**Subject:** Warehouses at mission Tiki drive in

Hi Michael

My name is Solomon Bates. I am writing you as a concerned citizen regarding the proposed plan to build warehouses in the lot that is currently the mission Tiki drive in. I have read that the proposed project will be quite impactful and harmful for the air quality in the area. As we all can attest to global warming, caused by greenhouse gases, is a science backed phenomenon that is happening to our planet. Most countries and cities are taking steps to help combat this at the moment. However, this project would be counterproductive to this. California prides itself on being on the forefront of progressive policies for it's citizens. Therefore, when we continue to back projects that are harmful towards California citizens we become counterproductive. Please reconsider this proposal for the building of these warehouses in regards to the effects it will have on the citizens. Thank you for your time.

**Subject:** Please stop the warehouses

Dear Mr. Diaz,

I am emailing you as a concerned citizen of Upland. I have heard the news of the Warehouses that will be replacing the tiki drive through.... The environmental impact on the health of the local community is a negative one. Do you really want that to be what you are known for? I implore you to reconsider this. We do not want the warehouses in our community and urge you to make changes to cancel or stop this.

**Subject:** Save Tiki Tiki

Hello Mr. Miguel Diaz,

Help save Tiki Tiki Mission Movie Theater!!

I'm not one to be writing or promoting places but this place has been around longer than I have moved out here in the inland empire. I have such fond memories of this place. It's helped my family when funds were low at the swap meet. It's been a place where as a family we would watch the latest movies and be loud, silly, crazy, and no worries of interruptions!!

Let's help this place still be available for our next generation to have these fond memories!!!  
We still have time to save it!!!

**Subject:** Mission Tiki Drive-in Redevelopment Proposal

Director Diaz,

I'm a third-generation Inland Empire resident and am writing to voice my opposition to the proposed redevelopment of the Mission Tiki Drive-in into a warehouse park. Our county is littered with warehouse space, with millions of square feet currently vacant. This proposal, according to the Inland Valley Daily Bulletin, has no tenants attached. Why build more warehouse space, subjecting residents and businesses in the neighborhood, to the road closures, pollution, noise, and service disruptions for a project that could, potentially, bring no new business to the city and lay empty for years? Why do this at the cost of tearing down a decades-old community institution that employs people both through its movie theater and swap meet operations, attracting customers from across Southern California?

Thank you for your consideration,

Ms. Devlin Smith  
Ontario, CA

**Subject:** Mission Tiki Drive-In

DO NOT tear down our drive in!!! We've been going there for decades! Montclair does not need any more warehouses. There's plenty of land in San Bernardino. Use that instead.

The locals need that drive-in and they need the swap meet.

Thank you

**Subject:** mission tiki

Hello,  
it has come to my intention that there are some plans to build warehouses where the mission Tiki is. I would like to put my input as I would say it would not be a good idea as it would make the surrounding area look uglier than it already does along with this drive-in being A lot of residents childhood place to go to. I found myself coming here for years on now since I was six years old so I do ask please do not build the warehouses

**Subject:** Mission Tiki Drive In

Dear Mr. Diaz,

As I am sure you are aware, since the announcement of the closure of the Mission Tiki Drive-In there has been much outcry from the public over the loss of such a beloved piece of our cities history. A closure such as this truly relays the end of an era that Mission Tiki worked tirelessly to uphold for so many years. However, while the closure is devastating in so many way, I believe the most devastating part of this, is the decision to replace the drive-in with multiple warehouses. The addition of warehouses to a city is often times shrouded in the belief that warehouses are an economic benefit to that city, and surrounding areas. However multiple studies are finding this to be proving false.

P12-1

As this study finds warehouses do not generate any long term or net job growth

<https://www.epi.org/publication/unfulfilled-promises-amazon-warehouses-do-not-generate-broad-based-employment-growth/>

P12-2

a further issue presented by the addition of warehouses in an area like Mission Tiki, is that a pollution. multiple studies have found that warehouses create excessive pollution that harms how those living in the surrounding areas as seen in both of the following studies.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2740858/>

<https://www.mh-rcg.org/post/your-online-shopping-is-polluting-this-small-town-1>

P12-3

I, like many others are reaching out to you to please urge you to reconsider allowing these warehouses to be built in our community. For the sake of so many in our community and for the sake of our community itself.

Thank you,

--

**Subject:** Save the Mission Tiki Drive-In

Dear Michael Diaz,

I am writing to express my wishes at the Mission Tiki Drive-In not be closed. It has been a staple in the community for 60 plus years giving families and friends many joyous experiences. It would be a shame to take it down for some warehouses that would pollute the air making their lives worse while the drive-in has made so many people happy. I have had so many great memories at the drive in throughout my life it would break my heart to see it go. especially during the pandemic it has been a godsend for all in the Inland Empire. Allowing people to get out of the house without worrying that their health would be at risk. I know there's a lot of money behind this warehouse project and it will happen anyways. I just need to express my opinion. Thank you for your time.

Sincerely,

Terrance Johnson

**To:** Michael Diaz  
**Subject:** Proposed Warehouse Project at Mission Tiki Drive-In Theater

Good morning Mr. Diaz,

My name is Vincent Salgado, and my family and I have been residents of Montclair for the past fifteen years. I graduated from Montclair Highschool, and I am currently pursuing a dual Master's degree at the University of Michigan SEAS in Ecosystem Science & Management + Environmental Behavior, Education & Communication. I am contacting you to voice my concerns about the proposed project to build 7 industrial warehouses at the current Tiki Drive-in Theater location. I will shorten it to TDT for simplicity.

P16-1

**Community Identity**

As I am sure you are aware, TDT serves as a swap meet during the day and as a theater space during the night. Due to this dual role, the TDT has become one of the few places of community engagement within the city of Montclair. To address rising anxieties from climate change and resource descent (I am willing to discuss this with you in further emails), community cohesion is essential to ensure the community can prepare for impending difficulties. Based on anecdotal experience, the city does not appear to have a strong social identity, but the TDT serves as a site that is dear to the hearts of many Montclair residents, especially to those who grew up with TDT. To us, the development of this site will be the equivalent of demolishing NYC's Central Park to use for industry. Without TDT, the city loses a significant portion of its remaining social identity. Yes, the Montclair Mall serves as a place for commerce as well, but it provides a completely different atmosphere than TDT. At the Montclair Mall, there is not much social bonding since shoppers know that every purchase only aids national and international corporations. On the other hand, Montclair residents know that they are directly helping families when they purchase goods from the TDT, and both consumer and vendor show gratitude to one another when making purchases. Over time, these interactions foster community cohesion that is absent from a mall setting. The TDT is also important for lower-income residents of Montclair, many of who walk or drive a short distance to arrive at the TDT. The lower cost of goods and produce sold there helps families save money, which they can further use to invest in themselves or further support local businesses.

P16-2

**Environmental Justice**

I understand that the city of Montclair lacks industry, but we are a primarily residential and commercial town. Residences directly south of the proposed development include much single-family housing. If the proposed development is successful, much of this family housing would lose value, causing economic harm to many Montclair residents. To the East, Southwest, and West, there is are many mobile home parks that house many of the lower-income families that live in the city. These families have the lowest means of moving, so they will face the greatest burden of this development. My family lives in Shady Lane Mobile Park, 4138 Mission Blvd, so they, too, will be impacted. In addition, there are two elementary schools that are less than a block away from the proposed site, and these children will have to face the associated air pollution throughout all 7 years of attendance (K-6). Due to the proposed project having 7 different warehouses, this means that up to seven different companies can come be

P16-3

## Appendix B - Comment Letters

working in the area. The intersection of Mission Blvd and Romona Ave will contain many more trailers than before, which will be an increased traffic and air pollution in the area. The city of Montclair has a responsibility to ensure the health of its residents, especially those that are most vulnerable.

↑ P16-3  
Cont.

### Compromise

Here, I will list several ideas to appeal to the community if development of the warehouses were to occur.

↑ P16-4

- Require a conservation easement for the land that the trees on the Southside of the property must remain intact. Studies show that trees provide immense benefits to mental health, and the large trees present at TDT are one of the few that grow alongside Mission Blvd.
- Aside from the Southern trees, a requirement for the land to only contain chaparral vegetation to limit water use. No grass.
- If possible, require that warehouse jobs prioritize hiring local residents than distant ones. This way, more money will stay locally.
- Increased taxes on the warehouse property to facilitate air quality control programs and repair roads.
- A requirement to keep and maintain the TDT main sign at the corner of Mission and Ramona for its historical significance.

↑ P16-5

↑ P16-6

↑ P16-7

↑ P16-8

↑ P16-9

### Alternatives

If the city highly desires that the land be developed, here are some other ideas that it can pursue rather than warehouse use.

- Multi-family housing apartments to help ease increasing rental costs within the city.
- Converting the land to mixed-zoning so that single-family units can be built on top of commercial buildings.
- Commercial use with an emphasis of using some land to use as a local farmers market
- Commercial with the incorporation of a resilience hub to assist Montclair residents
- Commercial with the incorporation of a multi-cultural center to reflect Montclair culture and history

↑ P16-10

Thank you for your time and consideration, Mr. Diaz. I am willing to discuss this matter in greater detail with you in addition to helping out with this project any way that I can. I hope you have a wonderful rest of your day.

Attentively,

**Vincent C. Salgado**

**To:** Michael Diaz  
**Subject:**

Dear Michael Diaz,

I'm emailing you to say NO to the proposed warehouse at the Mission Tiki Drive In site. The construction and operation would exceed the threshold set by the South Coast Air Quality Management District for carbon dioxide.

As the community development director for the city of Montclair, I hope you recognize the harm such a warehouse would cause to current and future residents as well as the regional ecosystem.

The Mission Tiki Drive In became — and still is — a safe entertainment destination for my family because of Covid. Please don't sacrifice it for yet another polluting warehouse in Inland Southern California.

Thank you,  
Erin Michaela Sweeney

P17-1

**From:** Jessica Gaytan  
**Sent:** Tuesday, February 1, 2022 9:52 PM  
**To:** Michael Diaz  
**Subject:** Public Comment Regarding Mission Drive-In Replacement

Dear Michael Diaz,

My name is Jessica Gaytan and I have lived in Montclair, CA all 22 years of my life. I always regarded the Mission Tiki Drive-In as the city's secret gem. People from all over Southern California come to Montclair over the weekend as drive-ins are a rarity today. It also hosts the outdoor swapmeet and the livelihood of the vendors would be affected if the space was transformed into warehouses.

P18-1

However, I am especially concerned about the environmental consequences of the plan. I read the Environmental Impact Report and was appalled by the significant and unavoidable impacts section. Even if the warehouses use solar panels and electric energy, there will still be an increase in the greenhouse gas emissions due to the nature of the industry. The warehouses do not exist in a bubble- freight trucks must travel to and from the site, and these vehicles expel a large amount of air pollution. The Inland Empire already has the worst air quality in the country, and adding more warehouses to Montclair will only make it worse.

P18-2

If the new developers must transform the property, I would rather it become something that benefits the direct community, not worsen its health. I would love it if Montclair had more green public spaces where all members of the community can gather, share knowledge, participate in mutual aid, grow food, rest & dream, and more.

P18-3

Thank you for your time and consideration.

Best,  
Jessica Gaytan

**Subject:** warehouses in montclair

Hi Michael Diaz,

I'm writing to voice opposition to the addition of more warehouses in Montclair, specifically at the Mission Tiki Drive-in location. Beyond negative environmental and health consequences (which is already an increasing concern in the Inland Empire), the drive-in gives a sense of community to many. I hope to see more spaces like that in the future, not less.

Thanks kindly,  
dakota

**To:** Michael Diaz  
**Subject:** No more warehouses, stop destruction of mission Tiki drive-in

Hello Mr. Diaz,

I'm emailing you today asking you to advocate for your community's health. Please do not approve the environmental plan to turn the Mission Tiki Drive-in into a warehouse. I've lived near the Mission Tiki drive-in all my life and with our already poor air quality this would only make things worse. This would have a direct impact on me and now my young children. As well as the environmental impact, there are traditions worth keeping and I think a drive-in where family can come together with children of any age shouldn't be taken away. This also allows other families with financial constraints to be able to see a movie with their family. I looked forward to bringing my 2 children under 4 years old to see a movie with the comfort of knowing it wouldn't bother other movie goers as it would in a theater. This location has been a source of many happy memories from birthday parties, hanging out with friends to just a fun family night. To think that future generations will miss out on these experiences and instead have their air quality diminished is very disheartening and upsetting. Hasn't this community been through enough? Please fight for us and our health.

Thank you,  
Melissa Arias

**Sent:** Wednesday, February 2, 2022 11:07 AM  
**To:** Michael Diaz  
**Subject:** Insert Subject

Good afternoon Mr. Diaz,

I hope this email finds you well. My name is Alliah Badawi. I am writing with concerns I have about the development of the land that is currently occupied by the Mission Tiki Swap Meet and Drive-in. I have lived in Montclair my entire life. As a child, I went to the swap meet with my grandparents most weekends. I would walk around eating an ice cream while they shopped around for what they needed. To this day, I still go to the drive-in to watch newly released movies. It is much more comfortable and cheaper than an actual theater. Not to mention, with the current state of COVID-19, it's safer. I live a mere 1 minute(if that) drive from the drive-in and I simply cannot imagine Montclair without it. I know many citizens of Montclair share this sentiment.

I have also recently learned that there are currently 5 unoccupied warehouses in Montclair. It simply does not make sense to build 8 more, especially taking into consideration the effects this build will have on our environment. Even with mitigations to meet regulations, this project will have negative long-term effects on the health of members of the community. Before making a decision, I ask that you please visit the drive-in for a movie.

Please reference this petition that has garnered almost 10,000 signatures, organized by a fellow concerned citizen: <https://www.change.org/p/city-of-montclair-keep-mission-tiki-drive-in-i-m-montclair>

Thank you for your time.

Best regards,

Alliah Badawi

P21-1

**From:** Alondra Cobian  
**Sent:** Wednesday, February 2, 2022 7:01 PM  
**To:** Michael Diaz  
**Subject:** Warehouses replacing Montclair's Mission Tiki Drive-In

Hello Mr. Diaz,

My name is Alondra Cobian and I am a resident of the City of Montclair and I am studying Environmental Science at the Claremont Colleges. I'm writing this message to express my concerns about the new development project that is going to replace the Mission Tiki Drive-In and I hope you grant me time to read this email.

