We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

BA Environmental (a Division of Building Analytics) has conducted a Phase I Environmental Site Assessment (ESA) at the subject property located at 6450 Sunset Boulevard, in the City of Los Angeles, California. This Phase I ESA was conducted in general accordance with ASTM Standard Practice E 1527-13 and the United States Environmental Protection Agency All Appropriate Inquiry (AAI) Rule (as defined in the Code of Federal Regulations 40 CFR Part 312). Any exceptions to, or deletions from, this practice are described in the Objective and Scope of Work Section of this report. This Executive Summary presents a brief summary of the salient portions of the document. The Executive Summary, however, is not a stand-alone document, and must be read in conjunction with the entire Phase I ESA Report.

Report Findings and Conclusions Summary

| Report Section | No Further Action | De Minimis Condition† | Recognized Environmental Condition †† (REC) | Historical Recognized Environmental Condition ††† (HREC) | Controlled Recognized Environmental Condition †††† (CREC) | Environmental Concern††††† | Description |

| Wetlands | X | | | | | | |

- † De Minimis Conditions are those defined as conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.
- †† Recognized Environmental Condition (REC) is defined as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.”
- ††† Historical Recognized Environmental Condition (HREC) is defined as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”
- †††† Controlled Recognized Environmental Condition (CREC) is defined as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-

based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

††††† An Environmental Concern is defined as any other environmental condition which BA Environmental would not identify/consider a REC, CREC or an HREC.

Note 1: Historically, the subject property was occupied by a gasoline service station and automotive repair from around 1938 until around 1991. Agency oversight records reported, all of the USTs, a wastewater clarifier and automotive lifts have been removed and assessed for releases. Impacted soils were over excavated in the UST excavation and removed from the subject property. The USTs received closure in 1991. There were no identified releases related to the clarifier and lifts at the time of removal. Based on review of the closure reports for the USTs and the assessment reports for the automobile garage area, BA Environmental considers this to be a HREC and not an environmental concern at this time.

Significant Data Gap Summary

| Report Section | Description |
|---|-------------------------|
| Environmental Liens and Activity Use Limitations (AULs) | No significant data gap |
| Interviews | No significant data gap |
| Historical Site Usage | No significant data gap |
| Historical Adjacent Property Usage | No significant data gap |
| Site Reconnaissance | No significant data gap |
| Environmental Agency Files | No significant data gap |
| Environmental Database | No significant data gap |

Findings and Conclusions

BA Environmental has identified **no** Recognized Environmental Conditions (RECs), **no** Controlled Recognized Environmental Conditions (CRECs) and no Environmental Concerns. BA Environmental did identified **one** Historical Recognized Environmental Condition (HREC) in connection with historical gasoline fueling and automotive repair.

Recommendations

Based on the findings of this Phase I ESA, BA Environmental recommends **no** further investigations at this time. However, if redevelopment of the subject property should disturb subsurface soils, monitoring should be conducted to determine if any residual contaminates remain that would need specific disposal or handling.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
6450 Sunset Boulevard
Los Angeles, California

1.0 REASON FOR PERFORMING PHASE I ESA

The Phase I ESA was conducted in accordance with ASTM Standard Practice for Environmental Site Assessments E1527-13, and the United States Environmental Protection Agency AAI. This Phase I ESA was conducted for the purpose of informing the Client and User of environmental conditions at the subject property in connection with a commercial property acquisition and to assist User in qualifying for an LLP.

2.0 INTRODUCTION

BA Environmental (a Division of Building Analytics) has prepared the following Phase I Environmental Site Assessment (ESA) for **Seward Partners LLC**. (“**Client**”), **which acts on behalf of 6450 Sunset Owner LLC** (“**User**”). This report is regarding the subject property located at 6450 Sunset Boulevard, in the City of Los Angeles, California.

This report was prepared in accordance with the BA Environmental Proposal and Contract (LA12116) dated August 5, 2020. The assessment was performed at the Client’s request using the methods and procedures consistent with good commercial and customary practice designed to conform to acceptable industry standards.

The independent conclusions represent our professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, on behalf of User has been assumed to be correct and complete. The conclusions presented are based on the data provided, observations, and conditions that existed on the date of the on-site visit.

In expressing the opinions stated in this report, BA Environmental has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. Documentation and data provided by the Client on behalf of User, designated representatives of the Client or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, have been used and referenced with the understanding that BA Environmental assumes no responsibility or liability for their accuracy.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. BA Environmental should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

Phase I ESA reports are valid for up to 180 days prior to the date of an acquisition, per ASTM E1527-13.

3.0 RELIANCE

All reports, both written and verbal, are for the sole use and benefit of User and Client. This report may not be relied upon by any other person or entity without the express written permission of BA Environmental. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this investigation. In the absence of a written agreement with BA Environmental/Building Analytics granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against BA Environmental/Building Analytics, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold BA Environmental/Building Analytics, Client, User and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply for misuse or misapplication of this report.

4.0 OBJECTIVE AND SCOPE OF WORK

The purpose of the ESA is to identify, to the extent feasible, recognized environmental conditions. The identification of the presence or lack of recognized environmental conditions will “permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”); that is, the practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B)” (ASTM E1527-13).

This Phase I ESA meets or exceeds the general requirements of the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments E1527-13, and the United States Environmental Protection Agency All Appropriate Inquiry (AAI) Rule (as defined in the Code of Federal Regulations 40 CFR Part 312). The ASTM standard practice defines good commercial and customary practice for conducting ESAs using reasonable inquiry. The scope of services for this Phase I ESA consisted of several tasks, including:

- A reconnaissance of the site and its vicinity;
- Interviews with current owners and occupants of the subject property, and personnel at local government agencies;
- A compilation of the property history, including the review of previous environmental reports regarding the subject property (if available);
- A review of pertinent Site and local regulatory agency files;
- An agency list search of facilities with recorded environmental issues located within the radii required by ASTM E1527-13;
- Tier 1 Vapor Encroachment Screen; and
- A summary of our findings, conclusions and recommendations.

Additional services that were provided include:

- A visual survey and review of a map of designated wetlands;
- A visual mold survey;
- A visual asbestos survey of suspect asbestos-containing materials (ACMs);
- A visual lead-based paint survey;
- A review of a survey and map of radon zones; and
- A review of relevant Methane Zones.

The scope of this Phase I ESA is not intended to address, assess, or otherwise determine whether soil or groundwater contamination, waste emplacement, existing or threatened mold/fungus growth, asbestos-containing building materials, and/or lead-based paint actually exists at the subject property. BA Environmental considers a Tier 2 vapor encroachment screen beyond the scope of this Phase I ESA, and therefore a Tier 2 vapor encroachment screen was not conducted as part of this ESA. Additionally, this ESA does not serve as a comprehensive wetlands, mining, oil, pipeline, and/or gas well survey, which would require additional surveys, comprehensive subsurface exploration and/or other sampling activities, which are beyond the scope of service for this Phase I ESA. This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions as noted by AAI Rule (as defined in the Code of Federal Regulations 40 CFR Part 312). Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

As per ASTM Practice E1527-13, there are no deviations from, or deletions of, the general requirements of this standard practice contained in this report. This Phase I ESA has been performed by, or under the direct supervision of an “environmental professional,” as defined in ASTM E1527-13 and the EPA AAI Rules.

A Phase I ESA is a non-intrusive investigation. As such, it is not a full and complete assessment of all environmental conditions. Adverse conditions may exist that could not be discovered by such an assessment. No ESA can completely eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a subject property. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. The ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property. The practices of ASTM E1527-13 recognize reasonable limits of time and cost. The term “All appropriate inquiry” does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information, and in fact may interrupt or interfere with the orderly or timely completion of a property transaction. One of the purposes of ASTM E1527-13 is to identify a balance between limiting the costs and time demands inherent in performing an ESA and the reduction of uncertainty about unknown conditions resulting from additional information. BA Environmental has made every reasonable effort to discover and interpret the information and current conditions regarding the site within the time available. We will recommend prudent additional investigations, if deemed necessary.

Several terms are commonly used throughout this report. For the purpose of this report, the **site vicinity** refers to an area within a 1-mile radius of the subject site. The term **adjacent property** includes those properties next to or across a street or a railroad track from the subject property. **Adjoining properties** are those which directly abut the

subject property. **Recognized environmental conditions** (RECs) refers to “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.” The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies” (ASTM E1527-13). “Conditions determined to be de minimis are not recognized environmental conditions” (ASTM E1527-13).

A Historical REC (HREC) is defined as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” If a past release of a hazardous substance or petroleum product that has occurred at the subject property and has been remediated, and the remediation has been accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent), this condition shall be considered an HREC.

Controlled Recognized Environmental Condition (CREC) is defined as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.

An Environmental Concern is defined as any other environmental conditions which BA Environmental would not be identified or considered as a REC CREC or HREC.

BA Environmental uses risk levels (low, moderate and high) to provide the User with a relative risk for the potential for impact to the subject property. These risk levels are qualitative only and have no quantitative basis.

It should be understood that the conditions of a site can change with time as a result of natural processes or the activities of humankind at the subject site or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur at any time due to government action or the broadening of knowledge. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations, standards of practice, and property conditions existing at the time the assessment was performed. BA Environmental/Building Analytics cannot be held responsible or liable for any changes in conclusions or recommendations affected by changes in the site or government regulations.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain factual assumptions, findings, conclusions, or circumstances discussed in this report. A change in any factual assumption, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

5.0 DESCRIPTION OF SUBJECT PROPERTY

5.1 Site Location and Legal Description

The subject property is located at 6450 Sunset Boulevard, in the City of Los Angeles, California, on the south side of Sunset Boulevard, between Wilcox Avenue on the west and Cole Place on the east, in the City of Los Angeles, California. The subject site is identified as APN 5546-014-056.

5.2 Site Improvements

The subject property is occupied by a single-story commercial retail building, consisting of approximately 17,136 square feet, situated on an approximate 0.76-acre parcel of land. Other improvements include surface asphalt parking and landscaping. The subject building was reportedly constructed in 1993 on previously developed land. Vehicular access to the parking lot is from Wilcox Avenue to the west and Cole Place to the east.

5.3 Utilities

| | |
|-----------------------|---|
| Electric: | Los Angeles Department of Water and Power (LADWP) |
| Natural Gas: | Southern California Gas Company |
| Water: | LADWP |
| Sewer: | City of Los Angeles |
| Storm Drain: | City of Los Angeles |
| Solid Waste Disposal: | City of Los Angeles |

5.4 Drinking Water

Municipal water service is supplied by the City of Los Angeles. According to the 2018 Water Quality Report for the City of Los Angeles Municipal Water System, there are no MCL violations, and the drinking water supplied by this municipal supplier meets all drinking water standards. A copy of the 2018 Water Quality Report for the City of Los Angeles Municipal Water System is included in Appendix A.

5.5 Adjacent Land Use

During the reconnaissance of the surrounding area within a 0.25-mile radius, BA Environmental observed that the subject site is located in an area of commercial, retail and residential properties.

The adjacent properties to the subject site are as follows (Figures 1 and 2):

North: Sunset Boulevard followed by Studio Instrument Rentals

East: Cole Place followed by a commercial office building

South: Alleyway followed by studio office space and media storage

West: Wilcox Avenue followed by a commercial office building

6.0 PHYSICAL SETTINGS

6.1 Topography

The property is depicted on the Hollywood, California Topographic Quadrangle map of the United States Geological Survey (USGS). The location of the subject site is at Latitude 34° 5' 51.12" North, Longitude 118° 19' 50.28" West of the Prime Meridian. The topography of the subject site slopes generally towards the south at a gradient of approximately 75 feet per mile. The elevation at the site is approximately 351 feet above mean sea level (msl).

Surface drainage of the subject site generally flows towards the south. Some localized changes in surface drainage are present throughout the subject site.

No other major bodies of surface water (i.e., oceans, lakes, rivers, streams, etc.) are depicted within a 1.0-mile radius of the site.

6.2 Geology and Hydrogeology

The subject Site is located in the Hollywood Piedmont Slope area of the Los Angeles Coastal Plain, on the northern side of the Hollywood Syncline (DWR 1961). The Coastal Plain of the Los Angeles County consists primarily of unconsolidated sediments of alluvium, underlain and bounded to the north and east by bedrock and the west and south by the Pacific Ocean. The Santa Monica Mountains are located to the north and east-west trending Santa Monica-Hollywood Fault is located approximately ½ miles north of the subject site. The subject Site is situated over the Hollywood Sub-basin of the Central Groundwater Basin of the Los Angeles, San Gabriel Hydrologic Unit. The alluvium within the site vicinity consists of Holocene alluvium, underlain by the Pleistocene deposits of the Lakewood Formation. The Lakewood Formation included the Bellflower Aquiclude, and the Exposition and Gage Aquifers (DWR 1961).

A site located approximately 1,600 feet to the southeast of the subject site reported groundwater typically encountered at 35 to 40 feet bgs with a hydraulic gradient of approximately 0.006 feet per foot (ft/ft) (Murex 2019).

6.3 Oil Wells and Oil Fields

The State of California Geologic Energy Management Division (CalGEM), formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR), oversees the drilling, operation, maintenance, and plugging and abandonment of oil, natural gas, and geothermal energy wells.

A review of relevant Munger oil and gas field maps and CalGEM Well Finder GIS indicated that the subject site was not located within any oil or gas fields, and that no oil or natural gas wells were located on the subject site (Munger, 1993; Cal GEM, 2020).

7.0 USER PROVIDED INFORMATION

As stated in the ASTM E1527-13 guidelines, the “User” of the Phase I ESA is responsible to identify recorded and known environmental liens and activity and use limitations (AULs) for the subject property, unless contracted with the Consultant. The User should also inform the Consultant of any specialized knowledge or experience of the User material to REC’s at the subject property, as well as community known or reasonably ascertainable information about the subject property. The Consultant is also to be informed by the User if the User believes that the purchase price of the subject property is lower than fair market value due to contamination. The Consultant should also be informed of the purpose of the Phase I ESA. Unless otherwise stated, the purpose of the Phase I ESA is assumed to be to qualify for an LLP.

During this investigation, BA Environmental has requested from the Client acting on behalf of User, any information, records, and/or knowledge of the subject property. BA Environmental also requests any past environmental reports (including but not limited to Phase I ESAs, Phase II Subsurface Investigations, Site Characterization Reports, Groundwater Monitoring Reports, Remediation Reports, Asbestos or Lead-Based Paint Surveys or Abatement Documents, Mold Surveys or Abatement Documents, and Indoor Air Quality Reports) regarding the subject property. BA Environmental has requested copies of all operating permits regarding environmental issues (i.e., generators, USTs and ASTs, wastewater discharge, hazardous materials storage and handling, hazardous waste storage and disposal and air emissions permits). BA Environmental has also requested any present or historic knowledge of environmental litigations, administrative proceedings and violations associated with hazardous materials/wastes and/or petroleum products.

