H. Heidary, Associate Civil Engineer  
**SUBJECT:** Bridge Replacement on First Street over Clover Creek  
**DATE:** March 27, 2014

---

First Street is approximately 0.5 miles long and runs through the center of Upper Lake. There are several homes and driveways in the immediate vicinity of the bridge. The road will be closed at the bridge site for the duration of construction. Access will still be maintained for those residents with driveways adjacent to the bridge. There are multiple alternative routes that residents could use to access their property. The maximum delay would be for the residents on the east side of the bridge heading toward highway 20 westbound (See Exhibit A). The delay for these residents will be approximately 5 minutes. Thirty days prior to construction, the County will place Changeable Message Sign (CMS) boards on First Street warning residents of the upcoming road closure. In addition to the CMS boards, a notice will also be placed on the County's website as well as in the local newspaper. Flyers will also be distributed to the nearby residents to warn of the road closure. The road closure is anticipated to last three months.