P22-1

Firstly, Montclair is over 70% Hispanic/Latinx meaning that these communities are the most susceptible to environmental injustices due to their socioeconomic background. Therefore, Implementing more warehouses is taking advantage of the language barriers, income inequality, and the humility of the people living in Montclair. Due to their lack of money and knowledge of the English language, it is extremely difficult for communities to speak against these issues and take action because of their vulnerable position.

P22-2

This project will not only cause environmental damage due to the amount of greenhouse gases that will be emitted but it will also increase the likelihood of chronic diseases in the community such as asthma rates. As of 2019, about 12% of the population in Montclair had asthma, which is higher than the percentage of people with asthma in the state of California. With the construction of warehouses, the asthma rates will only keep increasing and it may lead to other health issues as well. Montclair is already geographically disadvantaged due to the inversion layer (basically meaning that all of the pollution is not rising up to the atmosphere) so all of the air pollutants are staying near the surface, causing the air quality to exceed The World Health Organization's recommendations.

P22-3

Overall, It's incredibly unfair to develop these warehouses because it's contributing to the systemic problem of environmental racism and it's also ignoring people's voice in wanting to keep the Mission Tiki Drive-In. This place is important to the community of Montclair as a place of gathering and it also helps low-income people make money because it's a swap-meet during the day. Replacing it with warehouses is extremely contradictory to Montclair's motto saying that "The People Are the City" so I hope that this development will not happen with respect to the people themselves.

P22-4

Thank you for your time,  
 Alondra Cobian

**Subject:** No More Warehouses in Montclair

Evening Michael,

Montclair and the IE does not need any more warehouses. I know you've noticed the increasingly smoggy atmosphere here is Southern California, the unbearable traffic because of the thousands of semis clogging up the freeways. These effects are felt exponentially by communities of color, this includes the communities you represent.

No more Warehouses please,

Julieta M

Dear Michael Diaz,

I am writing to you as someone who lives 5 minutes away from the Mission Tiki. I am currently a student at Scripps College in Claremont, CA and as someone who comes from a single parent household, I began working with my mom at a very young age to be able to clothe and sustain ourselves in the Mission Tiki swapmeet. This place is a cultural fusion of many different cultural first-generation communities that survive off of this work and it should not be replaced by a warehouse, which robs us of our collective joy, depletes our bodies, and pollutes our air. Let this be instead a moment where a cultural center or a community garden can open up and provide joy for the low-income communities in the area. I sincerely write and hope that you will join us in the fight against Amazon to take over our communities. Our communities have already faced enough with the toll of the rent crisis and the warehouse boom in the Inland Empire to have yet more warehouses in that area contribute to respiratory illnesses.

A concerned constituent,  
Lizbeth Valdivia-Jauregui

Hello Michael,

I hope this email finds you well.

My name is Maricruz Santander, a resident of Montclair for over 10 years. I have been informed the Mission Tiki land has been sold, and there are talks about replacing it with warehouses. I am concerned due to the environmental effects on my community. I believe the land can be used to benefit the city, such as affordable housing, a park, or maintaining the drive-in.

Thank you so much for your time. I look forward to hearing from you.

Best,  
Maricruz Santander

**Subject:**

Hi my name is Milo Santamaria, and I grew up and have lived in Montclair pretty much my whole life. I'm asking for the city to reconsider replacing the Mission Tiki Drive-In. The Drive In is in an area that does not have a lot of safe places for kids to hang out, and has been an important part of our community for many years.

The city should consider what its residents want for our communities, instead of what will be more profitable for people who already have money and social power. Montclair is a city of mostly Latinx and working class families, yet it seems like the city has been developing things that will benefit people of higher classes from outside the community. Fancy malls and warehouses do not address the issues of our unhoused community members, or support families during these unprecedented times.

**Subject:** Warehouses in the city of Montclair

Hello Michael,

I hope you're having a fantastic day today. I just wanted to write you in regards to the warehouses that are being proposed to replace the Tiki drive in. As someone who has lived in and around Montclair for almost my entire life, I must say that this is incredibly disappointing news. As you know, many young adults and kids have been attending the tiki drive in as a place to be themselves with their friends while they watch movies. Many of them also attend the swap meet held at the tiki drive in on weekends along with their families. For many years the city has provided an amazing place for the citizens of Montclair, and surrounding cities, to come together and share their food, products, or even services throughout the pandemic and it's caused many great opportunities. When my father wanted to open a food stand during covid we were heart broken to hear that the swap meet was no longer going to be serving food due to the pandemic. Despite this, we still wanted to wait for the tiki drive in, because we knew in our hearts our community was going to receive us there with open arms. Michael I sincerely hope you take the time to listen to the community and help us take advantage of this wonderful spot that we may never ever have anywhere else. Thank you for your time,

Arianna Lerdo

**Subject:** Save Mission Tiki Drive In / Swampmeet

Getting rid of mission tiki drive in is going to affect our community and the surrounding cities. The drive in makes Montclair distinct, the only other nearby drive in is in Paramount. The drive in puts Montclair on the map, people have been coming here for years upon years putting money into this beautiful business. I have been coming here for years & have brought people from other cities to it and they couldn't believe a place like this existed and they fell in love. I would hate to see this place go & be replaced by a warehouse. There's so many other places you can put the warehouse, is this really what our world has come to? Replacing unique businesses with warehouses? I am beyond flabbergasted by this news and am deeply saddened and will do everything possible to save this business.

Good Afternoon Mr. Díaz,

Growing up in Pomona and as a current student at Claremont Mckenna College, the Mission Tiki drive-in has been a staple in my life- a place where many memories flourished. This is email however is not to encapsulate the Tiki drive-in, but to prevent warehouses to be built. The air quality in the Inland Empire devastes daily life and warehouses will only contribute to the environmental detrimental effects. Instead, a solution that is environmentally sustainable and honors the memory of the Mission Tiki drive-in.

Thank you,

**Subject:** Local opinion on the Mission Tiki Drive In

Hello,

I wanted to voice my opinion about turning the mission tiki Drive-In into warehouses. As a local from the area , I highly disagree with this. The mission tiki area also serves as outdoor swapmeet. Do you understand how many our locals depends on that swapmeet for their needs and jobs? They need that, and while the warehouses might open jobs or so you think , I can tell you that there are many warehouses around the city to not being used ; let alone Ontario has like many more if a company was looking for an empty warehouse. I don't think this will sit good with other locals , and I can tell you no one in our area is begging for more warehouse space. I think if you needed to use your money for a project, there are many other things the city of Montclair needs to improve on and the warehouses shouldn't be at the top. The project will also be causing significant environmental impact due to the conflict of the land use plan. It would be creating indirectly generate greenhouse gas emissions and I don't know if you've noticed but this planet is dying faster than we think. As an educated woman who receives her bachelors in immunology and microbiology , I have studied many things to help this world a better place in the science field and I know this is only put us steps back. Please consider what your local people need and what we need is not those warehouses.

Thank you  
Jessica G Gonzalez

**Subject:** Comments in regards to the Mission Tiki Drive In

Good Afternoon,

I am emailing in regard to the new warehouse development of the Montclair Tiki Drive In. I am fully against this project as this place is a nostalgic for many in the community. There are already so many warehouses in the inland empire. A big portion of the cities residents are questioning why this has to be done in the first place? I found out about this development through friends. They insisted that I also email you guys in regards to my opinion to this plan. Not sure if this helps anyone at all , however I would like to state that this will not be great for our communities moral. As COVID is still spreading, the Tiki Theatre was up and running for our enjoyment during these hard times. Not to mention how rare it is to come across a drive in theatre. I hope that you take my words in consideration as well as the communities who will be sad over the loss of a place such as this.

Thank you,  
Jessica Pereabras

**Subject:** NO MORE WAREHOUSES IN MONTCLAIR.

I am a concerned citizen of the local area in Montclair, in particular concerned with the planning and destruction of the Drive-In Tiki... as long as I can remember, the drive-in and swap meets that occur on these fairgrounds has been part of the atmosphere in this area for so long... it would be such a shame to not have such a great outlet still available for the citizens of the Inland Empire. I am completely devastated at even the thought that another warehouse could take over this space that holds so many dear memories for many of us. I ask you please from the bottom of my heart, to please please not take the drive-in away from us... the inland empire is constantly changing and it just breaks my heart to see something with so many memories just be torn down without at least voicing my opinion. Please do right by us and use this space for public use like, community centers, low-income housing, or even a park would benefit so many more than another stupid warehouse. Thank you so much for your time and hope you take this into consideration... have a great day!

Hi Mr. Diaz,

I have lived in the city of Ontario, which is borderline Montclair (on Benson) all my life. We do not need more warehouses! They will only worsen our health. Do you live in the city of Montclair? If so, why would you want to pollute our air even more? Or do you not live in the city of Montclair so you aren't as concerned? Whatever it may be, you need to consider putting a stop to the development of these warehouses! Please. The city of Montclair would greatly appreciate it and thank you.

**Subject:** Tiki Drive Inn

Today, I came across an article that says the Tiki Drive Inn is to be knocked down to build manufacturing and business buildings.

The drive ins been around for so long, people in their 50s can visit or drive by and get flashbacks of so many memories that they've forgotten about. Times where they were happy, miserable, or experienced something they could call the best moment of their life or even the worst. Times that they learnt something about themselves that could disappear with the Tikis. This place is a huge part of the community. It's a place of comfort in so many lives. It's horrible to hear that it's being taken away from us to feed America's economy.

The California Air Resources Board has commented that the warehouses could potentially increase exposure of air pollution to nearby communities. This could lead to major health impacts to those families who are already underprivileged.

We give you the power to make a change that wouldn't take anything away from the community. You're the only one who can do it.

**To:** Michael Diaz  
**Subject:** Tiki drive in: destruction, greed, and unaccountability

Hello

Apparently the public is to address "EIR, the project design, zone changes and potential impacts."  
And not the history, loss of culture, nor impact on the families/community, such as: loss of a gathering place for social engagement, loss of economy for locals, and loss of experience/memories for future youth to be apart of.

The city may as well tear down churches and libraries, for those eyesore warehouse "boxes" create more revenue than architecture and learning.

P39-1

Perhaps it's best to focus on the city of San Bernardino.

Where they allow hills to be torn down to accommodate JC Penny logistics. And Tesla, and Amazon. Displacing indigenous animals, such as the coyote, roadrunner, rattle snake, Jack rabbit, ground hawks. Let's talk about the traffic area, full of diesels, where youre lucky to make it through a traffic light, and even luckier if you can get your kids to school in time. The roads were not designed for them, yet you can go to the palm exit off the 215 and see the warped streets. Beautiful views blocked by warehouses. Noise pollution increased. A homeless influx.

All right next to a water tank and near a reservoir.

Feel free to travel up palm, the monstrous concrete "dump" that was to act as a base for structures, but is totally illegal and hazardous.

P39-2

Whoever decides this, should take a look at failed areas. Or having to live amongst it as part of the "deal"

Bet they wouldn't

P39-3

Thank you

Have a great day

**Subject:** Mission Tiki Drive-in demolition

Hello,

I want to express my complete opposition to the new development on the existing Mission Tiki Drive-in land. This development will take away a large vital community space. Swap meets are a significant part of local culture, especially to the many minority communities nearby. The drive-in is one of only a handful in the entire LA area, and we have seen how important it is through the pandemic as a way to escape the home in a safe manner.

All of this will be lost, and for what benefit? The community will not gain new gathering space from a giant warehouse. The community will not benefit from the huge increase in air and noise pollution. The community around the site is already underserved, and this will only add to inequity of those living nearby. This project has virtually no benefit and numerous negative impacts on the local community and as such should not be allowed to proceed.

Regards,  
Aaron McCain

**Subject:** Mission Tiki

Good morning Michael Diaz,

I'm writing this in objection to requested zoning changes that would allow a historic monument, Mission Tiki Drive-In, to be replaced by warehouses. The Inland Empire does not need more warehouses and this drive-in should be protected by the historical society, as it began as a single-screen operation back in 1956.

When the pandemic was at its peak and we were all complying with stay-at-home mandates, Mission Tiki was a safe haven for me and my partner (who is at higher risk if he were to contract Covid-19) to safely enjoy an activity that allowed us to escape our home. One of the only activities we could participate in as dining, museums, and gyms, etc., were not open. This is not only the case for me but for many Angelinos and residents of the Inland Empire. It was so popular, a number of articles were written like this one from LA Mag: <https://www.lamag.com/culturefiles/mission-tiki-drive-in-encore/>

I am aware that there are two other locations in Riverside, however, due to the traffic in this city, those locations are just too far for an Angelino/Inland Empire resident to be able to get to any time, but especially after work. I would ask that you please reconsider allowing the development of warehouses at this reprieve many of us hold dear as the pandemic continues to rage on.

Sincerely,  
Angela Groom

**To:** Michael Diaz  
**Subject:** Save Mission Tiki Drive In

Dear Michael Diaz

My name is Christine Ross. I've moved to Montclair in the summer of 2017. I'm writing on behalf of my family, friends, children and myself in regard to saving what should be a historical landmark, The Mission Tiki Drive In. The Mission Tiki Drive is my main factor as to why I purchased our home here in Montclair. Like most of the residents in Montclair and our neighbors in the surrounding areas, I've been a guest at the Mission Tiki Drive for many years. Not a customer but a guest. It's a second home to me. My mother would bring us to the drive in for summer fun or just to have a break during the week. My children ages 7 and 4 love watching movies at the Tiki Drive In. I've been bringing my 7-year-old since she was 2 years old. When I spoke to them about the possibility of the Drive In being demolished they started to cry and asked so many questions as to "why someone would take fun away from us". So as the request of my daughter I'm writing you this letter in hopes to save our Drive-In. I want to encourage them and others to speak up for what you believe in. It's hard to explain to my children without tears flowing from my eyes that our family tradition will be destroyed. We lost my mom in November of 2019 and the Tiki Drive In was her thing. Every summer since I've moved here, we have met with family and friends from Corona, Covina, San Diego, Brea, Palmdale, Fontana, Los Angeles and San Bernardino with their young children for Movie Night every weekend or when an appropriate movie for the children are playing. The Mission Tiki Drive In is where I drive to at night when my child can't sleep, we sit and watch a movie. It's where I go alone to decompress from my daily life to get safe alone time when I'm stressed. It's my husband and I have our date nights once a month. It's a place I feel safe and comfortable enough to take my kids alone. I refuse to take my kids to an indoor facility to watch a movie for the following reasons: 1. If they decide to become restless, I don't want to disturb others. 2. I don't want them to sit on filthy seats that can spread germs. 3. Because Covid I don't want to risk our health nor do I want to mask my children in their on O2 for hours. 4. Going to a movie theater is more expensive than the Tiki Drive In. Like other families, I can't afford \$11.00 per adult (at a Matinee price) \$10.50 per child, plus additional \$40 at the concession stand. That's ridiculous. At the Tiki Drive In prices for all are very reasonable and the food taste a lot better. As you know the Mission Tiki Drive In has been around for many years and it should be a landmark. This belongs to the community, our friends and neighbors. This is a place for people to enjoy a movie in comfort of their own vehicles. This is memories and traditions for most of us.

