- General Rule: [Sec.15061(b)(3)]

REASONS WHY PROJECT IS EXEMPT: The project consists of replacement and installation of a water storage tank and maintenance of an existing road as well as installation of water tank associated instruments. The project may result in some minor vegetation trimming or removal, but mature trees will be avoided to the extent feasible. The project is not anticipated to impact any known environmentally sensitive area, and its impact on the environment is insignificant, individually and cumulatively. There is no reasonably possibility that the project will have a significant effect on the environment, or damage scenic resources because there will be minimal ground disturbance, and the replacement tank will be similar to the existing tank and would be partially obscured by vegetation and topography from any public road. Recent wildfires resulted in fire breaks being graded around the residential resources, so the existing access road will be rehabilitated for maintenance access.