7.1 Title Records

A title records review, or chain-of-title, can be used to identify prior ownership of a property and to evaluate previous activities or operations in terms of environmental significance. It is also reviewed to determine if there are any easements, covenants, restrictions, limitations or environmental liens which may affect the subject properties usage.

BA Environmental was provided by Client, acting on behalf of User, with a copy of a Preliminary Title Report. A review of this Preliminary Title Report did not indicate that there were any recorded Environmental Liens and Activity and Use Limitations (AULs) associated with the subject property. A copy of the Preliminary Title Report is included in Appendix B.

7.2 Specialized Knowledge and Commonly Known or Reasonably Ascertainable Information

No specialized knowledge of the subject site, or commonly known or reasonably ascertainable information not otherwise included in the ESA, was reported to BA Environmental by the Client, acting on behalf of User.

7.3 Valuation Reduction Due to Environmental Issues

In a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to fair market value of the property if the property was not affected by hazardous substances or petroleum products. No information regarding deviations from a fair market value purchase price for the subject property on account of environmental contamination was reported to BA Environmental by the Client acting on behalf of the User.

7.4 Review of Previous Environmental Reports

On behalf of the User, Client provided BA Environmental copies of the following previous environmental reports regarding the subject property.

BA Environmental, Phase I Environmental Site Assessment (ESA) Report, Staples, 6450 Sunset Boulevard, Los Angeles, California, prepared January 2, 2019 - In December of 2019, BA Environmental (BA) conducted a Phase I ESA of the subject site. This ESA included a review of historical documents, a site reconnaissance, review of governmental environmental databases, review of environmental agency files and interviews of individuals familiar with the subject site. BA Environmental interviewed the Loss Prevention Manager for Staples (Mr. Brian Magallanes) regarding any known environmental issues in connection with the subject property. Mr. Magallanes has been associated with the subject property for approximately 5 years. According to Mr. Magallanes he is unaware of any present USTs, ASTs located on the subject property. Mr. Magallanes was unaware of the property's history prior to Staples occupying the subject site since around 2000. Mr. Magallanes, to the best of his knowledge, no hazardous materials are used or stored on-site and he is unaware of any asbestos containing materials or lead-based paint in associating with the subject building or business. BA Environmental did not identify any Recognized Environmental Conditions (RECs) associated with the subject property. A Historical Recognized Environmental Condition (HREC) was identified in association with a former gasoline service station which occupied the subject property from 1938 to 1990. This former gasoline service station received closure in 1991 from the LAFD, based on information provided in a GTI, Tank Removal Report dated October 26, 1990. BA Environmental reviewed other investigations, including confirmation sampling and soil removal in the areas of the former automotive repair associated with the subject property. No further investigations based on their findings, were recommended. Based on the previous reports provided to BA Environmental for review, BA Environmental was of the opinion there is a low potential for any residual contaminates to be a significant threat to human health. BA did not identify any concerns regarding the investigation in the garage area based on reports reviewed. However, if redevelopment of the subject property should disturb subsurface soils, monitoring should be conducted to determine if any of the residual contaminates would need any specific disposal or handling.

Smith Emery Company, 1993, Soil Sampling, Garage Excavation, 6450 Sunset Boulevard, Los Angeles, CA, dated May 28, 1993 - In May of 1993, Smith Emery Company (SEC), conducted soil sampling near a 4-foot by 9-foot open cut within the concrete slab on the western end of the garage. Two borings were advanced to a depth of 5 feet bgs on each end of the open cut in the concrete slab. Two soil samples, HF-1 and HF-2 were collected from the two borings. Each of the soil samples was analyzed for gasoline, mineral spirits, Kerosene, diesel fuel and heavy hydrocarbons. The soil sample HF-1 was reported to contain a very low concentration of gasoline range hydrocarbons (1.1 milligram per kilogram (mg/kg)). The soil sample HF-2 was reported not to contain detectable concentrations of gasoline, mineral spirits, Kerosene, diesel fuel or heavy hydrocarbons. Based on their findings, SEC recommended no further investigations.

Smith Emery Company, 1992, Phase II Environmental Assessment, 6450 Sunset Boulevard, Los Angeles, CA, dated September 10, 1992 - On August 25, 1992 SEC conducted a Phase II Environmental Assessment on the subject property, which was occupied by a vacant automotive service center. Areas investigated were the four hydraulic automotive lifts and suspected clarifier as well as two soil stockpiles located in the interior garage and exterior of the garage. Borings B1-B3 and B5 was advanced adjacent to the lifts. Three of the soil samples were collected at 5 feet bgs and one was collected at 3.5 feet bgs. Soil samples collected from these borings reported no detectable concentrations of total petroleum hydrocarbons in the full carbon chain (TPH-cc). Soil boring B4 was advanced adjacent to the suspect clarifier. Soil samples collected at 5 feet bgs and 10 feet bgs within this boring. The 5-foot samples were reported not to contain detectable concentrations of TPH-cc, and the 10-foot-deep sample was reported not to contain detectable concentrations of TPH-cc or volatile organic compounds (VOCs). Grab soil samples collected from the two soil stockpiles were analyzed for Total Recoverable Petroleum Hydrocarbons (TRPH). The interior stockpile sample contained a reported TRPH concentration of 55 mg/kg and was disposed of off-site. The exterior stockpile sample was reported not to contain any detectable concentrations of TRPH. SEC concluded that based on the analytical results, no further assessment or remedial measures are warranted in the areas assessed in this report.

Groundwater Technology (GTI), Inc., 1990, Tank Removal Report, Chevron Service Station #9-9625, 6450 Sunset Boulevard, Los Angeles, CA, dated October 26, 1990 - On August 30, 1990 two borings were advanced (SB-1 and SB-2) in an area to be excavated. BA Environmental has interpreted that SB1 and SB-2 were advanced adjacent to the tank pit prior to excavation. SB1 was advanced to a total depth of 10 feet bgs, with soil samples collected at 5 and 10 feet bgs. SB2 met with refusal at 2 feet bgs and a soil sample was collected at this depth. Samples were analyzed for Total Petroleum Hydrocarbons as gasoline (TPH-g), Total Petroleum Hydrocarbons as diesel fuel (TPH-d), and benzene, toluene, ethylbenzene and xylene (BTEX). None of the soil samples were reported to contain detectable concentrations of TPH-g, TPH-d and BTEX compounds.

On September 4, 1990, a total of 5 USTs were removed from the subject property under permit and oversight of the Los Angeles City Fire Department (LAFD). Four of the USTs were reported to have a capacity of 10,000 gallons and to have contained gasoline and diesel fuel. One 1,000-gallon UST was reported to contain waste oil. All the tanks were reported to be of fiberglass construction. When removed, the tank integrity was reported to be good with no visible evidence of holes.

A total of 10 soil samples (DO-1, DO-2, DO-3, S-1, S-2, U-1, U-2, R-1, R-2 and R-3) were collected beneath the 10,000 gallon fuel USTs (fill ends, centers, and outlet ends).

One soil sample (UO-1) was collected beneath the waste oil tank. A total of 12 soil samples (D1 thru D12) were collected beneath the former fuel dispensers. An additional 4 soil samples (D-13 thru D-16) were collected below grade at the western end of the two former pump islands. Two soil samples (L-1 and L-2) were collected beneath the product lines. Six soil samples (SP-1 thru SP-6) were taken from the main tank pit excavation soil stockpile. One soil sample (SP-7) was collected from the waste oil tank excavation soil stockpile.

Soil sample DO-1, collected at 14 feet bgs in the UST excavation was reported to contain 5,200 mg/kg of TPH-d. Soil was over excavated in the southeastern corner of the tank pit. Soil was further removed from the UST excavation to a depth of 22 feet bgs. Soil samples DO-5 (22 feet bgs), DO-6 (east wall @ 18 feet bgs) and DO-4 (on the south wall @ 20 feet bgs) were reported not to contain detectable concentrations of TPH-d.

Analytical data for the 12 soil samples collected from beneath the fuel dispensers reported maximum concentrations of benzene, toluene, ethylbenzene and xylenes and TPH-g of 0.75 (D-8), 0.55 (D-8), 3.7 (D-11), 40 (D-11) and 660 kg/mg (D-8) in soil, respectively. Two soil samples (D-3 and D-8) were reported not to contain detectable concentrations of TPH-d. Additional soil samples D-13 thru D-16 were collected September 17, 1990 at 5 feet bgs at the west end of the two pump islands.

The two soil samples (L-1 and L-2), collected three feet bgs from beneath the product lines reported only two concentrations of VOC's (benzene at 0.010 mg/kg and xylene at 0.037 mg/kg) in the L-1 sample.

Soil samples FP-7, FP-8 and FP-9, collected from the soil stockpile, reported concentrations of 78, 160 and 900 mg/kg of TPH-d, respectively.

Areas identified to have impacted soil were reportedly excavated. All stockpiles of contaminated soil were reported to have been removed from the subject property for disposal.

Below are all of the analytical results associated with the removal of the USTs, fuel dispensers, auto lifts, and soil stockpiles.

- TPH-g = hydrocarbons as gasoline
- TPH-d = hydrocarbons as diesel
- TPH-o = hydrocarbons as oil range organics

7.5 Permits

BA Environmental was not provided operating or handling permits by the Client or User.

8.0 HISTORICAL REVIEW

As part of the historical review, BA Environmental reviewed available historical aerial photographs for the years 1928, 1938, 1948, 1952, 1954, 1964, 1970, 1977, 1981, 1989, 1994, 2002, 2005, 2009, 2012 and 2016 (EDR, 2019a); city directories for the years 1920-2014 (EDR, 2019b); historical topographic maps for the years 1894, 1896, 1898, 1900, 1902, 1920, 1921, 1924, 1926, 1948, 1953, 1966, 1972, 1981, 1991 and 2012 (EDR, 2019c); historical fire insurance maps for the years 1907, 1913, 1919, 1950, 1955, 1957, 1960, 1961, 1962, 1966, 1968, 1969 and 1970 (EDR, 2019d); and building online records (City of Los Angeles, 2019). Copies of the above historical documents are provided in Appendices C through F.

The following summaries of the use history of the subject property and of adjacent properties are based on a review of the foregoing material.

8.1 History of Subject Property

The subject property was occupied by feed and hay storage buildings and a single-family residence from prior to 1907 until around 1919. By 1919, the feed and hay buildings were converted into retail store fronts. During this time period, the single-family residence remained on the southernmost portion of the subject property. By 1938, the northern portion of the subject property was redeveloped to include a gasoline service station and automotive repair shop, with the southern portion of the subject property being occupied by single family residences and duplexes. By 1955, the residential structures were demolished, and the southern portion of the subject property was redeveloped into a parking lot. By 1994, the gasoline service station had been demolished and the subject property was redeveloped into a retail store occupied by Staples. Since, 1994 there have been no significant changes to the use or configuration of the subject property.

Historically, a gasoline service station occupied the subject property from 1938 to 1990. A total four 10,000-gallon fuel USTs and one 1,000-gallon waste oil tank were removed in 1990. In 1991, the LAFD issued a closure letter regarding the USTs, which required no further action needed.

8.2 History of Adjacent Properties

From prior to 1907 until around 1913, the adjacent properties to the north of the subject site were occupied by Sunset Boulevard followed by a vacant parcel of land, the electric company's storage yard and a single-family residence. By 1913, the residence also had a restaurant associated with it. By 1919, the properties to the north of Sunset Boulevard were occupied by vacant land, an electric company's storage yard and a building occupied by retail establishments and the Film Exchange. Sometime prior to 1938, the adjacent property to the north of Sunset Boulevard was occupied by an automotive dealership and automotive repair. The adjacent property to the north of Sunset Boulevard remained an automotive dealership and automotive repair used by Packard from the 1930s through the 1950s, and then by a Mercedes Benz dealership until around 1990.

Since the late 1990s, the adjacent property to the north of Sunset Boulevard has been occupied by a studio rental space.

The adjacent property to the south of the subject Site was occupied by single-family residences from prior to 1907 until around 1945. By 1945, the adjacent properties to the south were occupied by retail stores facing Wilcox Avenue and single-family residences facing Cole Place. There continued to be no changes in the use of the adjacent properties to the south until around 1957, when the property facing Wilcox Avenue was occupied by retail store fronts and the property facing Cole Place was occupied by an office, warehouse and optical glass grinding building used by the American Optical Company. By 1968, the adjacent properties to the south were occupied by store fronts facing Wilcox Avenue, and a musical instrument stage and rehearsal studio facing Cole Place. Other entertainment industry related businesses occupied the warehouse building facing Cole Place from the early 1990s until around the mid-2000s. Around 2008 the warehouse building facing Cole Place was demolished, creating automobile parking for the retail/office buildings facing Wilcox Avenue. Currently, the structures facing Wilcox Avenue are occupied by film and television production office space.

Historically, the adjacent properties to the east of the subject property were occupied by a carriage painting shop from prior to 1907 until around 1938. By 1938, the adjacent properties to the east were occupied by Cole Place followed by retail shops. In the 1960s, the adjacent property to the east of Cole Place was redeveloped into a parking lot. Sometime prior to 1970, the parking lot was redeveloped into the current office building. Since 1970, there have been no changes in the configuration or usage of the adjacent properties to the east.

Historically, the adjacent properties to the west were occupied by Wilcox Avenue followed by a vacant parcel of land from prior to 1907 until around 1919. By 1919, the properties west of Wilcox Avenue were occupied by single-family houses. The adjacent properties remained occupied by single-family residences until sometime prior to 1938. By 1938, the adjacent properties to the west of Wilcox Avenue were redeveloped into retail spaces. By 1970, the adjacent properties to the west of Wilcox Avenue were redeveloped into the present-day commercial office building. Since 1970, there have been no significant changes to the adjacent properties to the west.

8.3 Environmental Liens and Deed Restrictions

In addition to reviewing a copy of a Preliminary Title Report, which revealed no indications of recorded Environmental Liens or AULs associated with the subject property, BA Environmental obtained a EDR Radius Map report which, reflected the results of a search of databases for Federal Superfund Liens, US Engineering Controls, Institutional Controls, and Deed Restrictions. According to the EDR report, **no** Federal Superfund Liens, US Engineering Controls, US Institutional Controls, or Deed Restrictions exist for the subject site (EDR, 2020a).