P45-1

P45-2

I ask that you please consider the families in Montclair, our community, along with our surrounding neighbors who aren't lucky enough to have a Drive-In in their city and save the Mission Tiki Drive In. For people who are too afraid to speak up, the people who believe their voices wont be heard and families who are starting their journey and would like to have a tradition in becoming apart of the Mission Tiki Drive In experience. Please don't kill our past, ruin our traditions and destroy our community.

I have plenty of ideas on how the new owner can profit from the Mission Tiki Drive In. Ways we can utilize the space and create jobs, especially for our locals who are walking distance to the facility.

P45-3

Let's save the Mission Tiki Drive In today and make it a Historical Landmark for all to enjoy for all of tomorrows.

P45-4

Greetings Mr. Diaz,

The Mission Drive in is such a point of pride not just for Montclair residents, but for Residents in the residing cities. I grew up watching films with my family here and what a joy it is to have raised my children doing the same. We caught the new Spiderman movie there last month and made a night of visiting our other favorite Montclair haunts. As a graduate of Montclair High School and resident of Claremont, this corner off of Mission and Ramona is an iconic jewel of our area which I share with visitors from out of state or from other countries. My wife and I would regularly take the exchange students that were staying with us for a few weeks to The Mission for an experience like no other. I would gladly donate money to the city for use as a grant or some such thing to keep this cultural landmark open to the public. We are losing our shared gathering spaces at such lightning speed, and The Mission is one of those sacred places where you can commune with the stars, your family and film. Please don't hesitate to be in touch if there is anything I can do to be of service regarding this.

Re: Draft Environmental Impact Report Mission Boulevard and Ramona Avenue Business Park Project SCH# 2021010005

To The City Manager of the Montclair, Mayor and City Council Members:

I am a parent of a 4-year-old and 9 year old. I am requesting the city to not move forward with demolishing the Mision Tiki Drive in. At the very least, please wait until after the pandemic is over. I would be fighting this proposal if it was about a warehouse expansion alone but the fact that it is not only a huge environmental impact that is being proposed but that it is also taking away a massive community benefit that has served this region for decades is egregious. This has been a safe place for families to enjoy during this pandemic. There are very few places that offer this type of safe family activity during this time of great strife. Why would the city take this benefit away from the children and families that depend on this location for recreation and entertainment? It is the only drive-in miles around. ***It feels like a slap in the face to all the parents that have been dealing with the mental health challenges of raising small children in a pandemic and the city manager and city council is choosing to make a profit rather than support the residents of the city they are supposed to serve. What is the urgency to build another warehouse right now? My children are feeling extremely sad and disappointed in you as elected officials and city staff that would disregard the children and families and build a facility that will actually damage their health and contribute to environmental damage and climate change impacts.*** There are severe environmental impacts to this project. Why are you as the the city manager, Mayor and City Council ok with this?

↑  
P49-1  
↓

The EIR says there will be a significant environmental impact. I am writing to demand: No new warehouses in Montclair! There are already unused warehouses. There are no tenants proposed for this new proposal. Even with mitigations, the project will have severe environmental consequences. The Inland Empire already has the worst air quality in the country due to the logistics industry, and adding more warehouses will increase the local air pollution. On top of the environmental reasons, a drive-in is a nostalgic place for many of us, and I'd hate to see it become a potentially empty warehouse.

↑  
P49-2  
↓

Simply building another massive warehouse in the Inland Empire will not create community wealth. In fact, the Inland Empire is already one of the nation's largest warehouse hubs and yet we still have the lowest per capita income in the state of California.

We cannot continue to allow logistics to take precedence over our working families. If we have to choose between building yet another giant warehouse in the Inland Empire or protecting the quality of life of our residents, we will always stand with local residents. Developers should not be able to lobby City of Montclair leaders so that they can make a substantial profit at the expense of our community members' health and economic well-being. Expanding warehouses in the Inland Empire will certainly grow truck traffic in our neighborhoods and communities and will further increase the spread of

↓  
P49-3  
↓

## Appendix B - Comment Letters

dangerous pollutants in our air—and ultimately hurt our children and families. Air pollution in our region is driven largely by the warehouse industry and contributes to 609 deaths and 1,371 major health incidents per year causing negative economic impacts for communities like Montclair. With the movement of diesel trucks in and out of warehouses in residential communities, children in schools and daycare centers are exposed to toxic diesel emissions that have long term impacts on their health well into adulthood.

Residents of Montcalir—as everyone else in the Inland Empire and California—deserve cleaner air and to not live just feet away from an enormous warehouse that will do little to help strengthen our local economy and uplift our neighbors, particularly as the quality of warehouse jobs continue to erode and the community is stuck with the negative environmental effects. We must reject the false choice that the residents of the Inland Empire must choose between either good jobs or clean air. The residents of our communities demand and deserve both.

Follow up questions:

Were all the permits were obtained for this project?

Is this use in violation of local, state or federal environmental laws? If the EIR says that the region is already in non-attainment how is it possible for this project to be built?

I look forward to your response.

**Subject:** Commenting on Mission Tiki Drive-In

Dear Michael Diaz,

The Mission Tiki Drive-In Theater has been cherished by Inland Empire residents for *66 years*. Although I'm a newer member of the community, I formed heartwarming memories watching movies at Mission Tiki with my loved ones, and I want to continue making memories there!

P50-1

But more importantly, I am very concerned about the unavoidably significant environmental impact of the new development project. According to the American Lung Association's State of the Air report in 2019, **San Bernardino county contains some of the most ozone-polluted cities in the U.S.** We don't want more air pollution! This is detrimental to people's health, which should be a top priority for the future of IE.

P50-2

We would like to know that you're committed to minimizing industrial air pollution and greenhouse gas emissions as much as possible, and this project will NOT help with that commitment.

Thank you for your time,  
Isabella Raman

**Subject:** Mission/Tiki drive in

Hello honorable Mayor

im just sending you and council members my concerns and ideas about the drive in. I know it's gone, I just want to try and remove and preserve what we can of it. I lived in montclair fr 54 years and still own the house at 5616 Alamos st. I now live in Rancho Cucamonga but Montclair is my heart and my home forever.I plan on being at the next council meeeting.Im looking forward to meeting those of you there that continue to take care of the matters of the ever growing home town of montclair and I thank you all

my letter ...

First I'd like to point out that **Montclair** itself does not have a history or historic things that go way back to the 1800s, some but not much. Montclair only got its name in 1956 we don't have the historical buildings such as Ontario or Pomona but we are proud of the many things we have had here in the past. We need to keep them or parts of what is left of them. The subject of this letter is to ask of you to see about saving and preserving what we can of the Mission AKA Tiki Drive-In. I believe this is a matter of the city requesting the new owner of the property to let us go in and get the tiki statues. They are hollow and very light I checked them myself. I would like us to relocate the ticket huts and parts of the projector building such as the butter cart, dispensers and some of the decorative wall coverings in the snack bar. I didn't go upstairs to the projection room; however we should look into removing and preserving the projectors they may not have a resale value for the city to sell except perhaps to a private collector. Something you may want to ask the owner if we can have them before a private collector can ask first. If there are four of them the city should keep at least one of them. I know the property is sold and there will be no more drive in but please let's not repeat the mistake of not preserving such a big part of the Inland Empire's memories and letting those artifacts get sold or destroyed like parts of the Valley Drive- In and neon sign. I went to the Mission Drive In myself in January and spoke to the employees and they were told they have at least till the month of May. Time is passing by quickly and the new land owners may sell or destroy whatever we would like to keep and preserve of the Mission /Tiki Drive- In if we don't express interest in saving them ourselves.

**Subject:** Zoning change for DEIR (SCH 2021010005)

Good Afternoon Mr. Diaz,

My name is Mohammad Izadpanah and I am the owner of parcel 1012-151-02-0-000 located at 4349 State St. in the City of Montclair. I received the public notice that the City of Montclair mailed me. The current zoning of my property is industrial. Is the City of Montclair planning to change the zoning of my property because of this development next door? Will the zoning for my parcel remain the same? What am I allowed to build in this 7000 SQFT lot?

*Best Regards,*

*Mohammad Izadpanah / Realtor*

**Subject:** Mission Boulevard and Ramona Avenue Business Park Project - Opposition

Dear Michael Diaz,

I am writing, as a concerned local community member, to express my opposition to the Mission Boulevard and Ramona Avenue Business Park Project.

I read about the impact this project will have on air quality and want to urge you to prioritize the community's health. There is already so much pollution and air quality, in my opinion, falls below "Good" frequently. I will spare you a lengthy plea accompanied by supporting reports (from the SCAQMD, CAR, etc.), because I'm sure you are well aware.

Lastly, from a sentimental standpoint, losing Mission Tiki Drive-In would be a devastating loss. That place is our history. A good history. One of family and community. However, even if the drive-in must leave, please find alternative plans for the property. My vote would be for another drive-in, if the Mission Tiki must sell.

Thank you for your time and consideration,  
Stacy Brzozowski

**Subject:** Mission Tiki Drive-In

To Whom It May Concern,

I've appreciated having the Mission Tiki Drive-In for family outings for myself, my wife and my kids. As drive-ins have disappeared across the country, it's been nice having this one nearby, and in the early days of the pandemic, when nothing felt safe, it was a godsend to have this no-touch experience so close at hand. I urge the City of Montclair to consider doing whatever they can to maintain this treasure. It's a great place for people of all walks of life to come together. And it contributes to the quality of life for the people of Montclair and the surrounding communities.

Thank you for your time.

Sincerely,  
Ben Benjamin

**Subject:** Proposed Mission Boulevard and Ramona Avenue

Dear Mr. Michael Diaz and Members of the city of Montclair,

I am writing in regards to the proposed demolition of the Mission Tiki Drive In Theater. Please do not approve this development. Do not re-zone this property. As your draft EIR states this action will impact the environment and the public in harmful ways causing pollution through emissions like greenhouse gases, and the transporting, use and disposal of hazardous materials. There are 4 schools within 1/4 mile of the this site, this is hazardous to these children and anyone else in the vicinity of this project as well as disruptive due to the noise it will cause.

Though this property is not listed in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Code section 5020.1(k) it should be. The city of Montclair has the power to do this and bend to the will of the people to save this treasured icon of Americana. Please consider the culture of our community, our families, our children and your legacy as you deliberate this decision.

Regards,  
Catherine Guffey

**Subject:** MISSION Tiki Drive In

Evening Mr. Diaz,

I am writing in regard to the proposal that would shutter the Mission Tiki Drive in and turn this plot of land into warehouse facilities. The city of Montclair has many vacant warehouse facilities currently. The proposal would not only vanquish a crown jewel of Montclair, but also leave a much larger carbon footprint than the current use. Generations have cherished the Mission Drive in including mine. I came from a working class family, and the treat of going to Vince's Spaghetti in the 70's and then a drive in with my family is something that I did for my family as well (and continue to do). My wife and I have taken innumerable exchange students that we have put up over the years to The Mission for an experience that they will not find in their country. This corner of Ramona & Mission should be a landmark, not the ghost of a gathering place for so many Inland families. Please see that my voice is heard regarding this and contact me should you have any questions. Thank you for your time regarding this matter.

**Subject:** Mission Tiki Drive-In - don't allow this cultural gem to be replaced with a business park!

Dear Mr. Diaz,

Don't let the Mission Tiki Drive-In slip away, this cultural gem is worth fighting for. There are few drive-in theaters remaining, and the Mission Tiki draws visitors from near and far for this reason and more. Sharing conversation and food before a movie is a cherished experience for children and adults, and as we have learned dearly over the past two years, is to be valued.

|  
|  
| P59-1

The draft EIR states this project would have a "significant and unavoidable impact...on air quality, greenhouse gas emissions, and land use and planning." It seems a no-brainer to me to opt for maintaining a landmark that promotes community and shared social experiences in lieu of yet another business park that will negatively impact our environment.

|  
| P59-2

I've been going to the Mission Tiki with my children since they were toddlers (2006) , and we've been so grateful to have been able to continue going there to watch movies safely during the pandemic (once it reopened). But, the Mission Tiki has a much longer history than the pandemic, which is worth conserving. The Mission Tiki offers an affordable way for families and friends to safely enjoy entertainment and I hope the city of Montclair realizes the gem that it has in the Mission Tiki and opts not to replace it with a business park.

Sincerely,

Kristen Conway-Gomez

**Subject:** Get rid of the Mission Tiki

Mike Diaz and Members of the Montclair Planning Commission

I support the removal of the Mission Tiki Drive-in-Theater and the building of a warehouse and business complex on the northwest corner of Mission Blvd and Ramona Ave. Many are calling the old and antiquated Mission Tiki Drive-in-Theater, a historic landmark that needs to be preserved. Something, just because of its age, does not make it historic or a landmark. The Mission Tiki Drive-in-Theater may be known to many in this city, but not to far outside our area. Many of the patrons who went to the Mission Tiki Drive-in-Theater have long since gone and moved away from the area.

I am one who has been to the Mission Tiki Drive-in-Theater, and in more than 60 years in this area, I have been to the theater maybe four times. I found the experience uncomfortable and distracting, taking away from the movie-going experience.

There are many who took advantage of the drive-in movie during the pandemic, but as this pandemic comes to an end, so will the attendance at the Mission Tiki Drive-in-Theater. The people who are trying to save the Mission Tiki Drive-in-Theater will not support this business in the future. If these people truly want to save this business, then they should invest 34 million dollars and buy it, (something they will not do). They can then turn it into a viable movie experience for the masses that will provide a profitable return on their investment (yeah, right). THIS WILL NOT HAPPEN!

