**PROJECT DESCRIPTION:** The proposed project would demolish the existing vacant school buildings, accessory structures, pavement, and infrastructure on the project site, and construct 74 new single-family residences with solar panels, onsite roadways with sidewalks, and an approximately 1.12-acre park. The project includes installation of new water, sewer, and stormwater drainage infrastructure that would connect to existing infrastructure adjacent to the site. This includes removal of the existing connections and development of new connections to the Orange County flood control channel that is adjacent to the site, which requires an encroachment permit from the Orange County Department of Public Works. In addition, the project includes a Response Action by the California Department of Toxic Substances Control to reduce potential subsurface volatile organic compound vapor accumulation below the proposed residential structures.

The project includes a General Plan Amendment to change the Land Use designation of the site from Public Facilities to Low Density Residential (LDR), Low Medium Density Residential (LMDR), and Park to align with the single-family development (zoned R1) along the west side of the site. The project also includes a zone change to change the zone from PI-Public and Institutional to R-1-Single-Family Residential and GH-Garden Homes with a Planned Development (PD) Overlay to allow flexibility on the maximum coverage in the GH zoning and the ratio of 2nd story building area to 1st story building in the R1 zoned areas; and PI to P/OS-Parks and Open Space for the approximately 1.12-acre park. The proposed project would result in a gross density of 5.69 dwelling units per acre (du/ac), with a density of 4.72 du/ac in the portion of the project within the R1 zone and 6.69 du/ac within the GH zone. A Tentative Tract Map and Precise Plan of Design is also proposed. A Conditional Use Permit is also proposed to allow for the development of single-family dwellings in the GH zone.