8.4 Interviews

BA Environmental interviewed any available individuals familiar with the subject property, to the best of knowledge, regarding current and past usages, presence of underground storage tanks (USTs), usage and storage of hazardous materials, and the possibilities of any spills or unauthorized releases of hazardous materials on the subject property. BA Environmental assumes that the interviewees used good faith in answering

questions and in obtaining information for the subject property. Mr. Brian Magallanes, Loss Prevention Manager for Staples (the current occupant) was interviewed regarding the subject property.

Mr. Brian Magallanes, Loss Prevention Manager for Staples, the site current occupant, was interviewed with regard to the subject site on December 27, 2019. According to Mr. Magallanes, he has been with the subject site for approximately five years. Mr. Magallanes indicated that he was unaware of the property's history prior to Staples occupying the subject site since around 2000. Mr. Magallanes indicated that no USTs are located on-site. According to Mr. Magallanes, to the best of his knowledge, there are no wastewater clarifiers or grease interceptors on-site. According to Mr. Magallanes, no hazardous materials are used or stored on-site, except for small quantities of maintenance supplies and janitorial supplies. Mr. Magallanes was unaware of any releases or spills of hazardous materials on the subject property. According to Mr. Magallanes, he was unaware of any past or present environmental investigations or reports for the subject property. Mr. Magallanes was interviewed with regard to asbestos and lead-based paint existing on the subject property. Mr. Magallanes stated that he was not aware of any asbestos or lead-based paint on-site. Mr. Magallanes was interviewed with regard to water leaks and mold. According to Mr. Magallanes he was unaware of any current mold growth within the building. Mr. Magallanes stated he was unaware of any past or present roof leaks or plumbing leaks. The quality of the answers obtained from Mr. Magallanes during the interview was judged to be good.

9.0 SITE RECONNAISSANCE AND IMPROVEMENTS

On August 13, 2020, BA Environmental performed a visual reconnaissance of the subject property located at 6450 Sunset Boulevard, in the City of Los Angeles, California. Mr. Richard O'Neil of BA Environmental was given access to the subject property through Randy Rumrill (Sr. Facilities Coordinator, Facilities Management of Staples). During the site reconnaissance, BA Environmental visually assessed the subject property, exterior of the subject building, sales floor area, backroom areas, parking lot, roof and all storage areas which may contain hazardous materials, all janitorial spaces, all mechanical areas, and all building maintenance shops.

9.1 Site Improvements

The subject property is occupied by a single-story commercial retail building, consisting of approximately 17,136 square feet, situated on an approximate 0.76-acre parcel of land. Other improvements include surface asphalt parking and landscaping. The subject building was reportedly constructed in 1993 on previously developed land.

9.2 Building Construction

The subject building is of concrete masonry unit (CMU) construction, built on a concrete slab on-grade. The CMU walls support glue-laminated beams and wood purlins covered with plywood sheeting. The roof is a built-up asphalt roofing system. Interior flooring consists of commercial grade carpeting, bare concrete and resilient floor tiles. Interior walls are primarily of painted drywall, with bare CMU in backroom areas. The ceiling of the sales floor area consists of open panelized wood with insulation and some areas finished with painted drywall. Exterior finishes are of painted CMU and aluminum framed window glazing.

9.3 HVAC Systems

The heating, ventilating and air conditioning (HVAC) system consists of rooftop mounted units. No environmental issues were observed with this equipment.

9.4 Elevators

No Elevators service the subject property.

9.5 Industrial Equipment/Manufacturing Processes

During the site reconnaissance, no industrial equipment was observed on the subject site. No manufacturing processes which utilize hazardous materials or petroleum products were observed during the site visit.

9.6 Hazardous Materials/Waste Storage

Only small quantities of normal household cleaners and consumer products were observed to be used and sold on the subject property. These cleaning agents were observed to be in good condition with no visible evidence of leakage from containers. No staining was observed on the surfaces beneath the containers.

9.7 Biohazards and Infectious Wastes

No biohazards or infectious wastes were observed on the subject site during the site reconnaissance.

9.8 Radiologic Hazards

No radiologic hazards were observed on the subject site during the site reconnaissance.

9.9 Underground Storage Tanks

No evidence for the presence of on-site underground storage tanks (USTs), such as fuel dispensers, fill ports, aboveground vents or piping, was observed during the site reconnaissance. According to the California State Water Resources Control Board and the City of Los Angeles Fire Department (LAFD), USTs are not currently present on the subject property.

Historically a gasoline service station occupied the subject property from 1938 until 1990. A total four 10,000-gallon fuel USTs and one 1,000-gallon waste oil tank were removed in 1990. In 1991, the LAFD issued a closure letter regarding the USTs, which required no further action needed.

9.10 Aboveground Storage Tanks

On the day of the site reconnaissance, no aboveground storage tanks (ASTs) were observed on the subject site.

9.11 Hydraulic Lifts and Equipment

One hydraulically operated truck dock plate was noted on the subject property. No noted leakage was observed from the hydraulic aboveground tank. No environmental concerns were observed with this equipment.

Historically, below ground hydraulic lifts were located on the subject property associated with automotive repair. These lifts were removed around 1993 and reported to have no elevated concentrations of TRPH.

9.12 Generators and Emergency Power Systems

No electrical generators or emergency power systems were observed on the subject site on the day of the site reconnaissance.

9.13 Wastewater Treatment Systems, Clarifiers and Interceptors

No wastewater treatment systems, wastewater clarifiers or interceptors were observed on the subject site on the day of the site reconnaissance.

Historically, a wastewater clarifier was associated with automotive repair shop. This clarifier was removed in 1990. Soil samples collected during abandonment revealed no elevated concentrations of hydrocarbons or VOCS.

9.14 Pits, Ponds and Lagoons

Pits, ponds and lagoons are often associated with the disposal of solid and liquid wastes, which may include hazardous materials. According to ASTM Standard E1527-13, pits, ponds and lagoons are “man-made or natural depressions in the ground surface that are likely to hold liquid or sludge containing hazardous substances or petroleum products.” No pits, ponds or lagoons were observed during the site reconnaissance, and information obtained from the assessment indicated that pits, ponds and lagoons do not currently exist, or have ever existed on the subject site or any of the adjacent properties.

9.15 Septic Tanks and Cesspools

Septic tanks and cesspools are often associated with the disposal of wastewater from structures that are not served by public sewer systems. Septic tanks and cesspools may be associated with hazardous materials, if such materials have been inappropriately disposed of in the past via sinks. Information obtained from the subject site reconnaissance indicated that septic tanks and cesspools do not currently exist on the subject site. Presently, the sanitary sewer discharge to the subject building is tied into the city-owned sanitary sewer system.

9.16 Distressed Vegetation and Staining

Areas of vegetation (trees and shrubbery) in planters were observed to be associated with the subject property. No distressed vegetation, dead vegetation or discolored vegetation was observed during the site reconnaissance.

No areas of significantly stained soil, or stained asphalt or concrete, were observed on-site during the site reconnaissance.

9.17 Spills, Corroded Surfaces and Odors

No visible evidence of spills or ponded liquids was observed during the site reconnaissance. No corroded or degraded metal or concrete surfaces were observed. No unusual odors were detected inside or outside of the subject building on the day of the site reconnaissance.

9.18 Wells, Cisterns, Sumps and Floor Drains

No evidence of the presence of cisterns, sumps, floor drains or well heads, was observed at the subject property.

9.19 Pipelines

No evidence for the presence of underground pipelines used to transport petroleum products such as crude oil, gasoline, or natural gas was observed on or adjacent to the subject property on the day of the site reconnaissance.

9.20 Mines, Oil and Gas Wells, Oil Production Facilities

During the site reconnaissance, no visible evidence of mine shafts, open pit mines or other mining activities were observed on the day of the site reconnaissance.

No oil or natural gas wells were observed on the subject site. No evidence of oil production facilities, sumps, tank batteries, piping or refineries were observed on the day of the site reconnaissance.

9.21 Polychlorinated Biphenyls (PCBs)

PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Federal regulations put into effect following the Toxic Substance Control Act (TSCA) require that electrical transformers be labeled to identify their PCB content. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “*Non-PCB*,” 2) 50 ppm-500 ppm – “*PCB-Contaminated*,” and, 3) Greater than 500 ppm – “*PCB-Containing*.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977. The manufacture and distribution of PCBs was banned in 1979. One pad mounted electrical transformer was observed on the subject site. The

transformer appeared to be in good condition with no visible evidence of leakage. No staining was observed on the concrete pad beneath the transformer or on the soil surrounding the pad. The transformer is owned and operated by the LADWP. LADWP is responsible for all environmental issues concerning this transformer.

Fluorescent lighting was observed throughout the subject building. Fluorescent ballasts containing PCBs have not been manufactured since the late 1970s and have a maximum life expectancy of 15 years. Although the light ballasts were not inspected up close, at a distance the light ballasts appeared to be of relatively recent manufacture. At a distance, the light ballasts appeared to be in good condition with no visible evidence of leakage. Based on the date of construction of the subject building (1994), there is a low potential for the light fixtures to contain PCBs. BA Environmental did not observe other equipment on-site likely to contain PCBs.

9.22 Other Environmental Concerns

BA Environmental did not observe any other environmental concerns on the day of the site reconnaissance.

9.23 Trash and Waste Containment

Trash dumpsters were observed on the subject property. This dumpster was observed to contain non-hazardous paper and plastic waste, and food waste. No staining was observed on the surface beneath the dumpsters. No environmental conditions were noted with trash disposal/containment.

9.24 Stormwater

Stormwater that collects on the roof is directed into roof drains, which drain to the parking lot and then either into the sanitary sewer system or to the city street. From there it drains into the city-owned storm drain system.

10.0 AGENCY CONTACTS

10.1 City of Los Angeles Fire Department (LAFD)

On August 10, 2020, BA Environmental searched the LAFD, hazardous materials storage database, for files regarding the subject property. BA Environmental placed a request for records regarding a gasoline service station located on the subject property. Information was limited; however, the property owner was able to provide the Tank Removal report and other pertinent documentation. A review of the UST closure report is provided in Section 6.6 above. The subject property received agency closure from the LAFD requiring no further investigation in 1991.

A copy of the Closure Letter is in Appendix H.

10.2 California State Regional Water Quality Control Board (RWQCB)

On August 10, 2020, BA Environmental searched the RWQCB's Geotracker database for UST Program, and Spills, Leaks, Investigations and Cleanups (SLIC) Program, files for the subject site. According to the RWQCB's Geotracker database, no files exist for the subject property.

10.3 California State Department of Toxic Substance Control (DTSC)

On August 10, 2020, BA Environmental searched the ENVIROSTOR database for any files regarding contamination beneath the subject site. According to the DTSC's ENVIROSTOR database, no files exist for the subject property.

10.4 South Coast Air Quality Management District (AQMD)

On August 10, 2020, BA Environmental searched the AQMD's Facility Information Detail (FIND) database for AQMD records regarding air emissions permits for the subject property. According to the AQMD's FIND database, no files exist for the subject property.

11.0 GOVERNMENT RECORDS REVIEW

Regulatory compliance is a primary element of an ESA. Failure to comply with governmental regulations can result in fines, and can expose businesses or individuals to liabilities from which the law would otherwise shield them. The presence of hazardous wastes or hazardous materials, on-site or at neighboring sites, may present certain liabilities. Environmental Data Resources, Inc. (EDR) searches over 900 federal, state and local databases nationwide to provide the most recent information regarding the hazardous materials sites within the site vicinity, and which are identified below (EDR, 2020a). EDR searches each database to the radius specified in ASTM E1527-13 and the EPA AAI Rules. Descriptions of each database searched are provided in the EDR Radius Report. A copy of the EDR Radius Report dated August 7, 2020 is provided in Appendix F. A summary of the sites listed within the governmental databases researched by EDR is provided in Table 1 below.

**Table 1
Environmental Databases Searched
and Their Search Radii**

| AGENCY DATABASE | SEARCH RADIUS | TARGET PROPERTY | NUMBER OF SITES IDENTIFIED | DATE OF GOVERNMENT VERSION |
|---|---------------|-----------------|----------------------------|----------------------------|
| United States Environmental Protection Agency (EPA) National Priority List (NPL) for Superfund Sites | 1.0 mile | --- | 0 | 4/27/20 |
| U.S. EPA Proposed NPL List (Proposed NPL) | Property | --- | 0 | 4/27/20 |
| US EPA NPL Liens (Federal Superfund Liens) | Property | --- | 0 | 10/15/91 |
| U.S. National Priority List Deletions (Delisted NPL) | 1.0 mile | --- | 0 | 4/27/20 |
| U.S. EPA Comprehensive Environmental Response, Compensation and Liability Index System (CERCLIS) List | 0.5 mile | --- | 0 | 4/03/91 |
| U.S. EPA CERCLIS – No Further Remedial Action Planned (CERCLIS-NFRAP) | 0.5 mile | --- | 0 | 4/27/20 |

| AGENCY DATABASE | SEARCH RADIUS | TARGET PROPERTY | NUMBER OF SITES IDENTIFIED | DATE OF GOVERNMENT VERSION |
|--|---------------|-----------------|----------------------------|----------------------------|
| U.S. EPA Resource Conservation and Recovery Act (RCRA) Corrective Action (CORRACTS) List | 1.0 mile | --- | 0 | 3/23/20 |
| U.S. EPA RCRA Permitted Treatment, Storage, and Disposal Facilities (TSDF) | 0.5 mile | --- | 0 | 3/23/20 |
| U.S. EPA RCRA Registered Large Generators of Hazardous Waste (RCRA LQG) | 0.25 mile | --- | 2 | 3/23/20 |
| U.S. EPA RCRA Registered Small Generators of Hazardous Waste (RCRA SQG) | 0.25 mile | --- | 18 | 3/23/20 |
| U.S. EPA RCRA Very Small Quantity Generators (RCRA-VSQG) | 0.25 mile | --- | 0 | 3/23/20 |
| U.S. EPA RCRA NonGen / NLR | | 1 | 0 | 3/23/20 |

|--|--------------------------------|-----------------|----------------------------|----------------------------|
| Other Local, State, and/or Federal Databases (see EDR report for complete listing of databases and search radii) | Variable according to database | 8 | 12 | |

11.1 Subject Property

The subject property under the address of 6450 Sunset Boulevard is listed on the HAZNET, HWTS, CERS HAZ WASTE, SWEEPS UST, HIST UST, CA FID UST, RCRA NonGen/NLR, FINDS and ECHO governmental environmental databases.