The theater industry currently struggles to attract customers—competition from big-screen home televisions and theaters, Netflix, Amazon Prime, and the Disney Channel. People can now experience this entertainment experience at home.

Montclair has the AMC Dine-in Theater, a luxury experience with comfortable seats; it is climate-controlled with many big-screen options to choose from. Given a choice, people will attend a walk-in theater more than a relic of the 1950s. There is a reason these drive-in theaters have closed throughout the country. When a business can no longer make a profit, the land is sold, and something new and hopefully better takes its place. Montclair has many examples of this. Kmart was an old, outdated shopping model that was torn down and replaced by Costco. Montgomery Wards closed down and it was replaced by Target, and the Broadway went out of business and was replaced by the AMC Dine-in theater. All of these not-profitable businesses were classic landmarks, if we had saved them, they would be a blight on our city had they been preserved. The Sears Store now sits empty, closed down by its parent company. Sears has been around longer than the drive-in movies and has more historical significance. Do we declare the Sears Building a historic landmark? I THINK NOT!

The new owners of the Mission Tiki Drive-in-Theater property paid good money and are investing in their future and the future of Montclair. As a resident, I want to see the new property owners succeed and prosper, which in turn will benefit our great city. I hope the city moves forward without delay to bring this project to completion.

**Subject:** Reconsider the demolition of the Mission Tiki Please

Dear Mr. Diaz,

Hope this message finds you well. I am dearly sadden to hear that there are plans to demolish the Mission Tiki Drive in. I ask for those in power to reconsider please. That is one of the main reasons why I still go back to my hometown. Growing up in Ontario, I remember my mom(who didn't know how to drive)would use the outdoor swapmeet that is hosted there as well as a form to make us exercise and at certain times in life when we were "good kids" she would make my dad drive us to the Tiki. It was not only a place to spend with family but also a place to comfortably hang out with friends, chill, and watch a movie. It is a true landmark and hopefully it continues to be with the help and support of you. Thank you for your time and consideration.

Kindly,  
Gissell Padilla

**Subject:** Mission Tiki Drive-in Redevelopment

Hello,

As a passionate film goer and drive-in theater enthusiast I find the idea of redeveloping the Mission Tiki site in favor of more industrial facilities appalling especially at a time when our economy and soaring costs of living have dreadful impacts on family activities.

The Mission Tiki serves a greater purpose, it brings communities together. It encourages communal gatherings and shared experiences. And it does so at a price everyone can afford unlike the huge conglomerates such as Disneyland or Universal Studios that continually outprice most families' disposable income.

The Mission Tiki is a jewel in an otherwise challenging world.

Save the Mission Tiki Drive-in. Do the right thing.

**Subject:** Tiki Drive In

Dear Mr. Diaz,

The demolition of the Tiki Drive-In is not only a destruction of fond family members and the history of Montclair but, according to reports, what is planned to take its place will have negative effects on the air quality of the town. This not only impacts our neighbors, many of which travel for one of the only remaining drive-ins in the area, but ourselves.

I hope there is a possibility of changing this outcome.

-Jenna

*Subject: Comments on Mission Blvd. and Ramona Ave. Business Park EIR (SCH NO. 2021010005)*

Dear Mr. Diaz,

Thank you for the opportunity to comment on the Environmental Impact Report (EIR) for the proposed Mission Boulevard and Ramona Avenue Business Park. Please accept and consider these comments on behalf of Golden State Environmental Justice Alliance (GSEJA). Also, GSEJA formally requests to be added to the public interest list regarding any subsequent environmental documents, public notices, public hearings, and notices of determination for this project. Send all communications to Golden State Environmental Justice Alliance P.O. Box 79222 Corona, CA 92877.

O1-1

**1.0 Summary**

The project proposes the construction and operation of approximately 513,295 square feet (sf) of flexible space for light manufacturing and distribution uses across eight buildings on a 26.2 net acre site. A General Plan Amendment is proposed to change the project site's General Plan land use designation. The southern portion of the project site includes Buildings 1-6 and is proposed to change from General Commercial to Industrial Park. The norther portion of the project site includes Buildings 7 and 8 and is proposed to change from General Commercial to Limited Manufacturing. A Zone Change is also required. The project proposes to change the Zoning designation from M1 Limited Manufacturing and MIP Manufacturing Industrial to M1 Limited Manufacturing for Buildings 7 and 8. Building 1-6 are proposed to change from C3 General Commercial and M1 Limited Manufacturing to MIP Manufacturing Industrial.

O1-2

Michael Diaz  
February 22, 2022  
Page 2

## 2.0 Project Description

The EIR does not include a floor plan, grading plan, detailed site plan, or elevations for buildings 1-5. The basic components of a Planning Application include a site plan, floor plan, grading plan, and elevations. The site plan provided in Exhibit 3-8 does not provide any detailed information such as the earthwork quantity notes, parking requirements, site coverage, floor area ratio, etc. The EIR has excluded the proposed floor plans, a detailed site plan, elevations for buildings 1-5, and a grading plan from public review, which does not comply with CEQA's requirements for adequate informational documents and meaningful disclosure (CEQA § 15121 and 21003(b)). Incorporation by reference (CEQA § 15150 (f)) is not appropriate as these documents contribute directly to analysis of the problem at hand. Providing this information is vital as the Project Description states, "Grading would occur across the 27.74-acre Project site and result in approximately 139,302 cubic yards of cut and 103,261 cubic yards of fill," and there is no method for public verification of this statement in the EIR. The EIR must be revised to include all application items for review, analysis, and comment by the public and decision makers.

O1-3

## 4.3 Air Quality, 4.6 Energy, and 4.8 Greenhouse Gases

Please refer to attachments from SWAPE for a complete technical commentary and analysis.

O1-4

The EIR does not include for analysis relevant environmental justice issues in reviewing potential impacts, including cumulative impacts from the proposed project. This is especially significant as the surrounding community is highly burdened by pollution. According to CalEnviroScreen 4.0<sup>1</sup>, CalEPA's screening tool that ranks each census tract in the state for pollution and socioeconomic vulnerability, the proposed project's census tract (6071000303) ranks worse than 91% of the rest of the state overall in environmental pollution burdens. The surrounding community bears the impact of multiple sources of pollution and is more polluted than average on every pollution indicator measured by CalEnviroScreen. For example, the project census tract ranks in the 77th percentile for ozone burden, the 93rd percentile for PM 2.5 burden, and the 61st percentile for diesel particulate matter. All of these environmental factors are typically attributed to heavy truck activity in the area.

O1-5

Further, the census tract is a diverse community including 86% Hispanic and 6% Asian-American residents, which are especially vulnerable to the impacts of pollution. The community has a high rate of low educational attainment, meaning 92% of the census tract over age 25 has not attained

<sup>1</sup> CalEnviroScreen 4.0 <https://oehha.ca.gov/calenviroscreen/report/calenviroscreen-40>

Michael Diaz  
February 22, 2022  
Page 3

a high school diploma, which is an indication that they may lack health insurance or access to medical care. Medical care is vital for this census tract as it ranks in the 47th percentile for incidence of cardiovascular disease, 55th percentile for incidence of asthma, and 44th percentile for babies born at a low birth weight.

↑  
O1-5  
Cont.

Additionally, the project's census tract (6071000303) is identified as a SB 535 Disadvantaged Community<sup>2</sup>, which is not discussed or presented for analysis in the EIR.

↑  
O1-6

The State of California lists three approved energy compliance modeling softwares<sup>3</sup> for non-residential buildings: CBECC-Com, EnergyPro, and IES VE. CalEEMod is not listed as an approved software. The CalEEMod energy calculations in the EIR do not comply with the 2019 Building Energy Efficiency Standards and under reports the project's potentially significant GHG and Energy impacts to the public and decision makers. Since the EIR did not accurately or adequately model the energy impacts in compliance with Title 24, a finding of significance must be made. A revised EIR with modeling in one of the approved software types must be circulated for public review in order to adequately analyze the project's potentially significant environmental impacts. This is vital as the EIR utilizes CalEEMod as a source in its methodology and analysis, which is clearly not one of the approved softwares.

↑  
O1-7

#### 4.8 Land Use and Planning

Table 4.8-2: Consistency with 2020-2045 RTP/SCS Goals erroneously finds complete consistency with SCAG's Connect SoCal RTP/SCS document. The project requires a change in land use designation to proceed, which indicates that it is not consistent with the analysis provided in Connect SoCal. Due to errors in modeling as noted throughout this comment letter and the EIR's determination that the project will significant and unavoidable impacts to Air Quality and Greenhouse Gas Emissions, the proposed project is directly inconsistent with Goal 5 to reduce greenhouse gas emissions and improve air quality, Goal 6 to support healthy and equitable communities, and Goal 7 to adapt to a changing climate. The EIR must be revised to update the finding of significance to include inconsistency with SCAG's Connect SoCal RTP/SCS.

↑  
O1-8

The EIR does not provide any meaningful discussion or analysis regarding the proposed General Plan amendment and Zone Change. The EIR concludes that the project will not result in any significant impacts because "Approval of the proposed General Plan Amendment would eliminate any potential inconsistency between proposed land uses and the site's existing land use designations." Relying upon approval of the proposed General Plan amendment to determine there

↑  
O1-9

## Appendix B - Comment Letters

Michael Diaz  
February 22, 2022  
Page 4

will be no environmental impacts circumvents the required process of CEQA analysis. The EIR is inadequate as an informational document and must be revised. This is vital as the EIR includes misleading consistency analysis with General Plan goals, policies and objectives, including the following:

↑  
O1-9  
Cont.

Policy CE-1.1.6. Keep traffic on all streets in balance with the capacity of the circulation system by regulating the intensity and density of land use in conformity with Level of Service "D" or better performance during typical weekday peak hours.

↑  
O1-10

The EIR concludes the project is consistent with this policy even though "based on the results of the TIA, the Project would not be consistent with the City's General Plan operational standards (Policy CE-1.1.6) at the Silicon Avenue/Mission Boulevard intersection under the Existing plus Project and Opening Year (2045) plus Project conditions." The EIR provides mitigation for this "As part of the Project's conditions of approval, the City will require that the applicant work with the City to help implement an improvement to address this condition to improve to LOS "D" or better performance during typical weekday peak hours." This mitigation measure is not listed in Table 1-1. Summary of Project Impacts and Mitigation Measures. Additionally, this represents deferred mitigation in violation of CEQA as there is no evidence that mitigation will be implemented. The language utilized is uncertain and does not provide a specified timeline or list of improvements to be made. Implementation of this mitigation measure is implementation of the project without CEQA review. The EIR must be revised to state the project is inconsistent with this General Plan policy and provide either a finding of significance or specific mitigation to achieve LOS D or better at the Silicon Avenue/Mission Boulevard intersection.

↑  
O1-11

Goal AQ-4.0.0. Reduce to a minimum particulate emissions from such uses as construction, operation of roads, and buildings.

↑  
O1-12

Objective AQ-2.2.0. Use incentives, regulations, and transportation Demand Management in cooperation with other jurisdictions in the South Coast Air Basin to reduce the vehicle miles traveled for auto trips.

↑  
O1-13

AQG-1.0.0. To achieve coordination of air quality improvements within the portion of the South Coast Air Basin (SCAB) in San Bernardino County and improve air quality through reductions in pollutants.

↑  
O1-14

The EIR concludes the project is consistent with the above items emissions will be reduced to the maximum extent feasible. However, emissions still exceed the applicable thresholds and result in significant and unavoidable Air Quality impacts. The EIR must be revised to include this information in the consistency analysis and find the project inconsistent with these items.

↑  
O1-15

Michael Diaz  
February 22, 2022  
Page 5

Additionally, the project is inconsistent with the following applicable items from the General Plan and EIR has not provided a consistency analysis:

01-16

Goal AQ-3.0.0. To achieve a pattern of land uses which can be efficiently served by a diversified transportation system and development projects which directly and indirectly generate the minimum feasible air pollutants.

01-17

Objective AQ-3.1.0. Continue to ensure that the fundamental City documents, including the General Plan, achieve a community which is efficiently balanced in terms of jobs/housing and which adequately prepares for management of growth.

01-18

The EIR does not discuss or analyze Section 11.84 - Zoning Amendments of the City's Municipal Code. Section 11.84 requires the Planning Commission to make findings that "the public necessity, convenience, general welfare, or good zoning practices require the proposed change." The EIR must be revised to include this information for discussion and analysis.

01-19

#### 4.10 Transportation

The EIR states that "in keeping with the intent of Section 21099 of the Public Resource Code and Section 15064.3, subdivision (a) of the CEQA Guidelines (which specify that automobile VMT is the primary metric that should be evaluated), the *extra step of removing heavy truck VMT* from SBTAM was undertaken provide for a project level analysis that most appropriately meets the intent of SB 743." The EIR also sources the OPR's 2018 Technical Advisory<sup>4</sup> that states "here, the term 'automobile' refers to on-road passenger vehicles, specifically cars and light trucks." However, the purpose of the OPR Technical Advisory document is purely advisory, stating in its introduction:

"The purpose of this document is to provide advice and recommendations, which agencies and other entities may use at their discretion. This document does not alter lead agency discretion in preparing environmental documents subject to CEQA. This document should not be construed as legal advice."

01-20

The OPR document is not a legal interpretation, court decision, or amendment to the CEQA statute that clarifies the definition of automobile. The term "automobile" is not defined in the CEQA statute and application of the OPR interpretation is speculative and does not provide an analysis of the "worst-case scenario" for environmental impacts. Widespread public understanding and perception indicates that trucks, including medium and heavy-duty trucks associated with the industrial nature of warehouse operations, are automobiles. The EIR must be revised to remove

<sup>4</sup> Governor's Office of Planning and Research Technical Advisory on Evaluating Transportation Impacts in CEQA [https://opr.ca.gov/ceqa/docs/20190122-743\\_Technical\\_Advisory.pdf](https://opr.ca.gov/ceqa/docs/20190122-743_Technical_Advisory.pdf)

Michael Diaz  
February 22, 2022  
Page 6

this misleading information and include all truck activity for quantified VMT analysis. The operational nature of industrial/warehouse uses involves high rates of truck/trailer VMT due to traveling from large regional distribution centers to smaller industrial parks and then to their final delivery destinations. Appendix B-1 within the Air Quality Appendix indicates that the project will generate 1,249 average daily trips and 11,727,158 annual VMT (11,727,158 / 365 days = 32,129 daily total VMT). The Appendix finds that trucks specifically will generate 487 average daily trips and 7,110,200 annual VMT (7,110,200 / 365 days = 19,480 daily total VMT). This is exponentially higher than the VMTs reported in the EIR. The VMT generated by trucks accounts for 60% of the project's total annual VMT and it is excluded for analysis in the EIR. The project's truck/trailer activity is unable to utilize public transit or active transportation and it is misleading to the public and decision makers to exclude the truck/trailer activity from VMT analysis. A revised EIR must be prepared to reflect a quantified VMT analysis that includes truck/trailer activity to adequately and accurately analyze the potentially significant project transportation impacts.