The HAZNET/HWTS listings are in regards to the former automotive repair conducted on the subject property in 1990. These listings are for the manifest and removal of waste oil from the subject property regarding historical automotive repair. Other historical database listings are in the regards to the former USTs which were located on the subject property (HIST UST, HAZNET/HWTS, SWEEPS UST, CA FID UST) which were associated with a Chevron service station. BA Environmental reviewed UST removal documentation associated with the gasoline service station. These reports included soil sampling, removal of the USTs and excavated soil from the property. Impacted soil identified during the abandonment of the USTs was removed from the subject property. Under the oversight of the LAFD, a closure letter was issued in 1991 (Appendix H). BA Environmental considers this to be a HREC and not a concern at this time; however, if redevelopment of the subject property should disturb subsurface soils, monitoring should be conducted to determine if any residual contaminants remain that would need specific disposal or handling. Automotive repair was also conducted on the subject property during the same period of the gasoline service station operation. Investigations in the areas of the former auto garage included soil sampling and removal of excavated soil. Based on the findings of the investigation in the automotive repair portion of the subject site, BA Environmental is of the opinion there is no environmental concern at this time; however, if redevelopment of the subject property should disturb subsurface soils, monitoring should be conducted to determine if any residual contaminants remain that would need specific disposal or handling.

Staples was listed on the RCRA NonGen / NLR, FINDS, ECHO, CERS HAZ WASTE, FINDS and ECHO governmental environmental databases searched. These listings are typical for a business which documents chemicals stored and sold as part of the business. No RCRA wastes are generated. Based on the types of listings, there is a low potential for environmental impact to the subject property and not a concern at this time.

11.2 Adjacent Properties

CNN America INC/Turner Broadcasting system and Sunset Tower LLC located at 6430 Sunset Boulevard is located adjacent following Cole Place to the east. This facility is listed on the CERS TANKS, HAZMAT and CERS governmental environmental databases. These listings are understood to be associated with diesel powered emergency generators and the diesel fuel located on this property. There have been no reported releases. Based on this information, there is a low potential for impact to the subject property from this off-site facility.

The former Hollywood Mercedes Benz located at 6465 Sunset Boulevard located north following Sunset Boulevard is listed on the RCRA-SQG, HIST UST, FINDS, ECHO and HAZNET governmental environmental databases. This facility has reported no RCRA violations and no releases were noted in the governmental records. Based on this information, there is a low potential for impact to the subject property from this off-site facility.

11.3 Site Vicinity

The closest listed facility is the LAPD Maintenance Garage, located at 1401 Wilcox Avenue, approximately 150 feet south-southwest of the subject site. This facility is listed on the CERS HAZ WASTE, SWEEPS UST, CERS TANKS, CA FID UST, HAZMAT, RCRA-SQG and CERS governmental environmental databases. No RCRA violation reported and no reported releases. With respect to groundwater flow, this facility is located in a down-gradient location relative to the subject property. Based on this information, there is a low potential for environmental impact to the subject property from this off-site facility.

BA Environmental reviewed the EDR database report for off-site facilities in the site vicinity which may have impacted the subject property. Sites of concern included those with known releases, facilities which use significant quantities of hazardous materials, sites with USTs, and facilities which are hydraulically up-gradient of the subject site.

A review of all of the sites listed within the subject site vicinity revealed that the closest non-adjacent facility is greater than 300 feet from the subject site. Based on the distances and statuses of these facilities, there is a low potential for environmental impact due to off-site sources.

12.0 DATA GAP DISCUSSION

The ASTM E1527-13 standard defines the term Data Failure as a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The term Data Gap is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance, interviews, and agency file reviews.

Based on all of the historical documents available and the reconnaissance of the subject site, it appears that no significant data gaps exist. Although minor historical data gaps exist, it is BA Environmental's opinion that these data gaps are not significant, and that during these data gaps the subject property's use did not significantly change. BA Environmental did not identify any significant data gaps in connection with the subject property.

13.0 NATIONAL PIPELINE MAPPING SYSTEM

On August 10, 2020, BA Environmental reviewed the National Pipeline Mapping System (NPMS) regarding pipelines, liquefied natural gas (LNG) plant and breakout tank data, and gas transmission and hazardous liquid pipeline accidents and incidents. The NPMS pipeline data consists of gas transmission pipelines and hazardous liquid pipelines

jurisdictional to United States Department of Transportation's Pipelines and Hazardous Materials Safety Administration (PHMSA). It does not contain gas gathering or distribution pipelines, such as lines which deliver gas to a customer's home. According to the NPMS, no pipelines or pipeline incidents are present on or adjacent to the subject property.

14.0 VAPOR ENCROACHMENT SCREEN

Vapor encroachment can occur when vapor migrates into on-site subsurface soils from on-site or off-site soils and/or groundwater contaminated with petroleum hydrocarbons or other volatile organic compounds.

Current or past uses such as gas stations (using petroleum hydrocarbons), dry cleaning establishments (using chlorinated volatile organic compounds), former manufactured gas plant sites (using volatile and semi-volatile organic compounds), and former industrial sites such as those that had vapor degreasing or other parts-cleaning operations (using chlorinated volatile organic compounds) are of particular concern. Vapors are capable of migrating great distances omnidirectionally along subsurface conduits such as utility lines, pipelines, sewer and storm water lines, and building foundations. The migration of these vapors into a building or structure can pose a health risk. To assess for the potential of vapor encroachment, ASTM created the Standard Guide for Vapor Encroachment Screening on Property Involved Real Estate Transactions, ASTM 2600-10. This Standard Guide supersedes ASTM 2600-08. The purpose of this guide is to provide practical guidance and a useful process for conducting a vapor encroachment screen (VES) on a property parcel involved in a real estate transaction in the United States of America with respect to chemicals of concern (COC) that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property. The VES is conducted in a two-tier process, which is as follows:

Tier 1 – Initial Screening (non-invasive)

Tier 2 – Site Specific Numeric Screening (non-invasive and invasive)

BA Environmental performed a Tier 1 VES on the subject property in general accordance with ASTM 2600-10. The Tier 1 VES has revealed no potential vapor encroachment conditions (VECs) which may impact the subject site.

15.0 ADDITIONAL NON-ASTM SCOPE ASSESSMENT

15.1 Visual Asbestos Survey

On July 12, 1989, the EPA issued a final rule banning most asbestos-containing products. In 1991, this regulation was overturned by the Fifth Circuit Court of Appeals in New Orleans. As a result of the Court's decision, the following specific asbestos-containing products remain banned: flooring felt, rollboard, and corrugated, commercial, or specialty paper. In addition, the regulation continues to ban the use of asbestos in products that have not historically contained asbestos, otherwise referred to as "new uses" of asbestos. Although the use of asbestos in the manufacture of most building materials was for the most part discontinued by 1979, some non-friable ACMs, such as roofing material and floor coverings (floor tile and mastic), were manufactured and used into the mid-1980s. Other non-friable ACMs such as mastics and coatings in which the asbestos is bound by organic binders can still be found in materials today.

- Friable materials are materials which can be crumbled, pulverized, or reduced to powder by hand pressure when dry.
- Non-friable materials are materials in which the fibers have been locked in by a bonding agent, coating, or binder, and may not release fibers during normal use and handling. Improper handling, such as grinding or sanding of non-friable ACMs, will render these materials friable.

BA Environmental performed a visual survey of suspect friable and non-friable asbestos-containing materials (ACMs). Suspect materials observed during the site reconnaissance include 12" by 12" resilient floor tiles and associated mastic, vinyl base molding and adhesive, drywall, joint compound, carpet mastic, mirror mastic, caulking, sealant, and roofing materials. All building materials were observed to be in good condition, with a low potential for damage. Based on the date of construction of the subject building (constructed in 1994), there is a low potential for ACMs to exist within building materials.

15.2 Visual Mold Survey

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by limited ventilation and high humidity are the most common locations of mold growth. Mold growths often appear as discoloration, staining, or fuzzy growth on building materials or furnishings and are varied colors of white, gray, brown, black, yellow, and green; however mold may not visually manifest itself.

Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work. Mold can cause allergic reactions, respiratory conditions and in some rare cases death in individuals which are sensitive to them, have respiratory conditions, or to the young or elderly.

BA Environmental performed a visual mold survey in accessible areas at the subject property. This visual assessment should not be construed as a mold survey or inspection. This assessment was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the Client and User an indication if significant (based on observed areas) mold growth is present at the subject property. BA Environmental did not assess areas not readily accessible, nor did we conduct a destructive or invasive survey. It is possible that significant fungal spore growth inside walls, insulation, attic spaces, or other areas can exist and not be visible on the finished surfaces of a building's interior spaces. BA Environmental did not 1) perform a mold/fungi inspection, 2) perform any building material surface mold sampling, or 3) perform air sampling for mold spores at the subject property as part of this Phase I.

No areas of visible mold or moist areas conducive to mold growth were observed within the interior of the building during the site visit. No mold odors, evidence of roof leaks

(such as wet walls or carpets), plumbing leaks or areas that have remained moist for extended periods of time were observed within the building during the site visit.

15.3 Visual Lead-Based Paint Survey

Lead was a major ingredient in paint pigment prior to and through the 1940s. While other pigments were used in the 1950s, the use of lead in paint continued until the mid-1970s. In 1978, the Consumer Products Safety Commission banned paint and other surface coating materials that are lead-containing.

BA Environmental performed a visual lead-based paint survey in accessible areas at the subject property. All of the paint observed on-site appeared to be in good condition with no visible evidence of damage or peeling. Based on the age of the current subject building, constructed in 1994, there is a low potential that lead-based paint exists on the subject site.

15.4 Radon Gas Survey

Radon is a radioactive gas that occurs naturally in the environment and cannot be seen, smelled or tasted. The human health effect associated with exposure to elevated levels of radon is an increased risk of developing lung cancer. The US Environmental Protection Agency (EPA) and the US Center for Disease Control are concerned about the increased risk of lung cancer developing in individuals exposed to above average levels of radon in their homes or offices. In order to address these concerns, the US EPA conducted a radon survey and presented the results for various counties in 1993.

The EPA's map of Radon Zones assigns each of the 3,141 counties in the United States to one of three zones. The zone designations were determined by assessing five factors that are known to be important indicators of radon potential: indoor radon measurements, geology, aerial radioactivity surveys, soil parameters and foundation types. The subject site falls within the designation of Zone 2. Zone 2 counties have a predicted average indoor radon screening level of greater than or equal to two pico curies per liter (pCi/l) of air and less than or equal to four pCi/l of air. According to the EPA, of the 63 sites tested within the subject site's zip code, 100% of the 1st floor living areas tested were reported to have radon levels below 4pCi/l of air. The average radon concentration was reported to be 0.711 pCi/l of air. According to the California Radon database, 13 sites were tested in the subject site's zip code. No sites were reported to have radon levels above 4 pCi/l of air. It is BA Environmental's opinion, based upon these results, that there is a low potential that radon is a concern for the subject property.

15.5 Methane Zones

Methane zones in the city of Los Angeles were recently established and defined in Los Angeles Ordinance No. 175790 amended Section 91.106.4.1 and Division 71 of Article 1, Chapter IX of the Los Angeles Municipal Code to address the potential for methane intrusion into buildings emanating from geologic formations, to establish citywide methane mitigation requirements, and include more current construction standards to control methane intrusion into buildings. The Los Angeles Department of Public Works recently produced a map of Methane and Methane Buffer Zones for the City of Los Angeles (City of Los Angeles, 2004). According to this map, the subject property is **not** located within a Methane Zone.

15.6 Wetlands and Flood Plains

During the site reconnaissance and drive-by survey of the surrounding area, BA Environmental observed no indications of wetlands. According to the Environmental Data Resources, Inc. (EDR) report, no wetlands as per the National Wetlands Inventory (1994) are located within 0.25 miles of the subject site. BA Environmental reviewed the US Fish and Wildlife (USFW) National Wetlands Inventory Wetlands Mapper website. According to the USFW, the subject site is not located within a Wetlands or Riparian environment (USFW, 2020).

According to information provided in the EDR report, the subject site is not located within a 100- or 500-year flood zone per the Federal Emergency Management Agency (FEMA). According to FEMA's National Flood Insurance Program (NFIP) Panel #1605F, the subject site is located within an Other Flood Area Zone X. This is defined as areas being outside of 0.2% annual chance floodplain (FEMA, 2020).

16.0 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

BA Environmental has performed a Phase I ESA, in conformance with the scope and limitations of ASTM Practice E1527-13, regarding the commercial office building located at 6450 Sunset Boulevard, in the City of Los Angeles, California. Any exceptions to, or deletions from, this practice are described in the Objective and Scope of Work section of this report.

This assessment has revealed **no** Recognized Environmental Conditions (RECs) in connection with the subject property.

This assessment has revealed **no** Controlled Recognized Environmental Conditions (CRECs) in connection with the subject property.

This assessment has revealed the following Historical Recognized Environmental Condition (HREC) in connection with the subject property:

- Historically, the subject property was occupied by a gasoline service station and automotive repair from around 1938 until around 1991. Reportedly, all of the USTs, a wastewater clarifier and automotive lifts have been removed and assessed for releases. Impacted soils were excavated in the area of the former fuel dispensers and removed from the subject property. The USTs received closure in 1991 under the guidance of the LAFD. There were no identified releases related to the clarifier and lifts at the time of removal. Based on review of the closure reports for the USTs and the assessment reports for the auto garage area, BA Environmental considers this to be a HREC and not a concern at this time.

Based on the findings of this Phase I ESA, BA Environmental recommends no further investigations at this time. However, if redevelopment of the subject property should disturb subsurface soils, monitoring should be conducted to determine if any residual contaminants remain that would need specific disposal or handling.

17.0 LIMITATIONS

17.1 General Limitations

This report contains all of the limitations inherent in the methodologies that are referred to in ASTM E1527-13. BA Environmental has made every reasonable effort to discover and interpret the information and current conditions regarding the site within the time available. This assessment has been completed under the time and cost restraints implemented by the Client and User. There is a possibility that, even with the proper application of the methodologies outlined in ASTM E1527-13, there may exist on the subject property conditions that could not be identified within the scope of the assessment or which are not reasonably identifiable from reasonably ascertainable information. This assessment is a visual, non-intrusive investigation, and conditions may exist at the site that cannot be identified solely by visual observation. No sampling, destructive or subsurface, of any type has been conducted on-site, unless expressly stated in the Objective and Scope of Work section above. This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of AAI Rule (as defined in the Code of Federal Regulations 40 CFR Part 312). Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property. All conclusions and recommendations are based on the visual observations made on the day of the site reconnaissance. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. BA Environmental is not responsible for identifying any environmental issues or site conditions which may have occurred after the site reconnaissance.

This assessment relied upon information obtained from the site reconnaissance and from relevant regulatory agencies. BA Environmental believes that the information contained herein is reliable. This assessment has relied upon information obtained from the record review, previous reports and interviews of individual concerning the subject property, and assumes it to be correct and accurate. However, BA Environmental cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. This assessment has been completed in general accordance with ASTM E1527-13 and accepted practices of the environmental industry.

This report is not intended to address, assess, or otherwise determine whether soil or groundwater contamination, waste emplacement, existing or threatened mold/fungus growth, asbestos-containing building materials, and/or lead-based paint actually exists at the subject property. Such determination would require comprehensive subsurface exploration and/or other sampling activities, which were beyond the scope of service for this assessment. BA Environmental considers vapor intrusion beyond the scope of this Phase I ESA, and therefore a vapor intrusion study was not conducted. Additionally, this report does not serve as a comprehensive wetlands, mining, oil, pipeline, and/or gas well survey.

This report summarizes an environmental investigation conducted for the subject property. Although conditions at neighboring properties may impact the subject property and, to the extent they were identified, were included in the subject property evaluation, this report does not serve as an assessment of sites other than the subject property.

This Assessment was prepared for a limited use involving a single transaction, as set forth herein, and may not be used for any other purpose without the written consent of BA Environmental. No re-publication, copying, or distribution of any part of this report is authorized without the written consent of BA Environmental. Field data, field notes, and other data and documents assembled by BA Environmental to produce this

assessment, represent the work product of BA Environmental's training, experience and professional skill. This information belongs to, and remains the property of BA Environmental/Building Analytics.

17.2 ASTM Limitations

The innocent landowner, contiguous owner, and bonafide prospective purchaser defenses to liability under CERCLA require that a person acquiring property conduct an all appropriate inquiry with respect to the site. BA Environmental has conducted this environmental assessment in accordance with the standards for conducting an all appropriate inquiry set forth at 40 CFR Part 312. Those standards require the application of scientific principles and professional judgment to certain facts with resultant subjective interpretations and exercise of discretion. Professional judgments expressed herein are based on the facts currently available within the limits of the existing data, and data gaps identified herein, scope of work, budget, and schedule. Those standards also require that the User undertake certain additional inquiries. In addition, the liability defenses under CERCLA require, among several other things, that the User after the acquisition stop any continuing releases, prevent any future threatened releases and prevent or limit human, environmental or natural resource exposure to any hazardous substance released at the site. Therefore, BA Environmental makes no warranties, expressed or implied, including, without limitation, warranties as to merchantability or fitness for a particular purpose, including any warranty that this Phase I ESA will in fact qualify User for the innocent landowner, contiguous property owner or prospective purchaser defense to liability under CERCLA. BA Environmental's assessment is limited strictly to identifying recognized environmental conditions associated with the site. Results of this assessment are based upon the visual site inspection of readily accessible areas of the site conducted by BA Environmental personnel, information from interviews with knowledgeable persons regarding the site, information reviewed regarding historical uses, information provided by contacted regulatory agencies, and review of publicly available and practically reviewable information identifying current and historical uses of the property and surrounding properties. All conclusions and recommendations regarding the site represent the professional opinions of the BA Environmental personnel involved with the project, and the results of this report should not be considered a legal interpretation of existing environmental regulations. BA Environmental assumes no responsibility or liability for errors in the public data utilized, statements from sources outside of BA Environmental, or developments resulting from situations outside the scope of this project. BA Environmental make no warranties, expressed or implied, including, without limitation, warranties as to merchantability or fitness for a particular purpose.

18.0 GLOSSARY OF ACRONYMS

AAI = All Appropriate Inquiry

ACGIH = American Congress of Government Industrial Hygienists

ACMs = asbestos-containing materials

AHERA = Asbestos Hazard Emergency Response Act

AQMD = Air Quality Management District

ASTs = aboveground storage tanks

ASTM - American Society for Testing and Materials

AUL = activity and use limitations

bgs = below ground surface

BTEX = benzene, toluene, ethylbenzene and xylenes

CDPH = California Department of Public Health (formerly DHS)

CERCLA = Comprehensive Environmental Response, Compensation, and Liability Act

CFR = Code of Federal Regulations

COC = chemical of concern

DHS = Department of Health Services

DOGGR = California Department of Oil, Gas and Geothermal Resources

DOT = Department of Transportation

DTSC = Department of Toxic Substance Control

EA = Environmental Assessment

EDR = Environmental Data Resources, Inc.

EPA = United States Environmental Protection Agency

ESA = Environmental Site Assessment

FEMA = Federal Emergency Management Agency

HREC = Historical Recognized Environmental Condition

HVAC = heating ventilating and conditioning

HWS = Hazardous Waste Site

IAQ = indoor air quality

Kw = kilowatts

LACDPW = Los Angeles County Department of Public Works

LAFD = Los Angeles City Fire Department

LBP = lead-based paint

LEL = lower explosive limit

LLPs = land owner liability protections

LQG = large quantity generator of hazardous waste

LUSTs = leaking underground storage tanks
MCL = maximum concentration limit
MSDS = Material Safety Data Sheet
MTBE = methyl-tertiary-butyl ether
 $\mu\text{g/l}$ = micrograms per liter
 $\mu\text{g/kg}$ = micrograms per kilogram
 mg/kg = milligrams per kilogram
 mg/l = milligrams per liter
msl = mean sea level
NOV = Notice of Violation
NPL = National Priority List
NRC = Nuclear Regulatory Commission
OCHCA = Orange County Health Care Agency
O&M = Operations and Maintenance
OSHA = Occupational Safety and Health Administration
PCBs = polychlorinated biphenyls
PCE = perchloroethene or tetrachloroethylene
ppb = parts per billion
ppm = parts per million
PVC = polyvinyl chloride
RCDEH = Riverside County Department of Environmental Health
RCRA = Resource Conservation and Recovery Act
REC = Recognized Environmental Condition
RWQCB = Regional Water Quality Control Board
SBCFD = San Bernardino County Fire Department
SLIC = Spills Leaks, Investigations and Cleanups
SPCC – Spill Prevention, Control and Countermeasure
SQG = small quantity generator of hazardous waste
SVOC = semi-volatile organic compounds
SWPPP = Stormwater Pollution Prevention Plan
TCA = trichloroethane
TCE = trichloroethene
TPH-cc = total petroleum hydrocarbons, carbon chain range
TPH-d = total petroleum hydrocarbons as diesel
TPH-g = total petroleum hydrocarbons as gasoline
TRPH = total recoverable petroleum hydrocarbons

TSCA = Toxic Substance Control Act
UPS = uninterrupted power source
USFW = United States Fish and Wildlife
USGS = United States Geological Survey
USTs = underground storage tanks
VES = Vapor Encroachment Screen
VCP = Voluntary Cleanup Program
VOCs = volatile organic compounds
WIP = Well Investigations Program

QUALITY IN EVERY DROP

Director Message, Razmik Manoukian

For over a century, LADWP has been the steward of our City's water system and supply. It is a responsibility we take very seriously. Every day, we import raw water, purify it and deliver it to your tap 24-hours a day – all for less than half a penny per gallon. It is our

duty to maintain the value of this precious resource, and to comply with increasing state and federal water quality mandates to protect every drop of water we deliver. In 2018, LADWP tested for over 200 constituents in the water and performed more than 120,000 tests on samples taken throughout the City - not just for regulatory compliance, but also for research and operational improvements.

We are proud of our success in water quality, especially with our continued progress on several large water quality initiatives. Over the last 20 years, LADWP has actively improved the water quality for our customers by removing large uncovered reservoirs such as Encino, Lower Stone, Silverlake and Hollywood out of service; covering distribution reservoirs such as Santa Ynez,

Elysian and Upper Stone; building the new Headworks Reservoir, installing a state-of-the-art Dr. Pankaj Parekh Ultraviolet Disinfection Facility and deployed 96 million shade balls on the Los Angeles Reservoir. The latest water quality Improvement project is the Los Angeles Reservoir Ultraviolet Disinfection Plant project which is currently under construction. These projects were a massive undertaking which resulted in excellence in water quality.

This report summarizes the results of the water quality tests conducted in 2018 and provides specific information about the quality of water served in our neighborhoods. You will see that most constituents have not been detected in our water sources and those that are (see tables I-IV on pages 11-15), are safely within the regulatory limits for drinking water. We are proud to bring pure, clean, refreshing tap water to all our customers across the city – at home, at work and in our neighborhood parks every day.

At LADWP, we are committed to customer service. If you have any questions about your water quality or seek advice on how to improve water quality at your home or workplace, please do not hesitate to call our Water Quality Customer Care Line at (213) 367-3182.

MANAGING OUR WATER RESOURCES

A Message from Richard F. Harasick, LADWP Senior Assistant General Manager, Water System

Compared to previous years, the last two have been good for Los Angeles in terms of water resources. The Eastern Sierra snowpack, the main water source for the Los Angeles Aqueduct, is in very good shape for a change. The above average snowfall and the rains have made for a spectacular spring, and will help sustain our water needs well into the rest of the year.

We have gone from one extreme to the next; from parched dry conditions to more water than we can handle just like in 2017. It is important to remember that one good rainy season does not necessarily mean we will always enjoy an overabundance of water in the future.

That is why LADWP continues to focus on L.A.'s water future, employing long-term resource planning and management no matter the situation. Our goal in 2019 will be to get the water windfall to the right storage or treatment facility, thus ensuring a sustainable and resilient water supply for the years to come.

With our abundant rainfall, stormwater capture in L.A. County, which includes the LADWP service territory, stood at 113 percent of normal for the water year October 1, 2018 to May 1, 2019. That's approximately 23.5 billion gallons of water, enough to supply over 24,000 L.A. households annually. Through our stormwater capture infrastructure, rain barrels and cisterns, Los Angeles has been carefully harnessing this precious resource to recharge our local aquifers and help reduce our reliance on imported purchased water.

LADWP is also rising to meet the challenges of future water supplies with the ultimate sustainability endeavor. The city of Los Angeles' recent announcement to recycle 100 percent of all wastewater by 2035 will require major infrastructure investment to move advanced treated

pure water from the Hyperion Water Treatment Plant to additionally replenish our groundwater aquifers. This large capital improvement project represents another Mulholland moment, a game-changer at par with building another aqueduct. Its completion will be a leap for Los Angeles towards water independence.

To kick start that effort a wastewater ozone demonstration project at the Donald C. Tillman Plant in the San Fernando Valley is in progress to begin advanced wastewater treatment operations. This is the initial phase of an effort to replenish L.A.'s groundwater in the San Fernando Valley. This pure water will be conveyed to the Hansen Spreading Grounds where it will percolate through the soil. Once ready it will be pumped through existing groundwater wells, treated again and placed back into the distribution system.

There is no better and smarter way to manage our water resources than through water conservation. L.A. residents have truly made this a way of life and our city's per capita water use as of fiscal year 2017-18 is 112 gallons. Ours is one of the lowest of any major U.S. city and lower than it was in 1970, despite a population increase of more than one million people. LADWP has been working closely with our elected officials, other city departments, and customers to reduce water use across all sectors. The city's goal is to reduce water use by 25 percent by 2025, and 30 percent by 2035. We continue to encourage conservation through rebates and incentives for water-saving measures and devices. Furthermore, we are finding ways to conserve within our own system and operations. As an example, LADWP's Water Loss Task Force has been deploying strategies to reduce water losses in our distribution system.

Our professional forefathers undertook the complex and monumental task of constructing the Los Angeles Aqueduct to bring reliable, fresh, quality water to Los Angeles. LADWP staff today are just as committed to fulfill that goal, innovating and adopting modern solutions to operational and resource challenges. We remain steadfast in our resolve to ensure the reliability and sustainability of water for our customers and the entire city of Los Angeles.

WHERE DOES L.A. GET THE WATER IT NEEDS?

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals that are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.
- Radioactive contaminants that can be naturally-occurring or the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency (U.S. EPA) and the State Water Resources Control Board (SWRCB) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. SWRCB regulations also establish limits for contaminants in bottled water that provide the same protection for public health.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. 2019. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the U.S. EPA's Safe Drinking Water Hotline (800) 426-4791.

IMPORTANT NOTICE

Precautions for the Special Needs Population

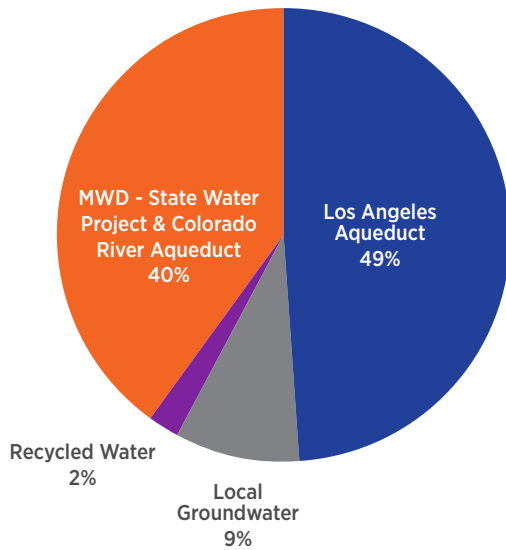

There are certain health conditions for which additional precautions on environmental exposures, including drinking water, would be advisable. Elderly customers and infants can be particularly at risk from infection as well as those with weakened immune systems including individuals living with HIV/AIDS or other immune system disorders, those who may have undergone chemotherapy or those who have received organ transplants.

Customers concerned with these types of health challenges should seek advice from their health care providers about drinking tap water. Contact U.S. EPA's Safe Drinking Water Hotline at (800) 426-4791, or visit www.epa.gov for free guidelines on how to reduce the risk of infection by *Cryptosporidium* and other microbial contaminants.

L.A.'S WATER SOURCES IN 2018

2018 Water Sources

REGULATORY COMPLIANCE

Regulatory Compliance How do we measure up?

LADWP works around the clock to ensure that the drinking water we deliver to our customers is of the highest quality and meets all safety requirements. Highly trained, certified treatment operators monitor our water treatment operations continuously, thereby helping meet federal and state standards for drinking water. In 2018, we tested for more than 200 constituents in the water and performed more than 120,000 tests on samples taken throughout our water system.

Notice of Violations of Drinking Water Regulations

Water quality is LADWP's highest priority. Staff works to ensure treatment protocols are followed year round at each of the city's water treatment facilities. Unfortunately, LADWP was issued one citation in 2018 for violating the surface water treatment rule. This violation was reported in the 2017 annual drinking water report. LADWP addressed the citation and put measures in place to prevent this type of occurrence in the future. LADWP received no additional violations in 2018.

Notification Levels Established for Two Fluorinated Compounds

On July 13, 2018, the California State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW) issued health-based drinking water Notification Levels (NLs) for Perfluorooctanoic acid (PFOA) and Perfluorooctane sulfonic acid (PFOS). PFOA and PFOS are compounds that have been used in consumer products to make materials stain-resistant, water-proof, and non-stick. They are also used on surface coatings for paper, cardboard packaging, carpets, furniture, leather, fire-retardant foams, cookware, and equipment lubricants.