O1-20  
Cont.

## 5.0 Effects Found Not to be Significant

### 5.10 Population and Housing

The EIR does not provide a quantified analysis of the construction workforce generated by the proposed project. The EIR states that “the number of construction workers needed during any given period would largely depend on the specific stage of construction. These short-term positions are *anticipated* to be filled *primarily* by construction workers who reside in the Project site's *vicinity*; therefore, construction of the Project would not generate a permanent increase in population within the Project area.” The “vicinity” of the project site is undefined and relying on the entire labor force within an undefined distance, potentially the greater SCAG region, to fill the project's construction and operational jobs will increase VMT and emissions during all phases of construction and operations and a revised EIR must be prepared to account for longer worker trip distances.

O1-21

The EIR concludes that the project will generate 282 employees during project operations based on the SCAG Employment Density Study. However, the City's 1999 General Plan EIR<sup>5</sup> (Table 2: General Plan Update Build-Out Projections) provides adopted local-level data that must be used. Table 2 states that the City will grow by 5,822 jobs, 1,455,250 square feet of new non-retail development, and non-retail development generates 4 employees per 1,000 square feet of building area (1 employee per 250 square feet of building area). Utilizing Table 2's employment factor of

O1-22

<sup>5</sup> Montclair 1999 combined General Plan and EIR  
[https://cloud.cityofmontclair.org/main.html?download&weblink=d9839f79a4f97e12ef5124cfc6527d13&realfilename=City\\$20of\\$20Montclair\\$20General\\$20Plan.pdf](https://cloud.cityofmontclair.org/main.html?download&weblink=d9839f79a4f97e12ef5124cfc6527d13&realfilename=City$20of$20Montclair$20General$20Plan.pdf)

Michael Diaz  
February 22, 2022  
Page 7

1 employee per 250 square feet of non-retail development for analysis results in the following calculation:

Total Building Area: 513,295 sf / 250 = 2,054 employees

Utilizing the City General Plan local data, the proposed project will generate 2,054 employees. The EIR must be revised to use this data in its methodology. Additionally, the EIR must provide a cumulative discussion to analyze if the proposed project has exceeded General Plan growth projections. Given that the project requires a General Plan Amendment and Zone Change to proceed with the proposed annexation, it is clear that the growth generated by the proposed project was not planned for in the City's General Plan and exceeds growth forecasts. The EIR must be revised to include this analysis for discussion and include a finding of significance.

Further, SCAG's Connect SoCal Demographics and Growth Forecast<sup>6</sup> notes that the City will add 1,600 jobs between 2016 - 2045. Utilizing the City General Plan local data of 2,054 employees, the project represents 128% of the City's employment growth from 2016 - 2045. SCAG's Growth Forecast notes that the City's population will increase by 10,500 residents between 2016 - 2045. Utilizing the City General Plan local data of 2,054 employees, the project represents 19.5% of the City's population growth from 2016 - 2045. A single project accounting for this amount of the projected employment and/or population over 29 years represents a significant amount of growth. The EIR must be revised to include this analysis, and also provide a cumulative analysis of projects approved since 2016 and projects "in the pipeline" to determine if the project will exceed SCAG's employment growth forecast for the City. Additionally, the EIR must also provide demographic and geographic information on the location of qualified workers to fill these positions in order to provide an accurate environmental analysis.

**7.0 Alternatives**

The EIR is required to evaluate a reasonable range of alternatives to the proposed project which will avoid or substantially lessen any of the significant effects of the project (CEQA § 15126.6.) The alternatives chosen for analysis include the CEQA required "No Project" alternative and only two other alternatives (Distribution Project per Limited Manufacturing Zoning Designation Project and 20% Reduced Development Intensity Project). The EIR does not evaluate a reasonable range of alternatives as only two alternatives beyond the required No Project alternative are analyzed. The EIR does not include an alternative that meets the project objectives and also eliminates all of the project's significant and unavoidable impacts. The EIR must be revised to include analysis of

<sup>6</sup> SCAG Connect SoCal Demographics and Growth Forecast adopted September 3, 2020

## Appendix B - Comment Letters

Michael Diaz  
February 22, 2022  
Page 8

a reasonable range of alternatives and foster informed decision making (CEQA § 15126.6). This could include alternatives such as development of the site with a project that reduces all of the proposed project's significant and unavoidable impacts to less than significant levels, and/or a project in compliance with existing General Plan and Zoning designations.

### Conclusion

For the foregoing reasons, GSEJA believes the EIR is flawed and an amended EIR must be prepared for the proposed project and recirculated for public review. Golden State Environmental Justice Alliance requests to be added to the public interest list regarding any subsequent environmental documents, public notices, public hearings, and notices of determination for this project. Send all communications to Golden State Environmental Justice Alliance P.O. Box 79222 Corona, CA 92877.

Sincerely,

Gary Ho  
Blum Collins & Ho, LLP

**Subject: Comments on the Mission Boulevard and Ramona Avenue Business Park Project (SCH No. 2021010005)**

---

Dear Mr. Ho,

We have reviewed the January 2022 Draft Environmental Impact Report (“DEIR”) for the Mission Boulevard and Ramona Avenue Business Park Project (“Project”) located in the City of Montclair (“City”). The Project proposes to demolish all existing structures and construct 513,295-SF of industrial space and 723 parking spaces on the 27.74-acre site.

Our review concludes that the DEIR fails to adequately evaluate the Project’s air quality, health risk, and greenhouse gas impacts. As a result, emissions and health risk impacts associated with construction and operation of the proposed Project are underestimated and inadequately addressed. An updated EIR should be prepared to adequately assess and mitigate the potential air quality, health risk, and greenhouse gas impacts that the project may have on the surrounding environment.

### **Air Quality**

#### **Unsubstantiated Input Parameters Used to Estimate Project Emissions**

The DEIR’s air quality analysis relies on emissions calculated with CalEEMod.2016.3.2 (p. 4.1-1).<sup>1</sup> CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes

<sup>1</sup> CAPCOA (November 2017) CalEEMod User’s Guide Version 2016.3.2, [http://www.aqmd.gov/docs/default-source/caleemod/01\\_user-39-s-guide2016-3-2\\_15november2017.pdf?sfvrsn=4](http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4)

O1-26

O1-27

be justified by substantial evidence. Once all of the values are inputted into the model, the Project’s construction and operational emissions are calculated, and "output files" are generated. These output files disclose to the reader what parameters are utilized in calculating the Project's air pollutant emissions and make known which default values are changed as well as provide justification for the values selected.

When reviewing the Project’s CalEEMod Output files, provided in Appendix B-1 and B-2 to the DEIR, we found that several model inputs were not consistent with information disclosed in the DEIR. As a result, the Project’s construction and operational emissions are underestimated. Therefore, an updated EIR should be prepared to include an updated air quality analysis that adequately evaluates the impacts that construction and operation of the Project will have on local and regional air quality.

O1-27  
Cont.

*Overestimated Architectural Coating Construction Phase Length*

Review of the CalEEMod output files demonstrates that the “Oakmont Mission and Ramona Industrial Park,” “Oakmont Mission and Ramona Industrial Park Mitigated,” “Oakmont Mission and Ramona Industrial Park LST,” “Oakmont Mission and Ramona Industrial Park HRA,” and “Oakmont Mission and Ramona Industrial Park HRA Mitigated” models include a manual change to the default architectural coating phase length (see excerpt below) (Appendix B-1, pp. 6, 48, 84, 121, 163, 198, 232, 268; Appendix B-2, pp. 6, 49, 1032).

Table Name	Column Name	Default Value	New Value
tblConstructionPhase	NumDays	35.00	68.00

As a result of this change, the model includes the following construction schedule (see excerpt below) (Appendix B-1, pp. 12, 54, 90, 126, 167, 202, 238, 274):

Phase Number	Phase Name	Phase Type	Start Date	End Date	Num Days Week	Num Days
1	Demolition	Demolition	10/4/2021	11/12/2021	5	30
2	Site Preparation	Site Preparation	11/13/2021	12/10/2021	5	20
3	Grading	Grading	12/11/2021	2/11/2022	5	45
4	Building Construction	Building Construction	2/12/2022	10/20/2023	5	440
5	Paving	Paving	10/21/2023	12/8/2023	5	35
6	Architectural Coating	Architectural Coating	12/9/2023	3/13/2024	5	68

O1-28

As you can see in the excerpt above, the architectural coating phase length was increased by 94%, from the default value of 35 to 68 days. As previously mentioned, the CalEEMod User’s Guide requires any changes to model defaults be justified.<sup>2</sup> According to the “User Entered Comments & Non-Default Data” table, the justification provided for this change is: “Based on applicant provided information” (Appendix B-1, pp. 4, 46, 82, 230, 266).

<sup>2</sup> “CalEEMod User’s Guide.” California Air Pollution Control Officers Association (CAPCOA), May 2021, available at: <https://www.agmd.gov/caleemod/user-s-guide>, p. 1, 14.

# Appendix B - Comment Letters

However, this is incorrect, as the DEIR provides the following construction schedule (see excerpt below) (p. 3-13):

- Demolition: October 4, 2021–November 12, 2021 (2 months)
- Site Preparation: November 13, 2021–December 10, 2021 (1 month)
- Grading: December 11, 2021–February 11, 2022 (3 months)
- Building Construction: February 12, 2022–October 20, 2023 (20 months)
- Paving: October 21, 2023–December 8, 2023 (2 months)
- Architectural Coating: December 9, 2023–January 26, 2024 (2 months)

As demonstrated above, the architectural coating phase end date should have been January 26, 2024, which is consistent with the CalEEMod default phase length of 35 days. As such, the architectural coating phase length of 68 days is overestimated and inconsistent with the information provided in the DEIR.

This inconsistency presents an issue, as the construction emissions are improperly spread out over a longer period of time for the architectural coating phase. Thus, by extending the architectural coating phase length, the model assumes there are a greater number of days to complete the construction activities required by this phase. As such, there will be less construction activities required per day and, consequently, less pollutants emitted per day. As a result, the Project’s peak daily emissions associated with architectural coating construction phase are underestimated and the model should not be relied upon to determine Project significance.

### *Unsubstantiated Reductions to CO<sub>2</sub>, NO<sub>2</sub>, and CH<sub>4</sub> Intensity Factors*

Review of the CalEEMod output files demonstrates that the “Oakmont Mission and Ramona Industrial Park,” “Oakmont Mission and Ramona Industrial Park Mitigated,” “Oakmont Mission and Ramona Industrial Park LST,” “Oakmont Mission and Ramona Industrial Park HRA,” and “Oakmont Mission and Ramona Industrial Park HRA Mitigated” models include changes to the default CO<sub>2</sub>, NO<sub>2</sub>, and CH<sub>4</sub> intensity factors (see excerpt below) (Appendix B-1, pp. 6, 48, 84, 121, 163, 198, 232, 268; Appendix B-2, pp. 6, 49, 1032).

Table Name	Column Name	Default Value	New Value
tblProjectCharacteristics	CH4IntensityFactor	0.029	0
tblProjectCharacteristics	CO2IntensityFactor	702.44	0
tblProjectCharacteristics	N2OIntensityFactor	0.006	0

As previously mentioned, the CalEEMod User’s Guide requires any changes to model defaults be justified.<sup>3</sup> According to the “User Entered Comments & Non-Default Data” table, the justification provided for these changes is: “Based on SCE 2019 Sustainability Report” (Appendix B-1, pp. 4, 46, 82, 230, 266; Appendix B-2, pp. 4, 47, 1030). However, these changes remain unsupported.

<sup>3</sup> “CalEEMod User’s Guide.” California Air Pollution Control Officers Association (CAPCOA), May 2021, available at: <https://www.agmd.gov/caleemod/user's-guide>, p. 1, 14.

O1-28  
Cont.

O1-29

According to the DEIR, the Project will become operational in 2024 (p. 4.1-30). However, according to Southern California Edison, 100% carbon-free power is not expected to be achieved until the target year of 2045 (see excerpt below).<sup>4</sup>

**Clean Energy Transition**

**GOAL:** Deliver 100% carbon-free power in terms of retail sales to SCE customers by 2045<sup>2</sup>

As such, the reductions of the CO<sub>2</sub>, NO<sub>2</sub>, and CH<sub>4</sub> intensity factors to zero is incorrect. Furthermore, regarding the CO<sub>2</sub> intensity factor, the DEIR states:

“The 2019 Sustainability Report by SCE reported a GHG intensity of 534 pounds of CO<sub>2</sub>e per megawatt-hour delivered to customers” (p. 4.6-23).

As such, the model should have included a CO<sub>2</sub> intensity factor value of 534 pounds per megawatt hour (“lbs/MWh”). Additionally, as the DEIR and associated documents fail to mention or justify the revised CH<sub>4</sub> and NO<sub>2</sub> intensity factors, the model should have left the CH<sub>4</sub> and NO<sub>2</sub> intensity factors as default.

These unsubstantiated reductions present an issue, as CalEEMod uses the CO<sub>2</sub>, NO<sub>2</sub>, and CH<sub>4</sub> intensity factors to calculate the Project’s greenhouse gas (“GHG”) emissions associated with electricity use.<sup>5</sup> Thus, by including unsubstantiated reductions to the default CO<sub>2</sub>, NO<sub>2</sub>, and CH<sub>4</sub> intensity factors, the models may underestimate the Project’s GHG emissions and should not be relied upon to determine Project significance.