The NL issued is a health-based advisory level, not a regulatory level, established by SWRCB-DDW for chemicals that may present health risks but have yet to go through a Health Hazard Assessment. A Health Hazard Assessment is part of the process required to formally adopt a Maximum Contaminant Level (MCL) and includes rigorous research and data analysis by the State Office of Environmental Health.

The NLs for PFOA and PFOS have been set at 14 parts per trillion (ppt) and 13 ppt, respectively. A ppt is equivalent to one ounce in 7.5 billion gallons of water. An NL requires a public water supplier to notify SWRCB-DDW and its governing bodies if drinking water tests exceed the level and recommends customer notification.

Health consequences for exposure to significant levels of PFOA and PFOS may include liver toxicity, cancer risks, and immunotoxicity. Human exposure to PFOA and PFOS are primarily through consumer products, food, indoor and outdoor air, and dust. There is potential for exposure via ingestion of drinking water, particularly in former PFC manufacturing areas. Major U.S. manufacturers voluntarily phased out production of PFOS between 2000 and 2002, and subsequently for PFOA in 2006 due to toxicological concerns.

LADWP tested for PFOA, PFOS, and other PFC's in its source water and distribution system in 2013-2014, well after phased out production of these compounds as part of U.S. EPA's Unregulated Contaminant Monitoring Rule 3 (UCMR3).

During UCMR3 over 38 samples were collected from 11 different monitoring locations. Results for all samples were below laboratory detection levels utilizing advanced U.S. EPA certified test methods for these compounds and well below the NLs for PFOA and PFOS. LADWP continues monitoring for PFOA, PFOS, and other PFC's, including testing of local groundwater sources.

LADWP has a comprehensive water quality monitoring program to help ensure the safety of our water supply. Our water meets or exceeds all State and Federal drinking water standards established by the SWRCB-DDW and the U.S. EPA.

SWRCB-DDW has results of statewide testing for PFOA and PFOS on its website: https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/PFOA_PFOS.html

LEAD AND DRINKING WATER IN L.A.

Lead is commonly found throughout our environment – in the air, soil, and in homes with old lead-based paints. Fortunately, lead is not found in any of the city’s water sources. LADWP has participated in the federal Lead and Copper Rule (LCR) sampling program since 1991 and has taken steps to eliminate lead containing materials in our distribution system. Los Angeles has and continues to be in compliance with the lead and copper regulation, based on residential sampling. In addition, LADWP is improving its corrosion control plan to further minimize lead exposure at the tap.

LADWP most recently conducted LCR residential sampling in 2018. To find the LCR results, see Table I (cont’d) on page 12.

The LCR sampling program focuses on single family residences which were built from 1982 to 1987 that have copper pipes plumbed with lead solder. Customers with qualifying homes that participate in the sampling program will get their tap water tested for lead and copper at no cost. Customers who think their home may qualify can participate in LADWP’s next round of LCR sampling are asked to contact us at (213) 367-3182.

In Los Angeles, the main source of lead in drinking water is household plumbing, primarily in homes built before 1986 where lead solder was used to join copper pipes. In 1986, federal law restricted the use of lead in lead-based solder to 0.2% and in pipes and pipe fittings used to serve drinking water to 8%. This helped reduce the amount of lead at the tap inside homes. In 2010, California law further restricted the amount of lead in pipes and pipe fittings to 0.25%, which again reduced the amount of lead at the tap inside homes. The amount of time water remains stagnant in home plumbing will affect how much lead could potentially leach into the tap water. The longer water remains motionless in the pipes, the more likely higher levels of lead will leach into drinking water. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is also available from the Safe Drinking Water Hotline or at www.epa.gov/lead.

Voluntary Lead Testing of Drinking Water at California Public and Private K-12 Schools

In January 2017, the SWRCB-DDW amended LADWP’s domestic water supply permit to include a new voluntary program to test for lead in drinking water at California public and private K-12 schools within its service area. Schools interested in participating in this program can find out more information on www.ladwp.com/waterquality under Water Quality in The News, Lead Testing for

Los Angeles Schools. Written requests will be accepted until November 1, 2019.

As of December 2018, LADWP has received and processed 24 requests from schools. No school had lead levels above the action level of 15 parts per billion. The breakdown of the samples results are as follows:

Total Samples Tested: 57

Non-Detect Results: 48

Above Action level: 0

Maximum Result: 3.5 µg/L

Average Result: 0.22 µg/L

If you have any questions regarding this program, please contact us at (213) 367-3182.

AB 746 Requires Lead Testing in California Public K-12 Schools

Effective January 1, 2018, California Assembly Bill 746 requires community water systems to test for lead in drinking water at California public K-12 schools within their service area by July 1, 2019. This law compliments the existing optional lead testing in schools program that began early last year. Under the new lead testing program, all public K-12 schools must participate in lead testing unless they can show that their school was constructed or their plumbing was replaced after December 31, 2009, and that they have conducted equivalent lead testing after January 1, 2009 and posted the results on their website.

Since the effective date, LADWP has established a schedule for four rounds of testing to complete sampling for 103 schools within our service area. LADWP has contacted and sent out testing kits to public K-12 schools within its service area. In 2018, three schools were tested. The results are included below. No school had lead levels above the action level of 15 parts per billion. All remaining schools should be tested by July 2019. If you have any questions regarding this new program, please contact us at (213) 367-3182.

Total Samples Tested: 11

Non-Detect Results: 5

Above Action level: 0

Maximum Result: 3.6 µg/L

Average Result: 1.24 µg/L

Assessment Programs for Surface and Groundwater Sources

Purchased Supplies:

The Metropolitan Water District (MWD) receives and treats water from the State Water Project and the Colorado River that is then delivered to Los Angeles customers. Three of the five MWD treatment plants: F.E. Weymouth, Robert B. Diemer and Joseph Jensen, supply water to the Los Angeles area. MWD tests its water for nearly 400 constituents and performs about 250,000 water quality tests per year on samples gathered from its vast distribution system. Analysis of these samples is undertaken at MWD's state-of-the-art water quality laboratory. Results from MWD are provided to LADWP and are included in the report on Tables I, II and III.

Safeguarding Our Surface Water

Administered by the State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW), the Surface Water Treatment Rule (SWTR) is a set of drinking water regulations that establish specific treatment requirements for surface water to reduce the risk of waterborne diseases.

The last update to the SWTR is the Long Term 2 Enhanced

Surface Water Treatment Rule (LT2). This rule protects treated water reservoirs from microbiological contamination by requiring one of three actions: 1) covering, 2) removing from service, or 3) providing additional treatment. In March of 2009, LADWP executed a Compliance Agreement for LT2 with SWRCB-DDW for six uncovered reservoirs: Los Angeles, Upper Stone Canyon, Santa Ynez, Ivanhoe, Silver Lake, and Elysian. Based on the agreement LADWP has met the requirements for five of the six reservoirs. The Los Angeles Reservoir is the only remaining reservoir awaiting regulatory compliance.

The Los Angeles Reservoir will be brought into compliance with the LT2 through a combination of shade balls and construction of a new ultraviolet (UV) disinfection plant. The "shading" of the reservoir was completed in 2015 with nearly 96 million shade balls deployed. The new UV treatment facility will disinfect water leaving the Los Angeles Reservoir to satisfy the LT2 water quality regulation. Construction began in June 2017 and will be completed by the December 2020 compliance date set by the SWRCB-DDW.

Go to www.ladwp.com/waterquality to learn more about water quality projects and issues.

2018 DRINKING WATER QUALITY MONITORING RESULTS

Tables I, II, and III list the results of water tests performed by the LADWP and MWD from January to December 2018. LADWP tests for over 200 substances. These tables include only substances with values that are detected.

How to Read the Tables

The substances found in the water served in your area are listed as follows:

- For San Fernando Valley Area – water test results are under the Los Angeles Aqueduct Filtration Plant, the Northern Combined Wells and the MWD Jensen Plant columns.
- For Central Los Angeles Area – water test results are under the Los Angeles Aqueduct Filtration Plant and the Southern Combined Wells columns.
- For Western Los Angeles Area – water test results are under the Los Angeles Aqueduct Filtration Plant columns.
- For Harbor/Eastern Los Angeles Area – water test results are under MWD, Weymouth, Diemer, and Jensen Plants columns.

Some substances are reported on a citywide basis as required by the SWRCB-DDW.

Abbreviations and Footnotes

ACU = apparent color unit

CFU/mL = colony-forming unit per milliliter

< = less than the detection limit for reporting purposes

µg/L = micrograms per liter (equivalent to ppb)

µS/cm = microSiemens per centimeter

mg/L = milligrams per liter (equivalent to ppm)

NTU = nephelometric turbidity units

NA = not applicable

NR = not reported

NT = not tested

NUM/100 mL = number per 100 milliliter

% = percentage

pCi/L = picoCuries per liter

TON = threshold odor number

Unregulated Contaminants Monitoring Rule

The Unregulated Contaminant Monitoring Rule (UCMR) is a special program developed by the U.S. EPA that requires public water systems to survey up to 30 selected contaminants of emerging concerns (CECs) once every five years. Results indicate that most of the contaminants were not detected at the very low minimum reporting levels required by the U.S. EPA for UCMR3 analyses. Of the contaminants that were detected (see Table IV on page 15) chlorate and strontium were in insignificant but expected concentrations.

LADWP routinely tests for and detects chlorate in the distribution system. Chlorate is a disinfection byproduct of chlorination. Although it is unregulated, the SWRCB-DDW has set a notification level of 800 mg/l. UCMR3 test results for chlorate were much lower, ranging from not detected to 296 mg/l.

TERMS USED IN THE TABLES

Compliance: A drinking water standard based on the health risk (primary standards) and aesthetic (secondary standards) exposure of a contaminant to consumers. For example, bacteria and nitrate have strict limits that must be met at all times due to the acute effects they can cause. Other standards, like small amounts of disinfection by-products and man-made chemicals, have standards that are based on a lifetime of exposure because the risk to consumers is very low. Compliance with most standards is based on an average of samples collected within a year. This allows for some fluctuation above and below the numerical standard, while still protecting public health.

Federal Action Level (AL): Concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow. ALs are set by U.S. Environmental Protection Agency (U.S. EPA).

Federal Minimum Reporting Level (MRL): Minimum concentration of a contaminant which can be detected in drinking water using analytical methods established by the U.S. EPA. Data reported in Table IV reflect MRLs.

Maximum Contaminant Level Goal (MCLG): Level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. EPA.

Maximum Residual Disinfectant Level (MRDL): Highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): Level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the beneficial use of disinfectants to control microbial contaminants. MRDLGs are set by U.S. EPA.

Notification Level (NL): Health-based advisory level established by SWRCB-DDW for chemicals in drinking water that lack MCLs.

Primary Drinking Water Standard (PDWS): MCLs and MRDLs for contaminants that affect health along with their monitoring and reporting requirements, and water treatment requirements.

Public Health Goal (PHG): Level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency, Office of Environmental Health Hazard Assessment (OEHHA).

Secondary Maximum Contaminate Level (SMCL): Highest level a constituent allowed in drinking water that may affect the taste, odor or appearance. SMCLs are set by the U.S. EPA.

State Detection Limit (DLR): A detected contaminant at or above its detection level for reporting purposes. DLRs are set by the SWRCB-DDW. Data reported in Tables I through III reflect DLRs.

State Maximum Contaminant Level (MCL): Highest level of a contaminant allowed in drinking water. Primary MCLs are set as close to the Public Health Goals (PHGs) or Maximum Contaminant Level Goals (MCLGs) as is economically and technologically feasible. For certain contaminants, compliance with MCL is based on the average of all samples collected throughout the year.

Treatment Technique (TT): Required process intended to reduce the level of a contaminant in drinking water. For example, the filtration process is a treatment technique used to reduce turbidity (cloudiness in water) and microbial contaminants from surface water. High turbidities may be indicative of poor or inadequate filtration.

TABLE I

Calendar Year 2018 Water Quality Monitoring Results Health-based Primary Drinking Water Standards (MCLs) Substances Detected in Treated Water

| Substances | Major Sources in Drinking Water | Units | Meets Primary Standard (YES / NO) | State Primary Standard MCL | State PHG | Los Angeles Aqueduct Filtration Plant | | Northern Combined Wells | | Southern Combined Wells | | MWD Weymouth Plant | | MWD Diemer Plant | | MWD Jensen Plant | |
|------------------------------------|---|--------|-----------------------------------|------------------------------|-----------|---------------------------------------|-----------|-------------------------|------------|-------------------------|----------|--------------------|------------|------------------|------------|------------------|-----------|
| | | | | | | Average | Range | Average | Range | Average | Range | Average | Range | Average | Range | Average | Range |
| Aluminum | Erosion of natural deposits; residue from surface water treatment processes | µg/L | YES | 1000 | 600 | <50 | <50 | <50 | <50 | <50 | <50 | 105 (a) | <50 - 220 | 124 (a) | <50 - 310 | < 50 (a) | <50 - 75 |
| Arsenic | Erosion of natural deposits | µg/L | YES | 10 | 0.004 | 3(a) | <2 - 3 | <2 | <2 - 2 | <2 | <2 - 2 | <2 | <2 | <2 | <2 | <2 | <2 |
| Barium | Erosion of natural deposits | µg/L | YES | 1000 | 2000 | <100 | <100 | <100 | <100 | <100 | <100 | 118 | <100 - 118 | 117 | <100 - 117 | <100 | <100 |
| Bromate (b) | By-product of ozone disinfection; formed under sunlight for chlorinated water | µg/L | YES | 10 | 0.1 | 1 (a) | <1 - 3 | 2 | <1 - 3 | 2 | <1 - 3 | 5 (a) | <1 - 10 | 2 (a) | <1 - 4.7 | 5.2 (a) | <1 - 6.4 |
| Fluoride | Erosion of natural deposits; water additive that promotes strong teeth | mg/L | YES | 2 | 1 | 0.7 | 0.7-0.8 | 0.7 | 0.6-0.7 | 0.7 | 0.6-0.7 | 0.7 | 0.6 - 0.9 | 0.7 | 0.6 - 0.9 | 0.7 | 0.4 - 0.8 |
| Gross Alpha Particle Activity (c) | Naturally present in the environment | pCi/L | YES | 15 | 0 | <3 | <3 | 4 | <3 - 4 | 4 | <3 - 4 | <3 | <3 | <3 | <3 | <3 | <3 - 3 |
| Gross Beta Particle Activity (c) | Naturally present in the environment | pCi/L | YES | 50 | 0 | 4 | <4-5 | <4 | <4-4 | <4 | <4 - 5 | <4 | <4 | <4 | <4 | <4 | <4 |
| Heterotrophic Plate Count Bacteria | Naturally present in the environment | CFU/mL | YES | TT | none | <1 | <1 | <1 | <1 | <1 | <1 | <1 | <1 - 1 | <1 | <1 - 1 | <1 | <1 |
| Nitrate (as N) | Erosion of natural deposits; runoff and leaching from fertilizer use | mg/L | YES | 10 | 10 | <0.4 | <0.4 | 1 | 0.7-2 | 1 | 1-2 | <0.4 | <0.4 | <0.4 | <0.4 | 0.5 | 0.5 |
| Nitrate + Nitrite (as N) | Erosion of natural deposits; runoff and leaching from fertilizer use | mg/L | YES | 10 | 10 | <0.4 | <0.4 | 1 | 1 - 2 | 1 | 1 - 2 | NR | NR | NR | NR | NR | NR |
| Total Organic Carbon (TOC) | Erosion of natural deposits | mg/L | YES | TT | none | 1.6 | 1.5 - 1.8 | 1.3 | 1.0- 1.8 | 1.3 | 1.0-1.6 | 2.4 (a) | 2.1 - 2.8 | 2.4 (a) | 2.1 - 2.7 | 2.6 (a) | 2.0 - 2.6 |
| Trichloroethylene (TCE) | Discharge from metal degreasing sites and other factories | µg/L | YES | 5 | 1.7 | <0.5 | <0.5 | <0.5 | <0.5 - 0.9 | <0.5 | <0.5 - 1 | <0.5 | <0.5 | <0.5 | <0.5 | <0.5 | <0.5 |
| Turbidity (d) | Soil runoff | NTU | YES | TT = 1 | none | 0.17 | 100% | NA | NA | NA | NA | 0.06 | 100% | 0.07 | 100% | NA | 0.06 |
| | | % | | TT = 95% of samples ≤0.3 NTU | | NA | | | | | | NA | | NA | | | NA |
| Uranium (c) | Erosion of natural deposits | pCi/L | YES | 20 | 0.43 | 3 | 2 - 4 | 3 | 1 - 4 | 3 | 2 - 4 | <1 | <1 | <1 | <1 | <1 | <1 - 1 |