*Unsubstantiated Reduction to Acres of Grading Value*

Review of the CalEEMod output files demonstrates that the “Oakmont Mission and Ramona Industrial Park,” “Oakmont Mission and Ramona Industrial Park Mitigated,” “Oakmont Mission and Ramona Industrial Park LST,” “Oakmont Mission and Ramona Industrial Park HRA,” and “Oakmont Mission and

<sup>4</sup> “2020 Sustainability Report.” Southern California Edison, available at:

<https://www.edison.com/content/dam/eix/documents/sustainability/eix-2020-sustainability-report.pdf>, p. 40.

<sup>5</sup> “CalEEMod User’s Guide.” California Air Pollution Control Officers Association (CAPCOA), May 2021, available at: <https://www.agmd.gov/caleemod/user's-guide>, p. 19.

↑  
O1-29  
Cont.  
  
O1-30  
↓

Ramona Industrial Park HRA Mitigated” models include a manual reduction to the default acres of grading value (see excerpt below) (Appendix B-1, pp. 6, 48, 84, 121, 163, 198, 232, 268; Appendix B-2, pp. 6, 49, 1032).

Table Name	Column Name	Default Value	New Value
tblGrading	AcresOfGrading	247.50	112.50

As you can see from the excerpt above, the acres of grading value was reduced by approximately 55%, from the default value of 247.5 to 112.5-acres. As previously mentioned, the CalEEMod User’s Guide requires any changes to model defaults be justified.<sup>6</sup> According to the “User Entered Comments & Non-Default Data” table, the justification provided for this change is: “Cut 139,305 cy, Fill 103,261 cy, Export: 36,042 cy” (Appendix B-1, pp. 5, 47, 83, 231, 267; Appendix B-2, pp. 5, 48, 1031). However, this reduction remains unsupported for two reasons.

First, the justification provided by the “User Entered Comments & Non-Default Data” table only references the amount of required material import and export, not the revised acres of grading value.

Second, the DEIR and associated documents fail to mention the revised acres of grading value or substantiate this reduction whatsoever. This is incorrect, as according to the CalEEMod User’s Guide:

“CalEEMod was also designed to allow the user to change the defaults to reflect site- or project-specific information, when available, provided that the information is supported by substantial evidence as required by CEQA.”<sup>7</sup>

Here, as the DEIR and associated documents fail to provide substantial evidence to support the revised acres of grading value, we cannot verify the change.

This unsubstantiated reduction presents an issue, as CalEEMod uses the acres of grading value to estimate the dust emissions associated with grading.<sup>8</sup> Thus, by including an unsubstantiated reduction to the default acres of grading value, the models may underestimate the Project’s construction-related emissions and should not be relied upon to determine Project significance.

*Underestimated Worker Trip Number*

Review of the CalEEMod output files demonstrates that the “Oakmont Mission and Ramona Industrial Park,” “Oakmont Mission and Ramona Industrial Park Mitigated,” “Oakmont Mission and Ramona Industrial Park LST,” “Oakmont Mission and Ramona Industrial Park HRA,” and “Oakmont Mission and Ramona Industrial Park HRA Mitigated” models include a change to the default worker trip number (see excerpt below) (Appendix B-1, pp. 7, 49, 85, 122, 164, 199, 233, 269; Appendix B-2, pp. 7, 50, 1033).

<sup>6</sup> “CalEEMod User’s Guide.” California Air Pollution Control Officers Association (CAPCOA), May 2021, available at: <https://www.aqmd.gov/caleemod/user's-guide>, p. 1, 14.

<sup>7</sup> “CalEEMod User’s Guide.” California Air Pollution Control Officers Association (CAPCOA), May 2021, available at: <https://www.aqmd.gov/caleemod/user's-guide>, p. 13-14.

<sup>8</sup> “Appendix A Calculation Details for CalEEMod.” California Air Pollution Control Officers Association (CAPCOA), May 2021, available at: <https://www.aqmd.gov/caleemod/user's-guide>, p. 9.

01-30  
Cont.

01-31

Table Name	Column Name	Default Value	New Value
tblTripsAndVMT	WorkerTripNumber	23.00	20.00

As previously mentioned, the CalEEMod User’s Guide requires any changes to model defaults be justified.<sup>9</sup> According to the “User Entered Comments & Non-Default Data” table, the justification provided for this changes is: “CalEEMod defaults. Odd trips rounded up to account for whole round trips.” (Appendix B-1, pp. 5, 47, 83, 231, 267; Appendix B-2, pp. 5, 48, 1031). As such, per the justification, the worker trip number should have been rounded up to 24 to account for round trips. Thus, the above-mentioned worker trip number is underestimated by 4 trips.

This inconsistency presents an issue, as CalEEMod uses the worker trip numbers to estimate the construction-related emissions associated with on-road vehicles.<sup>10</sup> Thus, by including an underestimated worker trip numbers, the models underestimate the Project’s mobile-source construction-related emissions and should not be relied upon to determine Project significance.

#### Updated Analysis Indicates a Potentially Significant Air Quality Impact

In an effort to more accurately estimate Project’s construction-related emissions, we prepared an updated CalEEMod model, using the Project-specific information provided by the DEIR. In our updated model, omitted the unsubstantiated changes to the CH<sub>4</sub> and N<sub>2</sub>O intensity factors and acres of grading value, as well as included the correct architectural coating phase length, CO<sub>2</sub> intensity factor value, and worker trip number.<sup>11</sup>

Our updated analysis estimates that the Project’s construction-related VOC emissions exceed the applicable SCAQMD thresholds of 75 pounds per day (“lbs/day”) (see table below).<sup>12</sup>

SWAPE Criteria Air Pollutant Emissions	
Model	VOC (lbs/day)
DEIR	73.4
SWAPE	<b>142.2</b>
% Increase	94%
SCAQMD Threshold	75
Exceeds?	<b>Yes</b>

As you can see in the excerpt above, the Project’s construction-related VOC emissions, as estimated by SWAPE, increase by approximately 94% and exceed the applicable SCAQMD significance threshold. Thus, our model demonstrates that the Project would result in a potentially significant air quality impact that

<sup>9</sup> “CalEEMod User’s Guide.” CAPCOA, May 2021, available at: [http://www.aqmd.gov/docs/default-source/caleemod/user-guide-2021/01\\_user-39-s-guide2020-4-0.pdf?sfvrsn=6](http://www.aqmd.gov/docs/default-source/caleemod/user-guide-2021/01_user-39-s-guide2020-4-0.pdf?sfvrsn=6), p. 2, 9

<sup>11</sup> See Attachment A for updated modeling.

<sup>12</sup> “South Coast AQMD Air Quality Significance Thresholds.” SCAQMD, April 2019, available at: <http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf>.

O1-31  
Cont.

O1-32

was not previously identified or addressed in the DEIR. As a result, an updated EIR should be prepared to adequately assess and mitigate the potential air quality impacts that the Project may have on the surrounding environment.

↑ O1-32  
Cont.

**Diesel Particulate Matter Health Risk Emissions Inadequately Evaluated**

The DEIR concludes that the proposed Project would result in a less-than-significant health risk impact based on quantified construction and operational health risk analyses (“HRAs”). Specifically, the DEIR estimates that the maximum individual mitigated cancer risk posed to nearby, existing sensitive receptors as a result of Project construction and operation would be 5.5- and 9.2-in one million, respectively (see excerpts below) (p. 4.1-43, Table 4.1-15; p. 4.1-45, Table 4.1-17).

**Table 4.1-15. Construction Health Risk Assessment Results – Mitigated**

Impact Parameter	Units	Project Impact	CEQA Threshold	Level of Significance
Maximum Individual Cancer Risk – Residential	Per Million	5.5	10	Less than Significant
Chronic Hazard Index – Residential	Index Value	0.003	1.0	Less than Significant

Source: SCAQMD 2015.  
Note: CEQA = California Environmental Quality Act.  
See Appendix B-2.

**Table 4.1-17. Operational Health Risk Assessment Results – Mitigated**

Impact Parameter	Units	Impact Level	CEQA Threshold	Level of Significance
Maximum Individual Cancer Risk – Residential	Per Million	9.2	10	Less than Significant
Chronic Hazard Index – Residential	Index Value	0.003	1.0	Less than Significant

Source: SCAQMD 2015.  
Notes: CEQA = California Environmental Quality Act.  
See Appendix B-2.

O1-33

However, the DEIR’s evaluation of the Project’s potential health risk impacts, as well as the less-than-significant impact conclusion, is incorrect for two reasons.

First, the DEIR’s HRAs are incorrect. As indicated by the Health Risk Assessment Outputs (“HRA Outputs”), provided as Appendix B-2 to the DEIR, the HRAs rely upon exhaust PM<sub>10</sub> estimates from a flawed air model (pp. 4). As previously discussed, when we reviewed the Project’s CalEEMod output files, provided in Appendix B-1 and Appendix B-2, we found that several of the values inputted into the model are not consistent with information disclosed in the DEIR. As a result, the HRAs utilize underestimated diesel particulate matter (“DPM”) concentrations to calculate the health risks associated with Project construction and operation. As such, the DEIR’s HRAs underestimates the Project’s cancer risk and should not be relied upon to determine Project significance.

Second, while the DEIR includes two HRAs evaluating the health risk impacts to nearby, existing receptors as a result of Project construction and operation, the DEIR fails to evaluate the combined lifetime cancer risks as a result of Project construction and operation. According to OEHHA guidance, as referenced by the DEIR, “the excess cancer risk is calculated separately for each age grouping and then

summed to yield cancer risk at the receptor location” (p. 4.1-28).<sup>13</sup> However, the DEIR fails to sum the total cancer risks in order to evaluate the combined cancer risk over the course of the Project’s total construction and operation. This is incorrect and, as such, an updated analysis should quantify the entirety of the Project’s construction and operational health risks and then sum them to compare to the SCAQMD threshold of 10 in one million, as referenced by the DEIR (p. 4.1-43).

O1-33  
Cont.

**Failure to Identify a Potentially Significant Health Risk Impact**

As previously described, the DEIR estimates that the maximum individual cancer risk posed to nearby, existing sensitive receptors as a result of Project construction and operation would be 5.5 and 9.2 in one million, respectively, neither of which individually exceed the SCAQMD significance threshold of 10 in one million (p. 4.1-43, Table 4.1-15; p. 4.1-45, Table 4.1-17). However, as previously discussed, the DEIR should have evaluated the combined cancer risk resulting from the Project. In order to correctly evaluate the Project’s health risk impact, we summed the DEIR’s construction-related and operational cancer risk estimates and found that the resulting cancer risk exceeds the SCAQMD threshold of 10 in one million (see table below).

DEIR Cumulative Cancer Risk	
HRA	Cancer Risk (in one million)
Construction	5.5
Operation	9.2
SWAPE	14.7
<b>SCAQMD Threshold</b>	<b>10</b>
<i>Exceeds?</i>	<b>Yes</b>

O1-34

As demonstrated in the table above, the resulting cumulative cancer risk estimate exceeds the SCAQMD threshold of 10 in one million. Thus, the Project poses a potentially significant health risk to nearby existing sensitive receptors, which was not previously identified or addressed by the DEIR. As such, the DEIR is required under CEQA to implement all feasible mitigation to reduce impacts to a less-than-significant level. According to CEQA Guidelines § 15096(g)(2):

“When an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment.”

As you can see, the proposed Project should not be approved until all feasible mitigation has been considered and incorporated where feasible, such as those suggested in the section of this letter titled “Feasible Mitigation Measures Available to Reduce Emissions.” As such, the DEIR fails to identify and

<sup>13</sup> “Guidance Manual for preparation of Health Risk Assessments.” OEHHA, February 2015, available at: <https://oehha.ca.gov/media/downloads/cnr/2015guidancemanual.pdf> p. 8-4

adequately mitigate the Project’s potentially significant health risk impact, and the less-than-significant impact conclusion should not be relied upon.

↑ O1-34  
| Cont.

**Greenhouse Gas**

**Failure to Adequately Evaluate Greenhouse Gas Impacts**

The DEIR estimates that the Project would generate net annual greenhouse gas (“GHG”) emissions of 14,487.37 metric tons of carbon dioxide equivalents per year (“MT CO<sub>2</sub>e/year”), which would exceed the SCAQMD threshold of 3,000 MT CO<sub>2</sub>e/year (see excerpt below) (p. 4.6-28, Table 4.6-4).

**Table 4.6-4. Estimated Annual Operational GHG Emissions – Mitigated**

Emission Source	CO <sub>2</sub>	CH <sub>4</sub>	N <sub>2</sub> O	CO <sub>2</sub> e
	Metric Tons per Year			
Area	0.03	0.00	0.00	0.03
Energy	71.70	0.00	0.00	72.13
Mobile	12,874.47	0.05	1.95	13,455.13
Off-road equipment	147.20	0.01	0.00	147.91
Solid waste	111.51	6.59	0.00	276.26
Water supply and wastewater	330.25	3.10	0.07	429.57
	<b>Total</b>			<b>14,381.03</b>
	<i>Amortized construction emissions</i>			<i>106.34</i>
	<b>Total operational + amortized construction GHGs</b>			<b>14,487.37</b>

Notes: GHG = greenhouse gas; CO<sub>2</sub> = carbon dioxide; CH<sub>4</sub> = methane; N<sub>2</sub>O = nitrous oxide; CO<sub>2</sub>e = carbon dioxide equivalent. See Appendix B-1, Emission Calculations, for complete results. Totals may not sum due to rounding.

O1-35

As a result, the DEIR concludes that the Project would result in a significant-and-unavoidable impact after the implementation of Mitigation Measures (“MM”) GHG-1, GHG-2, and AQ-3 through 7 (p. 4.6-37 – 4.6-38). Specifically, the DEIR states:

“As such, annual mitigated operational GHG emissions with amortized construction emissions would exceed the SCAQMD threshold of 3,000 MT CO<sub>2</sub>e per year. However, with mitigation, emissions from the Project would still exceed the SCAQMD significance threshold and impacts would be significant and unavoidable” (p. 4.6-27).

However, the DEIR’s GHG analysis, as well as the subsequent significant-and-unavoidable impact conclusion, is incorrect for two reasons:

- (1) The DEIR’s GHG analysis relies upon an incorrect and unsubstantiated air model; and
- (2) The DEIR fails to implement all feasible mitigation.