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(b) Bromate is formed in water treated with ozone in the presence of bromide. Bromate has also been found in water treated with chlorine in some uncovered reservoirs in LADWP that have elevated bromide levels and are exposed to sunlight. MWD tests for bromate at its Diemer and Jensen Filtration Plants, which use ozone. Weymouth Plant has tested for bromate for less than 12-month period and so RAA is not calculated. All LADWP distribution reservoirs are now shielded with flexible covers or shade balls to minimize bromate formation.

(c) Radiological monitoring is performed in cycles of various frequencies in LADWP for treated sources water and at the blend points. Monitoring for Gross Alpha Particle Activity is performed in six year cycle and was conducted in 2016. Monitoring of Combined Radium-226 and Radium-228 is performed in three year cycle and was conducted in 2016. Monitoring of Gross Beta Particle Activity, Strontium-90, Tritium and Uranium is performed annually. MWD conducted all radiological monitoring in 2017.

(d) Turbidity is a measure of the cloudiness of water and is a good indicator of water quality and filtration performance. High turbidity can hinder the effectiveness of disinfectants. The Primary Drinking Water Standard for turbidity (included in this table) at water filtration plants is less than or equal to 0.3 NTU in at least 95 percent of the measurements taken in any month and shall not exceed 1.0 NTU at any time. The reporting requirement for treatment plant turbidity is to report the highest single measurement in the calendar year as well as the lowest monthly percentage of measurements that are less than or equal to 0.3 NTU.

TABLE I (CONT'D)

Calendar Year 2018 Water Quality Monitoring Results Health-based Primary Drinking Water Standards (MCLs) Substances Detected in Treated Water and Reported on City-Wide Basis

| Substances | Major Sources in Drinking Water | Units | Meets Primary Standard (YES/NO) | State Primary Standard MCL or (MRDL) | State PHG / (MRDLG) | Average | Range |
|-----------------------------------|---|-------------|---------------------------------|--|---------------------|---|---|
| Bromate (uncovered reservoirs) | By-product of ozone disinfection; formed under sunlight for chlorinated water | µg/L | YES | 10 | 0.1 | HRAA = 2 (a) | Range = <1 – 3 |
| Chlorine Residual, Total | Drinking water disinfectant added for treatment | mg/L | YES | (4) | (4) | HRAA = 2.0 (a) | Range = 1.8 – 2.1 |
| Copper (at-the-tap) AL = 1300 (e) | Internal corrosion of household water plumbing systems | µg/L | YES | TT | 300 | 90th Percentile value = 329 | Number of samples exceeding AL = 0 out of 103 |
| Fluoride | Erosion of natural deposits; water additive that promotes strong teeth | mg/L | YES | 2 | 1 | Average = 0.7 | Range = 0.2 - 0.9 |
| Haloacetic Acids (Five) (HAA5) | By-product of drinking water disinfection | µg/L | YES | 60 | none | HLRAA = 15 (f) | Range = 3 – 22 |
| Lead (at-the-tap) AL = 15 (e) | Internal corrosion of household water plumbing systems | µg/L | YES | TT | 0.2 | 90th Percentile value = 5.2 | Number of samples exceeding AL = 1 out of 103 |
| Total Coliform Bacteria | Naturally present in the environment | % Positives | YES | ≤5% of monthly samples are coliform positive | 0 | Highest monthly % positive samples = 1.5% | Range = % positive samples 0% – 1.3% |
| Total Trihalomethanes (TTHM) | By-product of drinking water chlorination | µg/L | YES | 80 | none | HLRAA = 38 (f) | Range = 9 – 46 |

- (a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. HRAA may be higher than the range, which is based on the test data in the reported calendar year.
- (e) At-the-tap monitoring of lead and copper is conducted as required by the federal Lead and Copper Rule. A system is out of compliance if the federal Action Level is exceeded in more than 10 percent of all samples collected at the customers' tap. The most recent monitoring was conducted in 2018. Although the City's treated water has little or no detectable lead, studies were conducted and corrosion control implementation started. A small corrosion control facility utilizing zinc orthophosphate

- (temporarily out of service for upgrades) has been in operation in the Watts area since the 1990's. Corrosion control was introduced to the Western Los Angeles area in 2010 and to the Hollywood area in 2015. The results of the corrosion control study will be available in 2019.
- (f) The federal Stage 2 Disinfectants/Disinfection Byproducts Rule (Stage 2 D/DBPR) requires compliance monitoring and reporting for total trihalomethanes (TTHM) and five haloacetic acids (HAA5) based on Locational Running Annual Averages (LRAAs) of established monitoring locations. The Highest Locational Running Annual Averages (HLRAAs) of all LRAAs in the current calendar year for TTHM and HAA5 are reported.

TABLE II

Calendar Year 2018 Water Quality Monitoring Results Aesthetic-based Secondary Drinking Water Standards (SMCLs) Substances Detected in Treated Water

| Substances | Major Sources in Drinking Water | Units | Meets Secondary Standard (YES/NO) | State SMCL or Federal (SMCL) | Los Angeles Aqueduct Filtration Plant | | Northern Combined Wells | | Southern Combined Wells | | MWD Weymouth Plant | | MWD Diemer Plant | | MWD Jensen Plant | |
|-------------------------------|--|-------|-----------------------------------|------------------------------|---------------------------------------|-----------|-------------------------|------------|-------------------------|------------|--------------------|------------|------------------|-----------|------------------|-----------|
| | | | | | Average | Range | Average | Range | Average | Range | Average | Range | Average | Range | Average | Range |
| Aluminum | Erosion of natural deposits; residue from some surface water treatment processes | µg/L | YES | 200 | <50 | <50 | <50 | <50 | <50 | <50 | 105 (a) | <50 - 220 | 124 (a) | <50 - 210 | < 50 (a) | <50 - 75 |
| Chloride | Runoff / leaching from natural deposits; seawater influence | mg/L | YES | 500 | 34 | 24 - 46 | 39 | 28 - 45 | 39 | 30 - 49 | 96 | 96 - 97 | 94 | 92 - 95 | 56 | 54 - 57 |
| Color, Apparent (unfiltered) | Naturally-occurring organic materials | ACU | YES | 15 | 3 | 3 - 4 | 3 | 3 - 4 | 3 | 3 - 4 | <1 | <1 - 1 | <1 | <1 - 1 | <1 | <1 - 1 |
| Odor | Naturally-occurring organic materials | TON | YES | 3 | <1 | <1 | <1 | <1 | <1 | <1 | 3 | 3 | 2 | 1 - 4 | 2 | 1 - 4 |
| pH | Naturally-occurring dissolved gases and minerals | Unit | YES | (6.5 - 8.5) | 7.6 | 7.3 - 7.9 | 8.1 | 7.4 - 8.4 | 8.1 | 7.6 - 8.4 | 8.1 | 8.1 - 8.2 | 8.1 | 8.1 | 8.5 | 8.4 - 8.5 |
| Specific Conductance | Substances that form ions when in water; seawater influence | µS/cm | YES | 1600 | 348 | 290 - 400 | 518 | 360 - 560 | 518 | 450 - 620 | 954 | 897 - 1010 | 906 | 852 - 961 | 436 | 428 - 444 |
| Sulfate (as SO ₄) | Runoff / leaching from natural deposits | mg/L | YES | 500 | 28 | 17 - 34 | 74 | 42 - 88 | 74 | 62 - 104 | 213 | 190 - 236 | 199 | 178 - 220 | 44 | 43 - 46 |
| Total Dissolved Solids (TDS) | Runoff / leaching from natural deposits | mg/L | YES | 1000 | 201 | 164 - 232 | 415 | 241 - 338 | 415 | 276 - 376 | 596 | 553 - 639 | 565 | 523 - 607 | 242 | 239 - 244 |
| Turbidity (g) | Soil runoff | NTU | YES | 5 | <0.1 | <0.1 | 0.1 | <0.1 - 0.2 | 0.1 | <0.1 - 0.2 | <0.1 | <0.1 | <0.1 | <0.1 | <0.1 | <0.1 |

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. Hence, HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(g) The Secondary Maximum Contaminant Level for turbidity of treated water in the distribution system is 5 NTU at the entry points to the distribution system.

TABLE III Calendar Year 2018 Water Quality Monitoring Results

Unregulated Drinking Water Substances Detected in Treated Water

| Substances | Major Sources in Drinking Water | Units | Los Angeles Aqueduct Filtration Plant | | Northern Combined Wells | | Southern Combined Wells | | MWD Weymouth Plant | | MWD Diemer Plant | | MWD Jensen Plant | |
|--|--|------------|---------------------------------------|-----------|-------------------------|------------|-------------------------|-----------|--------------------|-----------|------------------|-----------|------------------|-----------|
| | | | Average | Range | Average | Range | Average | Range | Average | Range | Average | Range | Average | Range |
| Alkalinity, Total (as CaCO ₃) | Erosion of natural deposits | mg/L | 97 | 86 - 112 | 117 | 90 - 131 | 117 | 107 - 139 | 112 | 107 - 117 | 106 | 99 - 114 | 72 | 68 - 76 |
| Ammonia + Chloramines (as N) | Drinking water disinfectant added for treatment | mg/L | 0.5 | 0.4 - 0.5 | 0.5 | 0.3 - 0.6 | 0.5 | 0.4 - 0.6 | NA | NA | NA | NA | NA | NA |
| Bicarbonate Alkalinity (as CaCO ₃) | Naturally-occurring dissolved gas; erosion of natural deposits | mg/L | 119 | 105 - 137 | 143 | 110 - 159 | 143 | 131 - 169 | NA | NA | NA | NA | NA | NA |

General Information

This annual Drinking Water Quality Report (also known as a Consumer Confidence Report) is required by the California State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW) and is prepared in accordance with their guidelines. The report is available online at www.ladwp.com/waterqualityreport. Copies may be requested by calling (213) 367-3182.

LADWP, the largest municipal utility in the nation, was established more than 100 years ago. The utility now provides reliable and safe water and electric service to the city's more than 4 million residents and businesses. LADWP is governed by Board of Water and Power Commissioners, appointed by the Mayor and confirmed by the City Council. The Board meets regularly on the second and fourth Tuesdays of each month at 10:00 a.m.

Meetings are held at:

Los Angeles Department of Water and Power
111 North Hope Street, Room 1555H
Los Angeles, CA 90012-2694

The meeting agenda is available to the public on the Thursday prior to the week of the meeting. You can access the Board agenda at www.ladwp.com/board or by calling (213) 367-1351.

For general information about LADWP, call (800) DIAL-DWP or visit www.ladwp.com.

For questions regarding this report, call the Water Quality hotline at (213) 367-3182.

THIS MESSAGE IS FOR NON-ENGLISH SPEAKING LADWP CUSTOMERS

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-990709-CHI2

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT-READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, ***First American Title Insurance Company***, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

First American Title Insurance Company

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

COMMITMENT CONDITIONS

1. DEFINITIONS

- (a) **"Knowledge" or "Known":** Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
- (b) **"Land":** The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
- (c) **"Mortgage":** A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
- (d) **"Policy":** Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
- (e) **"Proposed Insured":** Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
- (f) **"Proposed Policy Amount":** Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
- (g) **"Public Records":** Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
- (h) **"Title":** The estate or interest described in Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

- (a) the Notice;
- (b) the Commitment to Issue Policy;
- (c) the Commitment Conditions;
- (d) Schedule A;
- (e) Schedule B, Part I—Requirements; and
- (f) Schedule B, Part II—Exceptions.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

- (a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
 - (i) comply with the Schedule B, Part I—Requirements;
 - (ii) eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
 - (iii) acquire the Title or create the Mortgage covered by this Commitment.
- (b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
- (c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
- (d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
- (e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
- (f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
- (g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

- (a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
- (b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
- (c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
- (d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
- (e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
- (f) **When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.**

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION

Arbitration provision intentionally removed.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. First American

Schedule BI & BII

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-990709-CHI2

Commitment No.: NCS-990709-CHI2

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

- A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.
- B. Pay the agreed amount for the estate or interest to be insured.
- C. Pay the premiums, fees, and charges for the Policy to the Company.
- D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.
- E. Releases(s) or Reconveyance(s) of Item(s): 17 and 22
- F. Other: None
- G. You must give us the following information:
 - a. Any off record leases, surveys, etc.
 - b. Statement(s) of Identity, all parties.
 - c. Other: None

The following additional requirements, as indicated by "X", must be met:

- H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form (as provided by the company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

- I. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

- J. The following LLC documentation is required from:
- (i) a copy of the Articles of Organization
 - (ii) a copy of the Operating Agreement, if applicable
 - (iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iv) express Company Consent to the current transaction
- K. The following partnership documentation is required :
- (i) a copy of the partnership agreement, including all applicable amendments thereto
 - (ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iii) express Partnership Consent to the current transaction
- L. The following corporation documentation is required:
- (i) a copy of the Articles of Incorporation
 - (ii) a copy of the Bylaws, including all applicable Amendments thereto
 - (iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iv) express Corporate Resolution consenting to the current transaction
- M. Based upon the Company's review of that certain partnership/operating agreement dated **Not disclosed** for the proposed insured herein, the following requirements must be met: Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.
- N. A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review, along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.
- O. Approval from the Company's Underwriting Department must be obtained for issuance of the policy contemplated herein and any endorsements requested thereunder. This Commitment will then be subject to such further requirements as may be required to obtain such approval.
- P. Potential additional requirements, if ALTA Extended coverage is contemplated hereunder, and work on the land has commenced prior to close, some or all of the following requirements, and any other requirements which may be deemed necessary, may need to be met:
- Q. The Company's "Indemnity Agreement I" must be executed by the appropriate parties.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. Schedule BI & BII (Cont.)

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-990709-CHI2

Commitment No.: NCS-990709-CHI2

SCHEDULE B, PART II

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met.
2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

(Affects Lot 7 of Parcel No. 1)

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

21. The effect of a deed dated September 12, 2017, executed by Staples the Office Superstore, LLC, a Delaware limited liability company, successor by conversion to Staples the Office Superstore, Inc., a Delaware corporation, which acquired title as Staples Properties, Inc., a California corporation, as Grantor, to USR Real Estate Holdings LLC, a Delaware limited liability company, as Grantee, recorded September 20, 2017, as Instrument No. [20171074477](#) of Official Records.

NOTE: The Company will require an Affidavit of Execution and Delivery of Deed executed by the grantor in the presence of a First American notary or other satisfactory proof that the deed was valid prior to removing this exception or insuring the contemplated transaction.

22. A deed of trust to secure the performance of an agreement or other obligation, recorded September 20, 2017 as Instrument No. [20171074478](#) of Official Records.

Dated: September 12, 2017
Trustor: USR Real Estate Holdings LLC, a Delaware limited liability company
Trustee: Chicago Title Company, a California corporation
Beneficiary: Wells Fargo Bank, National Association

(Affects Both Parcels)

The above deed of trust states that it secures a line of credit. Before the close of escrow, we require evidence satisfactory to us that (a) all checks, credit cards or other means of drawing upon the line of credit have been surrendered to escrow, (b) the borrower has not drawn upon the line of credit since the last transaction reflected in the lender's payoff demand, and (c) the borrower has in writing instructed the beneficiary to terminate the line of credit using such forms and following such procedures as may be required by the beneficiary.

23. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.
24. Rights of parties in possession.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. ALERT - CA Senate Bill 2 imposes an additional fee of \$75 up to \$225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as 6450 West Sunset Boulevard, Los Angeles, CA.

2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

None

3. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

The map attached, if any, may or may not be a survey of the land depicted thereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of this Commitment or the Policy, if any, to which the map is attached.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Building Analytics were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 2

EXECUTIVE SUMMARY

RCRA-LQG sites within approximately 0.25 miles of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 18 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 24 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 15 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 35 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 13 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 03/23/2020 has revealed that there are 54 Cortese sites within approximately 1 mile of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 8 HIST CORTESE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

| LOS ANGELES GAS AND | N FORMOSE AVE BTWN R | WSW 1/2 - 1 (0.987 mi.) | 354 | 921 |

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 46 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 24 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 22 RGA LUST sites within approximately 0.5 miles of the target property.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 02-05-2019
Citation: HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description: Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak.

Violation Notes: Returned to compliance on 02/05/2019. OBSERVATION: The vent sump sensor was raised approximately 6 inches off the lowest point of the sump and not located to detect a leak at the earliest opportunity. Monitoring equipment shall be maintained to be able to detect a leak at the earliest possible opportunity. Corrected during inspection. CORRECTIVE ACTION: Ensure that all sensors are located at the lowest point of the sump.

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: OBSERVATION: The "Designated Operator Visual Inspection Reports" are missing signatures for months 2/20/19, 3/21/19, 4/17/19 & 5/15/19. CORRECTIVE ACTION: Complete missing signatures for months 2/20/19, 3/21/19, 4/17/19 & 5/15/19 and email Inspector a copy of the updated "Designated Operator Inspection Reports."

Violation Date: 02-05-2019
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)

Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.

Violation Notes: Returned to compliance on 02/05/2019. OBSERVATION: Owner/Operator did not properly install, calibrate, operate and/or maintain leak detection equipment. UDC 1/2 & 3/4 had splices in wire outside junction box. UDC 1/2 sensor wire was long enough to reuse. UDC 3/4 sensor was replaced under like for like permit. CORRECTIVE ACTION: Corrected on site, during inspection.

Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.

Violation Notes: Returned to compliance on 01/22/2018. OBSERVATION: A hazardous waste tank reassessment has not been conducted for the used oil and used antifreeze tank system within 5 years of the previous tank system assessment or within the remaining service life of the tank system as stated in the engineer's report, whichever is less. CORRECTIVE ACTION: Obtain a written hazardous waste tank system reassessment for the used oil and used antifreeze tank system in accordance with 22 CCR 15 66265.192 and submit a copy to the CUPA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HOLLYWOOD POLICE STATION GARAG (Continued)

S101617317

Site ID: 43433
Site Name: LAPD - HOLLYWOOD DIVISION
Violation Date: 02-05-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: Returned to compliance on 02/05/2019. OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. Spill bucket had 10" of liquid (~3 gallons) of liquid, and therefore did not hold 5 gallons. Liquid removed during inspection. CORRECTIVE ACTION: Ensure that spill bucket is free of liquid.

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: OBSERVATION: The "Designated Operator Visual Inspection Reports" are missing signatures for months 2/20/19 & 3/21/19. CORRECTIVE ACTION: Complete missing signatures for months 2/20/19 & 3/21/19 and email Inspector a copy of the updated "Designated Operator Inspection Reports."

Site Name: LAPD - HOLLYWOOD DIVISION
Violation Date: 02-08-2018
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 02/08/2018. OBSERVATION: Owner/Operator did not install or maintain spill bucket which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, or is resistant to galvanic corrosion. There was approximately 1 gallon of water in spill bucket . Water was removed

Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 07-26-2018
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: A follow-up is conducted. The Business Activities, Owner/Operator Identification, Hazardous Materials Inventory, Site Map, Emergency Response/Contingency Plan, Employee Training Plan and APSA sections were reviewed in CERS and field verified. Violations indicated previously has not been corrected and remains unresolved. Please refer to the CERS file emailed to you with notations on what needs to be corrected. You have 30 days to resolve these violations to avoid further action. If you have any trouble, feel free to call or send an email. Once it's complete, let me know by replying to this email and I'll verify in CERS and clear the violations. I've also attached a list of private contractors that can perform all of your CERS reporting for you if you choose, as well as information on a free training class offered by the city. Have a good day.
Eval Division: Los Angeles City Fire Department

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 354452
Site Name: LAFD - FIRE STATION 27
Violation Date: 09-12-2018
Citation: 23 CCR 16 2632(c)(2)(B), 2634(d)(1)(a), 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(B), 2634(d)(1)(a), 2636(f)(1)
Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes: Returned to compliance on 10/12/2018. OBSERVATION: Owner/Operator did not maintain leak detection equipment with an audible and visual alarm (Power & Warning lights not functional). CORRECTIVE ACTION: Maintain leak detection equipment with an audible and visual alarm.
Violation Division: Los Angeles City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 354452
Site Name: LAFD - FIRE STATION 27
Violation Date: 09-25-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional

Violation Notes: engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months. Returned to compliance on 09/25/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Site failed to test Overfill Prevention Equipment by 10/13/18, tested A/V alarm on 2/19/19. During 9/25/19 annual inspection, no A/V Alarm was found. Site does have FTSO. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification. Anniversary date for next test is 10/2021.

Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)

Violation Description: Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 p.s.i.g. and restrict or shut off the flow of product through the piping when a leak is detected.

Violation Notes: Returned to compliance on 09/18/2019. Mr. Almeida did not have the proper equipment to test LLD on 9/12/18. Last certified on 9/14/17. His coworker was to bring equipment later same day to certify. 9/12/18 LLD test results indicated failure. OBSERVATION: Diesel line leak detector failed to meet one or more of the following requirements: Monitor at least hourly; Capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g.; Restricting or shutting off the flow of product through the piping when a leak is detected. CORRECTIVE ACTION: Repair or replace Diesel line leak detector so that it is capable of monitoring at least hourly, detecting a release of 3.0 gallons per hour at 10 p.s.i.g., and restricting or shutting off the flow of product through the piping when a leak is detected.

Violations:
 Site ID: 86866
 Site Name: HOLLYWOOD YMCA
 Violation Date: 09-12-2019
 Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
 Violation Description: Failure to complete and electronically submit a site map with all required content.
 Violation Notes: Returned to compliance on 11/04/2019. Review, update and resubmit the site map in CERS to include all required elements. You can download detailed SITE MAP INSTRUCTIONS in the Hazardous Materials Business Plan (HMBP) Section using the following link <https://www.lafd.org/fire-prevention/cupa/documents-forms>
 Violation Division: Los Angeles City Fire Department
 Violation Program: HMRRP
 Violation Source: CERS

Evaluation:
 Eval General Type: Compliance Evaluation Inspection
 Eval Date: 07-29-2016
 Violations Found: No
 Eval Type: Routine done by local agency
 Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by TONA CONTACT INFORMATION: ADRIANA QUIROZ@YMCALA.ORG Observed the facility and inspected hazardous materials storage. Annual employee safety training records were maintained. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

- . Waste code: D000
- . Waste name: Not Defined

- . Waste code: F001
- . Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

- . Waste code: F004
- . Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

- . Waste code: F006
- . Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: Consent to enter, inspect and take photographs was given by: Erik Tieu
The Business Activities, Owner/Operator Identification, Hazardous
Materials Inventory, Site Map, Emergency Response/Contingency Plan and
Employee Training Plan sections were reviewed in CERS and field
verified. Review and correct any violations indicated previously in
this report, on or before the COMPLY BY date associated with each
violation. NOTE: The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4;
57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store,
use or handle hazardous materials in the City of Los Angeles to obtain
a Consolidated Permit from the Los Angeles Fire Department CUPA ****
Annual submission of a Hazardous Materials Business Plan into CERS is
required between January 1 and March 1 of every year. Please remember
that any change in inventory of greater than 100 percent will require
new submission within 30 days of that change. As a reminder, you must
complete all the [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Region: STATE
Facility Status: Open - Assessment & Interim Remedial Action
Status Date: 02/09/2016
Global Id: SL0603766574
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 34.0946610731753
Longitude: -118.326382935047
Case Type: Cleanup Program Site
Case Worker: CL
Local Agency: Not reported
RB Case Number: 1186
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Benzene
Site History: Paragon cleaners is located on the northeast corner of the intersection of Vine Street and Fountain Avenue. Ground water has been impacted by the contaminant PCE due to operations at the dry cleaners. The dry cleaner has been in operation since 1961, and in 2006, switched to "green" chemicals. The site owner has been issued a Cleanup and Abatement Order (CAO) from the state for assessment and cleanup.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

| Description: | A 3rd party contractor damaged a 2 inch plastic beam causing release of Natural Gas at a construction site. The natural gas leak is not yet stopped, crews are digging for control of the gas leak. They estimate ETA of leak stoppage to be around 1630 hours, will call back to report any updates. Los Angeles Fire Department is on site, and has evacuated 28 employees from the construction site. Road closure in both directions for Sunset Blvd, from Argyle Ave to North Gower. |

Latitude: 34.090493
Longitude: -118.328047
Case Type: Cleanup Program Site
Case Worker: NLA
Local Agency: Not reported
RB Case Number: 1224
File Location: Regional Board
Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: * Chlorinated Hydrocarbons, Tetrachloroethylene (PCE)
Site History: The Site was occupied by a motion picture post-production facility where titles, visual effects and special effects were applied onto motion picture film. The former Pacific Title and Art Studio (PTAS) was a post-production motion picture facility that operated from approximately 1946 to 2009. Operations in the main building included internal film developing and associated film cleaning and optical printing to support post-production processes. The main building housed office space, film developing, printing and film cleaning process units, studios and film viewing theaters. The garage-like structure in the southwest portion of the subject property was used for storage of equipment, paints, janitorial chemicals and other materials. In 2009, the Amidi Group acquired ownership of the property from PTAS for re- development of the main building into an executive office complex. The redevelopment was completed in June 2013.

Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 04/19/2019. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: DO inspections conducted after 9/30/2018 must be every 30 days and in accordance with sections 2716(a)-(e). Inspections occurred greater than 30 days on 2 different occasions: between 10/27/18 & 11/27/18(31 days) and again between 12/27/18 & 1/27/19(31 days). CORRECTIVE ACTION: Ensure that DO is complying with all the requirements noted above. Submit copy of compliant DO inspection record.

Site Name: FRANKLIN ARGYLE INC
Violation Date: 02-19-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 04/04/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Was due by 10/13/18, but going to be tested today(2/19/19). Not witnessed by LAFD, results to be reviewed upon submittal. CORRECTIVE ACTION: Apply for permit for new drop tubes and repair/retest. Submit verification.

than drinking water)
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Acetone, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: The site, located at the northwest corner of Seward Street and Barton Avenue in Hollywood, was formerly used for film processing activities from 1926 until 2002. The site was occupied by approximately eleven structures (Buildings 1 through 11), parking lots, and an interior courtyard. Film processing and associated activities were conducted in three main buildings; Buildings 1, 2 and 3. The majority of the chemicals that had been used in film processing were stored in the basement of Buildings 2 and 3. Historically, the chemicals used for film processing included isopropyl alcohol, acetone, 1,1,1-Trichloroethane (1,1,1-TCA), Perchloroethylene (PCE), ammonium thiosulfate, and proprietary development solutions. The remaining buildings were used as offices and for other purposes, such as general storage, a maintenance shop, an electrical shop, and for archiving films. Buildings 1 through 11 were demolished between April and August of 2005. The site is presently vacant and awaiting commercial redevelopment.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

| Description: | Caller states that a third party construction operator was excavating and looking for a sewer when they struck a 2" plastic main. The damage to the main and subsequent release of natural gas prompted local Fire Department to order the precautionary evacuation of 180 construction workers and 10 residents from the immediate area. Estimated time of control for the release is 3 hours. |

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