O1-36

**1) Incorrect and Unsubstantiated Quantitative Analysis of Emissions**

As previously stated, the DEIR estimates that the Project would generate net annual GHG emissions of 14,487.37 MT CO<sub>2</sub>e/year (p. 4.6-28, Table 4.6-4). However, the DEIR’s quantitative GHG analysis is unsubstantiated. As previously discussed, when we reviewed the Project’s CalEEMod output files, provided as Appendix B-1 to the DEIR, we found that several of the values inputted into the model are not consistent with information disclosed in the DEIR. As a result, the model underestimates the

O1-37

Project's emissions, and the DEIR's quantitative GHG analysis should not be relied upon to determine Project significance. An updated EIR should be prepared that adequately assesses the potential GHG impacts that construction and operation of the proposed Project may have on the surrounding environment.

↑ O1-37  
Cont.

*2) Failure to Implement All Feasible Mitigation to Reduce GHG Emissions*

As discussed above, the DEIR's GHG analysis relies upon an incorrect and unsubstantiated air model to determine the significance of the Project's GHG emissions. However, despite the DEIR's flawed air model, the DEIR concludes that the proposed Project's GHG emissions would be significant-and-unavoidable (p. 4.6-27). However, while we agree that the Project would result in a significant GHG impact, the DEIR's conclusion that this impact is "significant and unavoidable" is incorrect. As previously stated, according to CEQA Guidelines § 15096(g)(2):

"When an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment."

O1-38

As you can see, an impact can only be labeled as significant-and-unavoidable after all available, feasible mitigation is considered. Here, while the DEIR implements MM GHG-1, GHG-2, and MM AQ-3 through 7, requiring the Project to adhere to water and energy conservation practices, institute a recycling service, use construction equipment with Tier 4 engines, prepare a Transportation Demand Management Program, and provide include EV charging stations, the DEIR fails to implement *all* feasible mitigation (p. 4.6-37 – 4.6-38). Therefore, the DEIR's conclusion that Project's GHG emissions would be significant-and-unavoidable is unsubstantiated. To reduce the Project's GHG impacts to the maximum extent possible, additional feasible mitigation measures should be incorporated, such as those suggested in the section of this letter titled "Feasible Mitigation Measures Available to Reduce Emissions." Thus, the Project should not be approved until an updated EIR is prepared, including updated, accurate air modeling, as well as incorporating all feasible mitigation to reduce emissions to less-than-significant levels.

*Feasible Mitigation Measures Available to Reduce Emissions*

Our analysis demonstrates that the Project would result in potentially significant air quality, health risk, and GHG impacts that should be mitigated further. In an effort to reduce the Project's emissions, we identified several mitigation measures that are applicable to the proposed Project. Feasible mitigation measures can be found in the Department of Justice Warehouse Project Best Practices document.<sup>14</sup> Therefore, to reduce the Project's emissions, consideration of the following measures should be made:

O1-39

- Prohibiting off-road diesel-powered equipment from being in the "on" position for more than 10 hours per day.
- Requiring on-road heavy-duty haul trucks to be model year 2010 or newer if diesel-fueled.

↑ O1-40  
↑ O1-41

<sup>14</sup> "Warehouse Projects: Best Practices and Mitigation Measures to Comply with the California Environmental Quality Act." State of California Department of Justice.

## Appendix B - Comment Letters

- Providing electrical hook ups to the power grid, rather than use of diesel-fueled generators, for electric construction tools, such as saws, drills and compressors, and using electric tools whenever feasible. | O1-42
- Limiting the amount of daily grading disturbance area. | O1-43
- Prohibiting grading on days with an Air Quality Index forecast of greater than 100 for particulates or ozone for the project area. | O1-44
- Keeping onsite and furnishing to the lead agency or other regulators upon request, all equipment maintenance records and data sheets, including design specifications and emission control tier classifications. | O1-45
- Conducting an on-site inspection to verify compliance with construction mitigation and to identify other opportunities to further reduce construction impacts. | O1-46
- Using paints, architectural coatings, and industrial maintenance coatings that have volatile organic compound levels of less than 10 g/L. | O1-47
- Providing meal options onsite or shuttles between the facility and nearby meal destinations for construction employees. | O1-48
- Requiring that all facility-owned and operated fleet equipment with a gross vehicle weight rating greater than 14,000 pounds accessing the site meet or exceed 2010 model-year emissions equivalent engine standards as currently defined in California Code of Regulations Title 13, Division 3, Chapter 1, Article 4.5, Section 2025. Facility operators shall maintain records on-site demonstrating compliance with this requirement and shall make records available for inspection by the local jurisdiction, air district, and state upon request. | O1-49
- Requiring all heavy-duty vehicles entering or operated on the project site to be zero-emission beginning in 2030. | O1-50
- Installing and maintaining, at the manufacturer's recommended maintenance intervals, air filtration systems at sensitive receptors within a certain radius of facility for the life of the project. | O1-51
- Installing and maintaining, at the manufacturer's recommended maintenance intervals, an air monitoring station proximate to sensitive receptors and the facility for the life of the project, and making the resulting data publicly available in real time. While air monitoring does not mitigate the air quality or greenhouse gas impacts of a facility, it nonetheless benefits the affected community by providing information that can be used to improve air quality or avoid exposure to unhealthy air. | O1-52
- Constructing electric truck charging stations proportional to the number of dock doors at the project. | O1-53
- Requiring all stand-by emergency generators to be powered by a non-diesel fuel. | O1-54
- Requiring facility operators to train managers and employees on efficient scheduling and load management to eliminate unnecessary queuing and idling of trucks. | O1-55
- Achieving certification of compliance with LEED green building standards. | O1-56
- Providing meal options onsite or shuttles between the facility and nearby meal destinations. | O1-57
- Posting signs at every truck exit driveway providing directional information to the truck route. | O1-58

## Appendix B - Comment Letters

- Improving and maintaining vegetation and tree canopy for residents in and around the project area.
- Requiring that every tenant train its staff in charge of keeping vehicle records in diesel technologies and compliance with CARB regulations, by attending CARB approved courses. Also require facility operators to maintain records on-site demonstrating compliance and make records available for inspection by the local jurisdiction, air district, and state upon request.
- Requiring tenants to enroll in the United States Environmental Protection Agency's SmartWay program, and requiring tenants to use carriers that are SmartWay carriers.

O1-59

O1-60

O1-61

These measures offer a cost-effective, feasible way to incorporate lower-emitting design features into the proposed Project, which subsequently, reduce emissions released during Project construction and operation. An updated EIR should be prepared to include all feasible mitigation measures, as well as include updated air quality, health risk, and GHG analyses to ensure that the necessary mitigation measures are implemented to reduce emissions to below thresholds. The updated EIR should also demonstrate a commitment to the implementation of these measures prior to Project approval, to ensure that the Project's significant emissions are reduced to the maximum extent possible.

O1-62

### Disclaimer

SWAPE has received limited discovery regarding this project. Additional information may become available in the future; thus, we retain the right to revise or amend this report when additional information becomes available. Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable environmental consultants practicing in this or similar localities at the time of service. No other warranty, expressed or implied, is made as to the scope of work, work methodologies and protocols, site conditions, analytical testing results, and findings presented. This report reflects efforts which were limited to information that was reasonably accessible at the time of the work, and may contain informational gaps, inconsistencies, or otherwise be incomplete due to the unavailability or uncertainty of information obtained or provided by third parties.

## **Matthew F. Hagemann, P.G., C.Hg., QSD, QSP**

**Geologic and Hydrogeologic Characterization  
Investigation and Remediation Strategies  
Litigation Support and Testifying Expert  
Industrial Stormwater Compliance  
CEQA Review**

### **Education:**

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

### **Professional Certifications:**

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

### **Professional Experience:**

Matt has 30 years of experience in environmental policy, contaminant assessment and remediation, stormwater compliance, and CEQA review. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) and directed efforts to improve hydrogeologic characterization and water quality monitoring. For the past 15 years, as a founding partner with SWAPE, Matt has developed extensive client relationships and has managed complex projects that include consultation as an expert witness and a regulatory specialist, and a manager of projects ranging from industrial stormwater compliance to CEQA review of impacts from hazardous waste, air quality and greenhouse gas emissions.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014, 2017;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

## Appendix B - Comment Letters

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

### **Senior Regulatory and Litigation Support Analyst:**

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 300 environmental impact reports and negative declarations since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at more than 100 industrial facilities.
- Expert witness on numerous cases including, for example, perfluorooctanoic acid (PFOA) contamination of groundwater, MTBE litigation, air toxins at hazards at a school, CERCLA compliance in assessment and remediation, and industrial stormwater contamination.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

## Appendix B - Comment Letters

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.
- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

### **Executive Director:**

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

### **Hydrogeology:**

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted

## Appendix B - Comment Letters

public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nationwide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

### **Policy:**

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9.

Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific

## Appendix B - Comment Letters

principles into the policy-making process.

- Established national protocol for the peer review of scientific documents.

### **Geology:**

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

### **Teaching:**

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt is currently a part time geology instructor at Golden West College in Huntington Beach, California where he taught from 2010 to 2014 and in 2017.

### **Invited Testimony, Reports, Papers and Presentations:**

**Hagemann, M.F.**, 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

**Hagemann, M.F.**, 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

**Hagemann, M.F.**, 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Colorado.

**Hagemann, M.F.**, 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

## Appendix B - Comment Letters

**Hagemann, M.F.**, 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

**Hagemann, M.F.**, 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

**Hagemann, M.F.**, 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

**Hagemann, M.F.**, 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

**Hagemann, M.F.**, 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal representatives, Parker, AZ.

**Hagemann, M.F.**, 2003. Impact of Perchlorate on the Colorado River and Associated Drinking Water Supplies. Invited presentation to the Inter-Tribal Meeting, Torres Martinez Tribe.

**Hagemann, M.F.**, 2003. The Emergence of Perchlorate as a Widespread Drinking Water Contaminant. Invited presentation to the U.S. EPA Region 9.

**Hagemann, M.F.**, 2003. A Deductive Approach to the Assessment of Perchlorate Contamination. Invited presentation to the California Assembly Natural Resources Committee.

**Hagemann, M.F.**, 2003. Perchlorate: A Cold War Legacy in Drinking Water. Presentation to a meeting of the National Groundwater Association.

## ***Paul Rosenfeld, Ph.D.***

*Principal Environmental Chemist*

**Chemical Fate and Transport & Air Dispersion Modeling**

**Risk Assessment & Remediation Specialist**

### **Education**

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

### **Professional Experience**

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, industrial, military and agricultural sources, unconventional oil drilling operations, and locomotive and construction engines. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities. Dr. Rosenfeld has also successfully modeled exposure to contaminants distributed by water systems and via vapor intrusion.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, creosote, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at sites and has testified as an expert witness on numerous cases involving exposure to soil, water and air contaminants from industrial, railroad, agricultural, and military sources.

## **Professional History:**

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner  
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)  
UCLA School of Public Health; 2003 to 2006; Adjunct Professor  
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator  
UCLA Institute of the Environment, 2001-2002; Research Associate  
Komex H<sub>2</sub>O Science, 2001 to 2003; Senior Remediation Scientist  
National Groundwater Association, 2002-2004; Lecturer  
San Diego State University, 1999-2001; Adjunct Professor  
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager  
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager  
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor  
King County, Seattle, 1996 – 1999; Scientist  
James River Corp., Washington, 1995-96; Scientist  
Big Creek Lumber, Davenport, California, 1995; Scientist  
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist  
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

### **Teaching Experience:**

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

### **Academic Grants Awarded:**

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

## Appendix B - Comment Letters

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Members of the City of Montclair City Council  
Members of the City of Montclair Planning Commission

Re: Mission Boulevard and Ramona Avenue Business Park Project (SCH No. 2021010005)

Dear Members of the City of Montclair City Council and Planning Commission:

On behalf of the Golden State Environmental Justice Alliance (“GSEJA”), I am writing to you regarding the Mission Boulevard and Ramona Avenue Business Park Project (“Project”).

GSEJA is withdrawing its comment letter and opposition to the Project. The Project’s developer has addressed GSEJA’s concerns about environmental mitigation.

O2-1

O2-1

Sincerely,

Joe Bourgeois  
Executive Director

RE: Draft Environmental Impact Report for The Mission Boulevard and Ramona Avenue Business Park Project (SCH No. 2021010005).

Dear Michael Diaz,

On behalf of Southwest Regional Council of Carpenters (“**SWRCC**” or “**Southwest Carpenters**”) my Office is submitting these comments on the City of Montclair (“**City**” or “**Lead Agency**”) Draft Environmental Impact Report (“**DEIR**”) (SCH No. 2021010005) for the Mission Boulevard and Ramona Avenue Business Park Project (“**Project**”).

The Southwest Carpenters is a labor union representing more than 50,000 union carpenters in six states and has a strong interest in well ordered land use planning and addressing the environmental impacts of development projects.

Individual members of the Southwest Carpenters live, work and recreate in the City and surrounding communities and would be directly affected by the Project’s environmental impacts.

The Southwest Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearings and proceedings related to this Project. Cal. Gov. Code § 65009(b); Cal. Pub. Res. Code § 21177(a); *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal. App. 4th 1184, 1199-1203; see *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal. App. 4th 1109, 1121.

SWRCC incorporates by reference all comments raising issues regarding the EIR submitted prior to certification of the EIR for the Project. *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal. App. 4th 173, 191 (finding that any party who has objected

Page 2 of 5

to the Project’s environmental documentation may assert any issue timely raised by other parties).

Moreover, SWRCC requests that the Lead Agency provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (“**CEQA**”), Cal Public Resources Code (“**PRC**”) § 21000 *et seq*, and the California Planning and Zoning Law (“**Planning and Zoning Law**”), Cal. Gov’t Code §§ 65000–65010. California Public Resources Code Sections 21092.2, and 21167(f) and Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency’s governing body.

The City should require the Applicant provide additional community benefits such as requiring local hire and use of a skilled and trained workforce to build the Project. The City should require the use of workers who have graduated from a Joint Labor Management apprenticeship training program approved by the State of California, or have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state approved apprenticeship training program or who are registered apprentices in an apprenticeship training program approved by the State of California.

Community benefits such as local hire and skilled and trained workforce requirements can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project Site can reduce the length of vendor trips, reduce greenhouse gas emissions and providing localized economic benefits. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project Site can reduce the length of vendor trips, reduce greenhouse gas emissions and providing localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Skilled and trained workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the UC Berkeley Center for Labor Research and Education concluded:

. . . labor should be considered an investment rather than a cost – and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well trained workers are key to delivering emissions reductions and moving California closer to its climate targets.<sup>1</sup>

Recently, on May 7, 2021, the South Coast Air Quality Management District found that the “[u]se of a local state-certified apprenticeship program or a skilled and trained workforce with a local hire component” can result in air pollutant reduction<sup>2</sup>

Cities are increasingly adopting local skilled and trained workforce policies and requirements into general plans and municipal codes. For example, the City of Hayward 2040 General Plan requires the City to “promote local hiring . . . to help achieve a more positive jobs-housing balance, and reduce regional commuting, gas consumption, and greenhouse gas emissions.”<sup>3</sup>

In fact, the City of Hayward has gone as far as to adopt a Skilled Labor Force policy into its Downtown Specific Plan and municipal code, requiring developments in its Downtown area to requiring that the City “[c]ontribute to the stabilization of regional construction markets by spurring applicants of housing and nonresidential developments to require contractors to utilize apprentices from state-approved, joint

Cont.

labor-management training programs, . . .”<sup>4</sup> In addition, the City of Hayward requires all projects 30,000 square feet or larger to “utilize apprentices from state-approved, joint labor-management training programs.”<sup>5</sup>

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.<sup>6</sup>

In addition, local hire mandates as well as skill training are critical facets of a strategy to reduce vehicle miles traveled. As planning experts Robert Cervero and Michael Duncan noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions since the skill requirements of available local jobs must be matched to those held by local residents.<sup>7</sup> Some municipalities have tied local hire and skilled and trained workforce policies to local development permits to address transportation issues. As Cervero and Duncan note:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing.” The city’s First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about

negotiating corporate participation in First Source as a condition of approval for development permits.

The City should consider utilizing skilled and trained workforce policies and requirements to benefit the local area economically and mitigate greenhouse gas, air quality and transportation impacts.

If the City has any questions or concerns, feel free to contact my Office.

Sincerely,

Mitchell M. Tsai

**Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling**

---

Dear Mr. Tsai,

Soil Water Air Protection Enterprise (“SWAPE”) is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas (“GHG”) emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

### Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model (“CalEEMod”) is a “statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects.”<sup>1</sup> CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.<sup>2</sup>

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.<sup>3</sup>

---

<sup>2</sup> “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

<sup>3</sup> “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: [http://www.aqmd.gov/docs/default-source/caleemod/01\\_user-39-s-guide2016-3-2\\_15november2017.pdf?sfvrsn=4](http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4), p. 34.

O3-6

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.<sup>4</sup>

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$VMT_d = \sum (Average\ Daily\ Trip\ Rate_i * Average\ Overall\ Trip\ Length_i)_n$$

Where:

n = Number of land uses being modeled.”<sup>5</sup>

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$Emissions_{pollutant} = VMT * EF_{running,pollutant}$$

Where:

Emissions<sub>pollutant</sub> = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

EF<sub>running,pollutant</sub> = emission factor for running emissions.”<sup>6</sup>

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

### Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.<sup>7</sup> In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.<sup>8</sup> The default number of construction-related worker trips is calculated by multiplying the

## Appendix B - Comment Letters

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.<sup>9</sup> Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.<sup>10</sup> Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.<sup>11</sup> The operational home-to-work vehicle trip lengths are:

“[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).<sup>12</sup>

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).<sup>13</sup>

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8

<sup>12</sup> “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: [http://www.aqmd.gov/docs/default-source/caleemod/02\\_appendix-a2016-3-2.pdf?sfvrsn=6](http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6), p. 21.

<sup>13</sup> “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: [http://www.aqmd.gov/docs/default-source/caleemod/05\\_appendix-d2016-3-2.pdf?sfvrsn=4](http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4), p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8-miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7-miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

O3-7  
Cont.

**Practical Application of a Local Hire Requirement and Associated Impact**

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.<sup>14</sup> In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

<b>Local Hire Provision Net Change</b>	
<b>Without Local Hire Provision</b>	
Total Construction GHG Emissions (MT CO <sub>2</sub> e)	3,623
Amortized Construction GHG Emissions (MT CO <sub>2</sub> e/year)	120.77
<b>With Local Hire Provision</b>	
Total Construction GHG Emissions (MT CO <sub>2</sub> e)	3,024
Amortized Construction GHG Emissions (MT CO <sub>2</sub> e/year)	100.80
<b>% Decrease in Construction-related GHG Emissions</b>	<b>17%</b>

O3-8

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

**1.3 User Entered Comments & Non-Default Data**

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

### 3.0 Construction Detail

#### Construction Phase

Phase Number	Phase Name	Phase Type	Start Date	End Date	Num Days Week	Num Days	Phase Description
1	Demolition	Demolition	9/1/2021	10/12/2021	5	30	
2	Site Preparation	Site Preparation	10/13/2021	11/9/2021	5	20	
3	Grading	Grading	11/10/2021	1/11/2022	5	45	
4	Building Construction	Building Construction	1/12/2022	12/12/2023	5	500	
5	Paving	Paving	12/13/2023	1/30/2024	5	35	
6	Architectural Coating	Architectural Coating	1/31/2024	3/19/2024	5	35	

Acres of Grading (Site Preparation Phase): 0

Acres of Grading (Grading Phase): 112.5

Acres of Paving: 0

Residential Indoor: 2,025,000; Residential Outdoor: 675,000; Non-Residential Indoor: 326,400; Non-Residential Outdoor: 108,800; Striped Parking Area: 0 (Architectural Coating – sqft)

#### OffRoad Equipment

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Phase Name	Offroad Equipment Type	Amount	Usage Hours	Horse Power	Load Factor
Demolition	Concrete/Industrial Saws	1	8.00	81	0.73
Demolition	Excavators	3	8.00	158	0.38
Demolition	Rubber Tired Dozers	2	8.00	247	0.40
Site Preparation	Rubber Tired Dozers	3	8.00	247	0.40
Site Preparation	Tractors/Loaders/Backhoes	4	8.00	97	0.37
Grading	Excavators	2	8.00	158	0.38
Grading	Graders	1	8.00	187	0.41
Grading	Rubber Tired Dozers	1	8.00	247	0.40
Grading	Scrapers	2	8.00	367	0.48
Grading	Tractors/Loaders/Backhoes	2	8.00	97	0.37
Building Construction	Cranes	1	7.00	231	0.29
Building Construction	Forklifts	3	8.00	89	0.20
Building Construction	Generator Sets	1	8.00	84	0.74
Building Construction	Tractors/Loaders/Backhoes	3	7.00	97	0.37
Building Construction	Welders	1	8.00	46	0.45
Paving	Pavers	2	8.00	130	0.42
Paving	Paving Equipment	2	8.00	132	0.36
Paving	Rollers	2	8.00	80	0.38
Architectural Coating	Air Compressors	1	6.00	78	0.48

Trips and VMT

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

**1.3 User Entered Comments & Non-Default Data**

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

### 3.0 Construction Detail

#### Construction Phase

Phase Number	Phase Name	Phase Type	Start Date	End Date	Num Days Week	Num Days	Phase Description
1	Demolition	Demolition	9/1/2021	10/12/2021	5	30	
2	Site Preparation	Site Preparation	10/13/2021	11/9/2021	5	20	
3	Grading	Grading	11/10/2021	1/11/2022	5	45	
4	Building Construction	Building Construction	1/12/2022	12/12/2023	5	500	
5	Paving	Paving	12/13/2023	1/30/2024	5	35	
6	Architectural Coating	Architectural Coating	1/31/2024	3/19/2024	5	35	

Acres of Grading (Site Preparation Phase): 0

Acres of Grading (Grading Phase): 112.5

Acres of Paving: 0

Residential Indoor: 2,025,000; Residential Outdoor: 675,000; Non-Residential Indoor: 326,400; Non-Residential Outdoor: 108,800; Striped Parking Area: 0 (Architectural Coating – sqft)

#### OffRoad Equipment

## Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Phase Name	Offroad Equipment Type	Amount	Usage Hours	Horse Power	Load Factor
Demolition	Concrete/Industrial Saws	1	8.00	81	0.73
Demolition	Excavators	3	8.00	158	0.38
Demolition	Rubber Tired Dozers	2	8.00	247	0.40
Site Preparation	Rubber Tired Dozers	3	8.00	247	0.40
Site Preparation	Tractors/Loaders/Backhoes	4	8.00	97	0.37
Grading	Excavators	2	8.00	158	0.38
Grading	Graders	1	8.00	187	0.41
Grading	Rubber Tired Dozers	1	8.00	247	0.40
Grading	Scrapers	2	8.00	367	0.48
Grading	Tractors/Loaders/Backhoes	2	8.00	97	0.37
Building Construction	Cranes	1	7.00	231	0.29
Building Construction	Forklifts	3	8.00	89	0.20
Building Construction	Generator Sets	1	8.00	84	0.74
Building Construction	Tractors/Loaders/Backhoes	3	7.00	97	0.37
Building Construction	Welders	1	8.00	46	0.45
Paving	Pavers	2	8.00	130	0.42
Paving	Paving Equipment	2	8.00	132	0.36
Paving	Rollers	2	8.00	80	0.38
Architectural Coating	Air Compressors	1	6.00	78	0.48

**Trips and VMT**

**1.3 User Entered Comments & Non-Default Data**

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

**1.3 User Entered Comments & Non-Default Data**

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

**1.3 User Entered Comments & Non-Default Data**

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

**EXHIBIT B**

## ***Paul Rosenfeld, Ph.D.***

*Principal Environmental Chemist*

**Chemical Fate and Transport & Air Dispersion Modeling**

**Risk Assessment & Remediation Specialist**

### **Education**

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

### **Professional Experience**

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

## **Professional History:**

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner  
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)  
UCLA School of Public Health; 2003 to 2006; Adjunct Professor  
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator  
UCLA Institute of the Environment, 2001-2002; Research Associate  
Komex H<sub>2</sub>O Science, 2001 to 2003; Senior Remediation Scientist  
National Groundwater Association, 2002-2004; Lecturer  
San Diego State University, 1999-2001; Adjunct Professor  
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager  
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager  
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor  
King County, Seattle, 1996 – 1999; Scientist  
James River Corp., Washington, 1995-96; Scientist  
Big Creek Lumber, Davenport, California, 1995; Scientist  
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist  
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

**Rosenfeld, P.E.,** C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

### **Teaching Experience:**

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

### **Academic Grants Awarded:**

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

**Deposition and/or Trial Testimony:**

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS “Conti Perdido”  
*Defendant*.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112<sup>th</sup> Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosiences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

## Appendix B - Comment Letters

- In The Superior Court of the State of Washington, County of Snohomish  
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants  
Case No.: No. 13-2-03987-5  
Rosenfeld Deposition, February 2017  
Trial, March 2017
- In The Superior Court of the State of California, County of Alameda  
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants  
Case No.: RG14711115  
Rosenfeld Deposition, September 2015
- In The Iowa District Court In And For Poweshiek County  
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants  
Case No.: LALA002187  
Rosenfeld Deposition, August 2015
- In The Iowa District Court For Wapello County  
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants  
Law No.: LALA105144 - Division A  
Rosenfeld Deposition, August 2015
- In The Iowa District Court For Wapello County  
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants  
Law No.: LALA105144 - Division A  
Rosenfeld Deposition, August 2015
- In The Circuit Court of Ohio County, West Virginia  
Robert Andrews, et al. v. Antero, et al.  
Civil Action NO. 14-C-30000  
Rosenfeld Deposition, June 2015
- In The Third Judicial District County of Dona Ana, New Mexico  
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward  
DeRuyter, Defendants  
Rosenfeld Deposition: July 2015
- In The Iowa District Court For Muscatine County  
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant  
Case No 4980  
Rosenfeld Deposition: May 2015
- In the Circuit Court of the 17<sup>th</sup> Judicial Circuit, in and For Broward County, Florida  
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.  
Case Number CACE07030358 (26)  
Rosenfeld Deposition: December 2014
- In the United States District Court Western District of Oklahoma  
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City  
Landfill, et al. Defendants.  
Case No. 5:12-cv-01152-C  
Rosenfeld Deposition: July 2014

## Appendix B - Comment Letters

In the County Court of Dallas County Texas

Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.

Case Number cc-11-01650-E

Rosenfeld Deposition: March and September 2013

Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio

John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*

Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)

Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division

Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.

Case 3:10-cv-00622

Rosenfeld Deposition: February 2012

Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland

Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants

Case Number: 03-C-12-012487 OT

Rosenfeld Deposition: September 2013

**Geologic and Hydrogeologic Characterization  
Industrial Stormwater Compliance  
Investigation and Remediation Strategies  
Litigation Support and Testifying Expert  
CEQA Review**

**Education:**

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

**Professional Certifications:**

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

**Professional Experience:**

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

## Appendix B - Comment Letters

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

### **Senior Regulatory and Litigation Support Analyst:**

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

## Appendix B - Comment Letters

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

## Appendix B - Comment Letters

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

### **Executive Director:**

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

### **Hydrogeology:**

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

## Appendix B - Comment Letters

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

### **Policy:**

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

### Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

### Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

### Invited Testimony, Reports, Papers and Presentations:

**Hagemann, M.F.**, 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

**Hagemann, M.F.**, 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

**Hagemann, M.F.**, 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Colorado.

**Hagemann, M.F.**, 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

**Hagemann, M.F.**, 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

RE: Draft Environmental Impact Report for The Mission Boulevard and Ramona Avenue Business Park Project (SCH No. 2021010005).

Dear Michael Diaz,

On behalf of Southwest Regional Council of Carpenters (“**SWRCC**” or “**Southwest Carpenters**”) my Office is submitting these comments on the City of Montclair (“**City**” or “**Lead Agency**”) Draft Environmental Impact Report (“**DEIR**”) (SCH No. 2021010005) for the Mission Boulevard and Ramona Avenue Business Park Project (“**Project**”).

The Southwest Carpenters would like to express their support for this Project and withdraw their prior February 24, 2022 comment letter. After received clarification and further information about this Project, SWRCC believes that this Project will benefit the environment and the local economy by utilizing a local skilled and trained workforce and will be built utilizing protocols that will protect worker health and safety.

If the City has any questions or concerns, feel free to contact my Office.

Sincerely,

Mitchell M. Tsai  
Attorneys for the Southwest  
Regional Council of Carpenters
